BANK RECRUITMENT

PROBATIONARY OFFICERS/CLERKS

"Specialised Training in NSB Regular/Correspondence Courses has proved to be the guaranteed way to secure jobs in Banks as Probationary Officers & Clerks."

-says Editor, Citylight, Bombay.

If you have applied to State Bank of India or any Nationalised Bank Boards, for PO or Clerical Post, join our Course now.

Banking: A Rewarding Career:

Nearly 2500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. Any graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And, after nationalisation, Bank jobs have acquired a new status because now the Banks have taken upon themselves the responsibility of building a better India. Today, in our Banks, our social ideals find a dynamic expression. Bank jobs, therefore, offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects: (1) Reasoning (verbal, logical, non-verbal) (2) Quantitative Aptitude (3) General Awareness and Current Affairs (4) English Comprehension (5) Essays, letters, precis writing are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old, but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, FICCI as Officers. The subjects, syllabus, pattern of tests and examining body (NIBM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success oriented students join the Course well in advance of the test and benefit by our step by step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers/Clerks are declared at intervals of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants, 2300 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A provenly competent, specialised and thorough coaching becomes a MUST.

NSB's Faith in Specialisation:

National School of Banking head-quartered at Bombay was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams - of POs and Clerks. It has grown rapidly and is now the largest pre-recruitment training institute in the country. Our continuous research and on-going study of objective and descriptive exam question papers have contributed to our present pre-eminence as the central institute for BANK RECRUITMENT training.

JOIN NOW AND PREPARE FOR A RICH AND REWARDING CAREER. For details of vacancies, application forms and our special courses, write today with Rs 2/- P.O. or M.O. to

Double Standards

Apropos Poland: Current Events (Dec '82). It is essential to see certain developments in their right perspective.

While it is debatable whether the Polish Government, acting in the interests of its country's economy, was justified in banning the independent trade union, Solidarity, and imposing martial law, the hue and cry raised by the Western nations hardly passes muster in the light of their inglorious voting record in the UN when it comes to condemning the atrocities committed by Israel and racist South Africa.

Were these nations able to prevent Israel from invading Lebanon in June or succeed in curbing Menachem Begin's unilateral aggression against Syria (annexation of Golan Heights) and Iraq (destroying its nuclear installation)?

Have they done anything to secure the independence of Namibia from the racist regime of South Africa, which is insisting on untenable conditions to end its unjustifiable occupation?

Further, the massive aid doled out by the US to the military regime of El Salvador and Pakistan is there for all to see. Are these regimes, by any standards, democratic?

As long as these Western nations adopt a policy of convenient silence, motivated by materialistic ends, on the violations of international law and shuffling of the rights of the people of other nations by Israel and South Africa, they cannot have any moral right to impose economic sanctions on Poland.

**1. Anindita Nagaswaran, Madurai
Best Letter: Rs 40**

Give It A Chance

While respecting the public opinion voiced against our present educational system (*Debate Results: Dec '82*), I would like to point out that the efficacy or otherwise of any system largely depends on how well it is implemented. The present system could prove its usefulness with a couple of amendments. I suggest the following measures: abolish student union elections—the union should be dominated by the teaching staff with adequate student representation; exams should be conducted under police supervision to avoid mass copying; valuation of answer books should be centralised and candidates given free access to the answer books after the results are announced.

**Vishwaroop Shukla, Raipur
Prize-winning Letter: Rs 25**

a balanced picture of the country and its progress. In the period 1913–1970 the USSR recorded an 80-fold increase in industrial production compared to eight fold in the US, five-fold in FRG, three-fold in Britain and 3.1-fold in France. And today, what the USSR is producing is comparable to the combined industrial output of Britain, France, Canada, Belgium, Holland and Japan.

Prabhas Vasal, Rajasthan

Delaying Tactics

I want to direct your attention to the statement (Assam issue, *Current Events*, Dec '82) that the opposition parties should rise above narrow and petty political considerations to help the government tide over the present crisis in Assam. The government, sir, is no less responsible for the continuing stalemate. Their policy of waiting for time to take care of the issue only helps to prolong matters and could well lead to violence in the state, as in

Punjab. It is not only the opposition parties but the students and the government alike who have to rise above selfish interests and find a solution.

Dinesh Ranjan, Patna

Two Extremes

The two *Focus* articles, *Economy: In A Recession* and *RBI Report: Optimistic?* (Dec '82) presented two extreme sides of the situation—the former predicting a "dead-end" for the economy in the near future and the latter trying to negate it. Recession and inflation in the country have been artificially created because of the government's wrong policies with regard to industry and finance.

Sanjay S. Shanbhag, North Kanara

Just One Point

With reference to the item on Akali agitation in *Current Events* (Dec '82), one of the associates of Sant Elindranwale was wrongly mentioned as Amar Singh instead of Amrik Singh.

Amar Kumar, New Delhi

Apropos the joint USSR-India space flight (*News In Brief: Last Quarter*, Dec '82), R. Malhotra is a Wing Commander and not a Squadron Leader. Again, in the *Forthcoming Exams* (Dec '82) the age limit for RBI Officers (Grade 'B') exam should have been 21–28 and not 21–26 years.

Ish Kumar Srivastava, Varanasi

Regarding *News In Brief: Last Quarter*, I.L. Latif was wrongly mentioned as the Governor of Bombay. He is the Governor of Maharashtra, of which Bombay is the capital.

Vikrant V. Jushi, Bombay

Harmony At Any Cost

With reference to the Akali agitation (*Current Events*, Dec '82), the Akali Dal should refrain from doing anything which can be harmful to India's harmony and integrity. And the Centre, in its turn, should take every step to find an early solution. It should remember that walking on the moon or orbiting the earth in spaceships or staging of mammoth games will not save us from disaster if such agitations spread.

Minal Kant Ghosal, Calcutta

The Akali agitation is rooted not so much in religion or Sikh solidarity as much as in the Akalis' desire for power. Their extremist activities in the name of religion should be condemned and the Centre praised for its concrete stand on the issue.

V.V. Deshmukh, Aurangabad

A Balanced Picture

Know The World USSR (Dec '82) gave

WIN A PRIZE

Do our articles provoke you to say something? Is there anything else you feel strongly about? Here's your chance to say it and make some money in the bargain. The best letter will win Rs 40, the second Rs 25.

So why don't you start writing? Your letters should be typed, written on one side of the paper, and sent to: **Letters to the Editor, Focus, 10, Park Road, New Delhi 110017.**

Hello folks...

It was exam time. The annuals were being held in a university in western UP. Since it had been alleged that unfair means were widely used during exams, the university authorities requested the district police to help in preventing this. Those who would have 'benefited' from the 'open' exam system were naturally annoyed. A disgusted student 'leader' openly warned the police to withdraw itself from the university, failing which "the students would be compelled to resort to direct action". From next day onwards the police was absent from the scene and it was a free for all.

When results were declared the students were greatly disappointed, for the marks were much below their expectations. They decided to go to the university in a procession and *gherao* the Vice-Chancellor. Their case was that the marks had been deliberately downgraded. "How can we get such low marks when we have copied from books written by university professors?" they argued. An outright increase of 25 per cent was demanded. After a few hours of slogan shouting their demand was accepted.

This incident took place a few years back. However, it is not an isolated case. Most of the universities in India today are facing similar situations. Each year there are cases of question papers being leaked out, hostels found inhabited by criminals, students shot dead or stabbed and certain well-connected students getting favoured admission

or marking. Strikes by teachers and students are becoming a regular phenomenon. Isn't all this converting our universities—institutions meant to lead the youth from "darkness to light"—into centres of "darkness"?

An inquisitive academician wanted to find out how serious the universities were in imparting education and the students in receiving instructions. He initiated a research study in a prestigious Delhi University campus college. The study was conducted during the period 1973 to 1976. The report, recently published, has brought to light some alarming facts which should urge all of us, particularly parents and students, to do some serious thinking on the problem.

The main findings of the study are:

- Every teacher was supposed to take 540 classes during a year. However, the classes taken by a teacher ranged between 100 and 132. The cost of a lecture (calculated at minimum salary plus other benefits and amenities enjoyed by teachers), if all the 540 lectures had been delivered, would have been slightly more than Rs 40. However, since only 116 lectures were actually delivered (average of 100 and 132), one lecture cost approximately Rs 175. The actual cost of a lecture is much higher as a lot of the college teachers earn higher salaries.
- The performance of students deteriorated during their college years. It was found that out of the total students, 54 per cent joined college with over 60 per cent marks in their higher secondary exams. However, only 22 per cent could maintain their record while the remaining 78 per cent showed deterioration. The wastage rate was much higher in the social sciences group where 46 per cent of those who joined college had above 60 per cent marks at the higher secondary level. Only one per cent could maintain that percentage at the university level.
- The college building constructed with public money and costing millions of rupees, was heavily

under utilised—just 600 hours in a year.

These are also true of most educational institutions. All this should compel us to think about who is responsible for this state of affairs and who ultimately suffers. We feel parents and students should be more responsible. It is the parents who pay for the education in the form of either fees or taxes. Students suffer if the education is inadequate or improper. Both, unfortunately, do not realise their responsibility because education is not very expensive in India.

A question which should arise in the mind of every parent and student is: Do our universities prepare students for the job market? In the highly competitive market today, jobs are scarce and competition tough. The person who wants to be selected for a good position has to be head and shoulders above others. A student, who, during his stay in the college or the university, does not try to broaden his knowledge, develop his thinking, improve his expression, written or spoken, stands a very small chance of being selected in any competition or interview. The reason why a handful of excellent institutions are much in demand is that they are able to provide good education which enables their students to secure profitable jobs.

In fact, the situation in educational institutions has deteriorated to such an extent that if efforts are not made now to set things right, it would probably be too late. The initiative should come from the students themselves, who must demand their right to be educated properly, effectively and comprehensively. Only then can they think of a bright future and a satisfying career.

Shouldn't you think on these lines for a better future?

FOCUS

PUNJAB

ATROUBLED STATE

BY SAVITA PANT & G.N. DHAR

The seeds for a separate state for the Sikhs were laid during partition, when Master Tara Singh had demanded a buffer state between India and Pakistan. The idea failed to gain any mass support and consequently died down. Tara Singh then decided to change his tactics by raising the slogan of 'Punjabi Suba'. After the princely states adjoining Punjab were formally absorbed in the state, Sant Fateh Singh identified the slogan of 'Punjabi Suba' with the Punjabi-speaking people. It met with limited success—the state was reorganised in 1966. It was divided into two: Punjab comprising predominantly Punjabi-speaking areas; and Haryana made up of Hindi-speaking districts and tehsils. Chandigarh was made the combined capital of both.

Since then extremist slogans have been raised by the Akalis. However, it was only in 1971 that the first organised attempt was made to raise the slogan of Khalistan. In 1972, a working committee of 12 members formulated a comprehensive programme which was adopted as a resolution at Sri Anandpur Sahib on October 17, 1973. It was endorsed by the general house of the Akali Dal in August 1977 and by the All-India Akali Conference in 1978.

While this was happening, two major changes took place. First, in 1977, the Akalis (in coalition with the Janata Party) came to power, and second, a militant Sikh youth organisation, Dal Khalsa, championing the cause of a separate state, came into existence. Needless to say, the latter was an embarrassment to the former. This did not last long, though. In the 1980 mid-term elections, the Congress (I) came to power in the state. And the Akalis reverted back to their demand for a separate homeland.

Above: The hijacking of an Indian Airlines Boeing to Lahore by five militant Sikh youths on September 30, 1981, made headlines, gaining worldwide publicity for the Dal Khalsa. Top: Akali leaders staging a dharna outside the Prime Minister's residence.

The Akalis have ruled Punjab thrice—in 1967, 1969 and 1977. Yet, despite the affinity between the Punjab and the central governments during the 1977 Janata coalition of which the Akalis were a component, none of the issues now vociferously raised on grounds of Sikh discrimination, were brought up.

The Akali politics within Punjab today is no different from that of other political parties elsewhere in the country. The key figures in the power game of Punjab are the Big Five who seem to represent the different cross currents present within this turbulent land of five rivers. They are: Jarnail Singh Bhindranwale, leader of the extremist faction. Originally a sant from Moga village, he gained

prominence during the Akali-Nirankari clash four years ago. Today, he is the most vociferous and militant champion of the Sikh cause and rides the crest of an aggressively fundamentalist wave in Punjab; Harchand Singh Longowal, President of the Akali Dal from Sangrur District, is another hardliner to the extent that he has convinced many opposition leaders of the Anandpur resolution; Gurcharan Singh Tohra, President of the Shiromani Gurudwara Prabandhak Committee (SGPC), is well-versed in the holy tenets and is more of a politician maintaining links with the Congress (I), CPI(M) and Sikh leaders abroad; Jagdev Singh Talwandi is the ex-President of the SGPC and the leader of the Amritsar faction of the Akalis;

Prakash Singh Badal, the former Chief Minister, is a moderate with a sufficiently strong mass base.

Surprisingly, on the issue of Akali demands, all the factions have come under a common front, Bhindranwale's being the most militant and popular. But given a chance, each one of them would like to exploit the factionalism within the Dal to gain politically. In fact, it is their desire to create a political base that has brought them under a common banner. Interestingly, it was this factionalism that the Congress (I) exploited in the last elections, and was therefore able to gain control in the state, with Darbara Singh as the Chief Minister.

Darbara's position today is not enviable, though. The caution he has to exercise as a chief minister is not expected of Badal or the latter's more radical comrades in arms. Hence their stir for the acceptance of the demands, which are mostly contained in the Anandpur Sahib resolution (see box). They can be classified under general, religious and political aims.

The general aims are to propagate the Sikh way of life, maintain an independent entity of the Sikh Panth and create an environment where the 'national expression' of the Sikhs can be full and satisfactory.

The major religious aims are: declaration of Amritsar as a holy city, the relay of Gurbani (text of the holy book) from the Golden Temple, renaming of the Flying Mail from the capital to Amritsar as the Golden Temple Express and enacting an All-India Gurudwara Act to ensure a more meaningful management of places of worship and community centres than at present. The Akalis also demand the withdrawal of the government order of 1980 which changed recruitment to the army on the basis of the state's population rather than on merit. This order, according to the Akalis, will decrease the Sikh representation in the army from the present 15 per cent to 1.5 per cent.

The political aims are ingrained in the 'order of the tenth Guru'.

The purpose is to achieve the pre-eminence of the Khalsa. For this, they demand autonomy to the state, whereby the state would control matters like civil aviation,

finance and others, leaving only defence, external affairs, currency and railways to the Centre. They also demand the reorganisation of the state by the inclusion of those areas in the state of Punjab which have so far been kept out (these include Dalhousie in Gurdaspur district, Chandigarh, Pinjore, Kalka, Ambala, Una tehsil, Nalagarh, Shahbad and Gulha blocks of Karnal district, Sirsa tehsil, Tohra sub-tehsil and six tehsils of Ganganagar district in Rajasthan and other contiguous Punjabi-speaking and Sikh areas); giving a larger share of the Ravi-Beas waters and Bhakra Nangal power than at present; and the authority to decide their distribution amongst the various states.

While some demand one or the other

has always been made, never has there been an atmosphere of violent militancy which attended the present stir launched by the Akalis for the acceptance of the Anandpur Sahib resolution. It began with the murder of a local editor, Lala Jagat Narain, on September 9, 1981. This was followed by Bhindranwale's arrest on September 20, resulting in the police firing on Chowk Mehta Road which brought the movement into limelight. Individual terrorism snowballed into mass terrorism. The movement assumed an extremist stance, particularly after Bhindranwale's release which made the demagogue into a hero.

After the train-bus collision at Tarn Taran towards the end of 1982 in which 34 Akalis were killed, the Akali chief announced

ANANDPUR SAHIB RESOLUTION

The working committee of the Shiromani Akali Dal constituted a 12-member sub-committee on December 11, 1972, to formulate a comprehensive policy. This was accepted through a unanimous resolution at Anandpur Sahib on October 17, 1973.

General Aims

- (1) The propagation of the Sikh way of life.
- (2) Creating an environment in which the national expression of the Sikhs can be satisfactory.
- (3) Banishing illiteracy, untouchability and social inequalities.

Religious Aims

1. Bringing about a new All-India Gurudwara law.
2. Bringing all the gurudwaras of the world under the banner of one organisation.
3. Obtaining free access and control of Sri Nankana Sahib and other sacred Sikh places.

Political Aims

1. The political aims of the Panth are ingrained in the order of tenth Guru, with the ultimate purpose of achieving the pre-eminence of the Khalsa.
2. The areas which have been intentionally kept out of Punjab should be included into Punjab so that Sikh interests can be specially protected. The areas are Dalhousie, Chandigarh, Pinjore,

Kalka and Ambala, Nalagarh region, Shahbad and Gulha blocks, Sirsa, Hissar and other contiguous Punjabi-speaking and Sikh areas.

3. The Centre should be confined to handling only subjects such as defence, foreign relations, communications, railways and currency. All residual subjects should be under the jurisdiction of the Punjab Government. Contribution to the central finances should be in the ratio of its members in the Lok Sabha.
4. The Constitution of India should be federal in the real sense and the representation of the states should be equal.
5. The Akali Dal considers the present foreign policy defective.
6. To work towards obtaining justice for Sikh and other servants of the central and state governments.
7. The Dal will work for the maintenance of the traditional position of the Sikhs.
8. To rehabilitate the former members of the defence forces.
9. All men and women not convicted in an offence of moral turpitude should be allowed to possess small arms.
10. The Dal wants a ban on drinking and smoking in all public places all over Punjab. S.C.

COME, FORM YOUR OWN CCTimes CLUB

Are you a silent spectator, longing to voice your own views? If you're a CCTimes reader, you don't have to wait any longer. Now, our readers from a particular city, town or region can get together and form their own CCTimes Club. There is no restriction on the number of Clubs per city/town.

The Club can organise discussions, debates on important world and national issues, quiz contests and other competitions. For the quiz contests, our experts can supply questions that are guaranteed to set your grey matter working. Later, we may also hold inter-CCTimes Club Contests offering attractive prizes. We can sponsor visiting professors from foreign universities, Indian academicians, scholars and well-known personalities who will hold talks on topics concerning career selection and other issues.

And here's where our interference ends. As one of the aims of the Club will be to help you develop qualities of leadership and organisation—the organising of the Club and its activities will rest entirely with the members.

If the response is encouraging, there just might be more surprises coming from our end.

Once you have formed your Club, send us the names and addresses of the Club and members and we will issue membership cards. Address all Club correspondence to The CCTimes Club Desk, C/o Career & Competition Times, 10 Daryaganj, New Delhi 110 002

*Now for some exciting news --
"All Club members who win any
CCTimes contest will receive an
Extra Bonus Prize."*

that a procession would travel from Anandpur Sahib to the capital to mourn their death. Violence erupted when the procession was near Parliament House in Delhi. In a clash with the police four were killed and 150 injured. The Akalis decided to launch a fresh agitation from November 19, the opening day of the Asiad, to put their case before the international audience. Though they decided to postpone it for reasons unknown, thousands of paramilitary men were deployed along the border as a preventive measure.

The Centre's reaction to all this has been procrastinatory. To begin with, Prime Minister Indira Gandhi delayed any settlement because of the oncoming poll in Haryana, in May. Any hasty decision could have hurt the ruling party politically. Nevertheless, Mrs Gandhi asked the then Union Home Minister, Giani Zail Singh, to negotiate with the Akalis on their demands. These talks, in which the Prime Minister took part more than once, failed, whereupon the Akalis launched rallies to secure the Anandpur Sahib resolution. About 25,000 Akalis, including all their leaders, were arrested for violating prohibitory orders all over Punjab and also in Delhi. In late October '82, Mrs Gandhi ordered their unconditional release and deputed former Foreign Minister Swarn Singh to hold talks with the Akalis. Sant Longowal then appointed a five-man panel for the discussions. Finally in Delhi on November 3, the Akali-Centre talks failed. During the talks, the Akalis, besides advancing their earlier demands, also called for the dismissal of the Darbara Singh Ministry.

Now that elections are due in New Delhi and Jammu & Kashmir, any concession to the Akalis can have serious implications on non-Akali voters elsewhere. Still, Mrs Gandhi called the opposition party leaders for discussions. Now, the Prime Minister cannot take any decision without considering the Opposition's view, which again is not unanimous. While the BJP and Lok Dal have threatened to launch an agitation in case the Akali demands are accepted, others have taken a moderate stand.

Anyway, no government, be it

Mrs Gandhi's or anyone else's, can afford to concede all the Akali demands. As such the Centre has accepted some of their religious demands. Darbara Singh has, *suo moto*, banned the sale of liquor, tobacco and meat in a 200-m area around the Golden Temple, but the Akalis want this enforced throughout the walled city of Amritsar. The Centre has also permitted the relay of readings from the sacred Granth daily in the evenings, but has turned down the demand for the installation of a transmitter inside the temple. However, the Centre cannot even give such limited concessions as far as their political demands are concerned, for these need consultations with other concerned states.

For example, Haryana must have a say in the transfer of Chandigarh without linking it with that of Abohar and Fazilka to Haryana. About Ravi-Beas waters, besides Punjab and Haryana, Rajasthan has also to be consulted. As for the Punjabi speaking areas to be returned to Punjab, the Akalis insist on the implementation of the Sachar Committee report of 1949, which had declared as Punjabi-speaking the entire Kharar Tehsil, the whole of the Hoshiarpur district, including the Una tehsil (now in Himachal Pradesh) and Ferozepur district, including Abohar and Fazilka. Against this, the regional formula of 1956 and the Hukam Singh Parliamentary Committee report of 1966, which was the precursor to the formation of Haryana out of Punjab, would also have to be considered by any boundary commission that may be set up to delimit Punjab and the neighbouring states. Likewise, the Centre cannot repeal the government order of 1980 regarding recruitment in the army without obtaining the consent of other states in India. For similar reasons, the Centre has also turned down the Akali demand that Punjab be given the authority to decide on the allocation of power from the Bhakra Nangal.

Even the Akalis are well aware of the fact that these demands refer to the larger issue of Centre-state relations and cannot thus be conceded in isolation. For now, they have decided to defer their next move till January 26. □

INDIAN SCHOOL OF MINES DHANBAD-826004

No. : 615120/82(A)

Dated: 1st December, 1982

ADMISSION NOTICE—1983

Indian School of Mines, deemed to be a University under the UGC Act, invites applications from candidates desirous to appear at its Entrance Examinations for admission to the following groups of programmes.

- I. 4-year (8-Semester) programme leading to the award of B Tech degrees in (i) Mining Engineering, (ii) Mining Machinery, (iii) Petroleum Engineering and (iv) Open Cast Mining. About 135 seats are likely to be offered for this programme this year—60 in Mining Engineering, 30 in Mining Machinery, 30 in Petroleum Engineering and 15 in Open cast Mining.
- II. 3-year (6-Semester) programme leading to the award of M Sc Tech degrees in (i) Applied Geology and (ii) Applied Geophysics. 15 Seats are available in each course (Such students of this programme as may be obtaining minimum 60% marks or equivalent GPA in the examinations of the second year will be entitled to a scholarship @ Rs. 400/- per month in the final year.)
- III. 3-year (6-Semester) Condensed degree programme leading to the award of B Tech degrees in (i) Mining Engineering and (ii) Mining Machinery. 5 Seats are available in each course.
- IV. 3-year (6-Semester) Special Entry programme leading to the award of B Tech degree in (i) Mining Engg (ii) Mining Machinery and (iii) Petroleum Engg.
- V. 2-year (4-Semester) Special Entry programme leading to the award of B Tech degree in (i) Mining Engg (ii) Mining Machinery.

Note: Admissions to Programmes IV and V are make-up admissions i.e. direct admissions to III-Semester and V-Semester respectively of the regular 4-year B Tech programme. Therefore the number of seats available in these programmes will depend upon the vacancies that may be available at the time of admission.

Entrance Examination for all the above programmes shall be held on May 7 (Saturday) and May 8 (Sunday), 1983.

Eligibility:

For Programme I: Pass in Intermediate OR two-year PUC OR All India (XII Class) Senior School Certificate Examination OR plus + 2 stage of the 10+2 pattern of education or equivalent, in each case with Physics, Chemistry, Mathematics and English.

For Programme II: (a) Applied Geology: Pass in B Sc examination with Geology and any two subjects out of Physics, Chemistry and Mathematics. (b) Applied Geophysics: Pass in B Sc examination with Physics, and any two subjects out of Mathematics, Chemistry, Statistics and Geology.

In both cases the candidate should have passed the 10+2 or equivalent examination with Physics, Chemistry, Mathematics and English.

For Programme III: Diploma in Mining (or Mining and Mine Surveying) in case of B Tech (Min Engg), and Diploma in Mech/Elec Engg in case of B Tech (Min Machinery), after having passed the SSLC/Matriculation or Higher Secondary or equivalent examination, PLUS three years' industrial experience after obtaining the diploma. Sponsored candidates are preferred for this programme.

For Programme IV: (i) Pass in Institution of Engineers Studentship examination with one year's experience in Mining/Petroleum industry or (ii) B Sc degree with Physics, Chemistry and Mathematics.

For Programme V: Diploma in Mining/Electrical/Mechanical Engg with pass in section A of AMIE examination and one year's experience in Mining Industry.

Those who are appearing at any of the qualifying examinations may also apply; however their admissions (if selected) will be subject to the condition that their examinations (both theory and practicals) have finished earlier than 15th June 1983 and that the results are announced before the commencement of I Semester examinations of the School.

Maximum age limit (as on 1.10.1983): 22 years for admission to Programme I (except for Pet Engg for which it is 21 years), 24 years for Programme II, 23 years for Programme IV (except for Pet Engg for which it is 22 years). These limits are relaxable by three years in case of SC/ST candidates. There is no age limit for admission to Programmes III and V.

General:

(i) Those qualifying in the Entrance Examination for Programmes II and III, as also for Pet Engg—Programme I, may be required to appear for a personal interview as well.

(ii) 15% of the seats in all programmes are reserved for Scheduled Caste and 5% for Scheduled Tribe candidates.

(iii) One seat each in Applied Geology and Applied Geophysics (Programme II) is reserved for GIRL CANDIDATES subject to their qualifying in the relevant Entrance Examination. Girl candidates are not eligible for other programmes.

(iv) Last date for availability of Form by post: February 22, 1983.

(v) **LAST DATE FOR RECEIPT OF COMPLETED APPLICATIONS : FEB 28, 1983.** No reason whatsoever shall be considered valid for late submission of the completed form.

Detailed Memorandum of Information and the Application Forms (A, B, C, D, or E), available from 11th January, 1983 onwards (Form A for Programme I, Form B for Programme II, Form C for Programme III, Form D for Programme IV and Form for Programme V), can be had from the office of the undersigned either in person or by post on remitting a crossed Postal Order for Rs. 5/- payable to Registrar, Indian School of Mines, Dhanbad at ISM Post Office, Dhanbad.

Candidates should **CLEARLY SPECIFY** the form they require (A, B, C, D or E) in their request for the application

form.
IPB/1282

S.P. VARMA
REGISTRAR

FACTS FOR YOU

PRIMARY EDUCATION

● Of the 9,64,644 rural habitations in the country, 7,73,998 (90.24 per cent) have primary schools/sections either in the habitation itself or within a walking distance of 1 km. In terms of population, 92.82 per cent of the rural mass is served by these schools.

EXTINCTION OF MAMMALS

● During the last 2,000 years, no less than 77 species of mammals have become extinct. The rate of extinction has increased considerably during the last 150 years.

SICK UNITS

● A total of 23,742 sick industrial units owed Rs 1,912 crores to banks as on June 30, 1981. The break-up: 422 large units (Rs 1,453 crores); 960 medium units (Rs 137 crores); and 22,360 small units (Rs 322 crores). The sick units accounted for 7.6 per cent of total bank advances at the end of March 1981. The largest number of sick units were in West Bengal. The textile industry had the highest number of such units.

US & HOCKEY

● Hockey was formally introduced in the US by Henry Greer in 1928 in anticipation of the 1932 Olympics. The US played in this tournament against India and suffered the worst defeat in international hockey (24-1). Other US teams participated in the Olympics in Berlin (1936), London (1948) and Melbourne (1956).

SCIENCE NEWS

● According to researchers in South Africa, the scalp hair may become a special diagnostic tool to help detect diseases like cancer.

COMMUNICATIONS SATELLITES

● In 1945, Arthur C. Clark, a British science writer, for the first time proposed the idea of an earth satellite for radio communication between widely separated places. In an article published in the journal *Wireless World*, he suggested that an earth satellite could be made 'stationary' above any point over the Equator and with three such satellites, worldwide coverage could be achieved.

● Sputnik-1, the first earth satellite was launched by the Soviet Union on October 4, 1957. The 184-pound Sputnik orbited around the globe 15 times a day at a height of 560 miles with a speed of 18,000 miles per hour. Its radio beeped continuously so that the satellite could be tracked until its return to earth on January 4, 1958.

● Vanguard 1, sent up on March 17, 1958, by the US, was the first satellite to be equipped with solar cells to convert sunlight into electricity. Its radio stopped working after six years, when it had covered 7,94,304,000 miles in 23,640 orbits. But the satellite is expected to be in orbit for more than 200 years.

● The first known satellite communication experiment was the US Government's project SCORE (Signal Communication by Orbiting Relay Equipment), a radio-and tape recorder-fitted satellite that stored voice messages and repeated them on command from the ground. This was in December 1958. Later, Echol-1, a 100-ft aluminised plastic balloon put into orbit by the National Aeronautics and Space Administration, provided the first opportunity for a two-way cross-country telephone conversation.

WORLD TRADE

● The US, West Germany and Japan lead in world trade. In imports the US topped the list with 14.4 per cent of the total world imports worth \$ 1,897 billion in 1981. West Germany and Japan came second and third with a share of 8.6 per cent and 7.5 per cent respectively. The US also made the largest contribution of 12.8 per cent of total world exports worth \$ 1,823.4 billion in 1981. West Germany and Japan followed with 9.7 per cent and 8.3 per cent respectively.

EXPORT OF ARMS

● The US, the USSR and France are the world's top three arms-exporting nations, according to the Stockholm International Peace Research Institute, which monitors arms sales. The share of the US was \$25 billion (43 per cent); that of the Soviet Union \$ 16 billion (27 per cent); and of France \$ 6 billion (12 per cent).

WORLD WARS

● A total of 66 million people perished in the two World Wars: 15 million in the First World War and 51 million in the Second.

SPORTS IN RUSSIA

● More than 30 million athletes participate in about 150 nationwide tournaments and competitions held every year in the Soviet Union. There are 6,000 specialised sports schools there training two million children.

NEWSPAPER CIRCULATION

● Growth in the circulation of daily newspapers has shown a decline. The ABC (Audit Bureau of Circulations) figures for 1980 show that the increase in circulation of dailies during the year was 7.3 per cent. The corresponding figures for

1979, 1978 and 1977 were 16.2, 5.2 and 13.1 per cent respectively.

SOIL EROSION

● Due to paucity of trees India loses annually about 600 million tonnes of top soil as a result of erosion by rain. The soil thus washed away contains about 25 lakh tonnes of nitrogen, 38 lakh tonnes of phosphorus and 26 lakh tonnes of potassium. The loss of these main constituents of fertiliser is much more than the country's annual output of fertilisers. An average tree can prevent erosion of 100 sq m of soil with its roots.

AGRICULTURE

Out of 380 districts in the country, 55 account for about 60 per cent of the total fertiliser consumption. While the average fertiliser consumption per hectare is as high as 135 kg in Punjab and 67 kg in Tamil Nadu, it is only 18 kg in Bihar, 10 kg in MP and 9 kg in Rajasthan.

POPULATION EXPLOSION

● According to UN estimates, the world population would be 6.1 billion by the year 2000. If the conditions of stable fertility and declining mortality prevailing in the 1950s had continued to the end of this century, the projected world population would have been 7.5 billion. During the '70s, birth rates in developing countries declined at twice the rate in the '60s. Based on these declining trends, the UN predicts that the world population would stabilise at 10.5 billion in the year 2110.

● The increase in India's population during 1971-81—136 million—exceeded the total mid-1981 population of Brazil (121 million), which is the sixth most populous country in the world. If the population growth of India during the last three decades is taken into account, the additional numbers (323 million) will be seen to exceed the total population in 1981 of the Soviet Union (268 million) and that of the United States (230 million).

ENERGY CRISIS

● At the current rate of energy consumption, the earth will run out of oil in 35 years, natural gas in 50 years and uranium (the raw material for generating nuclear power) in another 70 years. The world's coal reserves will last for another 225 years.

KNOW YOUR CONSTITUTION

Legislative Procedure, The States...

Students preparing for any competition cannot escape being questioned on the Constitution. Our third instalment...

LEGISLATIVE PROCEDURE: A Bill normally goes through the following stages: After the introduction of a Bill in a House of Parliament, there is a general debate. Then, there is a clause-by-clause discussion and voting thereon. A specially important measure may go before a select committee or a joint select committee. A Money Bill has to undergo a slightly different procedure for its passage. After it is passed in the Lok Sabha, it is sent to the Rajya Sabha. If the Rajya Sabha does not pass the Bill, it has to return it within 14 days with its recommendations, which may be accepted or rejected (Art. 107-110). All Bills when passed by the Houses must receive the assent of the President and the President may either give his assent or withhold it and return the Bill for reconsideration by the Houses. If the Houses pass the Bill again, with or without the President's recommendations or amendments, then the President must assent to the Bill (Art. 111).

Union Budget: Every year the President shall cause to be laid before both Houses a statement of the estimated receipts and expenditures of the Government of India for that year. This "annual financial statement" is popularly known as the Budget (Art. 112).

Quorum: The quorum is fixed at one-tenth of the membership of the House but this may be regulated by rules framed by each House.

Language: The language used in Parliament is either Hindi or English (Art. 120).

Distribution of Seats: The Rajya Sabha shall be composed of not more than 250 members, of whom (a) 12 shall be nominated by the President; and (b) the remainder (Art. 238) shall be representatives of the States and the Union Territories elected by the method of indirect election.

Each State shall be allotted a number of seats in the Lok Sabha in such a manner that the ratio between that number and the population of the State is, so far as practicable, the same for all States.

Courts and Parliament: No discussion can take place in Parliament with respect to the conduct of a Judge of the Supreme Court or High Court in the discharge of his duties except on a motion for his removal (Art. 121). The Courts are not to inquire into proceedings in Parliament (Art. 122).

Committees: Parliament's control over the administration is also exercised through a series of committees.

The committees can summon witnesses or require documents to be produced. There is a *Committee on Privileges* which sees to breaches of Parliamentary privilege, and a *Business Advisory Committee* which helps the Ministry of Parliamentary Affairs in drawing up the programme for a session.

Two very important committees are the *Public Accounts Committee* and the *Estimates Committee*. Their members are elected by the House of the People and Ministers are barred from membership. The Public Accounts Committee ensures that money is spent for the purpose for which Parliament has voted it. The Estimates Committee examines possibilities of economy and reform in financial administration and the manner in which estimates may be presented to Parliament.

The Union Judiciary: See *Administration of Justice* in next issue.

The Comptroller and Auditor-General is appointed by the President to control, on behalf of the Union and the States, all disbursements and to audit all accounts of moneys administered by Parliament and State Legislatures (Art. 148-150).

THE STATES: The Executive:

The Governor: The executive power of each State vests in a Governor, appointed by the President, and is exercised by him either directly or through officers subordinate to him. All executive business and action is conducted in the name of the Governor. The powers of the Governor

nor are similar to those of the President in respect of pardons, etc and to suspend sentences. The Governor appoints the *Chief Minister* and the other Ministers of the Council of Ministers who aid and advise him in the discharge of the executive functions. The duties of the Chief Minister are similar to those of the Prime Minister. The Governor summons the Houses of the Legislature of the States, prorogues them and can dissolve the Legislative Assembly. The Governor can promulgate ordinances when the State Legislature is not in session. The Governor also has the power to give assent to Bills passed by the State Legislature and the power to reserve certain Bills for consideration by the President. The Governor also makes recommendations for introducing financial Bills. The Governor appoints the Advocate-General of the State.

The 22 States of India have Governors as their heads; the Union Territories of Andaman & Nicobar Islands and Chandigarh have Chief Commissioners; Delhi, Goa, Mizoram and Pondicherry have Lieutenant-Governors; and Lakshadweep and Dadra & Nagar Haveli have Administrators.

The system of government in the States closely resembles that of the Union.

The State Legislatures: Seven States, Andhra Pradesh, Bihar, Jammu and Kashmir, Karnataka, Maharashtra, Tamil Nadu and Uttar Pradesh have two Houses of Legislature; the others, only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council (sometimes Vidhan Parishad). The former has a duration of five years except during a proclamation of emergency when its duration can be extended one year at a time, while the latter is a permanent body with one-third of the members retiring every second year.

Membership Strength: The minimum strength of an Assembly is 60 (except in the case of Sikkim where the membership is 32) and
(Continued on page 79)

Above: Mullahs On The March: Armed Iranian mullahs taking part in a parade marking the third anniversary of Ayatollah Khomeini's call for a 20-million-member army in Iran. There is no telling how much success his call has met with. But his earlier pronouncements have been equated with religious dogma and carried through to the end by his immediate coterie. Those opposing the Ayatollah have been either harassed or liquidated. The London-based human rights organisation, Amnesty International, in its most scathing indictment of the Iranian regime, has charged that opponents of Khomeini are being rounded up arbitrarily, herded blindfolded in to prison where they are being held without charge and tortured. **Above right: The Turbaned Bobby:** Twenty-nine-year-old Satnam Singh (second left), formerly with Rajasthan Police before he migrated to Britain three years ago, is the first Asian on south-west England's highly-respected all volunteer Special Constabulary. He is also the first officer in the Avon and Somerset Force to be allowed to wear the turban on duty. Singh, who works nights for the Bristol Post Office, hopes to join the regular police force soon. He is seen here talking to afternoon shoppers in Redfield, Bristol. **Right: Royal Couple Meets Real Couple:** The London premiere of Richard Attenborough's highly acclaimed Gandhi was held on December 2 and among the celebrity audience were Prince Charles and Princess Diana. Also seen in the pic are actor Ben Kingsley (left), who played Gandhi, and Rohini Hattangady, who essayed the role of Kasturba.

Courtesy PIB

Left: Solidarity leader Lech Wałęsa—seen with wife and kids in Gdansk—after his release: "What can I tell you as a leader of this great union (Solidarity) which formally does not exist? It exists within us, even within those who turned away from it." Yet, in the following days, his question still remained a question for him. His arrest and subsequent release and his charge of being pressured to write a conciliatory note to Gen Jaruzelski did not, surprisingly, fuel people to rise up in opposition against their military rulers. Fireplaces without coal and homes without bread have made Poles placid.

Above. Traditional Opening: The fortnight-long Ninth International Film Festival of India (IFFI) got underway on January 3 in New Delhi with the traditional lighting of the lamp by the Minister of State for Information and Broadcasting, N.K.P. Salve, helped by actress Deepti Naval. Left: Some members of the jury of the Ninth IFFI, formed after many noted film personalities declined to be on it due to prior commitments. The jury has two Indian members: Vyjayanthimala Bali, a famous actress of yesteryear and Adoor Gopalakrishnan, maker of Elippathayam, the Malayalam film which won the British Film Institute's award for 1982.

1. **adequate:** C: sufficient; satisfactory; enough. Diet with or without an adequate amount of Vitamin A can make all the difference between good vision and blindness.
2. **affront:** C: deliberate insult; contemptuous treatment; slight. Whaling is an affront to human dignity, a debasement of human values and sensibility.
3. **archives:** D: a place for keeping public records or historical documents. The increasing interest in history has had an important influence on archives in Canada.
4. **capricious:** D: often changing; unreliable. Even today, monsoon is the despair of India because of its capricious behaviour.
5. **congested:** D: overcrowded; too full. After decades of rapid growth, South-East Asian cities are now caught in a nightmare of snarled, congested traffic.
6. **domain:** B: field or sphere of activity. Plastics, which were so far popular in households and industries, have now entered the domain of agriculture.
7. **emphasis:** D: special stress, value, importance or insistence upon something. While other NATO countries are trying to put more emphasis on conventional defence and less on nuclear weapons, the French are doing the reverse.
8. **generate:** A: to produce; bring into being. It may not be known to many that a tree with a 60 year rotation generates oxigen worth Rs 5 million, leave aside other uses.
9. **hinge:** A: to depend on; to be contingent on a single consideration or point. Africa's food crisis hinges on a narrow and widening—gap between a surging population and the growing inability to feed it.
10. **immune:** B: protected against a disease, as by an infection or a vaccine. No one is immune to illness, not even to death.
11. **incalculable:** A: very great; beyond calculation. The cost of the war was incalculable.

CAREER COUNSELLING

Please provide me information about the courses conducted by the Film and Television Institute of India (FTII), Pune.

Tapash Paul, 24 Parganas

The FTII conducts five courses: (a) Screenplay Writing; (b) Film Direction; (c) Motion Picture Photography; (d) Sound Recording & Sound Engineering; (e) Film Editing. The courses (a), (b), (c) and (d) are of three years' duration while (e) is of two. The admission is on the basis of a written test in English Composition and G.K. Candidates seeking admission to (c) and (d) must also take a test in Science. Admission requirements: for (a) and (b), Arts, Science or equivalent degree or diploma in Motion Picture Photography, Sound Recording & Sound Engineering and Film Editing of the FTII or equivalent; for (c): Intermediate or first year of the three-year Science degree course with Physics and Chemistry or equivalent subjects, or S.S.C. with a recognised degree/diploma in Fine Arts/Painting/Photography (two-year course); for (d): Intermediate or first year of the three-year degree course with Physics, Chemistry and Mathematics; for (e): Intermediate or first year of the three-year degree course in Arts/Science or equivalent. Age limit: (a) and (b): 19-30 years; (c), (d) and (e): 17-30 years. Application forms are available in February from the Administrative Officer, FTII, Pune-4, on payment of a fee. The entrance exam is generally held in May at Allahabad, Bombay, Calcutta, Delhi, Madras and Ranchi. The FTII awards scholarships and has separate hostels for boys and girls.

I'm a Commerce student and have a natural talent for sketching and painting. What are the avenues open to me in this field? Since I've had no formal training in Commercial Art, which institution should I join to further develop my talents?

Neeraj Sehgal, Delhi

With a diploma in Commercial Art or allied disciplines you stand

a good chance of getting an artist's job. In Delhi some institutes conducting this course are: 1. **College of Applied Arts, Tilak Marg**, which conducts a four-year degree course—the minimum qualification for admission is S.S.C. with 40 per cent marks or equivalent; 2. **Sarada Ukil School of Art, 66 Janpath**, offers a one-year diploma course—there are no minimum qualifications, though persons with three years experience in the art trade are preferred; 3. **Women's Polytechnic, Maharani Bagh** and **New Delhi Women's Polytechnic, J-23, N.D.S.E. Part-I**, offer a three-year diploma course—the minimum admission requirement in both these institutes is Hr. Sec. or 10th class of the 10+2 system or equivalent.

All these four institutes take in incumbents through merit/apptitude test and an interview. With such a degree or diploma—or while still in an art college—you can join an advertising agency, a magazine or a publishing house on part or full-time basis. Alternatively, you can even join a school as an art teacher or take up interior decoration and window-display assignments in big departmental stores. Today, there is a great demand for commercial artists having imagination and ingenuity. If you have these qualities, plus some experience, you can also freelance. The remunerations are very attractive.

I have passed M.Sc. in Statistics with more than 75 per cent marks in aggregate and aspire to become an Assistant Actuary in an insurance company. For this, one has to pass the fellowship examination of the Institute of Actuaries, London, or of the Faculty of Actuaries, Scotland. These exams are held in India but I've no information on them.

Mushtaque Ahmad, Meerut

Look up our July '82 issue for the necessary details.

I want to become a customs officer. Please let me have

the details.

Ashok Murthy, Secunderabad

Since you haven't mentioned your qualifications, we presume you're a graduate. For a Class I post in the Indian Customs and Central Excise Service and a Class II post in the Customs Appraisers' Service, you have to appear in the Civil Services Examination conducted by the UPSC. For more details, see *Employment News* dated December 18, 1982.

I will soon be completing my B.A. (Hons) in English Literature from Delhi University, and would like to do my B.Ed., also from Delhi. Please acquaint me with the names of institutes/universities where this training is imparted.

Renuka Sawhney, Delhi

Delhi University's Central Institute of Education offers a B.Ed. degree course. Minimum requirement is 50 per cent in graduation. Admission is done through a written test and interview. The Jamia Milia Islamia, Jamia Nagar, New Delhi, also offers this course. The eligibility percentage is the same while the admission is through merit. For further details, contact the Delhi University Employment Information & Guidance Bureau.

NOTE TO READERS

Before rushing in your career problem, check if it can be solved by looking up our sections on *Careers* or *Career Counselling* in the earlier issues. Space is limited; the mail received staggering. Letters chosen are those of general interest or in particular cases where the information is hard to find or has not been published before. Many students ask for a personal reply. Sorry, this is not possible. So please don't send postage or envelopes. Make your queries specific and brief. Send them to Career Counselling, Career & Competition Times, 10 Daryaganj, New Delhi-110 002. Your letters should be accompanied by the coupon.

THE WORLD IN 1982

BY PARTHA S. GHOSH & SANJUKTA BANERJEE

SUPERPOWERS

The early '70s were marked by the spirit of detente and a general relaxation of tensions between the superpowers. The early '80s, however, have seen a reversal in the process of detente and an escalation of tension between the US and the Soviet Union. While the Soviet Union has been largely responsible for this, the attitude of the US has not helped matters. The Soviets, however, showed the red flag to the American bull in the late '70s and the Reagan administration decided to charge, seeing the red peril around every corner. In the last seven years, Cuban troops supported by Soviet logistics in Angola and Ethiopia, Soviet military bases in South Yemen, Soviet military equipment pouring into America's "allergy", Libya, a communist coup in Afghanistan followed by the overt presence of Soviet troops in that country, Soviet political and military support for the Vietnamese occupation of Kampuchea and Soviet encouragement of the martial law authorities in Poland provided enough cause for alarm in the US.

Perception of threat from the Soviets in various sectors of the world has guided the US administration's security considerations increasingly. The government did not ratify the Strategic Arms Limitation Talks II (SALT II) held in mid-1979. However, in June-July 1982 Reagan finally agreed to resume

Brezhnev's final days: He built up the Soviet military potential—but failed to check the economic downside.

LEONID BREZHNEV on limiting long-range nuclear weapons and the Strategic Arms Reduction Talks (START) began in Geneva. The talks continued intermittently throughout the year but nothing significant was achieved because of the intransigence of both sides, although Washington's attitude was stiffer than Moscow's. What the West wanted was something like unilateral disarmament from the Soviet Union. Moscow, on the other hand, made peace overtures, especially after the death of Brezhnev. It declared it would not make the first strike but wanted the West to refrain from proceeding with its plan to instal 572 Pershing II and cruise missiles in Europe.

In fact, Moscow's peace overtures began much earlier in the year. At the 17th Congress of Trade Unions of the USSR held in March, Brezhnev announced a unilateral Soviet moratorium on the deployment of medium-range nuclear weapons in the European part of the USSR. This not only meant a freeze on the armaments already stationed there but a suspension of the replacement of the nuclear missiles, SS-4 and SS-5, in Europe by newer SS-20 missiles. Brezhnev stated the moratorium would be in force until an agreement was reached with the US to reduce, on the basis of parity and equal security, the medium-range nuclear weapons designed for use in Europe, or until practical preparations actually began on the deployment of Pershing II and cruise missiles. Reagan, however, scoffed at the Soviet gesture, saying it was pointless because Moscow already had 300 mobile SS-20 missiles with 900 warheads which could be targeted against Europe or Asia. He demanded that the Soviets should actually reduce the existing levels.

This led Brezhnev to tighten his language and shortly afterwards he accused the US and NATO of "trying to alter the established balance of power to their own profit and ensure themselves military superiority over the Soviet Union". He said the Soviet priority from now on should be "to strengthen... the defence of the country".

Western sources continued to report Soviet plans to improve and increase their weapons throughout the year, especially after April. Among these was a laser weapon to

destroy the sea-skimming cruise missiles and new ground-launched ICBMs. American sources also claimed that Russia was continuing to deploy SS-20 missiles even after its moratorium announcement in March. However, after the US agreed to the START talks, the Soviet peace overtures were renewed. It offered to make substantial cuts in its intercontinental missile and bomber forces and proposed that there should be an equal ceiling for the Soviet Union and the US of 1,800 long-range missiles and bombers. Reagan, who felt that the Russians had a definite margin of superiority over the West, found this unacceptable and called for a common ceiling of 850 long-range missiles. The basic problem was that the perception of the two sides differed. While the US felt that the danger lay in the large number of Soviet land-based missiles capable of making a devastating first strike, the Soviet Union saw the problem in terms of superior US weapons at sea and in the air, and also wanted to prevent the deployment of new US land-based missiles in Europe.

Towards the end of the year, matters took a turn for the worse when Reagan announced his decision to deploy 100 new MX missiles, each of which can carry its 10 independently-targetable warheads 6,000 miles or so. This may lead to further complications in the START talks because both SALT I and II forbid the building of new fixed intercontinental missile launchers. The American defenders of the MX plan to bypass the issue by saying that the MX launcher is not a fixed one, because the canister and not the silo, is the launcher. The Reagan administration, at year end did not appear too keen on improving relations with the USSR as the announcement of the MX plan came shortly after Andropov, a more pragmatic man than Brezhnev, took over.

In fact, in a major statement on the Soviet armaments posture in early December, the Soviet Defence Minister, Marshal Ustinov, charged that the MX missiles were a "cruel violation" of the SALT agreements and said that if the new MX missiles were deployed, the Soviet Union would respond by developing a similar weapon of its own.

Economic relations between the superpowers were none too good either, although US grain exports to the Soviet Union did not stop.

The United States

Reagan: The ever optimist.

The American people were exposed to the worst-ever infighting among Reagan aides till the middle of 1982. The superhawk, Defence Secretary Casper Weinberger had regular clashes with the internationalist, Secretary of State Alexander Haig, who finally resigned in late June to be replaced by George P. Shultz, Richard Nixon's Treasury Secretary from 1972 to 1974.

Shultz has brought about a degree of stability in the administration. But there are other factors which are increasingly eroding the credibility of the government. Topping that list is the economy. Reaganomics has become less and less popular and more and more people have begun to feel that their financial situation has become worse as a result of Reagan's supply-side economic policies. By October, the unemployment rate hit 10.1 per cent—the first double-digit figure since the Great Depression. In construction, the out-of-work rate reached 22.6 per cent, and in manufacturing, 13.8 per cent. Among teenagers, the unemployment rate was much higher, as it was for blacks and other minorities. The stock exchange too registered the largest one-day fall since 1929, on October 25. The US Government deficit also soared beyond the \$100-billion mark for the first time in history.

In November, the American

dum on Reaganomics during the Congressional election. The results showed that the fringe conservatism of the new right was slowly collapsing. The Senate remained largely Republican, although five seats almost fell to the Democrats. In the House, the Democrats gained 26 seats, increasing their number to 267. In addition, seven more Democratic governors were elected, and there are now 34 governors who are Democrats and 15 who are Republicans. The complexion of the 98th Congress is different from the 97th. About three-fourths of the 57 new Democrats elected to the House are staunchly in favour of their party and are not likely to align themselves with the Republicans. The elections have, therefore, produced a net swing away from Reagan's conservative ideology of some 40 votes in the House. The most difficult problem before the Congress is the enormous budget deficit of the Reagan administration, which, unless brought under control, forebodes a gloomy economic situation.

Although Reagan may compromise on his economic policies, it appeared that he was bent on following his defence policy. He is committed to the strategy of deterrence against a possible Soviet first strike. On November 23 he proposed that 100 new MX intercontinental nuclear missiles be placed in a Dense Pack cluster at an airbase in Wyoming. To buttress his argument for the new weapons system, he produced charts and graphs to show how the Soviet Union had attained a clear edge in the arms race. Yet, to reduce the chances of an accidental nuclear war, the President suggested a three-point plan to the Soviet Union, which included an advance notification by both countries of major military exercises and nuclear tests.

The House of Representatives (lame-duck session of the 97th Congress), however, rejected a down payment of nearly \$ one billion for the MX missiles system by a vote of 245 to 176. It is significant that 50 Republicans joined 195 Democrats to deliver this negative vote. Reagan, however, is continuing to lobby for the missiles.

The Soviet Union

Andropov: Moscow's energetic new strongman.

An era ended in the Soviet Union with the death of President Leonid Ilyich Brezhnev on November 10. The 18 years during which he held sway over the government were marked by peace and stability. His successor is 'spymaster' Yuri P. Andropov, whose claim to fame rests on 15 years of service as head of the KGB. He had himself elected to the 40-member Presidium of the Supreme Soviet, but he did not automatically become the President. For the time being he will remain the General Secretary of the Soviet Communist Party, to which post he was elected on November 12. Whether his rise to power would mean a change in Soviet politics or economy is not yet clear. In a speech to the party's Central Committee he admitted that the Soviet system was faltering but added he had no 'ready recipes' to improve it. He also cited some economic statistics which showed that 1982 had not been a particularly good year for the Russians. Industrial growth was only 2.8 per cent instead of the planned 4.7 per cent and labour productivity too grew at a slow pace.

In fact, the Soviet Union had another appalling harvest, the fourth in a row, in 1982. There was a general shortage of grain, meat and dairy products and it was the Americans who benefited from this. Reagan lifted the grain-sale embargo imposed by his predecessor, Jimmy Carter, as a reprisal for the Soviet invasion of Afghanistan, and more and more shipments of wheat,

corn and soybeans have been going east from America. Besides the US, the USSR imported grain from Canada, Argentina, France and Australia as well.

Grain imports, plus the war in Afghanistan, the burden of bailing out the Polish economy and of subsidising the Cuban and Vietnamese economies amounted to a heavy drain on Soviet resources. And early in the year Russia, suffering from severe foreign currency shortage, asked European and Japanese banks to extend an emergency loan of \$ 500 million. It also stepped up its exports of gold, diamond, timber and oil products substantially to earn hard currency. Finally, in May Brezhnev declared there would be a major shift of emphasis in the next five-year plan, from industry to agriculture. Beginning from 1986, a third of total investment—so far, it was about a quarter—will go to agriculture and related services. In April 1982, Soviet engineers also embarked on a long-term project to restructure the north Russian and Siberian river systems. This would result in an increase in the volume of the Volga and associated streams and a reversal in the direction of the flow of dozens of streams.

In other fields, 1982 was an ordinary year for Russia. It lost one of its least-known but most powerful personalities. Party Ideologue Mikhail Suslov, in February. In early March, the Soviet trade union boss, Alexei Shibayev, was sacked, 10 days before the five-yearly Soviet trade union congress was to open, and a new leader, Stepan Shalachen, was appointed in his place. The usual spate of defections took place, the most important one being the Soviet diplomat Vladimir Kuzichkin, who had formerly been in Teheran and who reportedly took important official documents with him.

In another important development, the first steps to rehabilitate Stalin took place in late 1982. A reassessment of Stalin's contribution to the Soviet Union began in Brezhnev's time but it was only after his death that the first major move occurred. On the 40th anniversary of the decisive engagement with Hitler's army on the banks of the Volga near Volgograd (formerly called Stalingrad), officials referred to it as the 'Stalingrad battle'.

ARMS RACE

While the economic crisis plagued the international system, an ever-increasing global arms race vitiated the atmosphere further. In 1980, the world spent \$ 500 billion on arms and weapons and military services. Increasing at an annual rate of three per cent and more the world's military budget has doubled in the last 20 years. If the same rate of growth continues, by 1990 the world military budget would touch a staggering \$ 685 billion figure and by the turn of the century \$ 940 billion.

Although the arms industry is the reserve of the superpowers and their industrially developed allies, it is the developing countries of the Third World which, since the 1970s, have emerged as the largest importers of arms and weapons. The developing nations' share of arms imports in the '70s came to a staggering 75 per cent of all imports of arms and weapons. Just five Middle-East countries—Iran, Saudi Arabia, Jordan, Syria and Iraq—accounted for one-third of all the major weapons imported by developing countries in the three years between 1977 and 1980.

The weapon-supplier countries have used their weapon-selling power as a key instrument of diplomacy. As a result, the traditional instruments of diplomacy such as formal alliances have declined. Developmental aid is less forthcoming than military assistance.

DISARMAMENT

Side by side with the growing arms race, there was a parallel current towards disarmament and arms control. Although the second UN Disarmament Conference held in June failed to accomplish anything worth the name, and although the US-Soviet dialogues for arms control did not make any headway, a strong grassroots movement for disarmament signalled a good omen for posterity. Bernard Feld, Chairman of the Pugwash Executive Committee, reaffirmed that "disarmament is technically possible; all that is lacking is political will".

The so-called peace movements

Both the US and the USSR do not hesitate to project their military presence in distant places for attaining their political aims.

The sales of Airborne Warning And Control System (AWACS) and F15 fighter components to Saudi Arabia, the F16s to Pakistan, the planned sale of FX fighter planes to Taiwan, and so on, have triggered off a new arms race and undermined non-proliferation efforts.

Besides the US, the arms sales issue has generated controversies in West Germany in connection with the sale of Leopard II tanks to Saudi Arabia, in France for honouring past commitments to Libya, and in Austria for the sale of 57 light tanks to Argentina. Arms sales decisions are inextricably linked to a framework of comprehensive foreign policy.

The hostilities in the South Atlantic between Argentina and Britain over the Falklands provided a windfall for the armament manufacturers all over the world. Instead of making efforts to arrest the spread of more advanced and sophisticated weapons, they indulged in an exercise of pushing their sales drives in the Third World countries. The Falklands war served as a laboratory test to judge the performance of their super-lethal ware. Britain's initial reverses in the war were explained as the handiwork of the Mirages. Even in India a case is being made that it should acquire the Exocet missile which was responsible for sinking some British warships, particularly the HMS Sheffield.

in the US and in a large number of European countries (including those in the Soviet Bloc) presented rays of optimism. It is significant that after the massive June 12 peace rally in New York, the Disarmament Information Bureau, which is set up by the Non-Governmental Organisations Committee at UN Headquarters, was flooded with enquiries about the peace movements in Germany, Italy and the Soviet Union. In the US, various organisations—the Group of International Lawyers, People Active in Vietnam War, Organisation of Concerned Scientists, United Campus Against Nuclear War, etc.—were active in carrying the message of peace to the people. Efforts were made to involve the Rotary International, the Women's

Up in arms against arms—an anti-nuclear rally in New York

Organisations, etc. In November 1982, there were a large number of convocations in American colleges and universities concerned with the threat of nuclear war. In fact, the American peace movement probably had an impact on the Congressional elections held in November. The Reagan administration, which has been pressing for a larger defence budget, suffered a setback.

Peace movements gained momentum in East Bloc countries also. There might be some truth in the Western allegation that these movements were government-sponsored; nevertheless it is certain they had some amount of public sympathy. The Peace Council of the German Democratic Republic, led by academics, was actively engaged in informing the people about the dangers of a nuclear war. There was also a growing youth movement in GDR whose major thrust was anti-nuclear. Similar peace movements were active in other parts of Eastern Europe also. It is interesting to note that the Finnish Peace Movement, which was spearheaded by some physicists, drew its inspiration from a conference in the Soviet Union that discussed the devastating influence of nuclear weapons. The conference had three American participants too.

The 32nd Pugwash Conference was held in Warsaw in the last week of August. It issued a call to scientists, governments and people worldwide to strive to avert a nuclear war which threatened the existence of mankind. Prominent scientists (188) from all over the world, including 97 Nobel laureates,

participated in the Conference. What real hopes disarmament raised could be anybody's guess. The decision by the Western nuclear powers not to hold the World Disarmament Conference was certainly not encouraging. Equally discouraging was the no letting-up in the super power confrontation when each accused the other of creating an atmosphere of tension.

NEIGHBOURS

China

Winds of change blew over China in 1982. Changes were effected in the country's Constitution and the Constitution of the Chinese Communist Party (CCP). The new party Constitution, which was adopted by the 12th Party Congress in September, abolished the post of party Chairman and Vice-Chairman and provided for the creation of a new party structure under the new General Secretary, Hu Yaobang, who is a protégé of China's strongman Deng Xiaoping. The most conspicuous casualty of the new set-up was former Prime Minister and Chairman, Hua Guofeng, who lost his seat on the standing committee of the Politburo. Another face which disappeared from active politics shortly afterwards was Foreign Minister Huang Hua, who was removed from office.

In December, a new Constitution was adopted by the National People's Congress (NPC). This

was China's fourth Constitution since 1949 and its third in the last eight years. The draft version had been in the news since April. According to the new Constitution, the revised position of the Chinese head of state now carries the title of President. Marshal Ye Jianying, who is at present the Chairman of the standing committee of the NPC, a post which had been made equal to the head of state by the 1978 Constitution, will continue to be the head of state until such time as the posts of President and Vice-President are filled. The powers of the new President will include promulgation of statutes, proclamation of martial law, proclamation of a state of war and the appointment and removal of the premier, vice-premiers, state councillors and others.

However, unlike the 1954 Constitution, the President is not designated as the armed forces commander or the chief of the Central Military Commission in the 1982 Constitution. The new Constitution further allows freedom of speech, press, assembly, procession and demonstration as well as freedom from arbitrary arrest. Although these appear to be major steps forward, there is a catch—all freedoms have been made specifically subservient to the 'four cardinal principles' that guide the nation. These call for support of the party, loyalty to its policies, recognition of the dictatorship of the proletariat and the adherence to the policies

of Marx, Lenin and Mao.

In another field too, there was a change in Chinese policy. Over the last few years Sino-US relations had improved remarkably at the cost of Sino-Soviet relations. But in 1982, Sino-US relations took a turn for the worse. Throughout the year, China pressurised the US on the issue of arms sales to Taiwan and in August managed to extract an agreement in which America pledged that it did not intend to carry out a long-term policy of arms sales to Taiwan. However, in the following month, the US State Department suddenly announced that the American Government was no longer prepared to supply nuclear equipment to or cooperate in the nuclear field with China. The apparent reason: reports to the effect that China had been assisting Pakistan in developing nuclear weapons technology.

There was, thus, a greater thrust on China's part to move towards a reconciliation with the Soviet Union which the latter had made clear it wanted, more than once and in public. The then Foreign Minister Huang Hua made some references to improving Sino-Soviet relations during a visit to Europe in July, and after the death of President Brezhnev, the thaw was quite visible. The negotiations between the two countries were given an official political status, much to the chagrin of the US.

The year also saw China's population topping the one-billion mark. The country's population, as estimated after the national census, was 1.076 billion.

Arms and the man: Deng Xiaoping at a military inspection.

Pakistan

President Zia-ul-Haq faced a bad year in Pakistan. In March, a Pakistan International Airlines aircraft was hijacked by members of the Kabul-based Al Zulfikar terrorist group. And from August onwards, terrorist attacks on pro-Zia officials mounted at an alarming rate. Zia's response was to tighten the ropes of martial law. Leaders of the four-party United Front in occupied Kashmir were arrested, vital public installations, government offices and important personalities were placed under high vigil, and in a final burst, Zia ordered death penalty for "any offence liable to cause insecurity or despondency among the people"—a clause which can be stretched without limit in Zia's Pakistan.

Besides terrorism, political opposition has been gathering strength in the country. The eight-party Movement for Restoration of Democracy repeatedly called for an end to martial law in 1982, and a lawyers' convention, in more explicit terms, demanded Zia's resignation. The President, however, shows no signs of letting up.

In fact, facing trouble at home, Zia played his foreign cards well all through the year. He climaxed his overtures to India by a personal visit in late '82 which was much appreciated. Sino-Pakistan relations, too, received a boost from his visit to China in October, and military, trade and other relations between the two countries are apparently flourishing at present. There are some signs of a thaw in

Soviet-Pakistani relations as well. He also undertook a trip of South East Asia and finally, in December, visited the US. Although the press did not react favourably to his visit, raising questions about the nuclear bomb he is supposed to be building and about the extreme punishments meted out by his regime, President Reagan reaffirmed his promise of \$ 3.2 billion in aid and 40 F16s to Pakistan.

Afghanistan

In 1982 the situation in Afghanistan did not show any signs of change. Babrak Karmal continued to be in office with the backing of Soviet troops while the Mujahedeens continued to embarrass the regime and its foreign mentors. Everybody came to realise that a solution of the Afghan imbroglio had to be a political one but on the question of how it was to be effected and what were its components no consensus appeared to be in sight.

Bangladesh

The democratically elected government of Abdus Sattar was ousted in Bangladesh's fifth and only bloodless coup engineered by the Army Chief, Lt Gen H.M. Ershad, in March 1982. Relations between the army and the civil authorities had begun to deteriorate shortly after Sattar had assumed the presidency in late 1981.

Ershad became the Chief Martial Law Administrator and throughout the rest of the year tried to improve the ailing Bangladesh economy. He launched a vigorous campaign to weed out corruption

and with a view to cleansing politics, banned 74 political parties, arrested more than 300 people and set up five special martial law courts to deal with political crimes. In April, he announced an eight-point economic programme which primarily aimed at promoting and protecting indigenous industries. He also tried to improve relations with neighbouring countries like India and Nepal, because external aid has a tremendous bearing on Bangladesh's economy.

Sri Lanka

It was the year of the President in the island nation of Sri Lanka: Junius Richard Jayewardene won the republic's first presidential election on October 20, polling 52.91 per cent of the total votes; later in the year people voted in favour of a referendum which doubled the life of Sri Lanka's 168-member Parliament, giving it a lease of another six years from August 1983. Jayewardene's victory meant a victory for the presidential form of government, which he had been advocating since assuming office in 1977.

The year wasn't free of troubles for the President, however. The running ethnic conflict between the Sinhali majority and the Tamils, concentrated in the Jaffna region, flared up several times and to this was added a new conflict based on religious lines. A series of violent clashes occurred between Sinhalis and Muslims in Galle and adjacent areas in the southern parts of Sri Lanka in July. The President declared a national emergency to prevent its escalation.

S.E. ASIA—THE PACIFIC

ASEAN

The South-East Asian-Pacific region showed signs of emerging as a potential cold-war theatre against the backdrop of an ambitious Vietnam, aided and abetted by the Soviet Union, and the Chinese determination to thwart that ambition. To complicate matters further there was the possibility of a militarily resurgent Japan sending shock waves to the concerned elite of the region. The presence of a sizable ethnic Chinese minority in almost all the countries of the region was an additional source of tension and

endangered political stability.

In 1982 the US showed an increased interest in the region. The visit of US Defence Secretary Casper Weinberger to South-East Asian capitals in the first week of November 1982, the second time in about six months, revealed this growing attention. In the context of the new cold war with the Soviet Union the US embarked upon a massive global strategic build-up in which South-East Asia automatically figured prominently. Speaking in Honolulu at the commencement of his South-East Asian safari, Weinberger said: "I hope everybody realises the

nature and extent of the [Soviet] build-up, how rapidly it has grown and how much of a threat it poses."

By 1981 end it had become obvious that the US was in the market for military bases in the Pacific, primarily to support its Rapid Deployment Force (RDF) should the necessity arise. The American response to the Iranian instability, and the uneasy super power relationship vis-a-vis the Persian Gulf—that of stationing two aircraft groups in the Indian Ocean—would have been almost impossible without the back-up facility of the Subic naval base and the Clark air base in the Philippines.

The Clark and Subic bases

turner became important because the Soviet Far Eastern fleet and Air Force had reportedly started using former US-built facilities in Vietnam, particularly at Cam Ranh Bay. During his Thailand visit in August 1982, Vietnamese Foreign Minister Nguyen Co Thach gave sufficient hint to this effect, saying: "There are no foreign military bases in Vietnam, but that does not mean it will always be so in the future."

Evidences were there that the American plan of bolstering up its military profile received favourable response from significant quarters. Philippines' President Ferdinand Marcos let it be known that he intended to renegotiate the terms under which US bases could be permitted to remain in his country. His intentions were not surprising as the political base grows from a military base, as is evident in the case of the Philippines. The US which pays the Philippines US \$ 500 million as rent for the bases earmarks US \$ 200 million as Economic Support Fund (ESF). It is interesting to note that the implementing agency for the ESF, the Ministry of Human Settlements, is headed by no less important a person than Marcos' wife Imelda.

According to Washington's strategic analysis, South-East Asia faced a two-fold threat: the first was Vietnamese expansionism directed against Thailand; and the second was the Soviet naval threat to the lines of communication of American forces from the west coast of the US through Japan, the Philippines and the Straits of Malacca to Diego Garcia in the Indian Ocean. Richard Armitage, US Deputy Assistant Secretary of Defence, told a Congressional hearing in early 1982 that the use of Vietnamese military facilities had permitted the Soviet Union to establish "a potential choking grip" on the sea lanes.

In June 1982, the *New York Times* disclosed a Pentagon plan which envisaged swift shifting of forces from the Pacific to the Indian Ocean in the event of a war in the Persian Gulf or the Middle-East. This secret document, from which the *New York Times* published excerpts, called for "a loose partnership of Asian nations by dealing with each directly, instead of trying to mould them into a formal group". The plan particularly called for an "active defence partnership" with Japan, requiring it to

safeguard sea and air lanes in its neighbourhood. The plea was not something new and Japan had already accepted it in principle at the US-Japan summit meeting in May 1981. But what is important is that the plan went into the details of what Japan should do, leaving no room for ambivalence persisting in Tokyo. During his November visit to ASEAN (Association of South-East Asian Nations) capitals, Weinberger urged the South-East Asian leaders not to take an alarmist view of Japan's military build-up. Speaking at a press conference in Singapore, he said: "I do not see any disposition whatsoever on the part of the Japanese to regain any kind of offensive strength." The game plan also called for "supporting measured increases" in China's military capability to "maintain the strategic value of our relationship". ASEAN countries were actually more scared of this relationship but the US kept assuring them that it would limit itself to supplying purely defensive weapons to Beijing.

It is argued that although most of the ASEAN countries show an apparent reluctance to support the presence of US bases, they, in their heart of hearts, are happy. The bases provide these anti-Communist regimes with a psychological umbrella which allows them the luxury of the middle path. That some of them are seriously reconsidering their military posture vis-a-vis the South-East Asian situation is explicit.

Singapore, for one, strongly favoured a higher American military presence. Whether he really believes that the Soviet Union poses a serious threat to the region or not, Premier Lee Kuan Yew, throughout 1982, kept harping on the Soviet danger to ensure that the US preoccupation with W. Asia or the Mediterranean did not lead to a downgrading of South-East Asia in Pentagon's priorities. He even pleaded, though with little success, that the ASEAN should give its mutual cooperation a larger military content, the immediate goal of which should be joint military exercises by the ASEAN partners. Through his warnings Lee tried to underscore the problem that might arise if the Soviet Union were to gain a lead in the Pacific arms race by default.

Indonesia continued its massive

defence build-up programme within the framework of a five-year strategic plan for 1978-83. Under the plan, Indonesia is committed to modernise its navy and air force. In this effort, the US is an active partner. Weinberger held talks with President Suharto and Defence Minister General Mohamad Jusuf in late 1982, and there are indications of an increased US-Indonesian cooperation.

It is generally believed that ASEAN security officials regularly meet secretly to discuss common problems. And while the activities of the region's pro-Beijing Communist parties are always high on the agenda, the officials also discuss the Soviet threat, particularly in the context of Vietnam's position as a Soviet proxy. Against this background it might not be just a coincidence that several Soviet diplomats were expelled during 1981 and early 1982 from various ASEAN capitals. Although ASEAN officials claimed that each country's action was independent of the others', some observers maintain the move was coordinated.

Japan

A development in 1982 which was pregnant with far-reaching consequences was the possible Japanese rearmament plan. The ruling Japanese alliance brought about notable changes in the Japanese Constitution, which heretofore laid down that Japan would never wage war and would not have an army for war. The famous "peace" article in the Japanese Constitution was proposed to be dropped. Alongside, an accelerated stepping

Nakasone: A hawk on defence.

up in Japan's military spending took place. The Japanese military budget for fiscal year 1982 was 2.6 trillion yen (\$ 17 billion), which denoted a 7.6 per cent increase over that of the previous year. The military spending envisaged for 1983-87 approved by the Defence Council of Japan, provided for massive enhancement of the power of Japan's navy and air force, which would be expanded twice over and in some cases four times.

Japan's programme to strengthen its military received a further boost

when Yasuhiro Nakasone, a hawk on defence, took office as Premier in a surprisingly smooth transition of power after the abrupt resignation of Zenko Suzuki on October 12. While Nakasone's main task is to revitalise Japan's economy which ran aground during Suzuki's reign, he has also set about rebuilding Japan militarily. Nakasone is an assertive nationalist and sees the furtherance of Japan's national identity and interests as the prime task of the political leadership.

of firing duly elected Arab mayors and town councillors on the suspicion that they were in league with the Palestine Liberation Organisation (PLO).

The Israelis, in fact, were looking for a showdown with the PLO from the beginning of the year. Around the time of the handing over of Sinai, some PLO bases in south Lebanon were bombed, in the first major violation of the July 1980 ceasefire. From early 1982, over 36,000 Israeli soldiers were massed up in northern Israel, and it was obvious that they were looking for an excuse to pour into southern Lebanon to uproot the Palestinians who had made a home there in the last few decades.

The excuse was provided when an Arab gunman shot down the Israeli Ambassador to Britain, Shlomo Argov. Israeli ground, air and sea forces attacked Lebanon to wipe out PLO hideouts and within a short while reached Beirut and laid a siege on the western sector where the Palestinians were concentrated. It is significant that except for Syria, no other Arab nation opposed Israel militarily. After many instances of broken ceasefires (by both sides), the PLO was forced to accept defeat.

The American special envoy, Philip Habib, pushed through a plan acceptable to the Israelis, and on August 21, Palestinians began to be evacuated from Beirut. The PLO guerrillas were scattered over eight different Arab countries.

This was not the end, however. In a replay of Armageddon, nearly a thousand unarmed Palestinians in the Lebanese refugee camps of Sabra and Shatila were massacred on the night of September 18. Although the Lebanese Christian militiamen, led by the Phalangists, were responsible for the massacre, the Israeli army was also tainted as it was responsible for the security of the camps and did nothing to stop the Phalangists, even though they were aware of the militiamen's plan. A formal state enquiry is still in progress in Israel.

Although the immediate crisis precipitated by the Israeli blitzkrieg is over, the long-term problem of establishing lasting peace still remains unsolved. There are two main plans in the air: an American one which calls, among other things, for West Bank autonomy linked with Jordan, and an Arab one

MIDDLE-EAST

Israeli-PLO Conflict

The year 1982 was eventful for West Asia—and all because of Israel. Much blood was shed, many were rendered homeless and a country was devastated by an Israeli blitzkrieg.

The year began with the issue of the return of Sinai to Egypt, as per the letter of the 1979 Camp David accord, very much in the forefront of Israeli politics. In mid-December 1981, however, Prime Minister Menachem Begin preempted any such peace moves by well meaning nations for the return of Golan Heights to Syria by annexing it. The region, which overlooks Israel's northern Galilee region, is of great strategic importance to the Jewish nation. In the Sinai, meanwhile, a movement called 'Stop the Sinai withdrawal' began. Its main aim was to oppose the return of Sinai by settling

An Israeli blitzkrieg. A Beirut building housing the PLO security forces under Israeli air attack

squatters all over the area. On April 25, however, Egypt regained possession of Sinai, which had been lost to Israel in 1967. The return, like the seizure, was effected by force. Israeli soldiers had to evict about 3,000 Israeli squatters and every building in the area was demolished before Sinai was handed back.

In the West Bank and Gaza, however, Israel continued to establish new settlements throughout the year. More and more Jews were settled in these areas and by the year end, land values had risen appreciably. The Arabs, attracted by the rising land prices, showed less reluctance to sell out to the Jews. The Palestinians in the area faced persecution at the hands of the Israelis, who followed a policy

pendent Palestinian state in the West Bank. Negotiations are on but a compromise is not yet in sight.

Israel came in for much censure in 1982 for its actions. The International Atomic Energy Agency (IAEA) rejected its credentials and there was a move in the UN General Assembly to oust it from that international body. Even President Reagan threatened to take stern action against the errant nation. He has been constantly asking Israel to withdraw its troops from Lebanon. The Begin administration faced massive opposition at home too, during and after the war.

Lebanon, bearing the brunt of the Israeli attack, was devastated. Politically, it saw the assassination of the President-elect, Bashir Gemayel, the right-wing Christian militia commander and the election of his brother, Amin, who has since been trying to put Lebanon on the path to recovery. This involves unifying the various groups in the country and bringing about a withdrawal of Israeli and Syrian troops from Lebanon.

Iran-Iraq War

The Iran-Iraq war continued sporadically through a major part of 1982. In the first week of May 1982, Iran gained success by registering victories against Iraq. In the north of Khorramshahr, Iranian troops captured the Iraqi strongholds on the west bank of the Karun River. In the 22-month-old war, this was Iran's major and decisive success. On April 30, Iran launched its offensive and its troops crossed over Karun River, captured key positions on the Akwaz-Khorramshahr Highway and took Hamid, a garrison town that the Iraqis had used as a rocket and artillery base.

The Iraqi defeat represented an astonishing military upset. Iraqi President Saddam Hussein sent his invasion forces into Iran on September 22, 1980 with the object of forcing Iran to recognise Iraqi sovereignty over the Shatt-al-Arab Waterway that divides the two countries and so lay claim to other disputed border territory.

As the war continued, Iraq faltered and failed to get the material support from its Arab brothers. The help of \$ 22 million by the oil Sheikdoms and the logistical support of Egypt and Jordan was not

enough. Syria, Libya and South Yemen went on to support Iran. Iran also had national unity and American weapons, purchased during the Shah's reign, along with the manpower.

As Iranian troops moved closer to Khorramshahr, Arab states of the Persian Gulf convened an emergency strategy session in Kuwait just 50 miles from the battlefield. Iran threatened Kuwait that with a weak military it would not be able to check the forces of Islam if Iran entered Kuwait.

It seemed, not long after, that the hostilities had ended. On August 4 the Iraqi Ambassador to Saudi Arabia, Shafiq-Al-Darraj, said in a press conference in Riyadh that the Iraqi President, Saddam Hussein, had accepted Iran's three terms for ending the 22-month-old Iran-Iraq war. The terms: withdrawal of Iraqi forces from Iranian territory; defining the side that provoked the conflict; and paying reparations to Iran. The fourth demand—the ouster of Hussein—was denied by the Iranian Foreign Minister Dr Velayati as ever having been one of their preconditions for ending hostilities. Nothing, however, was said about the status of the Shatt-al-Arab Waterway.

Hopes of peace were soon belied when reports of fresh fighting trickled in. The aggressor, this time, was Iran and the cause, according to Iranian Premier Hussein Mousavi, was the financial and military support being rendered to Iraq by some Gulf states. Reports of fresh fighting indicated a continuing stalemate on the ground with neither side making significant progress.

A fifth Iranian condition to halt the war—that Iraq allow Iranians volunteering to fight alongside the Palestinians in Lebanon to travel through Iraqi territory—was rejected by Iraq. On November 6, Iranian forces drove deep into Iraqi territory and captured Tib. All efforts to bring about peace, including a UN resolution calling for a ceasefire, were foiled by Iran. Clearly, the Iranians had no intention of stopping hostilities, determined as they were to see Hussein out of office.

Hussein, however, had no intention of yielding to Iran's demand and affirmed that Iraq would fight on indefinitely to secure its border and protect its independence.

INDIAN OCEAN

In the Indian Ocean, superpower rivalry mounted systematically, so much so that Indian Prime Minister Indira Gandhi preferred to call it a "zone of peril". What made the situation more complex was the fact that unlike the first cold war the present confrontation is not merely bipolar but also triangular. The US naval presence is only marginally directed against the Soviet Union but primarily concerned with ensuring the raw materials and oil supplies; not against the Soviet threat but against what Guy J Parker called "Third World trade unionism" in his authoritative study entitled *Military Implication Of A Possible World Order Crisis In The 1980s*. The Soviet presence is part response to the US presence and part to influence acquisition. This would explain why the US is not interested in pursuing the Indian Ocean or conventional arms transfer talks with the USSR. The rapid deployment force (RDF), the arms supplies to Saudi Arabia and Egypt, and the acquisition of bases in the Indian Ocean's littoral regions make some sense in a confrontation with the Soviet Union, though they do so much more in terms of combating "Third World trade unionism".

WESTERN EUROPE

Worldwide recession took its toll of European economies and by year end 10.5 per cent of West Europe's labour force was unemployed. The individual figures for various countries: West Germany—7.8 per cent, France—8.9 per cent, Britain—12.9 per cent and Italy—9 per cent. Inflation reached the level of 8.5 per cent, ranging from 4.5 per cent in West Germany to 16.5 per cent in Italy. In West Germany the growth rate declined by 2.5 per cent. However, *Time's* European Board of Economists, which held a "money summit" in December, felt that 1983 would be a better year and the economic recovery of West Europe would begin shortly.

In 1982, there was also the fear of a full-scale trade war between the US and the EEC over the issue of agricultural subsidies. Protectionist

pressures mounted in Europe at the time when the US opposed protectionism vehemently. West European countries were also opposed to American sanctions on the 3,600-mile Siberian natural gas pipeline which will link the Soviet Union with West Europe. The construction of the pipeline means billions of dollars for the hard pressed European economies in terms

an absolute majority in the national elections and the nation's first Socialist Prime Minister since the 1936-39 civil war, Felipe Gonzalez Marguez, came to power. In West Germany, Helmut Schmidt, the leader of the Social Democratic Party, was unseated, and Helmut Kohl, the leader of the conservative Christian Democratic Union, took

EASTERN EUROPE

Economically speaking, most East European countries stood dangerously overstretched. The fall in the prices of oil leading to a substantial decline in the value of OPEC deposits with Western banks combined with the reluctance of Western commercial lenders to extend credit to East European nations, contributed to the depressing situation. Two bright points were the restoration of IMF aid to Romania and the admission of Hungary—whose economic policies conform to those of the IMF—into that body.

Poland

Throughout 1982, Poland was under the martial law imposed by the head of the Polish Government, Gen Wojciech Jaruzelski, on December 12, 1981. A number of leaders of the independent trade union, Solidarity, other dissidents, intellectuals and members of the former regime were arrested and kept behind bars for the larger part of the year. Solidarity chief Lech Walesa was imprisoned for 11 months. Jaruzelski tried to justify the imposition of martial law as a move to foil a coup launched by reactionary forces.

His action, however, aroused much ire not merely at home but abroad too. The US imposed a cut-off of Poland's \$ 25 million in credit insurance at the US Exim Bank. American territorial waters were also made off-limits to Polish fishing vessels and the Polish national airlines' right to land in the US was suspended. Other West European nations, though much concerned, did not go so far as to impose sanctions.

Back in Poland, Solidarity continued to be defiant all through the year. In May and August, huge demonstrations were organised calling for an end to martial law and the release of political prisoners. Demonstrators often clashed with the militia and scenes of violence were seen in many Polish cities. Jaruzelski's government, however, took stern steps to put down the dissenters. On October 9, the Polish Parliament voted overwhelmingly to ban Solidarity, restrict the right to strike and limit future unions to the local level. All existing trade unions were abolished

(Continued on page 63)

of contracts, and they resented Reagan's hard-line stance. In fact, even the most loyal ally of the US, Britain, showed a readiness to defy the Americans on the issue.

Another divisive issue was the NATO plan to station 572 Pershing II and cruise missiles in Europe. The Labour Party in Norway almost carried through Parliament a measure intended to cut the country's monetary contribution to the Euro-missile project. Holland and Belgium had not agreed to accept the missiles on their soil by year end. In December, Spain announced that it was suspending its integration into the NATO military structure. Meanwhile, there was a resurgence of the peace movement in Europe.

In 1982, a number of governments changed hands in Europe.

Friends at odds: US sanctions on the Soviet gas pipeline were bitterly opposed by the West European countries.

over as the country's sixth Chancellor. In Italy Giovanni Spadolini's shaky government finally gave way to Amintore Fanfani, the leader of the Christian Democrats. In Holland and Belgium, right-centrist governments took over and in Ireland, incumbent Prime Minister Charles Haughey's Fianna Fail secured the most seats in the country's parliamentary elections, without gaining a majority. His government was, however, defeated in a confidence vote in Parliament. The changes in government were largely due to the worldwide economic recession and the failure of incumbent governments to deal with the problem.

PRACTICE TESTS

In preparing these tests we have tried to visualise the questions you are likely to face in your actual exam. Great care has been taken to frame questions which are of the same standard as those you'll encounter in your exam.

Rating: Evaluate your performance on the basis of the following score-card:

| | | |
|-----------------------------|---|-----------|
| 100 questions in 60 minutes | — | Excellent |
| 60 questions in 60 minutes | — | Good |
| 50 questions in 60 minutes | — | Fair |
| 35 questions in 60 minutes | — | Poor |

Tips: 1. Do not waste time over questions you are not sure about. 2. Give the problems some thought before choosing the answers. 3. Read the directions carefully before answering the questions. 4. Do not try to guess the answer.

TEST OF REASONING

BY LT COL I.R. MANCHANDA, former Dy President, S.S.B.

FOR MBA & BSRB (PO) EXAMS

This section forms an important part of the Probationary Officers (PO) exam conducted by the Banking Service Recruitment Boards (BSRBs), Delhi, Bombay and Bangalore and the M.B.A. Admission Test of the Faculty of Management Studies, Delhi University, to be held this month.

Time: 60 minutes.

Scores: 1. Give yourself one mark for each correct answer. 2. Deduct one mark for each wrong answer. 3. Then rate your score as under:

| | | |
|-----------------------|-----------------------|------------------|
| Excellent . . . 51-56 | Very Good . . . 46-50 | Good . . . 41-45 |
| Fair . . . 36-40 | Poor . . . Below 40 | |

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Answers are given at the end of this supplement.

- is the smallest
 - $\sqrt{15}$
 - $\frac{\sqrt{15}}{5}$
 - $\frac{5}{\sqrt{15}}$
 - $\frac{1}{\sqrt{15}}$
- If $4 = 10^{2m}$ and $9 = 10^{2n}$, 0.15 equals
 - 10^{2m-2n}
 - 10^{m+n-1}
 - 10^{n-m+1}
 - 10^{n-m-1}
- Two positive integers are in the ratio 2:5. If 4 is subtracted from each of these integers, the resulting numbers will be in the ratio
 - 2:3

- (b) 1:4
(c) 3:8
(d) Cannot be deduced
4. ---replaces the question mark.
2, 5, 10, 13, 39, 42, 168, 171, ?
(a) 174
(b) 513
(c) 855
(d) 1,026
5. The next number in the series
1, 3, 9, 10, 30, 90, 91, ? is
(a) 92
(b) 93
(c) 101
(d) 273
6. Pariah is to favourite as ostracism is to
(a) Climax
(b) Insolence
(c) Nepotism
(d) Precedent
7. Brush is to trowel as paint is to
(a) Banana
(b) Mortar
(c) Fruit
(d) Tree

Directions: Questions 8 to 15 are based on the letters O, P, Q, R, S, T, U, V and W, not necessarily in that order, which stand for nine consecutive integers from 1 to 12.

- (1) S is 3 less than Q and Q is the middle term
(2) W is as much less than O as O is greater than S
(3) O is as much greater than Q as T is less than P
(4) P is as much greater than O as U is less than Q
(5) R is greater than T
8. The sixth integer is
(a) O
(b) P
(c) Q
(d) R
9. If R stands for 11, the sum of O and U is
(a) 9
(b) 11
(c) 13

- (a) 15
10. The difference between the greatest possible value of T and the least possible value of S is
(a) 4
(b) 7
(c) 8
(d) 9
11. $T - V =$
(a) 2
(b) 3
(c) 4
(d) Cannot be deduced
12. If T stands for 10, what is the sum of all nine integers?
(a) 54
(b) 72
(c) 78
(d) None of the above
13. An integer Z is as much greater than T as S is less than P. Z is equal to $R + S$. What is W?
(a) 1
(b) 2
(c) 3
(d) 4
14. P is as much greater than Q as --- is less than V
(a) S
(b) U
(c) W
(d) V
15. How much greater than the greatest possible value of V is the smallest possible value of R?
(a) 1
(b) 2
(c) 4
(d) 8

Directions: Questions 16 to 19 are based on the following:

- (1) A 20-m high pole on one side of the 50-m wide Saraswati canal faces a 10-m high pole on the opposite bank
(2) There is a bird sitting on each of the two poles
(3) A fish appears on the surface of the water. The straight line passing through the poles

base and the fish is at right angles to the banks of the canal

- * (4) Assume the speed of both wind and water current is zero. Also assume the height of each pole as given in (1) is above ground level
16. How far must the fish be from the higher pole, if the two birds flying at identical speeds leave their respective perches simultaneously and reach the fish at the same time?
- 20 m
 - 22 m
 - 25 m
 - 26 m
17. Refer to question 16. Approximately how much distance does each bird fly before it gets to the fish?
- 25 m
 - 28 m
 - 30 m
 - Cannot be deduced
18. If the fish were equidistant from the two banks and the two birds leave the respective poles simultaneously and reach the fish at the same time, which one of the following statements must be true?
- The two birds have the same speed
 - The two birds fly an equal distance before they get to the fish
 - The speed of the bird on the 10-m high pole is less than that of the bird on the 20-m high pole
 - The speed of the bird on the 20-m high pole is less than that of the bird on the 10-m high pole
19. Refer to question 18. If the bird on the higher pole covers 41 m in a second, how much distance will the bird on the other pole cover approximately

in the same time?

- 31.4 m
 - 32.5 m
 - 33.5 m
 - 34.5 m
20. How much is $\frac{1}{4}$ of $\frac{x}{4}$?
- x
 - $1/x$
 - $x/16$
 - $4x$
21. What is $\frac{1}{5}$ of $\frac{x}{5}$?
- x
 - $1/x$
 - $1/25$
 - $25x$
22. P occurs only when Q occurs. Q has occurred. Therefore
- P must have occurred
 - P has not occurred
 - P may have occurred
 - None of the above
23. Based on the conversation between X and Y, state which one of the choices can be inferred.
- X: I just heard that Ram failed in the IAS exam.
- Y: Impossible! Ram was very witty.
- X knows Ram has failed in the IAS exam
 - X thinks Ram has failed in the IAS exam
 - Y thinks X is telling a lie
 - Y assumes no witty individual can fail in the IAS exam
24. The occurrence of P causes the occurrence of either Q or R. P has occurred. Therefore
- If Q has occurred, R must not have occurred
 - If R has occurred, Q must not have occurred
 - Both Q and R may have occurred
 - None of the above results can be deduced
25. If Ram lives on the first floor,

then Sham lives on the second. Sham does live on the second floor. Therefore

- (a) Ram lives on the first floor
 - (b) Ram does not live on the first floor
 - (c) Ram may or may not live on the first floor
 - (d) None of the above results can be deduced
- 26 Ram must be an athlete, he is over six feet tall. Which choice supports the above conclusion?
- (a) All athletes are over six feet tall
 - (b) Only those who are over six feet tall are athletes
 - (c) Only athletes are over six feet tall
 - (d) No persons other than those over six feet tall are athletes
- 27 If X is an editor, then he must be an intellectual. This statement can be deduced from
- (a) All intellectuals are editors
 - (b) Only editors are intellectuals
 - (c) Some editors are intellectuals
 - (d) None but the intellectuals are editors

Directions: Questions 28 to 30 are based on the following. (1) All Xs are philosophers; (2) No Ys are philosophers; (3) Some philosophers are doctors; (4) Some teachers are Xs; (5) Some doctors are Ys.

- 28 Which of the following must be true?
- (a) Some Xs are not teachers
 - (b) Some doctors are teachers
 - (c) Some Ys are not doctors
 - (d) Some teachers are philosophers
- 29 If all teachers are doctors, which of the following can be deduced?
- (a) Some Ys are teachers

- (b) All doctors are philosophers
- (c) Some Xs are doctors
- (d) Some Ys are Xs

- 30 If all women are Xs, which of the following must be false?
- (a) All women are doctors
 - (b) No women are philosophers
 - (c) All women are teachers
 - (d) No women are doctors

- 31 X is an opportunist. This conclusion can be logically deduced from which of the following statements?

- (a) The majority of the opportunists belong to Ram Desh; X belongs to Ram Desh
- (b) If X was not asked to join the Cabinet, then he is not an opportunist; X was asked to join the Cabinet
- (c) Everyone who is an opportunist pleases the head of the government, X pleases the head of the government
- (d) At all state functions, everyone who is not an opportunist is seated in one of the back rows; X is seated in the front row at all state functions

- 32 A merchant buys 4 $\frac{1}{2}$ tonnes of scrap at Rs 20 per kg. Assuming a 20 per cent wastage, at what price per kg must he sell it to earn a profit of 25 per cent?

- (a) Rs 25
- (b) Rs 26.25
- (c) Rs 31.20
- (d) Rs 31.25

- 33 At a party, everyone must shake the hand of the other. If the total number of handshakes is 66, there are --- people at the party

- (a) 9
- (b) 12
- (c) 15
- (d) 18

- 34 A contractor has 20 men who work eight hours a day to finish a piece of work in 28 days. At

the end of 18 days, only one-third of the work is done. He engages more men and all of them now work for nine hours a day. What is the least number of additional men that he must engage if the work is to be finished as scheduled?

- (a) 40
- (b) 44
- (c) 60
- (d) 64

35. If, in a map, south-east becomes north, south-west will become

- (a) West
- (b) East
- (c) South
- (d) South-east

36. If Brokerage is coded as Egarekobr, then Traveller would be coded as

- (a) Rellevart
- (b) Welrlvart
- (c) Rellevatr
- (d) None of the above

37. If Provided is coded as Rpvodide, then Suggestion would be coded as

- (a) Usseggitno
- (b) Usggseitno
- (c) Usegsgitno
- (d) Usgeseitno

38. If A=1, B=3, C=5, D=7 and so on, evaluate the following in figures.

- (a) Z
- (b) P-O
- (c) R-S
- (d) N-J

Directions: Questions 39 and 40 are based on the following: (1) "JIM RUM SUM" means "BRING COFFEE HERE"; (2) "SUM ROM AAM KAAM" means "BRING TEA FOR ME"; (3) "NAM KA RUM" means "WHAT IS HERE"; (4) "AAM BEE SEE" means "TEA WAS FINE"; (5) "MEAM FAM QUAM" means "I SAT THERE"

Note: The words in clear are not

necessarily in the same order as the words in code.

39. "COFFEE" in code is

- (a) RUM
- (b) SUM
- (c) AAM
- (d) JIM

40. "Tea" in code is

- (a) SUM
- (b) ROM
- (c) AAM
- (d) KAAM

41. Mercury is to Pluto as A is to

- (a) B
- (b) X
- (c) Y
- (d) Z

Directions: Questions 42 to 45 are to be answered on the basis of the information contained in the chart. The chart shows the plan outlay covering the period 1974-78.

42. During the period covered by the chart, in which year (compared with the previous year) was the plan outlay proportionately the largest?

- (a) 1974
- (b) 1975
- (c) 1976
- (d) 1978

43. The plan outlay in 1977 was approximately — per cent less than in 1976
 (a) 23.5
 (b) 25.4
 (c) 74.4
 (d) 76.4
44. The plan outlay in 1978 was approximately — per cent of that in 1977
 (a) 250
 (b) 251
 (c) 260
 (d) 261
45. What is the yearly average of the plan outlay for the period covered by the chart?
- (a) 405.5 crores
 (b) 425.5 crores
 (c) 445.5 crores
 (d) None of the above
46. If SEPARATE is coded as ESTEAPRA, how will you code VIOLENCE?
 (a) IVLONECE
 (b) EVCINEOL
 (c) IVCNELOE
 (d) EVCINOEL
47. If TISSUE is coded as TJSRUF, how will you code COFFEE?
 (a) CPFGEF
 (b) CPFEEF
 (c) COGEF
 (d) CNFGED

Directions: Questions 48 to 51 are based solely on the graph below, which shows oil imports by Blue Land during 1970-77. The figures are given in millions of tonnes.

48. In — there was a marked rise in oil imports.

- (a) 1973
- (b) 1974
- (c) 1975
- (d) None of the above

49. In — the percentage decrease in oil imports was the lowest.

- (a) 1971
- (b) 1976
- (c) 1977
- (d) None of the above

50. The percentage decrease in oil imports in 1976 when compared with oil imports in 1974 was most nearly

- (a) 23.6
- (b) 24.6
- (c) 25.6
- (d) 26.5

51. Assume that in 1978 and subsequent years oil imports were 10 per cent more than the average of oil imports during the preceding three years. Then, oil imports in 1980 would most nearly be — per cent of the oil imports in 1973

- (a) 100
- (b) 105
- (c) 109
- (d) 114

Directions: Questions 52 to 56 are based on the following five words (1) LIMERICK (2) OBDURATE (3) LANTERN (4) ZEPHYR (5) MAGNILOQUENCE. According to the instructions given in each question use the letters of the words and form a meaningful word. Your answer should be the alternative which gives the last letter of the new word so formed

52. Form a word using the second and fourth letters of the first word; the third letter of the second word; the second and

third letters of the third word; and the first letter of the fifth word.

- (a) A
- (b) D
- (c) M
- (d) N

53. Form a word using the second third and fifth letters of the first word, the third and eighth letters of the second word; the second and fourth letters of the third word; the first letter of the fourth word; and the second letter of the fifth word

- (a) D
- (b) M
- (c) E
- (d) T

54. Form a word using the second and fifth letters of the first word, the first, seventh and eighth letters of the second word, the fourth and sixth letters of the fourth word, and the twelfth letter of the fifth word

- (a) C
- (b) E
- (c) R
- (d) H

55. Form a word using the second and fifth letters of the first word, the first, fifth and seventh letters of the second word, and the second and fourth letters of the third word

- (a) R
- (b) T
- (c) A
- (d) O

56. Form a word using the fifth, seventh and eighth letters of the second word, the second and fourth letters of the third word; and the first letter of the fifth word

- (a) T
- (b) R
- (c) E
- (d) M

QUANTITATIVE APTITUDE

BY B. ARORA

FOR MBA & BSRB (PO) EXAMS

While this section goes as **QUANTITATIVE APTITUDE** in the PO exams of the BSRBs, it also figures in the M.B.A. Admission Tests.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. If $\frac{5}{7}$ of a number is 1,025, $\frac{3}{7}$ of the same number will be
 - (a) 410
 - (b) 615
 - (c) 645
 - (d) 735
2. A can do a piece of work in 12 days. Alongwith B, he can do the work in eight days. B alone can finish the work in——days.
 - (a) 10
 - (b) 15
 - (c) 18
 - (d) 24
3. The sum of five successive numbers is 100. The product of the first and the last number is —
 - (a) 246
 - (b) 282
 - (c) 396
 - (d) 484
4. Rs——becomes Rs 2,500 in four years at $6\frac{1}{4}$ per cent, simple interest.
 - (a) 1,500
 - (b) 1,800
 - (c) 2,000
 - (d) 2,200
5. Rs 2,000 at 5 per cent compound interest after four years will become nearly Rs
 - (a) 2,200
 - (b) 2,370
 - (c) 2,430
 - (d) 2,500
6. If Rs 1,200 yields Rs 594 as interest for six years at simple interest, the interest rate would be nearly——per cent.
 - (a) 6
 - (b) 7.25
 - (c) 8.25
 - (d) 9
7. A man buys a scooter for Rs 7,000 and sells it for Rs 11,500. The percentage profit is nearly——per cent.
 - (a) 54
 - (b) 58
 - (c) 64.3
 - (d) 70.6
8. A sphere of radius 10 cm is melted to form a cube of the same material. The side of the cube is nearly
 - (a) 10 cm
 - (b) 15 cm
 - (c) 16 cm
 - (d) 19 cm
9. The value of
$$\frac{3.8 \times 3.8 \times 3.8 + 1.2 \times 1.2 \times 1.2}{3.8 \times 3.8 + 1.44 - 3.8 \times 1.2}$$
is
 - (a) 3.4
 - (b) 5.0
 - (c) 5.8
 - (d) 6.2
10. A number is always divisible by 8 if
 - (a) Its last two digits as

- (b) It is even
(c) Its last three digits as a number are divisible by 8
(d) It ends in 8
11. A, B and C can do a piece of work in 15 days. A and B can do the same work in 24 days. C alone will do the work in—days.
(a) 36
(b) 39
(c) 40
(d) 48
12. A dealer marks his goods 20 per cent above his cost price. If he gives a discount of 10 per cent on his marked price, the profit he earns on his goods is—per cent.
(a) 7.5
(b) 8
(c) 10
(d) 12
13. The value of $\frac{5.293 \times 5.293 - 3.633 \times 3.633}{8.926}$ is
(a) 1.460
(b) 1.625
(c) 1.660
(d) 2.525
14. Three successive discounts of 10 per cent are equivalent to a single discount of—per cent
(a) 27.1
(b) 28.4
(c) 30
(d) 33.2
15. A tap fills a tank in eight hours. Two taps at the bottom of the tank can empty it in 15 and 20 hours respectively. If all the three taps are opened simultaneously, the tank will be full in—hours.
(a) 27
(b) 60
- (c) 120
(d) The tank will never fill
16. The value of $\frac{5^{363}}{5^{3+3+3}}$ is
(a) 1
(b) 5
(c) 5^3
(d) 5^{18}
17. The sum of two numbers is 8. If the numbers are in the ratio 3:1, their product is
(a) 10
(b) 12
(c) 15
(d) 18
18. A man sells a radio and a mixer for Rs 350 each. On one he gains 10 per cent and on the other loses 10 per cent on the whole. Thus he
(a) Neither gains nor loses
(b) Loses nearly 1 per cent
(c) Gains nearly 1 per cent
(d) Gains nearly 0.1 per cent
19. A 10-litre mixture of milk and water contains 30 per cent water. Two litres of this mixture is taken away. —litre of water should now be added so that the amount of milk in the mixture is double that of water.
(a) 0.4
(b) 0.7
(c) 0.8
(d) 1.4
20. The value of $\frac{1}{5+\sqrt{3}} + \frac{1}{5-\sqrt{3}}$ is
(a) 0.5
(b) 0.62
(c) $\frac{5}{11}$
(d) $\frac{5}{14}$
21. —three-figure numbers can be formed from the digits 2, 6, 3, 5, 1
(a) 24
(b) 44
(c) 60

22. The value of $\sqrt{117} \times 3\sqrt{13}$ is
 (a) $\frac{117}{\sqrt{3}}$
 (b) 117
 (c) $117\sqrt{3}$
 (d) 351
23. Two wires of radii 0.1 cm and 0.2 cm are of lengths 20 cm and 10 cm respectively. Their volumes are in the ratio
 (a) 1:1
 (b) 2:1
 (c) 1:4
 (d) 1:2
24. The width of a rectangle is 2 cm less than its length and its perimeter is 12 cm. The rectangle's area is
 (a) 6 cm²
 (b) 8 cm²
 (c) 12 cm²
 (d) 24 cm²
25. The length of a rectangle is increased by 2 cm and its width is decreased by 2 cm. The length of the diagonal of the rectangle (length > width)
 (a) Will increase
 (b) Will decrease
 (c) Will remain unchanged
 (d) Can increase or decrease depending upon the initial values of length and width
26. $2^3 2^{-6} + 2^{-3} 2^6$ is closest to
 (a) 1
 (b) 8
 (c) 34
 (d) 62
27. The expansion of $(x+3)^{19}$ will contain ——— terms
 (a) 18
 (b) 19
 (c) 20
 (d) 21
28. The missing term in the sequence 2, 7, 22, 67, ———, 607 is
 (a) 186

- (c) 248
 (d) 312
29. The next number in the sequence 2, 5, 28, 17, 126 is
 (a) 35
 (b) 37
 (c) 43
 (d) 217
30. A student loses a mark for every wrong answer and scores 2 marks for every correct answer. If he answers all the 60 questions in an exam and scores 39 marks, how many of them were correct?
 (a) 27
 (b) 31
 (c) 33
 (d) 37
31. The value of $\left[(-\frac{2}{7})^3\right]^{-2}$ is
 (a) $(\frac{2}{7})^6$
 (b) $(\frac{2}{7})^5$
 (c) $-\frac{2}{7}$
 (d) $(-\frac{2}{7})^{-6}$
32. The geometric mean of $a^{2n} \times b^{2n}$ is
 (a) $\frac{a^{2n} b^{2n}}{2}$
 (b) $\frac{a^{2n} + b^{2n}}{2}$
 (c) $(a b)^{2n}$
 (d) $a^n b^n$
33. The value of 91^2 is
 (a) 8,181
 (b) 8,241
 (c) 8,281
 (d) 8,431
34. The sum of all whole numbers from 1 to 50 is
 (a) 670
 (b) 1,275
 (c) 1,435
 (d) 1,442
35. The value of $64 \times 128 \times 512 \cdot 2^{-3}$ is
 (a) 2^{17}
 (b) 2^{19}
 (c) 2^{20}

- (a) 2--
36. Rakesh bought a TV priced at Rs 2,800. He was given two successive discounts of 10 and 5 per cent. If he had to pay 10 per cent sales tax, the net amount he paid was
 (a) Rs 2,592
 (b) Rs 2,612.60
 (c) Rs 2,633.40
 (d) Rs 2,660
37. Sohan purchased a horse for Rs 2,000 and sold it to Mohan at a loss of 10 per cent. Mohan sold it to Sham at a loss of 10 per cent while Sham sold it to Gopi at a gain of 10 per cent. The amount Gopi paid for it is nearly Rs
 (a) 1,782
 (b) 1,872
 (c) 1,890
 (d) 1,980
38. After a 22-per cent deduction, A's net salary is Rs 1,600. A's gross salary is nearly Rs
 (a) 2,025
 (b) 2,051
 (c) 2,078
 (d) 2,100
39. The expression $x^2 - 3x + 5$ has a minimum value for x equal to
 (a) Zero
 (b) 1.5
 (c) 2.4
 (d) 3.2
40. The minimum value of the expression $x^2 + 10x + 7$ is
 (a) -18
 (b) Zero
 (c) 7
 (d) None of the above
41. A man deposited Rs 1,000 in a bank for four years. If he gets a compound interest for the first two years at 10 per cent and for the next two years at 20 per cent, the amount he gets after four years will be nearly Rs
 (a) 1,468
 (b) 1,580
 (c) 1,742
 (d) 1,860
42. The unit digit in the product of $4,273 \times 7,564 \times 6,387 \times 2,465 \times 68$ is
 (a) Zero
 (b) 2
 (c) 7
 (d) 8
43. The value of the number $(4,629)^2 - (4,627)^2$ is
 (a) 16,642
 (b) 17,882
 (c) 18,512
 (d) 2,46,642
44. $\log_{10} \frac{1}{17} + \log_{10} 68$ is
 (a) $\log_{10} \frac{73}{17}$
 (b) $\log_{10} \frac{64}{17}$
 (c) $\log_{10} 68 \frac{1}{17}$
 (d) $\log_{10} 16$

FIGURE IT OUT

What is the missing number?

| | | | | | |
|---|---|---|---|---|---|
| 9 | 2 | 6 | 8 | 7 | 8 |
| 7 | 6 | 7 | 5 | 1 | ? |

Answer

8. (The second row is obtained by subtracting 1 from each digit in the first row and listing in reverse order).

SBI (PO) EXAM Dec '82

GENERAL AWARENESS

Questions published in this section appeared in the General Awareness paper of the PO Exam of the State Bank of India (December '82). These are based on the candidates' memory as they are not allowed to take their question papers out of the examination hall. We have compiled these questions as close to the original as possible. Hence, we take no responsibility for any discrepancies.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. In the 1982 Commonwealth Games held at Brisbane, the men's singles badminton gold was won by
 - (a) Prakash Padukone
 - (b) Syed Modi
 - (c) Nick Yates
 - (d) Sanjay Sharma
 - (e) None of the above
2. The captain of the team that won the Duleep Trophy in 1982 is
 - (a) Gavaskar
 - (b) Viswanath
 - (c) Kapil Dev
 - (d) Vengsarkar
 - (e) None of the above
3. Who said "The light has gone out of our lives"?
 - (a) Sardar Patel
 - (b) Swami Vivekananda
 - (c) Rabindranath Tagore
 - (d) Mahatma Gandhi
 - (e) None of the above
4. The Deodhar Trophy is associated with
 - (a) Hockey
 - (b) Football
 - (c) Badminton
 - (d) Lawn tennis
 - (e) Cricket
5. Former US Secretary of State and National Security Advisor Henry Kissinger has written the book
 - (a) *Crisis To Chaos*
 - (b) *Years Of Upheaval*
 - (c) *The World Of Cold War*
 - (d) *All The President's Men*
 - (e) None of the above
6. Who said, "At the stroke of midnight, when the world sleeps, India will wake to like and freedom"?
 - (a) Jawaharlal Nehru
 - (b) Mahatma Gandhi
 - (c) Lord Mountbatten
 - (d) S. Radhakrishnan
 - (e) None of the above
7. The Secretary of State under the Reagan administration is
 - (a) Allen Clark
 - (b) George Bush
 - (c) George Shultz
 - (d) Alexander Haig
 - (e) None of the above
8. Well-known journalist Arun Shourie is a recipient of the
 - (a) U Thant Award
 - (b) Padma Bhushan
 - (c) Jawaharlal Nehru Prize for International Understanding
 - (d) Ramon Magsaysay Award
 - (e) None of the above
9. The normal term of office of an American President is—

- years
- (a) 2
 - (b) 3
 - (c) 4
 - (d) 5
 - (e) 6
10. The present Governor of Tamil Nadu is
 - (a) Sadiq Ali
 - (b) P. Ramachandran
 - (c) Prabhudas Patwari
 - (d) S.L. Khurana
 - (e) Jagmohan
 11. Manmohan Singh was a/the — before he took charge as Governor of RBI.
 - (a) Member-Secretary in the Planning Commission
 - (b) Chairman of the Economic Administration Reforms Commission
 - (c) Economic Advisor in the Finance Ministry
 - (d) Chief Press Advisor to the Prime Minister
 - (e) None of the above
 12. The normal human heart beats — per minute.
 - (a) 60
 - (b) 72
 - (c) 74
 - (d) 84
 - (e) None of the above
 13. — is the universal recipient blood group.
 - (a) A
 - (b) B
 - (c) O
 - (d) AB
 - (e) There is no such blood group
 14. Brain drain means
 - (a) Brain fever
 - (b) Migration of talent
 - (c) Paucity of talent
 - (d) Lack of governmental interest in promoting science
 - (e) None of the above
 15. Which one of the following cities is paired correctly?

- (a) Kanpur—sugar
 - (b) Ahmedabad—textiles
 - (c) Bangalore—rubber
 - (d) Coimbatore—explosives
 - (e) Bombay—paper
16. The 1982 Asian Advertising Congress was held in
 - (a) Bombay
 - (b) Madras
 - (c) Calcutta
 - (d) New Delhi
 - (e) Bangalore

Ravi Bhatia

17. President Zail Singh underwent an operation at the Houston Hospital, Texas, for the treatment of a — ailment.
 - (a) Kidney
 - (b) Liver
 - (c) Lung
 - (d) Heart
 - (e) Brain
18. OPEC stands for
 - (a) Oil Producing and Exporting Countries
 - (b) Oil Producing and Energy Conserving Countries
 - (c) Organisation of Petroleum Exporting Countries
 - (d) Offshore Petroleum Exploration Consortium
 - (e) Organisation for Peaceful Exploration of Cosmos
19. India's Chief Election Commissioner is
 - (a) L K Jha

- (d) S.L. Shakunari
(c) R.K. Trivedi
(d) K.R. Puri
(e) None of the above
20. — is the specialisation in the field of skin diseases.
(a) Cardiology
(b) Dermatology
(c) Paleontology
(d) Pathology
(e) Demography
21. Genetic Engineering is a branch of
(a) Engineering
(b) Electronics
(c) Biology
(d) Atomic Physics
(e) None of the above
22. Fourth estate refers to
(a) Parliament
(b) The people
(c) The judiciary
(d) Education
(e) The press
23. Secularism means that
(a) The state recognises no religion
(b) The state will respect all religions equally
(c) There is no state religion
(d) All religions are state religions
(e) None of the above
24. Of the following Presidents — was also a Speaker of the Lok Sabha.
(a) Zakir Hussain
(b) S. Radhakrishnan
(c) Neelam Sanjiva Reddy
(d) V.V. Giri
(e) None of the above
25. The book *Asian Drama* has been written by
(a) Kuldeep Nayyar
(b) Alva Myrdal
(c) Gunnar Myrdal
(d) Leo Tolstoy
(e) V. S. Naipaul
26. In the 1982 Commonwealth Games India took the — position.
- (a) 1st
(b) 2nd
(c) 3rd
(d) 4th
(e) 6th
27. The Bihar Press Bill is being strongly opposed because
(a) It espouses press freedom
(b) Such a measure was never before adopted in India
(c) Foreign correspondents can be expelled from India without notice for adverse reporting

33. The Seventh Non-aligned Summit will be held in
(a) Baghdad
(b) Belgrade
(c) Colombo
(d) New Delhi
(e) None of the above
34. The Minister of Planning in the Union Cabinet is
(a) S.B. Chavan
(b) Shivraj Patil
(c) R. Venkataraman
(d) Kedar Pandey
(e) None of the above
35. ----- is a viral disease.
(a) Tuberculosis
(b) Pneumonia
(c) Cholera
(d) Cancer
(e) Smallpox
36. The James Bond film, -----, has been recently shot in India.
(a) *Man With The Golden Gun*
(b) *Moonraker*
(c) *For Your Eyes Only*
(d) *Octopussy*
(e) *Sea Wolves*
37. A Graham Bell invented the
(a) Television
(b) Telephone
(c) Teleprinter
(d) Electric bell
(e) None of the above
38. Among the following ----- is a noted English language writer
(a) Manohar Malgonkar
(b) N.T. Rama Rao
(c) Prabhoo Das
(d) C.D. Deshmukh
(e) P.L. Tandon
39. Which of the following is correctly paired?
(a) Ravi Shankar-----sarod

- (b) Ali Akbar Khan-----violin
(c) Hariprasad-----santoor
Chaurasia
(d) Shiv Kumar-----flute
(e) Zakir Hussain-----tabla
40. India has a-----economy.
(a) Socialistic
(b) Monopolistic
(c) Capitalistic
(d) Mixed
(e) None of the above

41. Helmut Kohl is the
(a) Chancellor of West Germany

(a) Swami Vivekananda
(b) Lord Mountbatten
(c) Mahatma Gandhi
(d) Jawaharlal Nehru
(e) Sir Winston Churchill
43. Who won the championship of the inaugural World Cup Badminton men's singles title held in Kuala Lumpur?
(a) Prakash Padukone
(b) Syed Modi
(c) Liem Swie King
(d) Mishun Sulek
(e) Han Jian

GENERAL KNOWLEDGE

FOR MBA, RBI OFFICERS, BSRB (PO)...

While this section goes as **GENERAL KNOWLEDGE** in the **RBI Officers & Stenographers'** exams and as **GENERAL AWARENESS** in the **BSRB (PO)** exam, it also figures in the **M.B.A. Admission Test of the Faculty of Management Studies, Delhi University**, all to be held this month.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. Yugoslavia celebrates its Republic Day on
 - (a) April 27
 - (b) July 28
 - (c) November 29
 - (d) December 30
2. According to the RBI report, in 1981-82 the economy registered a growth rate of—— per cent.
 - (a) 3.0
 - (b) 3.5
 - (c) 4.0
 - (d) 4.5
3. Foodgrain production in 1981-82 was——million tonnes.
 - (a) 102
 - (b) 127
 - (c) 132
 - (d) 147
4. Which bank first introduced the credit card?
 - (a) Andhra Bank
 - (b) Central Bank
 - (c) Canara Bank
 - (d) State Bank of India
5. The second largest nationalised bank in terms of deposits in 1981-82 was
 - (a) State Bank of India
 - (b) Central Bank
 - (c) Punjab National Bank
 - (d) Bank of India
6. The oldest credit card in India is
 - (a) Central Card
 - (b) Andhra Bank Card

- (c) Diners Club Card
 - (d) State Bank Card

 - (c) 10.5
 - (d) 11.0
 11. Aggregate deposits (time plus demand) with commercial banks in October 1982 were around Rs——crores.
 - (a) 45,000
 - (b) 47,000
 - (c) 49,000
 - (d) 51,000
 12. The——industry showed an increase in production during January-September 1982.
 - (a) Cotton yarn
 - (b) Tractor
 - (c) Soda ash
 - (d) Motorcycle
 13. Archery was first included in the——Asiad.
 - (a) 5th
 - (b) 6th
 - (c) 7th
 - (d) 8th
 14. The Durand Cup was started in 1888 at
 - (a) Simla
 - (b) Delhi
 - (c) Calcutta
 - (d) Kanpur
 15. Which golf club is considered to be the home of golf in India?
 - (a) Delhi
 - (b) Bombay
 - (c) Calcutta
 - (d) Madras
- was not included in the 1978 Bangkok Asiad.
- (a) Shooting
 - (b) Yachting
 - (c) Rowing
 - (d) Golf
17. The first mint of the East India Company in India was established in
 - (a) Bombay
 - (b) Madras
 - (c) Calcutta
 - (d) Nagpur
 18. The Indian delegation to the Dr Kotnis memorial function (China) was cancelled because
 - (a) China refused visas to certain members of the delegation
 - (b) China allegedly supplied nuclear fuel to Pakistan
 - (c) Evidence indicated that China maintains clandestine links with segregationist South Africa

 19. In——the US President and Vice-President belonged to different parties.
 - (a) 1797
 - (b) 1857
 - (c) 1897
 - (d) 1957
 20. The country traditionally known for archery is
 - (a) India
 - (b) North Korea
 - (c) South Korea
 - (d) Japan
 21. Two Soviet cosmonauts Anatoly Berezovoy and Valentin Lebedev established a new endurance record for remaining in space for——days.
 - (a) 210
 - (b) 211
 - (c) 212

- (d) 213
22. ———per cent of India's irrigable area has so far benefited by the irrigation potential created.
 (a) 45
 (b) 49
 (c) 51
 (d) 54
23. ———per cent of India's total exports are made to East Europe and the Soviet Union.
 (a) 14
 (b) 19
 (c) 24
 (d) 28
24. The 1981 Borlaug Award was given to
 (a) B.P. Pal
 (b) H.K. Jain
 (c) A.K. Sen
 (d) R.K. Jain

25. Huang Hua is China's
 (a) Former Premier
 (b) Chairman
 (c) Former Foreign Minister
 (d) Foreign Minister
26. Official bidding for hosting Olympics is done ———years before the Games.
 (a) 6

- (b) 7
 (c) 8
 (d) 9
27. A mechanical heart was fitted in a man in Salt Lake City, Utah, USA, in early December 1982. The person is
 (a) Chase Peterson
 (b) Barney Clark
 (c) David Clark
 (d) Barry Peterson
28. The deficiency of Vitamin—— is an important cause of preventable blindness.
 (a) A
 (b) B
 (c) C
 (d) E
29. The football match between North Korea and Saudi Arabia during the IX Asiad was cancelled because
 (a) The North Korean team assaulted the referee
 (b) The Saudi Arabian team assaulted the referee
 (c) The North Korean team did not turn up
 (d) The Saudi Arabian team walked out
30. The President of—— was killed by his soldiers while witnessing a parade in 1981.
 (a) Bangladesh
 (b) Egypt
 (c) Iran
 (d) Uganda
31. The seventh Orissa state films Best Director's Award was won by
 (a) Sarat Pujari
 (b) Anita Das
 (c) Bishwanath Misra
 (d) Prasanta Nanda
32. The US House of Representatives turned down a proposal of President Ronald Reagan in early December 1982. It pertained to
 (a) Supply of arms to friendly countries

- (c) Stopping of nuclear fuel supply to allies who had not signed the NPT
(d) Giving economic aid to LDCs
33. The OAU is an organisation of _____ nations.
(a) Asian
(b) African
(c) Arab
(d) American
34. The new national tennis champion is
(a) Nandan Bal
(b) Jayakumar Royappa
(c) S. Vasudevan
(d) Ramesh Krishnan
35. The NATO command headquarters in Europe is in
(a) Great Britain
(b) France
(c) West Germany
(d) Italy
36. _____ is not a member of the ASEAN.
(a) Malaysia
(b) Thailand
(c) Philippines
(d) Sri Lanka
37. Dr Mahathir is the Prime Minister of
(a) Malaysia
(b) Thailand
(c) Philippines
(d) Sri Lanka
38. Bhumibol Adulyadej is the King of
(a) Malaysia
(b) Thailand
(c) Kampuchea
(d) Indonesia
39. Bangladesh has officially recognised the government of
(a) Democratic Kampuchea
(b) Israel
(c) China
(d) Vietnam
40. Who has said "Flogging is a legacy of the British"?
- (a) Col. Muammar Gaddafi
(b) Gen Zia-ul-Haq
(c) Idi Amin
(d) Pieter Botha

(a) 15 lakh
(b) 50 lakh
(c) 10 crore
(d) 25 crore
47. In India there is one eye doctor for every _____ persons.
(a) 10,000
(b) 1,00,000
(c) 10,00,000
(d) 10,000,000

GENERAL ENGLISH

BY SURE KAMAL BAO

FOR RBI OFFICERS, BSRB (PO), MBA...

This section is designed to help those appearing in the M.B.A. Admission tests and RBI Officers, BSRB (PO) and Stenographers' exams.

READING COMPREHENSION

1 Read the following passage carefully and answer the questions that follow.

1. Language is one of the most important and characteristic forms of human behaviour. 2 It has, accordingly, always had a place in the academic world. 3. In recent years, however, its position has changed greatly. at one time the study of language was almost entirely restricted to specific languages, primarily those of Western Europe and classical antiquity, over the last few generations a much broader consideration of language has taken place at the side of the study of individual languages.

4. As each of the social sciences has developed, it has encountered problems within its domain. 5. Psychology, sociology, and anthropology have each investigated language both as a type of human activity and as a system interacting with personality, society, or culture. 6 Language has intruded even upon technological problems, and engineers have found themselves driven to basic research on human speech. 7. Today, as a result, we have well-established techniques for the study of language from a number of different points of view. 8. Each of these techniques supplements all the others in contributing to theoretical knowledge and the practical problems of the day.

9. One approach has, however, received little attention until very recently: descriptive linguistics, the discipline which studies languages in terms of their internal structures. 10 It differs from the other approaches in that it focuses its attention on different facets of human speech. 11. The common general subject matter and its special competence to handle certain types of problems bring it into important relationships with many other disciplines.

- 1 The first paragraph traces the growth of
 - (a) language as a whole
 - (b) interest in individual languages
 - (c) linguistic sciences
 - (d) forms of human behaviour
2. 'Academic world' in sentence 2 refers to the world of
 - (a) academies
 - (b) academicians
 - (c) learning
 - (d) learned men
- 3 Antiquity means the quality of being
 - (a) ancient
 - (b) academic
 - (c) heavy
 - (d) old
4. The phrase 'restricted to' in sentence 3 can be replaced by
 - (a) limited by
 - (b) related to
 - (c) limitations for
 - (d) limited to
5. 'Encountered' in sentence 4 means

- (b) faced
(c) fought
(d) defeated
6. The three sciences referred to in sentence 5 are called
(a) social studies
(b) humanities
(c) behavioural sciences
(d) biosciences
7. Engineers are driven to basic research in human speech because language
(a) has become a technological problem
(b) has extended into technology also
(c) interfered with technological innovations
(d) interfered with a part of our technology
8. The phrase 'Each of these techniques' in sentence 8 is grammatical because
(a) the verb is in agreement with the subject
(b) the noun agrees with the verb
(c) the verb and the noun are equal
(d) the noun and the verb are in concord
9. 'Descriptive linguistics' in sentence 9, according to the writer.
(a) had not received attention till recently
(b) had received full attention in the past
(c) has not received the attention it deserves
(d) receives little attention these days
10. The science of descriptive linguistics is concerned mainly with the
(a) description of language
(b) description of the alphabet
(c) description of human speech
(d) description of language symbols

SPOT THE ODD ONE

II Find the odd word out.

1. COMPACT

- (a) agreement
(b) contract
(c) briefcase
(d) covenant

2. ENGENDER

- (a) hate
(b) generate
(c) breed
(d) cause

3. FETID

- (a) stinking
(b) foul
(c) virtuous
(d) corrupt

4. HAZARD

- (a) mountain
(b) risk
(c) danger
(d) adventure

5. IMMUTABLE

- (a) malleable
(b) changeless
(c) fixed
(d) unalterable

WORD SUBSTITUTION

III In the following sentences the italicised phrases can be replaced by a single word. Choose the appropriate word:

1. It was a *huge and heavy* structure.

- (a) stupendous
(b) massive
(c) mountainous
(d) unwieldy

2. The *people who lent him money* filed a suit against him.

- (a) speculators
(b) creditors
(c) debtors
(d) lawyers

3. Some fruits are not *fit to be eaten*.

- (a) inedible
(b) digestible
(c) edible
(d) tasty

4. The *continual rise and fall* of prices is owing to an unsteady supply position.
 - (a) stability
 - (b) variation
 - (c) fluctuation
 - (d) inflation
5. The minister is finalising his *schedule of travel*.
 - (a) catalogue
 - (b) itinerary
 - (c) travelogue
 - (d) programme

USAGE

IV Choose the *correct* sentence in each of the sets given below:

1. (a) He walked for two and a half hours.
 (b) He came here by walk.
 (c) He entered into the room quickly
 (d) He found the room is empty.
2. (a) We discussed about the matter in the last meeting.
 (b) It has been raining hard for the last two hours
 (c) These medicines will help to cure the wounds
 (d) He abstained for taking food
3. (a) I was only 10 years when my parents died.
 (b) We had the pleasure of hearing him speak.
 (c) He neither cuts obscene jokes nor stupid jokes.
 (d) They say he died with cholera
4. (a) This scissor is useless
 (b) He died from starvation.
 (c) I cannot be able to lift this weight.
 (d) This toy is made of plastic.
5. (a) The sceneries in Ladakh are nice
 (b) Population explosion is a burning problem
 (c) I and he are good

friends.

- (d) The Ganges is a sacred river to the Hindus.

ERRORS

V Find out the *wrong* sentence in each of the sets given below:

1. (a) Much water has flowed under the bridge.
 (b) He goes to bed early.
 (c) Breads are sold here.
 (d) The serial begins in July.
2. (a) I have fever besides cold.
 (b) Children should rise early in the morning.
 (c) It is no use repeating the experiment
 (d) They paid no attention to my words.
3. (a) He has been laid up with fever since the 20th.
 (b) Nangia is angry with me.
 (c) Please write your answers in ink
 (d) I told him what all I know.
4. (a) This wine is made from grapes.
 (b) He made a long speech.
 (c) Yadav asked me where I was going
 (d) This resembles to that.
5. (a) Don't make noise.
 (b) I have a cold
 (c) He did nothing but weep.
 (d) She gave up singing.

ANTONYMS

VI Select the word which is nearly the opposite in meaning to the given word:

1. ENHANCE
 - (a) increase
 - (b) improve
 - (c) reduce
 - (d) heighten
2. JUDICIOUS
 - (a) indiscreet
 - (b) prudent
 - (c) wise

3. MYTH

- (a) legend
- (b) fable
- (c) fact
- (d) data

4. PROFANE

- (a) irreverent
- (b) holy
- (c) impious
- (d) base

5. RAMPANT

- (a) vehement
- (b) aggressive
- (c) headstrong
- (d) calm

SYNONYMS

VII Select the word which is nearly the same in meaning to the given word:

1. NAUGHTY

- (a) bad

(b) good

- (c) mischievous
- (d) well-behaved

2. PERTURBATION

- (a) composure
- (b) agitation
- (c) vexation
- (d) relaxation

3. RAPID

- (a) slow
- (b) tardy
- (c) dull
- (d) swift

4. SATIRICAL

- (a) pungent
- (b) genial
- (c) sarcastic
- (d) poignant

5. TURPITUDE

- (a) nobility
- (b) baseness
- (c) guilt
- (d) worthiness

DID YOU KNOW THAT ..

* by June '81 end 17 foreign banks were operating in India?

* bank rate in India is 10 per cent compared to 9.5 per cent in France, 7.5 per cent in West Germany and 5.5 per cent in Japan?

* as much as Rs 30 crores were paid as overtime to bank employees in 1980?

* profitability of nationalised banks has gone down from 16 paise in 1970 to 14 paise in 1980 on every hundred rupees of banking business?

* between the last Fridays of 1980-81 the banking system recorded a growth rate of 17.7 per cent in deposits?

* deposits of the SBI, its associates and 20 nationalised banks constitute 91 per cent of the total deposits of the banking industry?

* the deposits are expected to grow to over Rs 60,000 crores by '85

end?

* the deposit growth of banking industry during the year 1981-82 was to the tune of Rs 5,762 crores (15.2 per cent) as compared to Rs 6,229 crores (19.6) in the previous year 1980-81?

* the per capita deposit in June 1969 was Rs 86 which has gone up to Rs 575 by June '80 end?

* banks are expected to spend Rs 15,000 crores on the priority sector by the year 1985?

* as much as Rs 1,324.47 crores of the banking institutions were locked up in sick units as on December 1980?

* within one decade of bank nationalisation, branches increased by more than three times, business by about six and bank-employment by two-and-a-half times?

V K Nangia

ANSWER KEY

TEST OF REASONING

1. (d), i.e., $\frac{1}{\sqrt{15}} \cdot \frac{1}{\sqrt{15}}$ is the same as $\frac{\sqrt{15}}{15}$.
 2. (d), i.e., 10^{n-m-1} .
 $4=10^{2m}$ implies $2=10^m$, and $9=10^{2n}$ means $3=10^n$. In other words $0.15 = \frac{15}{100} = \frac{3}{20} = \frac{3}{2 \times 10} = \frac{10^n}{10^m \times 10} = \frac{10^n}{10^{m+1}}$.
 3. (d), i.e., nothing definite can be deduced. We will get different results depending on the value of the original integers.
 4. (c), i.e., 855. The pattern of the series is : $2+3=5$, $5 \times 2=10$; $10+3=13$, $13 \times 3=39$; $39+3=42$, $42 \times 4=168$; $168+3=171$. Therefore, 171 should be multiplied with 5 to get the next number.
 5. (d), i.e., 273. The series' pattern is $1 \times 3=3$; $3 \times 3=9$; $9+1=10$; $10 \times 3=30$; $30 \times 3=90$; $90+1=91$. The next number should, therefore, be three times 91.
 6. (c), i.e., nepotism. Pariah means a social outcast. Ostracism, which means exclusion from society, is related to pariah in the same way as nepotism (which means favouritism to relatives, especially in conferring offices) is to favourite.
 7. (b), i.e., mortar. Brush is used for painting and trowel, a flat-bladed tool, is used for spreading cement/mortar.
- Hint:** Questions 8 to 15 can be answered only when you have fixed the position of each of the letters O to W. The first statement gives us the following pattern: -S--Q----. From the second statement we can deduce that W can occupy either the first or the third or the fourth place. Correspondingly O could occupy either the sixth, the fourth or the third place. Since the third statement states that O is greater than Q, O has to occupy the sixth place and correspondingly W must occupy the first place giving us the pattern WS--QO---. Further, since O is as much greater than Q as T is less than P, T and P could respectively occupy either the third and the fourth places or the seventh and the eighth places or the eighth and the ninth places.
- T and P cannot occupy the third and the fourth places since, according to the fourth statement, U has to be accommodated at one of these places. T and P cannot occupy the eighth and the ninth places either since this shall leave no place for R which, according to the fifth statement, is greater than T. This means that T and P must occupy the seventh and the eighth places respectively; also R must be at the ninth place. In the light of the above and the fourth statement, U has to occupy the third place, thus leaving the fourth place to V. From the above discussion emerges the following picture: W S U V Q O T P R.
8. (a), i.e., O.
 9. (c), i.e., 13.
 10. (c), i.e., 8. T will have the greatest value when the letters stand for the integers 4 to 12, in which case T will be equal to 10. S will have the smallest value when integers 1 to 9 are taken, in which case $S=2$.

- (b), i.e., 3. Irrespective of the integers for which these letters stand, once the position of each letter is relatively fixed, we can say $T - V$ will always equal 3.
12. (b), i.e., 72. If $T = 10$, W and R must equal 4 and 12 respectively. Since the integers are consecutive, they form an arithmetical progression. Their sum would, therefore, equal $\frac{1}{2}(4 + 12)$, i.e., 72.
13. (c), i.e., 3. According to the pattern, S is 6 less than P . This means Z is 6 more than T . If Z is 6 more than T , it must be 4 more than R . In other words $Z = R + 4$. Since $Z = R + S$, as given in the question, $R + S$ must equal $R + 4$. In other words S must equal 4. If S is 4, W has to be 3.

14. (c), i.e., W .

15. (b), i.e., 2. R will be smallest, i.e., 9 when integers 1 to 9 are taken. S will be the greatest, i.e., 7 when integers 4 to 12 are taken. A rough diagram as shown below will help solve questions 16 to 19 speedily.

Pole $AB = 20$ m.

Pole $CD = 10$ m.

F represents the position of the fish
 x m from the higher pole and $(50 - x)$
 m from the other.

16. (b), i.e., 22 m. Speeds being equal, both birds must cover equal distances. In other words $(20)^2 + x^2$ must equal $(10)^2 + (50 - x)^2$. $400 + x^2 = 100 + 2,500 + x^2 - 100x$, i.e., $100x = 2,200$. This gives $x = 22$ m.

17. (c), i.e., approximately 30 m. If $x = 22$ m then $AF = CF$ must equal $\sqrt{(20)^2 + (22)^2}$ or $\sqrt{(28)^2 + (10)^2}$, both of which work out to $\sqrt{884}$, which is approximately 30 m.

18. (c), i.e., the speed of the bird on the 10-m-high pole is less than that of the bird on the other pole. If the fish is equidistant from both the poles, it must be 25 m from the foot of each of these two poles. The bird on the higher pole, therefore, covers $\sqrt{(20)^2 + (25)^2}$, i.e., $\sqrt{1025} = 5\sqrt{41}$ m, while the bird on the 10-m-high pole covers $\sqrt{(10)^2 + (25)^2}$, i.e., $\sqrt{725} = 5\sqrt{29}$ m.

Since they cover these distances in the same time, the speed of the bird covering a shorter distance will be less than that covering a greater distance.

19. (d), i.e., 34.5 m. Using the information obtained in answer 18, we can say that the bird on the 10-m-high pole will cover $\frac{5\sqrt{29}}{5\sqrt{41}} \times 41$ m in 1 second. This works out to $\sqrt{29} \times 41$ m, which is equal to 34.5 m approximately.

20. (c), i.e., $\frac{x}{16}$. "How much" means $\frac{1}{4} \times \frac{x}{4}$.

21. (b), i.e., $\frac{1}{x}$. This question implies: What part of $\frac{x}{5}$ is $\frac{1}{5}$. In other words, $? \times \frac{x}{5} = \frac{1}{5}$. Understand clearly the difference bet-

ween "how much" and "what is".

22. (c), i.e., P may have occurred. The opening statement means that all cases of P are cases of Q. It does not, however, mean that all cases of Q are cases of P. You cannot affirm the antecedent by affirming the consequent.
23. (d), i.e., Y assumes that no witty individual can fail in the IAS exam. Choices (a), (b) and (c) are incorrect since X has only reported what he has heard.
24. (c), i.e., both Q and R may have occurred. When we say either Q or R, it only means that at least one of the two must be true. It, however, does not preclude the possibility of both being true at the same time.
25. (c), i.e., Ram may or may not live on the first floor. If A, then B does not necessarily mean if B, then A. You cannot affirm the antecedent by affirming the consequent as explained in answer 22.
26. (c), i.e., only athletes are over six feet tall. Choice (a) is incorrect since it does not mean that all persons over six feet tall are athletes. Choice (b) is incorrect since "only those" does not mean "all those". Choice (d) is incorrect since it only means that all athletes are over six feet tall. Choice (d) implies that all those who are over six feet tall are athletes.
27. (d), i.e., none but the intellectuals are editors, since this means the same as "all editors are intellectuals". Choice (a) is incorrect since from it, we can only deduce that some editors are intellectuals. Choice (b) is not correct since it does not mean that all editors are intellectuals. Choice (c) is obviously incorrect.
28. (d), i.e., some teachers are philosophers. Choice (a) is not correct. Statement (4) implies that some Xs are teachers. Since, in logical reasoning, some also means 'perhaps all', we cannot say with certainty if choice (a) will be true. There is no positive evidence to support choice (b). For the same reasons as for choice (a), we cannot be certain of the truth of choice (c). Choice (d) is correct in the light of statements (1) and (4).
29. (c), i.e., some Xs are doctors. This can be deduced from the statement given in this question and statement (4). The following diagram illustrates this

30. (b), i.e., the statement "no women are philosophers" must be false. Since all women are Xs (as given in the question) and all Xs are philosophers (statement 1), we can deduce for certain that all women are philosophers. To say that no women are philosophers would be contrary to this conclusion and hence false. The

Following diagram clearly indicates that choice (D) must be false.

31. (d), i.e., at all state functions, everyone who is not an opportunist is seated in one of the back rows; X is seated in the front row at all state functions. This choice implies "if A, then B". 'A' stands for "all those who are not opportunists" and 'B' stands for "are seated in one of the back rows". If X is seated in the front row, it means he is not seated in one of the back rows. If A, then B means "not B, then not A". In other words, you can negate the antecedent by negating the consequent. Choice (a) is not correct since it does not mean that all those who belong to Ram Dosh are opportunists. Choice (b) is wrong because you cannot negate the consequent by negating the antecedent, i.e., if A, then B does not mean—if not A, then not B. Choice (c) is incorrect since it does not mean that all those who please the head of the government are opportunists.
32. (d), i.e., Rs 31.25 per kg. Since the wastage is 20 per cent, $\frac{4}{5}$ kg of saleable scrap costs the merchant Rs 20. In order to make a profit of 25 per cent, he must sell $\frac{4}{5}$ kg of saleable scrap for Rs 25. Therefore, he must sell a kg of saleable scrap for $25 \times \frac{5}{4} = \frac{125}{4} = 31.25$. Irrespective of the quantity of scrap involved, the answer would be the same.
33. (b), i.e., 12. Assume the number of persons is x. The first person will shake hands with (x-1) persons, the second with (x-2) persons, having already shaken hands with the first, the third with (x-3) persons and so on. The xth man will, therefore, shake hands with (x-x), i.e., none, having already shaken hands with everyone. This amounts to a series in arithmetical progression, the first term of which is (x-1) and the xth term 0. Therefore, 66 must equal $\frac{x}{2} (x-1+0)$. This is possible only if x equals 12.
34. (b), i.e., 44 men. Since in 18 days, 20 men working eight hours a day have finished only $\frac{1}{3}$ of the work, it will take them 36 days to finish the remaining work, i.e., $\frac{2}{3}$ of the work, if they proceed as before. In other words, the work involved is equal to $20 \times 36 \times 8$ man hours. In order to finish the work by the specified time, i.e., in the next 10 days working nine hours a day, we must have

$$\frac{20 \times 36 \times 8}{10 \times 9}$$

men or 64 men. So the contractor must employ 44 additional men.

35. (b), i.e., East. The following diagram will help. The letters in brackets indicate the changed directions once South-east becomes North.

36. (c), i.e., Rellevati. The coded word is obtained by reversing the sequence of the letters of the word in clear except that the first two letters of the word (in clear), though put last, do not change their positions relative to each other.
37. (b), i.e., Usggseitno. The letters of the word in clear change places to get the coded word according to the following pattern: Su becomes Us; gg remains the same; es becomes se; ti becomes it; and on becomes no.
38. (a) $Z=51$ (b) $P-0=31-29=2$ (c) $R \times S=35 \times 37=1,295$ (d) $N-J=27-19=8$. Self-explanatory.
39. (d), i.e. "JIM". From statements (1) and (2), we can conclude that "BRING" in code is "SUM". Statements (1) and (3) give us that "HERE" in code is "RUM". Therefore "COFFEE" in code must be "JIM".
40. (c), i.e., AAM. Statements (2) and (4) give us the answer.
41. (d), i.e., Z. In the solar system, Mercury comes first and Pluto last. A and Z are placed similarly in the alphabet.
42. (d), i.e., 1978. Mark the words proportionately. The plan outlay more than doubled in 1979 vis-a-vis the plan outlay in 1977.
43. (d), i.e., 76.4. $\frac{852.5-201}{852.5} \times 100 = 76.4$. Alternatively one could find out 201 crores is what per cent of 852.5 crores. This comes to approximately 23.6 per cent, which amounts to saying that the plan outlay was (100-23.6) per cent less than in 1976.
44. (d), i.e., 261. $\frac{524.6}{201} \times 100$ will give 261 per cent approximately.
45. (c), i.e., 445.5 crores.
46. (d), i.e., EVCINOEL. Self-explanatory.
47. (b), i.e., CPFEEF. No change in the letters at odd places. The letters at even places move in this pattern: the first letter—one place forward; the second letter—one place backward and the third—one place forward.
48. (a), i.e., 1973. Self-explanatory.
49. (c), i.e., 1977. Self-explanatory.
50. (b), i.e., 24.6. Note that the figures of 1976 are being compared with

those of 1977 and 1976. $\frac{110}{100} \times 193.6 = 213$

approximately.

51. (c), i.e., 109 per cent. In 1978, oil imports will be 110 per cent of the average of oil imports in 1977, 1976 and 1975, i.e., $\frac{110}{100} \times \frac{193.6}{3} = 70.9$ million tonnes approximately. In 1979, oil imports will be 110 per cent of the average of oil imports in 1978, 1977 and 1976, which equals $\frac{110}{100} \times \frac{170}{3} = 62.3$ million tonnes approximately. In 1980, the oil imports would be $\frac{110}{100} \times \frac{178.5}{3} = 65.5$ million tonnes approximately. This figure is $\left(\frac{65.5}{60} \times 100\right)$ per cent of the oil imports in 1973, since oil imports in 1973 were 60 million tonnes. This works out to approximately 109 per cent.
52. (d), i.e., N—the last letter in MAIDEN.
53. (c), i.e., E—the last letter in DRAMATISE
54. (a), i.e., C—the last letter in RHETORIC.
55. (a), i.e., R—the last letter in TRAITOR
56. (b), i.e., R—the last letter in MATTER

QUANTITATIVE APTITUDE

- (b) The required number is $\frac{3}{4}$ of 1,025, which is 615
- (d) A's one day's work = $\frac{1}{12}$. A's and B's one day's work = $\frac{1}{8}$. Therefore, B's one day's work = $\frac{1}{8} - \frac{1}{12} = \frac{1}{24}$. Hence B alone would do it in 24 days
- (c) Let the numbers be $x-2$, $x-1$, x , $x+1$, $x+2$. Then $5x=100$ or $x=20$. The required product is $18 \times 22 = 396$.
- (c) Amount = Principal + Interest = Principal $\left(1 + \frac{\text{Rate} \times \text{Time}}{100}\right)$.
 $2,500 = \text{Principal} \left(1 + \frac{25}{4} \times \frac{4}{100}\right) = \text{Principal} (1.25)$.
Hence, Principal = $\frac{2,500}{1.25} = 2,000$.
- (c) Amount = Principal $\left(1 + \frac{\text{Rate}}{100}\right)^{\text{Time}}$, Time = 2,000 $(1.05)^4 = 2,431.01$.
- (c) Rate = $\frac{\text{Interest} \times 100}{\text{Principal} \times \text{time}} = \frac{594 \times 100}{1,200 \times 6} = 8.25$.
- (c) Percentage profit = $\frac{4,500}{7,000} \times 100 = 64.3$.
- (c) Volume of the sphere = $\frac{4}{3} \pi R^3 = \text{Volume of the cube} = L^3$.
Therefore, $L^3 = \left(\frac{4}{3} \pi R^3\right) = \left(\frac{4}{3} \times \frac{22}{7} \times 1000\right)^{1/3} \approx 16 \text{ cm}$.
- (b) The expression is of the form $\frac{a^3+b^3}{a^2+b^2-ab} = a+b$.
Where $a=3.8$, $b=1.2$.
- (c)

11. (c) A's, B's and C's one day's work $= \frac{1}{15}$.
A's and B's one day's work $= \frac{1}{24}$.
Therefore, C's one day's work $= \frac{1}{15} - \frac{1}{24} = \frac{4}{60} - \frac{2.5}{60} = \frac{1.5}{60} = \frac{1}{40}$.
12. (b) Marked price $= 1.20x$, if x is the cost price.
Sale price $= (1.20 - 0.12)x = 1.08x$.
Percentage profit $= 8$ per cent.
13. (c) The expression is of the form $\frac{a^2 - b^2}{a + b} = a - b$,
where $a = 5.293$ and $b = 3.633$.
14. (a) Let the marked price be Rs 100.
Then 1st discount reduces the sale price to Rs 90.
IInd discount reduces the sale price to Rs 81.
IIId discount reduces the sale price to Rs 72.90.
Net discount $= (\text{Rs } 100 - \text{Rs } 72.90) = \text{Rs } 27.10$.
15. (c) Part of the tank filled in an hour $= \frac{1}{8}$.
Part of the tank emptied in an hour $= \frac{1}{16} + \frac{1}{24} = \frac{5}{48}$.
Therefore, in one hour the amount of tank filled $= \frac{1}{8} - \frac{5}{48} = \frac{15 - 5}{120} = \frac{10}{120} = \frac{1}{12}$. The entire tank will be filled in 120 hours.
16. (d) The expression is equal to $\frac{5^{27}}{5^9} = 5^{18}$.
17. (b) Let the numbers be x and y .
Then $x + y = 10$ and $x = 3y \rightarrow 4y = 10$ or $y = 2.5$ and $x = 7.5$.
18. (b) Cost price of the radio $\text{Rs } \frac{100}{110} \times 350 = \text{Rs } \frac{3,500}{11}$.
Cost price of the mixer $= \text{Rs } \frac{100}{90} \times 350 = \text{Rs } \frac{3,500}{9}$.
Total cost price $= \text{Rs } 3,500 \left(\frac{1}{11} + \frac{1}{9} \right) = \text{Rs } 3,500 \times \frac{20}{99}$.
Total sale price $= \text{Rs } 700$.
Therefore, there is a loss on the whole deal.
19. (a) Eight litres of the mixture contain 2.4 litre water and 5.6 litre milk. Hence the amount of water required is 0.4 litres.
20. (c) The given expression is equal to $\frac{5 - \sqrt{3} + 5 + \sqrt{3}}{5^2 - 3^2} = \frac{10}{25 - 9} = \frac{10}{16} = \frac{5}{8}$.
21. (c) The required number is equal to $5p_3 = 60$.
22. (b) The expression $= \sqrt{13} \times 9 \times 3 \sqrt{13} = (3 \sqrt{13})^2 = 117$.
23. (d) Volume of a wire $= \text{area} \times \text{length}$.
Therefore, $\frac{V_1}{V_2} = \frac{\pi R_1^2 L_1}{\pi R_2^2 L_2} = \frac{(0.1)^2 \cdot 20}{(0.2)^2 \cdot 10} = \frac{1}{2}$.
24. (b) Let the length be l . Therefore width $= l - 2$.
Perimeter $= 2 \times (\text{length} + \text{width}) = 2(2l - 2) = 4l - 4 = 12$.
 $\rightarrow l = 4$ and width $= 2$.
Hence, area $= 8 \text{ cm}^2$.
25. (a) Original diameter $= \sqrt{l^2 + w^2} = d$ (say).
New diameter $= \sqrt{(l+2)^2 + (w-2)^2} = \sqrt{l^2 + 4 + 2l + w^2 + 4 - 2w}$
 $> d$.

26. (b) The expression $= 2^2 + 2^2 = 8 + 8 = 16$.
27. (c)
28. (b) The next number in the series is obtained by multiplying the number by 3 and adding 1 to the product.
29. (b) The terms of the series are $1^2+1, 2^2+1, 3^2+1, 4^2+1, 5^2+1$. Hence the next number is 6^2+1 .
30. (c) Suppose he answers x questions incorrectly and $(60-x)$ questions correctly. Then his score $= 39 = (60-x) \times 2 - x$, which gives $x=27$.
31. (d)
32. (d)
33. (c) $91^2 - 9^2 = (91-9)(91+9) = 8,200$.
 $91^2 = 8,281$.
34. (b) The sum of all whole numbers from 1 to n is
 $n \frac{(n+1)}{2}$. Here $\text{sum} = \frac{50(51)}{2} = 1,275$.
35. (b) The given expression can be written as
 $2^8 \times 2^7 \times 2^9 \times 2^{-3} = 2^{19}$.
36. (d) Marked price = Rs 2,800.
 Price after 1st discount = Rs $(2,800 - 280) = \text{Rs } 2,520$.
 Price after 11nd discount = Rs $(2,520 - 126) = \text{Rs } 2,394$.
 Sales tax = Rs 239.40
 Net price = Rs $(2,394.00 + 239.40) = \text{Rs } 2,633.40$.
37. (a) Mohan's cost price = Rs 1,800.
 Sham's cost price = Rs $(1,800 - 180) = \text{Rs } 1,620$.
 Gopi's C.P = Rs $(1,620 + 162) = 1,782$.
38. (b) $0.78x = 1,600$, where x is the gross salary.
 $x = \frac{1,600}{0.78} = \text{Rs } 2,051$.
39. (b) The expression can be written as:
 $x^2 - 3x + 5 = (x^2 - 3x + 2.25) + 2.75 = (x - 1.5)^2 + 2.75$.
 The minimum value of first term is zero for $x = 1.5$.
 The expression is minimum for this value of x .
40. (a) $x^2 + 10x + 7 = (x+5)^2 - 18$.
 Since $(x+5)^2$ is positive for all values of x , the minimum value of the expression is -18 .
41. (c) Amount due to him after two years = Rs $1,000 (1 + \frac{10}{100})^2 = \text{Rs } 1,210$. Amount due to him after next two years = Rs $1,210 (1 + \frac{10}{100})^2 = \text{Rs } 1,210 \times 1.44 = 1,742.40$.
42. (a) The unit digit can be obtained by multiplying the unit digit in every number in the product and is $3 \times 4 \times 7 \times 5 \times 8 = \dots 0$
43. (c) $(4629)^2 - (4627)^2 = (4629 + 4627)(4629 - 4627) = 9256 \times 2 = 18512$.
44. (d) $\log_{10} \frac{1}{17} + \log_{10} 68 = \log_{10} \frac{68}{17} = \log_{10} 4 = \log_{10} 16$

FILL THE BILL

Which of the five numbered figures fits into the vacant space? (Insert the number in the space.)

Answer

2. The main figure is rotated through 90 degrees. Crosshatched and white areas are interchanged, and the central figure is rotated independently through 90 degrees.

From *KNOW YOUR OWN I.Q.* by H.J. Eysenck

THE WORLD IN 1982

(Continued from page 30)

and new ones were to be formed in individual factories, initially, by a new trade union law. The banning of Solidarity was greeted by wildcat strikes and violence in Gdansk, Nowa Huta, Wroclaw and Poznan. The US retaliated to the dissolution by suspending Poland's most-favoured-nation status.

Shortly afterwards the Polish authorities released Lech Walesa, presumably after he had written a letter to Jaruzelski calling for negotiations. The release came after a strike call by Solidarity on November 12 failed to evoke much response. So far, Solidarity has not been revived.

LATIN AMERICA

The Falklands War

In Latin America, a crisis developed around the question of sovereignty over the Falkland Islands. The Falklands, under British paramountcy, were seized on April 2 by Argentina. Three days later a British flotilla set out to repossess them. The Falklands crisis was the first major armed clash since World War II in which very sophisticated electronic-age weapons were tested. Argentina seized the islands to avenge the wrong that kept the Falklands (Malvinas as Argentina calls it) under the British paramountcy since 1863 while Britain fought the Argentines to uphold the principle that aggression should not succeed and to appease the surge of nationalistic pride that swept England following the outbreak of hostilities.

As initial efforts for a diplomatic settlement failed, the military risks increased. Under pressure from Tory ranks for a quick solution, riding on a new popularity wave and warned of further deterioration in weather conditions around the Falklands, the British Prime Minister, Margaret Thatcher, ordered an invasion of the Falklands. Under cover of darkness, and amidst fierce Argentine air, naval and ground attacks, about 2,500 British paratroopers landed on the island changing drastically the tide of the war in Britain's favour.

In June, the Falklands war came to an end with the unconditional

surrender, Brig Gen Marip Benjamin Menendez, before Maj Gen Jeremy Moore of the British Army at Port Stanley. In the aftermath of the war, Argentina, which lost nearly 1,000 soldiers, faced a political crisis which culminated in the resignation of President Leopoldo Galtieri on June 18. Argentina's Interior Minister, Gen Alfredo Oscar Saint-Jean took over as interim President and Maj Gen Cristino Nicolaides became the army chief. Subsequently, Gen Reynaldo Bignone became Argentina's new military President.

There were grave military political implications of the South Atlantic war which had, and continues to have, an impact on both strategic thinking and the shape of international relations. The war demonstrated how high technology had shrunk the distances of the world's blue waters. With distance

TOP OF THE NEWS

The Lebanese crisis and the change in Soviet leadership led the choices for the top 10 news stories for 1982 in a worldwide poll of AP's subscriber editors outside the US. The following is the result:

Lebanese crisis; death of Brezhnev and elevation of Andropov; Falklands war; Poland, with the banning of Solidarity and freeing of Walesa, China moves away from Maoism, resumes dialogue with the Soviet Union, Schmidt goes out in West Germany and Kohl takes over; arms debate and growth of the anti-nuclear movement in the West, resignation of US Secretary of State Alexander Haig and appointment of George Shultz, Socialists win in Spain.

The Iran-Iraq war and the death of Monaco's Princess Grace.

Other top vote-getters were the Democratic Party gains in the US Congressional elections, Suzuki's elevation to Prime Minister of Japan; the intruder at Buckingham Palace, the Japanese textbook scandal; events in Central America; and the submarine caught in Swedish waters, respectively. The first artificial heart operation was another story that received attention.

wealth, which the seabeds promise to a world that is increasingly becoming resource-starved, would take on ominous dimensions.

The Falklands crisis also brought into focus a number of territorial disputes among nations which could trigger off a war anytime. The ownership of Gibraltar is a contentious issue between Britain and Spain, which several rounds of negotiations have failed to resolve. The Argentine adventure brought hundreds of young Falangists on to the streets of Madrid shouting "Long Live Argentina". In South America and the Caribbean, there are half a dozen territorial claims that can be exploited politically by otherwise feeble regimes.

CENTRAL AMERICA

World attention was also focussed on Central America throughout 1982 for one reason or the other. El Salvador, which had been going through a period of civil war, continued to be the scene of sporadic bursts of violence. The government even called in a contingent of Honduran troops in July against the leftist guerrillas. The whole region is embroiled in trouble because Salvadorean guerrillas have been using Honduras as a safe haven for shipping arms. The Reagan administration also charged the leftist government in Nicaragua of being a conduit for Soviet and Cuban arms supplies to Salvadorean guerrillas. In fact, it was learnt that President Reagan authorised a secret CIA plan to overthrow the Nicaraguan Government and build a nationalistic and anti-Cuban opposition front to engage in political operations in Nicaragua.

Despite troubles, elections were held in El Salvador on March 28 for a 60-seat Constituent Assembly. The moderate Christian Democrats under Jose Napoleon Duarte won 24 seats, the ultra-rightist Republican Alliance (ARENA) under Roberto d'Aubujsson won 19 seats and the rest went to three of the other four rightist parties which were in the fray. The leftist guerrillas boycotted the elections. Alvaro Magana was later elected as the

by the Constituent Assembly. The Assembly has not yet had much success in evolving a new Constitution. However, Magana is pragmatic, and since summer, fewer civilians have been killed.

In Central America, the overriding issue in 1982, however, was an ailing economy. The worst hit was Mexico, although other nations were not far behind. In Mexico, there was 50 per cent unemployment, 100 per cent inflation, a \$81-billion foreign debt and

stagnant growth by the year end. The crisis was created by declining oil exports' revenues and recession. In November, the new President, Miguel de la Madrid Hurtado, announced a three-year programme to decrease the budget deficit. Brazil, Argentina and Venezuela are other Latin American nations which are on the verge of an economic collapse.

All these countries owe billions of dollars to American banks which will go bust if the economies of these countries fail.

has thrown British workers into deep despair. Were it not for the Falklands war, her government would probably have merited the title of being the most unpopular government in Britain since the end of the Second World War.

As it was, General Galtieri of Argentina came to her rescue. Beseated by economic problems and rising social unrest at home, the Argentinian dictator invaded the Falkland Islands hoping to cash in on the popular nationalist sentiment which sees British sovereignty over the Islands as a legacy of colonialism. But Argentina's final defeat in June sealed the fate of General Galtieri who was eventually replaced by General Bignone, even as it helped Mrs Thatcher to reach the heights of popularity at home which only a few months before would have been unimaginable.

As for the "new cold war", Reagan's militarism and his deep antipathy to what he perceives as the "expansionist" aims of the Soviet Union and its proxies (Cuba, and even Nicaragua), meant that early in the year he endorsed the victory of the near-fascist Major Roberto d'Aubuisson in El Salvador in elections that could hardly qualify to be described as "free" or "fair". No matter, the left wing Farabundo Marti National Liberation Front was still far away from power by the year end, though the d'Aubuisson regime is a thoroughly discreditable one, having little public support in the country. But elsewhere in Central America, Nicaragua is moving further to the left and surely American support for brutal dictatorships in Honduras and Guatemala is a recipe for long-term disaster.

But as far as the Western alliance goes, Reagan's excessive hostility towards the Soviets was

AFRICA

In Africa, the Organisation of African Unity (OAU) failed to provide much promise which is so important to fight the apartheid regime of South Africa. The walk-out by 19 of the OAU's 50 members from its Addis Ababa meeting in March 1982, over the proposal to make the Polisario guerilla movement the 51st member, was the Organisation's worst-ever split.

counter-productive, even in the short-run. In June, he imposed sanctions on the famous gas pipeline deal between the USSR and various European countries. The latter made clear their determination to defy the US sanctions, and it was Washington which eventually had to back down and revoke the sanctions. Meanwhile, considerable damage to the alliance had been done.

Moreover, Reagan's "tough talk" regarding the nuclear arms race, the siting of cruise and Pershing-II missiles in Europe and disarmament, whatever his actual intentions, provided a fillip to the already enormous and growing anti-nuclear peace movements. Both in Europe and in the US the pressure of this mass movement was making itself felt on the governments. A propaganda war between the superpowers has also begun with an American "zero option" pitted against a Soviet proposal for mutual cuts in nuclear and conventional weapons. In the background, proposals for a "general freeze" are enjoying currency among demonstrators. This cannot be a bad thing whatever one's doubts about superpower intentions.

The change of guard in the Kremlin after the deaths of Suslov and Brezhnev has not altered Soviet foreign policy, at least on the face of it. Andropov has so far tried to convey his serious commitment to a restoration of detente. Will 1983 see a more pragmatic Reagan prepared to give some form of detente another chance?

Surely, one factor that might lead him in this direction is a reappraisal of relations between USA and China. In April and May, the Chinese voiced their unhappiness

HIGH POINTS OF 1982

BY ACHIN VANAİK

By and large, 1982 will go down in history as a year which witnessed the consolidation of trends that first appeared in late 1980 and 1981. The contours of global politics were largely fixed by the world-wide economic recession, the "new cold war" and the move by China towards a more balanced relationship with the US and the USSR.

To take each of these themes: at the Versailles summit in June, the major OECD countries decided to treat inflation as enemy number one. By the end of the year, they had largely succeeded in reducing the level of inflation but only at the cost of rapidly rising unemployment. This was bound to have its political effect. In late September, Chancellor Helmut Schmidt had to leave office because of the collapse of his government coalition over differences on economic policy. But the ineptitude of the opposition parties is such that the Social Democratic Party might well return to power under another leader.

Falklands War

Largely because of the inability of the ruling conservatives in Spain to cope with recession or with the pressures of the Francoist army, the Socialist Party led by Felipe Gonzalez swept the polls on October 28. The conservative government under Mrs Thatcher has overseen a severe de-industrialisation of Britain. Massive unemployment

The August 1982 summit at Tripoli was boycotted by 18 of its members. Zaire's policy of re-establishing diplomatic relations with Israel created further tensions in the Organisation. According to one report, only 10 of the OAU's members paid all their dues in 1982; about \$4 million came in toward a budget of \$20 million, and the secretariat had to borrow money to pay its salaries.

The problem of the OAU has deeper roots. The gradual division of the Organisation into oppo-

sing "progressive" and "conservative" camps has been going on for some time. Many of the "progressive" countries have exclusively Marxist-ruling parties—they have close economic ties with the Soviet Union and sometimes even Cuban troops within their territory. The "conservative" bloc countries, on the other hand, are often the recipients of US military aid and have a more democratic system of government. As a result, OAU is no longer a collection of somewhat like-minded countries.

The crisis in the OAU would merely strengthen the apartheid regime of South Africa. The latter is active in weakening the OAU. In 1982, an agreement was concluded between South Africa and Swaziland to transfer a substantial part of territory to the Kingdom of Sobhuza II, the world's longest reigning monarch. Such a transfer of land involved the redrawing of boundaries between African states which is specifically ruled out under the OAU Charter unless there is free agreement to it. □

over US arms sales to Taiwan in no uncertain terms. At the same time, starting with Brezhnev's Tashkent speech in March, the USSR signalled its willingness to move as rapidly as possible towards normalisation of relations between the two Asian giants. These calls did not go unheeded even if Beijing did not respond as warmly as Moscow would have liked. But on a number of occasions throughout the year, the Chinese showed that they were keen on upgrading their relations with the USSR even if it meant taking a greater distance from their American "friends".

Polish Crisis

But though these developments represented important parameters of global politics in 1982, the two most important events of last year were located outside the axis of direct superpower conflict. Nor were they directly linked to the problems of worldwide recession. The first was the wholly unexpected success of the Polish authorities, at least for the time being, in controlling and decimating the workers' movement. And the second was, of course, the Israeli invasion of Lebanon and the eventual expulsion of the PLO. Both events have truly historic significance.

In December 1981, when General Jaruzelski imposed martial law, crushed strikes and occupation of plants by workers by force, and arrested union leaders, many Solidarity activists, once the immediate shock wore off, continued to defiantly proclaim—"the winter is yours, but the spring will be ours". To the immense relief of the Polish Government and the Kremlin, things did not work out that way. Despite sporadic resistance, it became clearer and clearer that the defeat inflicted by Gen Jaruzelski

on the workers' movement was a decisive one. By the end of 1982, Warsaw felt confident enough to suspend martial law, release Walesa and other internees and agree to a visit by the Pope in the coming year. Solidarity no longer exists as an organised force or mass movement. True, post-1980 Poland will not be like post-1956 Hungary or post-1968 Czechoslovakia. But the re-emergence of a powerful workers' movement will be a long, slow haul. For the moment, the Soviet empire remains intact, though shaken.

For all those who wish Solidarity well, the strategic lessons of the recent past must be fully absorbed. It is now evident that Solidarity's basic strategy of "an escalating series of compromises" with the government or a "war of position" is necessary but by itself not sufficient. The question of a decisive test of power must be addressed. The great Italian communist theoretician of the 1930s, Antonio Gramsci, once perceptively remarked that Gandhi's strategy of passive resistance during the Indian national movement was in fact just such a "war of position". But the India of the '40s is far removed from the Poland of today or of the future.

Lebanon Invasion

Israel's invasion of Lebanon was, of course, the single most significant event of the year. The Palestinian resistance suffered its gravest defeat since 1967 when it first emerged as a force independent of the existing Arab regimes. Its only bastion outside of Israel, i.e. Lebanon, crumbled in the face of Israeli military might. But the Palestinians did secure some important political gains. West Beirut fell only after a negotiated evacuation. The Palestinians did succeed in resist-

ing the Israeli war machine for a longer period than has ever been the case in any of the previous Arab-Israeli wars. The massacres of Sabra and Shatila created the biggest crisis in the Zionist self-image since the state of Israel was founded. Perhaps for the first time, large sections of the Israeli public came to realise that the Palestinians were not just "refugees" or "terrorists" but a *people* with an unshakeable aspiration to nationhood. And that the PLO is its popular and legitimate representative.

It is true that the immediate future for the Palestinian resistance looks bleak. Israel's dominance in the region is complete, and through it that of the United States. The PLO, dispersed as it is, lacks both an independent territorial base from which to make its armed presence felt, and the freedom to defy Arab regimes which are as keen to keep curbs on the resistance as to extract concessions from Israel. With the US unable or unwilling to put pressure on Israel, there is no reason why the latter should concede anything but the most niggardly kind of autonomy for Palestinians on the West Bank, certainly far removed from any kind of genuine statehood.

But there are two likely outcomes of Israel's victory in Lebanon. First, a shifting of the centre of Palestinian resistance from Lebanon to the West Bank, that is within Israel itself. Second, a dangerous internalisation of Arab frustration. This constitutes a real danger to the existing Arab regimes. It would take only the overthrow of one of the more conservative Arab regimes and its replacement by a "radical" government to once more place the Palestinian question at the top of the West Asian agenda.

DIARY OF 1982

January

12 US not to sell FX advanced military aircraft to Taiwan.

February

5 Lt Col Desi Bouterse seizes power in Surinam.

10 First news of violent fighting in Syrian city of Hama between government forces and opponents of President Hafez Assad's regime; fighting began on February 2.

22 South-South meet begins in New Delhi.

24 Muslim gunmen hijack Kuwaiti airliner at Beirut.

28 2,000 arrested in Pakistan in connection with terrorism.

March

8 Egypt's Supreme Military Court sentences five to death for assassinating President Anwar Sadat last October.

UN Conference of Sea Law opens 11th session.

11 Coup in Surinam.

Gen Guevara wins presidential poll in Guatemala.

13 Colombian army takes over in Bogota.

Chief of abortive coup in Surinam executed.

16 Soviet Union unilaterally announces moratorium on deployment of medium-range nuclear weapons in European part of USSR.

20 OPEC agrees to limit production to 18 million barrels a day and retain existing benchmark price.

24 Lt Gen H.M. Ershad seizes power in bloodless pre-dawn coup in Bangladesh.

28 Election in El Salvador.

April

2 Argentina seizes Falkland Islands.

4 Argentina also seizes S. Georgia Islands.

21 Israel bombs PLO bases in Lebanon.

23 Malaysian Prime Minister Mahathir Mohammad's coalition wins election.

24 UK warships move to S. Georgia waters.

25 British forces land in and recapture S. Georgia.

Israel returns Sinai peninsula to Egypt.

30 Blockade of Falkland Islands begins.

May

6 Argentina and Britain accept UN peace proposals.

8 US Vice-President George Bush and China's strongman Deng Xiaoping hold talks on US arms sales to Taiwan.

12 Dutch Government under Andries Van Agt resigns.

28 Pope John Paul II arrives in London on six day visit.

June

5 Seven-nation Versailles summit opens.

6 Israeli troops invade South Lebanon.

7 UN General Assembly's second special

session on disarmament opens.

10 NATO summit meeting opens in Bonn.

Iraq declares unilateral ceasefire in 21-month war with Iran.

11 Iran rejects Iraq's ceasefire.

Kenya becomes one-party state.

13 New leftist alliance takes over in Mauritius with Aneerood Jugnauth as Prime Minister.

15 Argentine troops in Falkland Islands surrender to Britain.

16 Geneva talks on Afghanistan begin.

19 Rebel leader Hissene Habre declares himself Chad's Head of State.

20 Iraq starts withdrawal from Iran.

28 Argentina accepts formal cessation of hostilities with Britain.

July

4 PLO Chairman Yasser Arafat agrees to evacuate W. Beirut after stipulating conditions.

11 New coalition government of anti-Vietnamese Democratic Kampuchea under Prince Norodom Sihanouk formally launched.

13 Moscow-Bonn natural gas pipeline deal signed.

16 Iraqi troops launch counterattack against Iran in northern sector.

21 US House of Representatives authorises production of MX ICBMs.

22 Israel initiates unilateral ceasefire with Syria.

25 Arafat accepts UN resolutions recognising Israel's right to exist.

29 PLO decides to leave Beirut.

August

1 Coup attempt in Kenya foiled.

2 Big Polish demonstration against martial law in Warsaw.

4 Iraq accepts Iran's terms to end war.

7 Armenian terrorists storm Ankara international airport, killing 10.

10 Israeli Government accepts in principle US proposal for removing PLO guerillas.

13 Solidarity supporters and militia clash in Gdansk.

17 Army mutiny in Seychelles.

US-China sign joint communique on arms sales to Taiwan.

18 Army rebellion in Seychelles crushed.

19 Israel accepts plan for PLO evacuation.

21 First batch of PLO guerillas leaves Beirut.

31 Polish riot police break up rallies in Gdansk and Wroclaw on Solidarity's second anniversary.

September

1 New martial law restrictions in Poland.

PLO completes evacuation of Beirut.

2 Israel rejects American West Asia plan.

15 Lebanese President-elect Bashir Gemayel assassinated; Israelis advance into

West Beirut.

18 Hundreds of unarmed Palestinians massacred by Lebanese right-wing militiamen at Shatila and Sabra refugee camps in West Beirut.

21 Amin Gemayel elected President of Lebanon.

October

1 Helmut Kohl takes over as Chancellor of West Germany.

6 Sino-Soviet talks begin in China.

9 Polish Parliament bans Solidarity, limits right to strike and restricts future trade unions to local level; US suspends Poland's most-favoured-nation status.

16 China test-fires IRBMs from nuclear-powered submarines.

21 J.R. Jayewardene re-elected President of Sri Lanka.

29 Spain's Socialist Workers Party wins absolute majority in national elections.

November

7 Leonid Brezhnev warns US of crushing retaliatory strike if it attacks USSR.

11 Tass announces Brezhnev's death which occurred on November 10.

12 Yuri P. Andropov succeeds Brezhnev as Soviet Communist Party's General Secretary.

Poland's Solidarity leader Lech Walesa freed.

13 US President Ronald Reagan lifts sanctions against Soviet natural gas pipeline.

23 Reagan to deploy MX missiles in Dense Pack cluster.

Andropov elected to Presidium.

25 Yasuhiro Nakasone is new Japanese Prime Minister.

December

1 US reduces aid to Pakistan.

4 Negative US vote on UN Sea Law meet.

5 Pakistan receives latest F-16s from US.

6 President Zia-ul-Haq of Pakistan in US on a nine-day state visit.

9 South Africa attacks Lesotho.

Defeat for Reagan on MX missile system; House of Representatives rejects arms build-up.

10 Sea Law Convention signed.

14 Earthquake leaves over 2,000 dead in North Yemen.

21 Andropov announces USSR's readiness for freeze on strategic arms.

22 US rejects Andropov's offer.

23 Jayewardene wins referendum for extending term of Sri Lanka's Parliament.

27. West Germany appeals to Andropov to solve Afghan issue.

28 Israel-Lebanon talks begin.

US seeks clarification on Andropov's offer of arms cut.

December 3 Akalis to discuss future plan on December 10.

Nagaland Government announces probe into Jasokie Government irregularities.

US casts negative vote on UN Sea Law Meet.

December 4 IX Asiad comes to an end.

Five dissident MPs and nine MLAs in Gujarat quit Congress (I).

Assam agitators announce four-man team for Delhi talks.

December 5 Morcha will be intensified, says Akali Dal President Sant Harchand Singh Longowal.

Assam delegation puts off trip to Delhi; demands member's release.

Pakistan to receive advanced F-16s.

December 6 Assam talks put off indefinitely, following the failure of the agitation delegates to turn up.

Longowal threatens revolt, alleges persecution of minorities.

Pakistan President Gen Zia-ul-Haq arrives in US.

December 7 Bihar Government to amend Press Bill.

Fresh efforts to resolve Punjab deadlock; Swaran Singh invites Akalis for talks.

Maharashtra Congress (I) dissidents demand CM Babasaheb Bhosale's ouster.

Centre to fix fresh date for talks on Assam.

December 8 No unilateral decision on Akali demands, Centre reiterates stand.

Centre says "no" to Bhosale's ouster.

December 9 No question of further talks, says Longowal.

Bihar Press Bill to be returned to state for reconsideration.

December 10 Key Akali session ends in deadlock.

Zia calls for new US approach towards India, Pakistan.

December 11 Nobel Prizes for 1982 presented in Stockholm.

New Akali stir to be announced on January 26, says Longowal.

December 12 Elections in two years, says Zia.

Drafts ready for two Kashmir ordinances for banning communal and secessionist organisations and prevention of corruption.

December 13 Six dissident Congress (I) legislators in Maharashtra suspended.

Most Pak troops on Indian border, admits Zia.

December 14 Army called out as nine die in communal violence in Baroda.

Earthquake leaves 1,082 dead in North Yemen.

December 15 Death toll in North Yemen rises to over 2,000.

Indian vessel Jala Murari sinks in the Pacific; crew rescued.

December 16 Supreme Court dismisses cases against Bihar CM Jagannath Mishra.

Baroda violence unabated; toll mounts to 12.

Home Minister P.C. Sethi renews offer of talks to Akalis.

Tory Government defeated on new UK immigration law.

December 17 Maharashtra rebels called to Delhi for talks; decision on Bhosale after poll.

Stabbing, arson in Baroda; violence spreads to Padra town.

December 18 Baroda limps back to normalcy.

International Atomic Energy Agency expresses dissatisfaction with Pak nuclear safeguards.

India, Vietnam set up joint commission to intensify economic cooperation.

December 19 Stray incidents mar Baroda peace.

Israel, Lebanon agree on withdrawal talks.

December 20 Anti-social elements behind Baroda riots, says Sethi; Centre to take steps for Baroda peace.

Textile strike to continue, says Samant.

US Congress refuses funds for manufacturing MX missiles; setback to Reagan.

December 21 US making peace fragile, says Andropov; expresses Moscow's readiness for freeze on strategic arms.

Areas under curfew in Baroda continue to remain paralysed.

December 22 Indo-Pak talks to decide bilateral issues begin.

US rejects Andropov's latest N-arms control plan.

December 23 India, Pakistan set up joint ministerial commission to promote bilateral relations.

Sri Lanka President Jayewardene wins referendum to extend Parliament's life

by six years.

Andhra Pradesh Congress (I) expels 55 rebels.

December 24 India, Bangladesh set up joint panel for feasibility studies on Farakka.

Indo-Pak accord on panel signed; no-war pact draft discussed.

December 25 US launched arms race, says Soviet Foreign Minister Andrei Gromyko.

Uneasy peace prevails in Baroda.

December 26 French nuclear fuel for Tarapur to arrive by April.

Gujarat Congress (I) dissidents form Rashtriya Congress.

Law and order situation under control in Baroda.

December 27 Oil, gas found in new Godavari basin well.

China accuses USSR of troops build-up on Sino-Afghan border.

December 28 Second Indian team lands on Antarctica.

Lebanon, Israel begin talks on withdrawal.

Censure move against Gujarat Government sponsored by opposition parties admitted in State Assembly.

Violence in Alleppey (Kerala); one killed in firing.

December 29 Fresh firing, strike in Alleppey as violence continues.

Gas struck in Bombay High.

States told to check urban land prices.

Israel, Lebanon differ on agenda of talks.

December 30 Army called in as violence spreads to Trivandrum.

Polish authorities suspend martial law.

No trust move against Gujarat Government rejected.

Antarctica team sets up base camp.

Lebanon talks deadlocked.

December 31 Three injured in Cochin firing; army brings Trivandrum back to normal.

January 1 Kerala calm but for tension in isolated pockets.

Vast areas of India within range of F-16s, says PM Indira Gandhi.

January 2 Army called back as calm is restored in Trivandrum.

Akalis agree to hold talks with Centre; direct negotiations favoured

APPOINTED

H.C. Sarin, former steel Secretary and presently Chairman of the Railway Reforms Committee, as Ambassador to Nepal.

B.K. Singh, former Chief Minister of Andamans, as Deputy Election Commissioner.

Serge Boidevaix, former French Ambassador to Poland, as Ambassador to India, replacing Andre Ross.

ELECTED

Bhagirath Lal Das, Indian Ambassador to GATT, as President of the contracting parties to the agreement for the year 1983.

V. Prasad Kodali, Director in the Department of Electronics, as Secretary for 1983 of the Institute of Electrical and Electronics Engineers, the world's largest scientific body.

Pierre Aubert, a Social Democrat from Meuchatel, as Swiss President by the Federal Assembly at Berne on December 8.

AWARDED

The 1982 Alternative Nobel Prize to West German environmentalist Petra Elly, the Malaysian consumer activist, Enwar Fazal, the British educationist, Sir Georga Trewelyan and a Sri Lankan group working on rural development in Asia.

Tansen Sammen '82 for "excellence, creativity and profound dedication to Hindustani classical music" to Pt Narayan Rao Vyas, Pt Dilip Chandra Veda and Ustad Nisar Husain Khan.

The Sanjay Gandhi Awards to B.P. Pal, former Chairman, National Committee for Environmental Planning and Coordination, for his contribution to environment and ecology; G.S. Venkaraman, Project Coordinator (algae), Division of Microbiology, IARI, for his contribution to

energy; P.R. Adiga, Associate Professor, Department of Biochemistry and UGC Centre for Advanced Study, Indian Institute of Science, and T.C. Anandakumar, Director of the Indian Institute for Research in Reproduction, jointly, for their contribution to family welfare and population control.

Sarat Chandra Roy memorial medal for 1982 to M.S.A. Rao, Professor of Sociology at the Delhi School of Economics, for his outstanding contribution to cultural anthropology.

Sir Richard Attenborough's 'Gandhi' and actor **Ben Kingsley** as best film and best actor of 1982 by the **United States National Board of Review**.

The Nehru Literacy Award for 1981 to Chinubhai Bhatt.

Sahitya Academy Awards for 1982 to well-known Hindi satirist Hari Shankar Parsai, Indo-Anglian novelist Arun Joshi and Malayalam short-story writer V.K. Narayan Kutty, among 22 others.

The Sanskrit Awards for creative writing to Vinod Bhardwaj, a Hindi writer and poet; Chaitanya Kalbag, for his investigative reporting and humane stories; Gurbachan Singh, in the field of fine arts; and vocalist Madhup, in performing arts.

Aryabhata Medal for 1983 to Satish Dhawan, Chairman of the Space Commission and Secretary to the Department of Space, for outstanding contribution to science by the Indian National Academy.

The Ghalib Awards for 1982 to four eminent Urdu scholars: Ali Ahmed Suroor, Maheshwar Dayal, Ghulam Rabbani Taban and late Mohd. Iteeq Siddiqki.

The second R.D. Birla Memorial Award to B.V. Srekanthan, Director, Tata Institute of Fundamental Research, for his contribution in the field of elementary particle physics.

The lady of the decade for peace Award to Prime Minister Indira Gandhi for "developing international understanding and world peace and her role as the champion of the non-aligned movement," by the Delhi-based National Integration Assembly.

Order of Lenin and Gold Star medal to Soviet cosmonauts Anatoly Berezovoy and Valentin Lebedev, who made a 211-day space flight on board Salyut-7-Soyuz. The title of Hero of the Soviet Union has also been conferred on Berezovoy, while Lebedev has already received this in 1973.

SCIENCE

First artificial heart: A feat of history-making surgery was performed at the Utah University Medical Center in Salt Lake City, when a team of surgeons implanted an artificial heart in a dying man. The procedure consists of removing the entire organ and replacing it with a plastic pump attached to a compressed air-power system that must be wheeled around on a large cart, plugged into a wall socket. The mechanical heart, known as Jarvik-70 after its inventor Dr Robert Jarvik, has been tested extensively on animals over a period of 15 years.

Keltron's new power system: The Kerala State Electronics Development Corporation (KELTRON) has manufactured the largest three-phase uninterruptible power supply (UPS) system in the country. The 67.5 KVA three-phase UPS system has been manufactured for computers at BHEL, Hardwar.

A joint US-Israeli research team has isolated the toxic responsible for one of the most severe forms of amoebic dysentery in a step which could lead to the development of a vaccine against the disease. The disease, caused by the penetration of the body by a single-cell parasite, *Entamoeba histolytica*, affects millions of persons in the world.

ECONOMY

IMF's lending pool increased: Under an agreement for preventing a string of Third World defaults that could set off a global credit crisis, the Big Five among industrialised nations—the US, Japan, West Germany, UK and France—have decided to increase the IMF's lending resources to \$ 100 billion from the current \$ 65 billion, starting late 1983 or early 1984.

Fall in crude-steel output: Crude-steel output in the non-communist world has fallen by 11 per cent in the first eight months of the current year and the prospects for 1983 are also uncertain, according to the annual report of the International Iron and Steel Institute which was presented in Tokyo recently. During the same period, India's steel output fell by 1.1 per cent from 7.05 million tonnes to 6.9 million tonnes. But taking the first half of the current financial year, 1982-83, the steel plants of SAIL (Steel Authority of India Limited) achieved a growth rate of seven per cent in the steel supply to the domestic market as compared to the first six months of the last financial year. According to

SAIL sources, a sluggish, on-take has resulted in SAIL plants accumulating stocks of nearly 1.25 million tonnes, causing a severe financial strain.

Indo-US textile pact: India gets a substantial increase in market access to the US for its textile goods, under a new agreement concluded in Washington recently. The agreement, which is expected to be ratified by the two governments shortly, is expected to result in a new addition of Rs 75 crores to the country's export earnings in 1983 alone.

Sugar production sets a high trend: Production of sugar, which had reached an all-time high of 84 lakh tonnes during the last year, October 81-September 82, has registered a new high trend ever in the season which began on October 1, 1982. Production during the first six weeks of the new season till November 15 was 2,83,000 tonnes compared to last season's 2,34,000 tonnes.

Karnal refinery cleared: The Union Energy Ministry has asked the Indian Oil Corporation to go ahead with the Rs 400-crore refinery to be set up at Beoh village in Karnal district.

Indo-Soviet accord on power: India and the Soviet Union have agreed to further develop their mutual cooperation in the field of power. Accordingly, the first of the six 210-Mw units of the Vindhyachal power station is scheduled to be commissioned by June 1987. The subsequent units will be coming at intervals of six months. Work is also expected to commence on the 400-Kv transmission line which will stretch over 900 km, to be ready for operation in time for power valuation from the Vindhyachal power station.

Funds released: The Ministry of Works and Housing has released Rs 3,137.18 lakhs to six states for projects approved under the centrally-sponsored accelerated rural water supply programme. This is the second instalment of grant-in-aid for 1982-83 to Karnataka (Rs 511.50 lakhs), Madhya Pradesh (Rs 797.50 lakhs), Manipur (Rs 4 lakhs), Maharashtra (Rs 472.50 lakhs), Nagaland (90.18 lakhs) and Rajasthan (Rs 1,261.50 lakhs).

Foodgrain production touches new high: Foodgrain production for 1981-82 was a record 133.08 million tonnes, according to official figures released on the basis of the final estimate received from the states. This marked a 2.7 per cent increase over the revised estimate for the previous year.

Indo-Soviet textile pact: The Soviet Union and India have agreed in principle on a long-term textile pact under which capacity for producing 600 million metres of cloth annually for the Soviet market will be provided in this country on an

when reputed economists write on India's economic problems like unemployment, falling foreign reserves, rising prices, recession, industrial relations and slow economic growth in our **MARCH '83** issue. Facts and figures for the candidate preparing for any competition and also for the university student who suddenly discovers his year-old textbook has become out-dated

Two issues of solid information to preserve for the forthcoming exams of Banks, NDA, Civil Services and others if you want to be a winner.

when all you wanted to know about the public sector—its tremendous growth in the last 30 years, its performance, achievements and losses, the problems it faces—is comprehensively tackled in our **APRIL '83** special issue. Just the material you need for scoring high in competitive and university exams and interviews.

Plus all our regular features

extensive basis. The two way turnover is expected to reach Rs 3,500 crores in 1983.

An agreement for a drilling contract worth \$ 31 million along with a supporting credit was signed between India and Mexico on December 13 for charter hire of an off shore jack-up rig for oil exploration in the Mahanadi basin.

Public sector output records a new high: Seventeen manufacturing public sector units under the Department of Heavy Industry have achieved a total production of Rs 154.25 crores during October 1982, marking an increase of 42 per cent over the production recorded during the same period the year before.

The Food & Agriculture Organisation has raised its estimate of world cereal production in 1982-83 to 1,537 million metric tonnes and expects ample overall supplies during the year. (The figure for 1981-82 stood at 1,516 million metric tonnes). Reviewing the current world cereal situation, it estimated wheat output at 470 million tonnes, 796 million in coarse grains and 271 million in milled rice.

India to pay less to the UN: India will be paying about 40 per cent less into the UN regular budget for the next three years under a newly approved scale of assessments. Hitherto, India has been contributing 0.60 per cent of the world body's budget. Under the revised scale, it will be only 0.32 per cent.

World Bank to fund grid project: The World Bank will provide funds for implementing the first stage of the Rs 500-crore national grid development project undertaken by the WTPC.

Drought in Himachal: Himachal is in the grip of a severe drought, the loss having been estimated at Rs 45 crores, with the loss in Simla district alone estimated at

more than Rs 13.5 crores. Of the nearly 27,000 hectares of cultivated land, the drought had affected nearly 56,000.

EEC extends trade sanctions against USSR: The EEC on December 21 decided to extend indefinitely the trade sanctions against the Soviet Union, imposed last March in condemnation of its role in the military repression of Poland.

UN budget for 1982-83: The UN General Assembly on December 22 adopted a revised budget of just under \$ 1,473 million for 1982-83, topping nearly \$ 33 million off the total approved at the 1981 session. The US, the USSR and Britain, concerned at mounting UN expenses, were among those who voted against the budget, adopted by 117 votes to 14 with 12 abstentions.

RBI appoints expert committee: The Reserve Bank has appointed an expert committee to review the working of the monetary system and suggest measures for improving the effectiveness of monetary policy as an instrument for promoting the basic objectives of the country's economic policy. The committee will be headed by Sukhomoy Chakravarty.

IMF assistance to Mexico: The IMF on December 23 announced approval of a \$ 3.9-billion financial package to debt-ridden Mexico.

India borrowed \$ 1.1 billion (about Rs 1,056 crores) from international banks in 1982, an increase of 8.5 per cent over credits obtained last year, according to *Asian Finance*, a regional magazine.

China to receive EEC aid: For the first time China will be among the developing nations to receive aid from the EEC. China becomes eligible for EEC aid since it has a per capita income less than \$ 370.

As protection against foreign governments suing American drug

NO NEXT ISSUE

Clayton Act Amendments making foreign governments ineligible for triple damages like other plaintiffs. In 1974 India sued a number of US drug companies of conspiring to fix prices of tetracycline and other antibiotics, seeking triple damages under US anti-trust laws.

ONGC steps up oil production at Bombay High The ONGC on December 31 stepped up oil production at Bombay High to 319,390 or nearly 41, 639 tonnes. The ONGC also reached a new high in the drilling metreage. The highest yearly total metreage of 1,11,012, drilled during 1981-82 was crossed with 1,14,914 on December 31.

The mandays lost in the 11-month-old textile strike by 2.50 lakh textile workers in Bombay is about 48 million as against 22.50 million in the whole country.

Soviet economy is stable. A CIA study on the Soviet economy has revealed that the Soviet GNP has grown at an annual rate of 4.8 per cent over the last three decades, though poor harvest in recent years has contributed to a fall in the growth rate which is now three per cent.

Norwegian assistance to India: Norway will provide India with Rs 7 crores as assistance for integrated child development services and women's employment projects under two agreements signed in New Delhi on December 27. The agreements were made under the umbrella agreement for economic cooperation signed between India and Norway for 1983-1986.

Kerala project cleared: The Planning Commission has approved the Vamanapuram irrigation project of Kerala, which envisages the construction of a storage dam across the Kallai river, a tributary of the Vamanapuram river in Kerala. Estimated to cost Rs 36.40 crores, the project when completed will provide irrigation to 18,014 hectares of land.

EVENTS

The last batch of the Jaguar deep-penetrating aircraft reached India on November 30. With this Britain has completed its supply of 40 Jaguars in fly-away condition to the Indian Air Force.

Crane named Mrs Gandhi: A Siberian crane, one of the two birds recently born in captivity at the International Crane Foundation in Baraboo, Wisconsin, USA, has been named Gandhi after the Indian Prime Minister according to the World Wildlife Fund.

The Law of the Sea Convention was signed by 118 countries on December 10 leading to the formation of an international seabed authority to regulate the mining of rich mineral deposits on the ocean floor. Among the 21 countries which

Belgium and Britain. They objected to the treaty's provisions on seabed mining. Japan indicated that it would sign at a later date.

Longest stay in space: Soviet cosmonauts Anatoly Berezovoy and Valentin Lebedev returned to earth on December 10 after setting a space endurance record of 211 days.

House votes for US aid to Israel: The US House of Representatives Appropriation Committee voted on December 12 to give Israel the \$510-million-aid that was proposed by US President Ronald Reagan, following a similar vote in the Senate the preceding week.

The UN General Assembly has, in a resolution, called on the US and the USSR to declare an immediate freeze on the production of nuclear weapons. The resolution was passed by 117 votes to 17 with eight abstentions. It was the first time that the Assembly adopted a resolution calling for a nuclear freeze which Western campaigns have increasingly focused on as an urgent arms-control priority. The Assembly passed a second resolution, initiated by India and co-sponsored by East Germany, Liberia and Mali, calling on all nuclear states to freeze production of nuclear weapons.

Azad flagged off. Azad, a completely indigenous 2.5-tonne payload vehicle developed by the Vehicles Research and Development Establishment for the army, was flagged off on December 14 in Ahmednagar (Maharashtra). Its salient features include a fail-proof braking system, audio-visual indicators on the dash panel, mechanical handling of the spare wheel, higher speed and adaptability for various roles.

Poland has scaled down its cultural links with the US and ordered special scrutiny of US visa applications in response to what it called interference in Polish affairs.

Spanish border guards opened the gates linking Spain with the British colony of Gibraltar at the stroke of midnight on December 15, ending a 13-year old blockade by Spain. The late dictator, Francisco Franco, closed the border on June 8, 1969, to press Spain's claim to the rock colony.

Bill passed: The Madhya Pradesh Assembly on December 15 unanimously passed a Bill to abolish royal grants sanctioned by rulers of former princely states to their loyal subjects.

Kohl loses confidence vote: The West German Chancellor, Helmut Kohl, deliberately lost a Parliamentary vote of confidence on December 17, paving way for early general elections on March 6. The Chancellor is expected to meet President Karl Carstens and ask him to dissolve

Martial law in Bangladesh for another three years: Military rule in Bangladesh is likely to continue for another three years, according to the Chief Martial Law Administrator, Lt Gen H.M. Ershad, who addressed the nation in connection with the victory-day celebrations of Bangladesh on December 16. Elections to the newly formed Thana Parishad—the nerve centre of village-level administration—would be held by the end of 1983, followed by elections to the district-level administrative units. Parliamentary elections would be held thereafter.

UN adopts human rights resolutions: On December 17, the UN General Assembly adopted resolutions directed against alleged violation of human rights in Chile, Guatemala and El Salvador. The US and Pakistan were among several countries which voted against all three resolutions.

In order to save the dwindling species of the Houbara Bustard, the United Arab Emirates has launched a project to breed the bird in captivity and rehabilitate it.

Balsemao steps down: Portugal's Prime Minister Francisco Pinto Balsemao announced his resignation on December 19. He was succeeded by Victor Gaspar, leader of the Social Democrats and former Education Minister.

USSR's message to the world: The Central Committee of the Communist Party of the Soviet Union and the Soviet Parliament on December 22 urged world leaders to avert a nuclear catastrophe, in a message of peace addressed to parliaments, governments, political parties and people worldwide.

South Africa rejects UN resolutions on Namibia: On December 21 Pretoria rejected five UN resolutions calling on South Africa to grant independence to Namibia. The UN General Assembly had passed these resolutions after a week's debate on the former German colony that has been under South African administration since World War I.

Egypt to get Chinese F-7s: China has agreed to provide Egypt with additional F-7 fighter planes. These are China's version of the Soviet MiG-21s, and are to be reassembled in Egypt. The agreement followed talks in Cairo between Chinese Premier Zhao Ziyang and Egyptian President Hosni Mubarak.

Strikers return to work: 86,000 employees have returned to work in Bombay's strike-scarred textile mills, the Parliamentary Consultative Committee for the Commerce Ministry was told on December 23. Each worker was paid a total amount of

ASSEMBLY ELECTIONS REVERSAL OF FORTUNES

The Congress (I)'s southern bastions of Andhra Pradesh and Karnataka have crumbled. In the other state, Tripura, where the Assembly elections were held the same day, January 5, the CPI (M)-led four-party left front has secured an absolute majority, though not unexpectedly.

In a way, the rout of the Congress (I) in Andhra Pradesh was also not unexpected. The reasons: a feeling that the chief ministers sent by the Centre were corrupt and incompetent, and were not paying heed to the growing resentment in the state; regular squabbles among ruling party members, tarnishing whatever little reputation they possessed, disgruntled ex-chief ministers and ministers out to align themselves with the Opposition just to secure a berth in the government; and the total alienation of the people from the government as their interests were given lesser priority than those of the Centre's.

Cine star-turned-politician, N.T. Rama Rao (NTR), in the people's reckoning, was the ideal alternative. His party Telugu Desam, since its inception nine months ago kept state interests high on its campaign agenda. This along with the following he had as a matinee idol, made NTR a crowd-gatherer par excellence. The absolute majority his party has secured in the latest elections well proves this point. Prime Minister Indira Gandhi, NTR's national equivalent, also tried to cash in on her personal charisma—since the state's ruling Congress (I) leaders enjoyed no credibility worth the name—but even she failed.

The political climate of Andhra Pradesh had so dominated the national scene that the near-rout of the Congress (I) in Karnataka has come as a surprise to most people outside the state. Yet, taking a fresh look at events in the state, preceding the elections, one needn't be surprised at the massive "no" the electorate gave to the

ruling Congress (I). Admittedly, the main regional opposition party in the form of the Karnataka Kranthi Ranga paled before Andhra Pradesh's Telugu Desam. But Chief Minister Gundu Rao—who was eventually defeated in the elections and resigned thereafter—and his cronies compared no favourably with their respective Andhra counterparts. The general political trends were also not dissimilar from those in Andhra Pradesh.

If the Congress (I) had emerged victorious in the two states, the credit would have gone to Mrs Gandhi. She campaigned extensively there, but took for granted the respect—and the mandate—reserved for her. Five years ago her party assumed power in these two states. In early '80 she swept the Prime Ministership mainly by the backing of these southern bastions. Her campaign promise at both times to provide a government that worked. She has failed. Dissidence, incompetency and corruption are the byword in almost all Congress (I)-ruled states. The Centre too isn't exactly a show-piece of honesty and efficiency. The great crisis Mrs Gandhi faces today is her fourth—the first in 1969, when party bosses challenged her leadership, the second in 1975 when the Allahabad High Court annulled her election to Parliament; and the third in 1977, when she lost the general election.

A brief evaluation of the results:

Andhra Pradesh: NTR's Telugu Desam swept to an overwhelming majority, winning 202 of the 294 total seats. It put up a good show in the three regions of the state—Telengana, Andhra and Rayalaseema. Even the Medak seat, Mrs Gandhi's parliamentary constituency, was wrested by the Telugu Desam. NTR himself secured a double victory, winning from both his constituencies—Tirupati and Gudivada—by huge margins. In contrast, the Congress (I) secured a mere 60 seats, and these too were won by narrow margins. The conspicuous casualties: N. Janardhana Reddy, Agriculture Minister and Eswar Reddy,

Assembly Speaker. The position of other parties: CPI (M)—5; CPI—4; BJP—3; others—19. Countermanded—1.

Karnataka: The Janata-Karnataka Kranthi Ranga combine were the front runners, bagging 95 of the 224 total seats. The ruling Congress (I) was trailing with 81 seats and the Bharatiya Janata Party with 18. Among the prominent losers: Gundu Rao; Kagodu Thimmappa, Public Works Minister; M.M.J. Sadyojatha, Transport Minister; Manorama Madhwaraj, Minister of State for Women and Child Welfare; and D.B. Jatti, son of former Vice-President B.D. Jatti. Other parties secured 29 seats. Countermanded—1.

Tripura The CPI (M)-led four-party ruling front secured an absolute majority in the 60-member State Assembly, bagging 37 seats. The Congress (I), however, made some gains on the strength of its alliance with the TUJS (Tripura Upajati Juba Samiti). The Congress (I) took 12 seats and the TUJS 6. The position of other parties: BJP—5, F Bloc—1; CPI—1; others—5.

ANTARCTICA

THE SECOND EXPEDITION

India's second expedition to Antarctica in 11 months reached the frozen continent on December 28, 1982 after leaving Goa on November 30. The first expedition had landed on Antarctica on January 9, 1982. The 28-member team led by Dr V.K. Raina, Director of the Geological Survey of India, went to Antarctica by a chartered Norwegian ship, Polar Circle. The team includes scientists from the National Physical Laboratory (NPL), the National Physical Research Institute, the National Institute of Oceanography and the Indian Meteorological Department. The expedition will conduct geological experiments to assess the continent's mineral and oil potential. It will also conduct a systematic study of krillo, a protein-rich sea animal which abounds in the surrounding waters. Besides geological studies, Raina's team will also

survey and identify an airstrip so that the next expedition team can be flown in. The scientists will, furthermore, study the flora and fauna and collect fossils that could throw light on Antarctica's early history.

Alongwith scientific studies, the second expedition plans to establish a direct communication link between Antarctica and India. It has taken a number of transmitters of different types and other equipment for this purpose. Radio propagation studies will be carried out by scientists of the NPL and atmospheric studies will be conducted by C.R. Sridaran of the Meteorological Department. Of the 28 members in the team, 16 are defence personnel. They will be responsible for establishing the communication links, selecting the runway for a permanent manned station and providing logistics.

AKALI AGITATION

MODERATES PREVAIL

December was a period of respite in the long-drawn Akali agitation, although when the month began the last phase of their morcha for the implementation of the Anandpur Sahib resolution was in progress. Shortly after the end of the Ninth Asian Games, however, all the Akalis who had been arrested during the course of the morcha (about 3,000) were released.

On December 10, there was a deadlock during the crucial strategy session of the Akali Dal high command in Amritsar and the participants authorised the Akali Dal President Sant Harchand Singh Longowal to take decisions on his own. According to informed sources, the major hitch was on the issue of the forwarding of resignations of Dal MLAs and MPs to the respective presiding officers. The moderates apparently prevailed at the December 10 meeting and it was decided that the Akalis would defer their next move till January 26. G.S. Tohra and Sant Jarnail Singh Bhindranwale had demanded that the morcha plans should be announced on December 10 itself. Next day, Longowal declared that all Akali legislators would resign on Republic Day and the party would fight a "decisive battle" for its demands after January 26.

In another significant development, Longowal called a meeting of

retired Sikh army men in Amritsar on December 23. Despite the government's perceptible endeavours to discourage the ex-servicemen, the call met with remarkable success. About 8,000 of them gathered at the Guru Ramdas Bhawan and extended full support to the demands listed in the Anandpur Sahib resolution. Two hundred former officers, including major generals, brigadiers, colonels and others, attended the meeting.

Meanwhile the Centre continued its efforts to come to some kind of understanding with the Akalis. The religious demands of the Akalis have essentially been conceded. On the political demand regarding the transfer of Chandigarh to Punjab too, there is no problem. The only hitch is how to delink it from the transfer of Amritsar and Fazilka to Haryana. The talks on the Ravi-Beas rivers too are progressing. As long as the moderates guide the Akali agitation, there are still hopes of an amicable solution.

BIHAR PRESS BILL

CONTROVERSY GOES ON

The press was very much in the news all through December.

The highly controversial Bihar Press Bill came up for discussion at the Centre and the Information and Broadcasting Ministry recommended that certain provisions to which there were serious objections should be amended. The ministry came to this conclusion after holding talks with representatives of eight organisations of the press and newspaper industry, including the Indian Federation of Working Journalists (IFWJ).

According to the ministry's recommendations, offences under the Bill should be made bailable and non-cognisable and only the printer/publisher, writer and editor should be liable to prosecution instead of almost anyone, including readers, vendors and advertisers. The Bihar Chief Minister, Jagannath Mishra, accepted these and the other recommendations suggested by the I & B Minister of State, N.K.P. Salve, and said that his government would place the Bill with all amendments before the State Legislature. The suggested amendments, however, had the effect of charging the political atmosphere more. Youth and student organisations launched a drive to enrol 'satyagrahis' to

Amritsar protest. Protests continue while the Bihar Press Bill awaits amendments.

court arrest, demanding total withdrawal of the Bill. Journalists and political organisations too plan to launch massive agitations to stall the Bill. The general feeling is that the amendments would only add up to cosmetic changes and that the Bill should be dumped in its entirety. The Press Council and the existing laws on libel and contempt are enough to keep the press in line, they add.

Later in the month, the Press Council of India admonished the Editors of *Gujarat Samachar*, *Blitz*, *Probe India* and *Bharati Leader* on complaints ranging from publication of grossly exaggerated "death figures" to "indecent and obnoxious writing". The monitoring work of the Press Council has so far been commendable. Stressing the importance of such bodies and professional newsmen's organisations, Salve told the Madras Reporters Guild at its silver jubilee celebrations on January 1 that they should adopt a code of ethics to promote "fearless and responsible journalism" so that the government need not take recourse to legislations like the Bihar, Tamil Nadu and Orissa Press Bills. He said that the central government wanted to uphold the freedom of the press and had, therefore, suggested the amendments to the Bihar Government.

KERALA

COMMUNAL FLARE-UP

Violence gripped several districts of southern Kerala in late December as mobs ran amok after one person was killed and several others injured in a clash between the police and Muslim processionists in Alleppey. On December 28, a large crowd of Muslims took out a procession to celebrate the birth anniversary of Prophet Mohammed. The police intervened in order to prevent the disruption of traffic. The processionists reportedly attacked the police, who retaliated. The problem spread to other parts of Kerala as mobs created havoc in Trivandrum, Cherai, Cochin, Cannanore, Tellicherry, etc. There was much arson and looting in the capital city of Trivandrum, and a 500-strong crowd entered the airport premises and squatted on the runway after setting fire to the grass around it. The army had to be called in for the first time in Trivandrum to help maintain law and order. Life limped back to normalcy towards the beginning of January. The Prime Minister's Principal Secretary, P.C. Alexander, flew to Trivandrum to assess the situation. Official sources blamed the RSS and Marxist elements for fanning communal flames in Kerala.

SINO-INDIAN RELATIONS STRAINS ARE SHOWING

Over the last few years, Sino-Indian relations have improved—but painfully slowly. It slipped down a couple of rungs in early December when the New China News Agency (NCNA), which is the mouthpiece of the state authorities, commented that at the closing ceremony of the IX Asian Games in New Delhi, the Indian Government had presented two dance items of Arunachal Pradesh, and by doing so had used an international sports meet to spread a "discreditable" claim to a territory along the Sino-Indian border. China does not recognise the existence of Arunachal Pradesh which was established in 1967. The NCNA claimed that the dances were a deliberate step on India's part to propagate its sovereignty over the state and legalise it.

India, without over-reacting, regretted the "unwarranted attack" and criticised it as "perverse". The Chinese Ambassador to India, Shen

Jian, was summoned by the External Affairs Ministry and warned that the implications of NCNA's statement were unacceptable. New Delhi also cancelled the visit of an official Indian delegation to Beijing which was about to leave on China's invitation to take part in the 40th death anniversary memorial functions of Dr D.N. Kotnis. However, the government reiterated its intention "to persevere in our efforts at normalisation and in the settlement of the border question which is central to the development of Sino-Indian relations". The next round of border talks are to be held in Beijing on January 28 as India did not allow the dispute over the ethnic dance item to affect its decision to hold it as scheduled.

The Chinese allegations were nevertheless disturbing for India. China had itself held a whole series of exchanges with Pakistan in Pakistani-occupied Kashmir, without considering India's susceptibilities. Besides, its blow-hot blow-cold attitude brings back uncomfortable memories of the years preceding the 1962 border conflict. Although the bone of contention in the border dispute is the western and not the eastern sector, China is obviously going to try to pressurise India in the eastern side so as to gain concessions in the west.

BARODA CLASH OF THE COMMUNITIES

Baroda was again rocked by communal riots in December. Since September 1981, Baroda had more than its share of communal problems and from April to October 1982, there was almost continuous tension and trouble. Since October 1981, more than 60 people have lost their lives in incidents of violence. The immediate cause of the recent outbreak on December 13 appeared to be the transfer of the city's police commissioner, Jaspal Singh, for his inability to deal with the communal situation. The transfer followed the resignation of three Muslim members of the Baroda municipal corporation to register their lack of confidence in his ability to protect Muslims. Jaspal Singh, however, had the backing of the majority community, including the students of M.S. University. The mayor and 16 civic councillors, all members of the majority community,

resigned in protest against his transfer.

This was followed by communal violence for five days and stray incidents continued to occur through the rest of the month. In one alarming incident, over 6,000 live cartridges and a number of guns and rifles were looted from an arms shop in Mandvi, although some of these were later recovered. About 5,000 men from the SRF, BSF and CRP and 200 army jawans were brought in to patrol sensitive areas in Baroda.

The Home Minister, P.C. Sethi, and the Defence Minister, R. Venkataraman, flew to the city to hold discussions with various groups. A special group was set up to go into the causes of the frequent riots. According to Venkataraman, the transfer of Jaspal Singh was not the main cause of the December riots. The students of M.S. University, however, continued to agitate for the reinstatement of the transferred police commissioner.

RAILWAYS POLITICIAN vs BUREAUCRAT

Some years back there was pandemonium at the Rail Bhawan when the then Railway Minister Hanumanthaiya had an open confrontation with the Chairman of the Railway Board, B.C. Ganguli. History is being repeated again. At a press conference on December 20, the present Railway Minister, A.B.A. Ghani Khan Choudhury, flayed the members of the Railway Board, saying that they were "one-track-minded" and carried out the instructions at a "bullock-cart" speed. He added they would have to change their outlook "or else they will have to go".

Yet, carrying out his instructions at the speed he demanded created pandemonium at the New Delhi railway station on December 26. On his instructions the departure time of the Neelachal Express was advanced from 7.15 a.m. to 6 a.m. The officials did not have time to inform ticket-holders—and the result was total confusion.

Choudhury's record at the Centre has not been particularly good. His first order, as Railway Minister, was to make the Gaur Express, that runs from Sealdah through Malda (his hometown), run daily instead of three times a week, without considering the losses that the railways would

incur from this. At the recent press conference he railed against centralisation of power in the hands of the Railway Board, but on the other hand he has instructed that not a single train should be cancelled without his express sanction. Prior to the railways portfolio, he held that of energy. There too, he served his constituency well by distributing coal licences generously to friends and relatives. His actions have also been criticised because the railways, despite severe constraints, have been doing reasonably well. The accident rate actually went down in the past year. Although a certain degree of decentralisation and modernisation are required, and the Railway Board may need to be streamlined, it would be in better taste if Choudhury gets his house in order less vociferously and with more decorum.

INDO-PAK RELATIONS A STEP CLOSER

The Zia-Mrs Gandhi summit in New Delhi was followed up in late December by a meeting between the foreign secretaries of India and Pakistan in Delhi. The most important outcome of this meeting was an agreement to set up a joint

commission, thus institutionalising the growing bilateral cooperation between the two countries. The agreement covers cooperation in the fields of economy, trade, industry, education, tourism, travel, information, science, technology, etc.

The agreement, however, does not mean that all differences between the two nations have been resolved. In fact, an official spokesman conceded at the end of the talks that the problem of better relations has still to be resolved at a "conceptual level". Apparently, significant differences emerged during the talks, and there is enough cause for these. India and Pakistan do not agree on a whole range of topics, including non-alignment and the no-war pact.

INDO-VIETNAMESE RELATIONS TOWARDS MORE HARMONY

In yet another example of South-South economic cooperation, India and Vietnam signed several documents in mid-December including an agreement for the setting up of a joint commission. Vietnam is the only country in the South-East Asian region with which India has established a joint commission. The agreement

followed the visit of the Vietnamese Foreign Minister, Nguyen Co Thatch, to India and long discussions between the Vice-Chairman of the Vietnamese State Planning Commission, Dan Ngoc Xuan, and the Secretary of the Indian External Affairs Ministry, K.S. Bajpai.

The agreement on the setting up of a joint economic commission stipulates cooperation in the fields of transport, communications, industry, textile industry, geology and mineral exploration and exploitation. India will also send experts to Vietnam to train its personnel in science and technology.

Recently, India also expressed its readiness to join the efforts of other countries of South-East Asia to bring about peace in the region. India has, for some time, been trying to create a new regional order based on trust and cooperation with its neighbours, and the understanding with Vietnam is a step towards this goal. Vietnam, too, appreciated India's decision to keep the Kampuchea seat vacant at the Seventh Non-aligned Summit and Thatch said that any other course would have led to "chaos".

Ila Chand Joshi, 80, noted Hindi litterateur and former editor of *Dharmayug*, *Sangam* and *Sahityakar*, on December 14 in Allahabad.

Abul Asar Hafeez Jullunduri, well-known Urdu poet of Indo-Pak fame, on December 21 in Lahore.

T.G. Percival Spear, well-known historian who re-edited and rewrote the *Oxford History Of India*, on December 17 in London.

Bishnu Dey, 73, Jnanpith award winner and one of the most distinguished Bengali poets in the post-Tagore era, after protracted illness, on December 3 in Calcutta.

Roshan Ara Begum, Indian-born vocalist who migrated to Pakistan and winner of the prestigious Pride of Performance Medal in 1960 for distinction in classical music, of a heart attack, on December 5 in Islamabad.

George B. Kisliakowsky, 82, who worked on developing the first atomic bomb and later advocated the banning of N-weapons, after protracted illness, on December 7 in Massachusetts.

Arthur Rubinstein, 95, one of the greatest interpreters of classical music, after a short illness, on December 20 in Geneva.

ANIL PENNA

START TALKS A NONSTARTER

The START (Strategic Arms Reduction Talks) talks have been in progress for some time now and the see-saw process of nuclear diplomacy went on as US arms negotiator Paul Nitze and his Soviet counterpart Yuli Kvitsinsky held lengthy discussions in Geneva throughout December. At issue was whether NATO will deploy 572 US-built Pershing II and cruise missiles in 1983 in response to the build-up of Soviet intermediate-range SS-20 missiles aimed at Western Europe. There were hints in early December that the Soviet Union had floated ideas for a compromise. These hints took concrete shape on December 21, when the General Secretary of the Communist Party of the Soviet Union, Yuri Andropov, appealed to the US at the 60th anniversary celebrations of the founding of the USSR "to take the finger off the trigger and put a reliable safety catch on all weapons". The Soviet Union declared that it was prepared on the basis of reciprocity with the US, to freeze its nuclear arsenal and offered to come to an agreement immediately on a complete and general nuclear tests ban. Andropov proposed that the Soviet Union would cut its force of land-based SS-20 missiles, each armed with three warheads, to the level of the 162 mostly sea-based weapons maintained by Britain and France.

The US found this proposal unacceptable, saying that this would leave the USSR with 260 potent SS-20 missiles in Europe "while denying us the means to deter that threat". Paris and London too cold-shouldered the arms-limitation offer. However, the dialogue is still in progress in Geneva. Earlier, Brezhnev had offered a freeze of medium-range missiles in Europe. The Americans had rejected this and instead, Reagan had proposed a "zero option", under which the 572

missiles would not be deployed if the Soviets dismantled all their SS-20s everywhere in the USSR. The Soviets felt this was a trap and demurred. In December, the Russians came up with the Andropov offer, which the West has found unacceptable.

Yet, Western Europe is certainly not averse to arms limitation. Many feel that the deployment of the Euro-missiles would only escalate the arms race. Besides, injudicious comments coming out of American circles about the possibility of a nuclear war in Europe's backyard have not helped matters. Denmark's Parliament has voted to freeze a \$6-million contribution to NATO earmarked for the construction of new missile sites. Although West European leaders are still staunchly supporting the US position, the peace movements in various countries, including West Germany and Britain, have been embarrassing them by organising massive demonstrations against the deployment of the nuclear missiles. The fact that the negotiation doors are wide open was obvious when the US State Department disclosed on December 28 that the Reagan administration had sought clarifications from the Soviet Union regarding their nuclear arms-limitation offer.

The Soviet Union, under its new leader, is also acting pragmatically. While declaring that he would match the MX missiles if they were deployed, Andropov declared his readiness on December 30 to meet the American President at a summit meeting. Reagan, however, is still hawkish. His response to Andropov's summit call was cool. He felt that some tangible evidence of Andropov's sincerity was required before such a meeting could be held. According to him, the Russians could demonstrate their sincerity by remedial actions in Afghanistan and Poland and by coming up with some "serious" proposals at Geneva.

MX MISSILES STIFF RESISTANCE

The lame duck session of the 99th Congress in the US launched a pre-emptive strike against the MX missiles. In late November, President Ronald Reagan selected a Dense Pack basing mode for 100 MX missiles in a 14-mile-long strip in south western Wyoming. The 95-ton missiles are designed to reinforce the Minuteman ICBMs in the US. The Dense Pack is, however, controversial because there is disagreement in important circles as to whether it will work. Proponents of the mode claim that, in the event of Soviet warheads hitting the site, enough MX missiles would survive to launch a retaliatory strike. Those against the method claim that about 90 per cent of the Dense Pack missiles could be destroyed by fewer than 60 25-megaton warheads. In fact the Joint Chiefs of Staff are themselves divided over the issue and three of the five members, including the army chief, do not support the Dense Pack.

The deployment of these missiles was stalled when the US Congress voted against giving money to begin production of the MX in mid-December. It rejected the \$988 million sought by the administration to produce the first five of the 226 missiles it wants to acquire, although it approved spending \$2.5 billion for continued research and development of the MX and its basing system (presumably something other than the Dense Pack). In the House, the voting was 245 to 176 in favour of debiting the \$988 million for MX production. It is significant that 50 Republicans voted against the President's proposal. In fact, a Republican-dominated Senate committee also defied Reagan by adopting Democratic Senator Ernest Holling's plan to forbid any use of the production funds until both Houses of

Congress approve a basing mode. The next Congress will be even less in favour of this particular plan of the President. According to the findings of the latest TIME poll, Reagan's military position on the MX is eroding. Public support for producing the MX which reached 45 per cent in September 1981, fell to 35 per cent in December 1981.

OF AND

CONCILIATORY APPROACH?

The Polish Government had hinted that it would lift martial law by year's end; instead, Gen Wojciech Jaruzelski merely decided to suspend it at the midnight of December 30. The change would mean very little in real terms. The military council of national salvation, which was the supreme governing body in Poland following the declaration of martial law on December 12, 1981, may turn over most of its responsibilities to a civilian government. But that would most certainly be headed by Jaruzelski. The path to quick reimposition of martial law is thus left wide open. The right of strike will also be restored, but only in compliance with the new trade union law that sets out a complicated bureaucratic procedure before any strike can be called. As such the government, after suspending martial law, has armed itself with special powers. And these are fashioned to prevent any revival of a powerful trade union like the banned Solidarity.

Even so, pro-Soviet Marxists in the Polish Communist Party such as the former Politburo member, Tadeusz Grabski, are asking Jaruzelski if it was prudent to suspend martial law. He has taken risks, but not without reason. The Solidarity underground has been weakened not so much by the arrest as by the release of the Solidarity leader, Lech Walesa. His conciliatory letter to Jaruzelski, whether under pressure or otherwise, has further strengthened the government's hand and all but destroyed Solidarity's image as the legitimate vanguard of the opposition. The release in late December of all but seven political internees detained under martial law, has, surprisingly, not helped Solidarity. The distancing of the Roman Catholic Church from the underground leadership has also undermined Solidarity's power base.

Warming the Americans. Zia with Reagan, at the US President's Oval Office.

But the most important factor of them all are the Poles. the massive 25 per cent drop in living standards has not radicalised them, it has depoliticised them. And it is from the Poles' bravado-cum foolhardiness that Solidarity gained strength.

Yet, all has not gone the way Poland's Soviet masters would want it. And the state of the Polish Communist Party must prove the most irksome. It is weaker than any of its counterparts elsewhere in the East Bloc; and it hasn't become any stronger by snuffing out competition in the form of Solidarity.

Jaruzelski has realised this, and Poland today is ruled by an odd mixture of communist and non-communist political authorities. Economy, on which so much is at stake, is in the hands of Janusz Obodowski. He is a Jaruzelski loyalist—but is not a member of the Communist Party.

US-PAK RELATIONS GAINING STRENGTH

“Pakistan is faced with a problem next door, in Afghanistan, where the Soviet Union now has 100,000 troops.” This is the line that Pakistan's military President Gen Mohammad Zia-ul-Haq took during his recent visit to the US—and he was amply rewarded. The US is fully aware of Pakistan's strategic importance, standing as it does at the crossroads of China, the Soviet Union, West Asia and South Asia. In US President

Reagan's reckoning Pakistan could conveniently be fitted into his scheme for a Rapid Deployment Force, now subsumed in the concept of a new US South-West Asia Central Command.

However, there is evidence of an increasing maturity in bilateral relations with the superpowers in both India and Pakistan, especially after their own bilateral relations have become more accommodative. Earlier, tensions between India and Pakistan had led them to form closer ties with more powerful nations. It is significant that in one of his major speeches in New York, Zia said “the US must work in concert with both Pakistan and India”. On West Asia, he took the stand that there should be an amalgam of the Reagan and the Fez plans, that the inalienable rights of Palestinians, including the right of self-determination, should be recognised, and that since Pakistan has close relations with the Arab states, it could play a role to serve the cause of peace.

Zia's visit served to strengthen US-Pak ties, despite several hand-caps. He secured reaffirmation of the \$3.2 billion military and economic aid package under which Pakistan is to receive some squadrons of F-16s with the assurance of the advanced avionics on which he has been insisting. Furthermore, an agreement was signed on a joint

...the US private investments in Pakistan and joint enterprises. The country was also assured of "special financing" to develop its energy sector. It is quite evident that the US considers its relationship with Pakistan valuable enough to sweep certain uncomfortable facts under the carpet.

In contrast, the US media took special pains to focus on these facts. Zia was overwhelmed by questions on human rights and democracy in Pakistan at the National Press Club, the Foreign Policy Association, the Commonwealth Club and at a series of press conferences. American newspapers gave him some hard knocks and some protestors in streets and at public functions greeted him with harsh slogans. Although Zia fielded most questions successfully and tried to strike a sympathetic chord with the American public, his main emphasis was that Pakistan was a front-line state and was placed in a pivotal position. Therefore, it was worthwhile for the Americans to boost up Pakistan's military and economic development.

ISRAELI-LEBANESE TALKS DIFFERENCES PERSIST

After months of efforts by US envoys, Israeli, Lebanese and American negotiators finally opened talks on December 28 in the suburban town of Khalde in Lebanon. The negotiations should have started much earlier, in keeping with Israel's promise to withdraw its troops from Lebanon by year's end, but were stalled by Israel's insistence on Jerusalem as the venue. This was unacceptable to the Lebanese since it would have meant endorsement of Israel's sovereignty over East Jerusalem. The procedural tangle was resolved with Israel finally agreeing to hold the talks alternatively at another place in Israel and some place in Lebanon. Yet, hopes of a breakthrough in the Lebanese stalemate were belied.

After three rounds of talks, the second in Kiryat Shmona, a north Israeli frontier town on December 30, and the third again in Khalde on January 3, there were no signs of progress. In a sense, the talks got bogged down even before they really began, when the negotiators failed to reach a consensus on an

agenda—the first step towards a solution. The Lebanese delegation headed by Antoine Fattal, a retired diplomat, proposed that talks focus on a timetable for the withdrawal of foreign troops. Alternatively, the Israelis gave priority to normalisation of relations within a non-belligerency pact that would end the 33-year-old state of war between the two nations. The Lebanese proposal—that future relations be discussed in the framework of the armistice agreement signed between the two nations in 1949—was also opposed by Israel. Jerusalem felt that the 1949 treaty was annulled by the 1967 six-day war. There was also a difference of opinion as to the extent of the US role in the parleys, largely as a protector of Lebanese interests.

Even as negotiators continued to haggle, fierce fighting broke out between pro and anti-Syrian factions in the northern Lebanese city of Tripoli. Clashes between Druze Muslims and Phalangist militiamen in central Lebanon went on, though sporadically. An attempt was made on the life of Walid Jumblatt—leader of the Druze Muslims—when a bomb was hurled at his car, killing four people. Jumblatt himself escaped with minor injuries. Alarmed by the violence, Lebanese President Amin Gemayel asked the US, France and Italy to expand their peace-keeping forces in Beirut.

Thus, even if an accord is reached between Lebanon and Israel—the Lebanese chief delegate's parting concession that his side may, in the end, come around to seeing the issue from Israel's point of view provides hope that they will—there does not seem to be any early solution to the continuing crisis in West Asia.

SOUTHERN AFRICA WAYS OF THE TERRORISTS

Will South Africa get away with its version of the Monroe Doctrine: that the whole Southern African region is in South Africa's sphere of influence and no force hostile to that country will be tolerated in that region? Pretoria has, till now. It has linked the indepen-

*As we went to press, Israel and Lebanon reached agreement on an agenda for negotiations concerning Israel's withdrawal from Lebanon.

dence settlement of Namibia with the withdrawal of Cuban troops from Angola. And in early December, it carried out a raid on the homes of African National Congress (ANC) exiles living in Maseru, the tiny capital of Lesotho, killing 42 people including women and children. It claimed that ANC terrorists had moved into Lesotho over the past month and were planning a series of guerilla attacks on South Africa at Christmas. The Lesotho Government, however, denied any such influx of insurgents and claimed that 12 of those killed were its own citizens, while the other 30 were bonafide refugees from South Africa, who had been living there peacefully for several years.

The attack came just after South Africa had completed high-level talks with Angola on the Cape Verde Islands concerning the withdrawal of Cuban troops from Angola. On December 8, South Africa had also flown journalists to its border with Mozambique to show the world that it was not amassing troops there, as claimed by Mozambique, and that it had peaceful intentions in the region. After such peace feelers, the raid came as a surprise. It has led to an escalation of tension in the region again.

Some observers suspect that the Cape Verde talks were put up for the Reagan administration's benefit and that South Africa's basic aim is to stall pre-independence elections in Namibia, which may be won by SWAPO (South West Africa People's Organisation) nationalists. The Lesotho raid may further drive the Angolan Government against South Africa, and since South Africa has linked the issues of Namibia and Angola, things may remain as they are.

Whatever may have been South Africa's reason for attacking Maseru, the raid is bound to have an adverse effect on neighbouring countries like Zimbabwe and Mozambique, which may well ask for foreign troops to help strengthen their defences. Further, South Africa's attack on women and children may strengthen the hands of the radicals within the ANC. They have been demanding guerilla attacks on civilian targets and have so far been held back by older moderates who feel that attacks should be confined to South Africa's security forces, power installations and other similar targets.

TERRORISM

A RED CONNECTION ?

Where does la Pista Bulgara (the Bulgarian Trail) lead?

A little hint here a little evidence there and it almost appears that the assassination attempt on Pope John Paul II in Rome, 19 months ago, was masterminded by the Soviet Union which was angered by the Pope's support of Poland's independent trade union, Solidarity. The latest rumours have it that the trail could lead all the way up to the Soviet leader and former KGB chief, Yuri Andropov—and if the connection is proved, East-West relations may be permanently damaged.

The evidence collected so far is believed to have come from Mehmet Ali Agca, who was arrested after his attempt on the Pope's life. He reportedly confessed that he was offered \$125 million by some Bulgarians to kill the Pope. Bulgaria is a staunch ally of the Soviet Union and it is well-known that the Bulgarian secret service is run by the KGB. If the Bulgarian connection could be established, it could implicate Andropov, who headed the KGB at the time. At present, the evidence is only circumstantial and the case remains, as yet, unproven. In December Italian authorities arrested Sergei Ivanov Antonov, the head of the local office of Bulgaria's Balkan Airlines, who was named by Agca as one of his accomplices. At Italy's request the West German police picked up another Bulgarian suspect in Frankfurt. Agca,

God saved the Pope! Pope John Paul II recovering in hospital after he was shot in St Peter's Square some months back

however has been inconsistent in the later versions of his confession.

Bulgaria meanwhile, has explicitly denied its involvement in the affair. The Soviet Union too rejected as absurd the speculation linking Moscow to the plot. Even some Western analysts feel that the attempt was too ill-planned to have been directed by the KGB. Yet, the idea of Bulgarian complicity is not too far-fetched. A former Italian labour official, arrested last February for spying for Bulgaria, reportedly named one of the Bulgarians implicated in the papal plot as his contact. Furthermore, Israel has long alleged that Bulgaria has been training PLO guerillas. According to Western sources, Bulgaria has also been a haven for terrorists for a long time. However, the latest case is as yet unproved, and since much is at stake, Italy and its Western allies are keeping quiet until more solid evidence is unearthed.

DISASTERS

BLACK DECEMBER

December was a month of disasters, natural and otherwise. One of the worst earthquakes in recent history shook North Yemen on December 13 and 14, killing over 3,000 people. Arab news agencies reported that the 40-second tremor measured four degrees on the Richter scale. The National Earthquake Information

Service of the US Geological Survey in Boulder, Colorado, however, estimated the magnitude at six degrees on the Richter scale. Yemen's authorities reported that one epicentre was believed to be at Maareb, the site of a famous old dam, and the worst-hit area was the province of Zamar. The population of North Yemen is approximately eight million.

Later in the month, the explosion of two tanks at a power plant took the lives of over a hundred Venezuelans near Caracas and injured several hundred more. The tanks, which contained over 40,000 tons of fuel each, started a fire which raged for days and raised flames which were over 60 metres high.

SRI LANKA

VOTE OF CONFIDENCE

President Junius Richard Jayewardene received Sri Lankans' mandate to shape the island state's future in terms of his right-wing policies when he secured a majority in a referendum in late December, to extend the life of the current Sri Lanka Parliament by another six years. About 3.1 million people voted in favour of extending the life of the Parliament and 2.6 million against. Jayewardene's United National Party (UNP) enjoys numerical strength in the present Parliament and will now continue to provide the President with strong backing for another six years. The President won with a narrow majority, however.

What is disturbing about the situation in Sri Lanka is that Jayewardene has often resorted to emergency rule in the past. The latest referendum was held under emergency conditions. A number of opposition leaders complained that it had not been fair. Sirimavo Bandaranaike, the leader of an eight-party opposition front and Sri Lanka's former premier, alleged that her supporters in her former electoral district Attanagalle had been intimidated by "UNP thugs" and some of their poll cards had been destroyed. The leader of the pro-Moscow Communist Party, Pieter Keuneman, said that the government had won by "terrorism and fraud". M. Sivasinghamparam, the President of the Tamil United Liberation Front, reported that the north and east had voted "massively" against the government.

SPORTS

TENNIS

Following were the major international tournaments held in December:

Chris Evert (USA) beat Martina Navratilova (USA) 6-3, 2-6, 6-3 to win the Australian Women's Open Tennis Championship held at Kooyong stadium in Melbourne on December 5.

Ivan Lendl (Czechoslovakia) beat John McEnroe (USA) 3-6, 7-6, 6-3, 6-3 to win the European Champions' Tennis Tournament on December 6 at Antwerp (Belgium).

Wojtek Fibak (Poland) beat Bill Scanlon (USA) 6-3, 2-6, 6-3, 6-4 to win the WCT Chicago Open Tennis Championships held at Chicago on December 6. Anand and Vijay Amritraj beat Bruce Hanson and Mike Cahill (USA) 3-6, 6-2, 6-3 to win the doubles crown.

Yanick Noah (France) beat Tomas Smid (Czechoslovakia) 6-3, 6-2 to win the G.P. Tournament held at Toulouse (France) on December 13.

Martina beat Chris 4-6, 6-1, 6-2 to win the \$3,00,000 Series Women's Tennis Championship held at East Rutherford, New Jersey, on December 20.

S. Vasudevan beat Jaykumar Royappa 6-1, 6-1 to win the National Lawn Tennis Championship held at Chandigarh on December 12. Anu Peshawaria won the women's crown, beating Zenobia Irani 3-6, 6-4, 6-1.

CRICKET

Australia beat England in the Third Test played at Adelaide (December 10-15) and England beat Australia in the Fourth Test played at Melbourne (December 26-30). Earlier, Australia drew the First and won the Second Test of the five-Test series against England.

Pakistan drew the First and won the Second Test of the six-Test series against India held in Lahore (December 10-15) and Karachi (December 23-27) respectively. Zaheer Abbas was voted Man of the Match for the First and Imran Khan for the Second Test. The scores (First Test): Pakistan—485 & 135 for 1, India—379. (Second Test): Pakistan—452, India—169 & 197.

WEIGHTLIFTING

Vladimir Marchuk (USSR) set up a world record of 260 kg for the jerk in the super-heavyweight (over 110 kg) category at the Soviet Cup Weightlifting Competition held in Moscow, on December 19.

Imran Khan: He gives no quarter

HOCKEY

Australia beat India 6-1 to win the Esanda World Hockey Tournament on December 19 in Melbourne.

CHESS

World champion Anatoly Karpov (USSR) once again won the 'Chess Oscar' awarded by the Zagreb newspaper, *Vjesnik*, to the best chess player of the year.

Joseph Dorfman won the Bhilwara International Chess Tournament on December 30 in Delhi, totalling 8 points.

ATHLETICS

Daley Thompson, the British decathlon world-record holder, was awarded the OBE (Officer of the Order of the British Empire) on December 30 in London.

BOXING

Louis Acaries (France) won the European middleweight boxing title on December 3 in Paris against Frank Wissenbach of Germany when the referee stopped the bout in the 12th round.

VOLLEYBALL

Haryana won the men's National Volleyball Championship on December 31 in Bhopal, defeating Uttar Pradesh 15-13, 8-15, 15-9, 5-15 and 15-8. Kerala retained the women's title, defeating Railways 12-15, 11-15, 15-10, 15-10 and 17-15.

K.C.

KNOW YOUR CONSTITUTION

(Continued from page 15)

the maximum 500. The minimum strength of a Council is 40 (except in the case of Jammu and Kashmir where the membership is 36) and the maximum one-third of the State Assembly (Art. 170-171).

Elections: An Assembly is elected directly on the basis of adult franchise with reservation of seats for the Scheduled Castes and Scheduled Tribes. The composition of a Council is more complicated. One-third of its members are elected by the Assembly, another one-third by local authorities (municipalities, district boards), one-twelfth by registered teachers in schools not lower than the secondary school standard, and one-twelfth by registered graduates of not less than three years standing. And the rest are nominated by the Governor from among persons who have distinguished themselves in art, science, literature, cooperation and social service (Art. 171). Under certain circumstances a person may be disqualified from being a member (Art. 190-193).

Administrative Units: The principal unit of administration in a State is the district under a Collector and Magistrate. A Collector is responsible to a Commissioner who heads a Division or to the Board of Revenue depending upon the practice of a particular State. A District Magistrate is responsible for the maintenance of law and order.

Language: The language by which the business of the State Legislatures is conducted is the official language of the State or Hindi or English provided that in certain cases the Speaker may allow a member to address the House in his mother-tongue.

Legislative Procedure: The procedure followed is similar to that followed in the Union Parliament in respect of Bills except Money Bills which procedure is contained in Art. 198 and 207. Annually a financial statement like the Union Budget is also introduced and passed by the House (Art. 202).

Immunity of Members: Similar provisions as for the Parliament exist in respect of the State Legislatures and members exercising their rights.

▶ FESTIVALS: A CELEBRATION OF FILMS

Come festival time and a city lives, breathes, talks...and whispers... about films that awaken social consciousness, about films that expose the sordid side of life, about films that focus on problems common to mankind and about the films that come uncensored.

An international film festival also provides the ordinary cinema-goers the chance to get to know some of the best cinematic work being produced in the world, to see films by film-makers who have "a vision, a passion, a story to be told".

The Fascists were the first to understand the tremendous impact of films on masses and use it as a major medium of propaganda. And thus was held the first international film festival in Venice, way back in 1932.

The countries that participated were the US, UK, France, Germany, USSR and Italy. The festival was part of the city's traditional International Art Exhibition. There were no awards and judging took place by popular vote.

Seven years later, the Cannes Film Festival was planned, but it was actually held after World War II in 1946. As international political alliances were being

Pather Panchali, Winner of the Golden Palm at Cannes in 1956.

restructured, the international film festivals provided an opportunity for interaction. Moreover, the nations that were rebuilding their film industry after the War saw in the festivals a chance for world recognition.

Festivals were then initiated in Berlin, Moscow, Karlovy Vary, London, San Francisco, Chicago and New York City. There are now about 110 international festivals, both competitive as well as non-competitive, that are held every year. A number of festivals are devoted to exclusive themes such as the science fiction festival at Trieste, short films festival at Oberhausen, and cartoons and puppet films festival at Denmark. Similarly, a film festival entitled 'Semana de Cine Beroamericao' is held in Spain which reviews the films of Latin American countries only.

The International Film Producers Association (FIAPF) founded in 1933, is the body which accredits international film festivals worldwide. Seven festivals have been recognised in the 'A' (top) category by FIAPF. These include Cannes, Berlin, San Sebastian, Moscow (alternately with

Karlovy Vary), Teheran and the Indian film festivals. A brief review of these festivals:

Cannes Film Festival (France): It has maintained its place among the leading festivals of the world. It is essentially a marketplace, providing publicity and sales opportunities for films and talent alike. The annual festival consists of three sections -the main competition, the critics' week and the directors' fortnight.

The main award is the 'Palme d'or' (Golden Palm) which till 1973 was called the Grand Prix. The Special Jury Prize is for the most original film, and there are prizes for the best actor and a dress.

Satyajit Ray's *Pather Panchali* won the Golden Palm in 1956. In the Cannes Film Festival held in May 1980, the Golden Palm went to Akira Kurosawa's *Kagemusha* and Bob Fosse's *All That Jazz* jointly.

Berlin Film Festival: This was established in 1951 under the directorship of Dr Alfred Bauer. The West supported the festival largely out of political sympathy; the socialist countries of Eastern Europe did not participate. However, the festival quickly became an international showcase and is held every year in spring. It has been acknowledged by world producers as comparable with the Cannes and Venice Film Festivals. The orientation is largely towards the independent or non-commercial film; the documentary film has always held an important place and a youth section was instituted in 1961.

In the mid-sixties, the festival acquired some notoriety for the sensationalism and political extremism of some of the entries, and in 1970 political activists succeeded in stopping proceedings. The festival is noted for showing films from developing countries. The awards for the best films are the 'Goldenes Bar' (Golden Bear) and 'Silberner Bar' (Silver Bear). Satyajit Ray's *Ashani Sanket* won the Golden Bear in 1973. In 1980, the Golden Bear for feature films was given jointly to two films, *Heartland* (USA) by R. Pearce and *Palermo Oder Wolfsburg* by Werner Schrosser (FRG).

Karlovy Vary (Czechoslovakia): This

festival, founded in 1946, is held in Prague every alternate year. Sponsored by the Department of Czechoslovakia State Films, it aims at furthering friendship among nations and introducing outstanding films which contribute to the development of cinematography by their artistic merit.

The main prize is the 'Crystal Globe'. It is awarded to the most outstanding film and there are various other prizes such as the 'International Friendship Prize', 'Fight for Social Progress Prize' and 'Labour Prize'. Mrinal Sen's *Oka Dore Katha* won the international Jury's Special Prize in 1978.

Moscow International Film Festival: This competitive festival started in 1973 and is held alternately with the Karlovy Vary festival. It is held usually in the month of July. The main prize is a gold medal for the best feature film. Silver and bronze medals are awarded to runners-up in this category. Gold, silver and bronze medals are also given for short films, children's films and documentaries.

Winners of the gold medal for the best feature film include *Mimino* by Georgi Danilov in 1977. Indian actress Suchitra Sen won the award for the best actress in 1965 for her performance in *Sat Pake Bhondha* (Bengali).

Teheran International Film Festival: This was first held in 1972, but soon became one of the most important competitive festivals with its wide range of programmes. In addition to its competitive section, there are other categories such as the 'Festival of Festivals', documentaries of interest, retrospectives, and also a special focus on the neglected areas of world cinema. The 'Golden Winged Ibex' is the prize awarded for the best feature film. It was awarded to *The Last Wave*, an Australian entry in 1977.

San Sebastian International Film Festival (Spain): This has emerged as an impressive festival and a useful film market. The films are always screened in their original language with Spanish or French subtitles. In 1977 *The Mechanical Piano* by Mikhalkov (USSR) won the award for the best feature film. Several awards are given for the best feature film, best actor, best actress and best short film.

International Film Festival of India: This was first held in Bombay in 1952. However, this and the other festival held in 1961 in New Delhi (which has remained its permanent home since then) were non-competitive. In the third festival in 1965, the 'Golden Peacock' was introduced as an award for the best feature film and best short film. In the fifth festival, India adopted a permanent insignia, a stylised representation of a peacock, India's national bird, along with a permanent logo of the festival *Vasudhaiva Kutumbakam* (the whole world is a family).

The festival was officially recognised by the International Federation of the Film Producers Association in July 1974 and is now held every two years. The 9th Film Festival was a resplendent panorama of world cinema that stretched over from

January 3 to 17, 1983. Apart from the International Film Festival, India has been organising periodic 'Filmotsave' at which selected festival films from India and abroad are shown on a non-competitive basis.

Sàgari Chhabra, New Delhi

Booktalk

FACTUALLY SPEAKING

"Twinkle, twinkle, little star/How I wonder what you are." Thus goes the nursery rhyme, and if you want to discover what exactly the "little star" is, *50 Facts About Space by Mark Lambert is just the book for you. It traces the entire history of the universe, discussing at length about galaxies, the planets, the distant stars, spacecraft and their entry into space, the role satellites play in space, how the moon and Mars were explored and whether we can really live in space by building space colonies. The book

*50 FACTS ABOUT SPACE, 50 FACTS ABOUT ANIMALS, 50 FACTS ABOUT SPEED & POWER & 50 FACTS ABOUT DINOSAURS; published by Piccolo, England; price: £ 1.50 each; pages: 32 each; distributed in India by Rupa & Co.

also explains how a space shuttle is different from other aircraft, and to what uses it can be put. Close encounters of the third kind and UFOs also figure here.

Why do woodpeckers peck? Did you know that fishes have one sense organ called 'lateral line' that no land animal has? Do honey bees go shopping? How does the porcupine fish defend itself from enemies? Which bird can sew? What is a pangolin? Which creatures carry lamps? Which birds wear three coats a year? What hatches eggs in its mouth? To find out the answer to these interesting questions and others, all you have to do is buy *50 Facts About Animals by Ron Taylor—an excellent book for children for improving their animal knowledge.

Our modern mechanical age started with machines powered by steam. From then onwards it has been a steady progress towards faster speed and greater power by man having graduated from steam travel to engines powered by petrol. Trains and fast jet planes have made the world such a small place, literally. How we accomplished all this, and reached where we are, is traced from the very beginning in *50 Facts About Speed & Power, also by Taylor.

The fourth in the series, *50 Facts About Dinosaurs by Lambert, gives a comprehensive picture of the history of dinosaurs, their development through the ages, their living habits, the various species

of dinosaurs and shatters many old myths about these descendants of fishes, amphibians and early reptiles. We are also enlightened about the history of mammals, their first appearance on earth, as well as about the flying reptiles and the relationship between birds and dinosaurs, and whether any 'ruling reptiles' still live. Lambert makes sure we end up a lot wiser about the 'terrible lizard'.

These books are written in an easy-to-understand language, and the vocabulary is simple. Every page has exciting facts to be savoured, complemented by illustrations that are very colourful and apt. Each book has a name game and a word puzzle. These should be an exciting proposition for anyone with a yen to learn. A must for all youngsters.

Kavita Chhibber, New Delhi

GAMES OF WAR AND PEACE

What if Germany and Japan had defeated the Allies in World War II? What if Argentina had, against heavy odds, kept possession of the Falklands in its high-tech war with Britain in the South Atlantic? History would have been rewritten, to say the least. In the event, the ifs remained ifs. And mistakes, tactical errors in military jargon—that were committed by the German commanders and military planners 40 years ago continue to haunt their successors: more recently, in Argentina, everyone from the President to a private was hauled up and made to pay for the country's humiliating defeat.

What was responsible for the victory of the Allies and Britain strictly in the military sense? Brilliant planning, keeping in mind the weapons of warfare available, the fast changing situations in war, and bold moves to clinch a battle. Armed forces worldwide, in peace and during war, plan military moves and test them for their practicability like a game of chess. It is war games they play—but with a difference. Success depends on how true-to-life they are. For stakes in war are very high: there are no runners-up, only the victor and the vanquished.

The ancient game of *Chatrang* seems to be the oldest discernible attempt at organising war games for kings and princes. The four basic wings—elephants, chariots, cavalry and infantry—were moved on a board representing varied terrain. The throw of dice controlled the moves and thus introduced an element of chance. *Chatrang* had provisions for training leaders in decision-making.

Modern-day war games were devised by the German father-and-son team of Von Reisswitz. The warring nations, hypotheti-

Battle in a bathtub. Planning a fight between two warships is Peter Boyle in the pirate film The Blarney Cock.

cally always at odds, were represented by Red Land and Blue Land, each attempting to out manoeuvre the other on sand models and maps prepared to scale and representing the actual terrain. Umpires, guided by elaborate rules, controlled the games and delivered judgments on the outcome of engagements.

To keep pace with the ever-changing scenarios of war, war games have been further refined. But the basic purpose remains the same: to train commanders and evaluate their operational and research plans. The participants are divided into two teams, Reisswitz-style—Red Land, normally the attacker, and Blue Land, the defender. The terrain, as before, is built to

scale and the two teams prepare their attack and defence plans. To ensure that the plans are not leaked out, both teams are kept apart. Once the plans are formulated, Blue Land presents its plan on the scale model with the help of miniature guns, tanks, coloured tapes and symbols indicating the size of the troops. Next, Red Land gives out its plan of offence. At this stage, the two teams discuss each part of the plan, and the decision of a control team of experienced officers is taken as final. The games continue for a number of days.

Recently, an innovation has been made in India in wargames: a Trombay third-generation computer is being used to check and verify the decisions of the control team. The computer works on data based on famous battles fought worldwide and the use of weapons under varying circumstances. The Trombay computer works on 73 identifiable variables which can have a bearing on the effect of weapons. In one of the war games run by Lt Gen K. Sundarjee at the College of Combat in Mhow (MP), an interesting situation arose. Red Land attacked across a canal and captured an area two km wide and a km deep. During the night, they inducted 40 tanks across the canal. Blue Land decided to counter-attack at daytime with 74 tanks. The computer then gave a startling verdict: a stunning defeat to the counter-attacker with a loss of 55 tanks against Red Land's 11.

This situation had a striking similarity to a military operation across a river near Jammu during the 1971 Indo-Pak war when our forces had crossed the river and established a narrow bridgehead in which they inducted 33 tanks. Pakistan counter-attacked during the day with 74 tanks and lost 46 against our 141.

Such is the dangerous stuff that war games are made of!

Col Pithvi Nath, New Delhi

HOUSE OF DICKENS

This house at Broadstairs, Kent is where Charles Dickens (1812-70) spent his last and perhaps best years and produced such outstanding works as A Tale Of Two Cities, Great Expectations and Our Mutual Friend. The house reflects a charm and dignity typical of the old world.

FLEXICON... *For building a more evocable vocabulary*

Flex your vocabulary and define each word given below—by yourself. The word and its meaning will then be within your grasp.

This month's set of words pertain to the sphere of world affairs.

Take each word, study the definition blanks and trace the appropriate definition-words to fit the blanks from the *Word List* alongside. The number of letters in the word (its length) and the context of the blank will combine to help you make the correct choice. Cross out each word from the *Word List* after you have filled it into a blank. If a certain definition proves elusive, move to the next one. You can get back to it with some certainty after you have succeeded in placing the other words in the list.

You are now certain to have this set of words always at your instant command in the future. Correct definitions are given on the next page.

1. **ABDICATE:** To abandon a— (6) [or other high—(6)]. To abdicate responsibility means to — (5) a basic or bounden—(4).
2. **ATTACHE:** A member of the diplomatic corps attached to his embassy in a —(9) capacity, like a naval attache or a —(8) attache. His badge of office is the small, stiff—(9) he usually carries.
3. **BLOC.** A compact block or—(5). In world affairs, a bloc is a group of nations—(6) together or in concert or united by treaty or—(9) for —(6) support.
4. **CONSUL:** One appointed to aid, advise and assist his country's —(8), while in —(7) country. He heads the —(9) and his duties are more —(10) than diplomatic.
5. **DETENTE:** An —(6) or lessening of —(8) between major nations or blocs.
6. **EMBARGO:** —(10) of trade with a country by governmental order. A general trade embargo—(4) off all trade ties. There can also be a partial embargo, —(11) some specific categories of commerce [as of military—(8), for example].

It's also an order or a government—

(11) the departure of commercial ships from its—(5).

7. **IMPERIALIST:** A term used to describe countries or governments that —(4) to extend political—(9) or—(8) control over other nations.
8. **IMPASSE:** A—(8) or dead-end. A—(9) from which there seems no way out. An impasse is a—(7) of diplomacy and an admission of irreconcilable —(11).
9. **MORATORIUM:** The legal—(13) for a delay or temporary suspension of payments of instalments due from an institution or government. During the '70s it even meant by extension, a—(4) gathering or nationwide rallying of groups to call for such action. It applies to any officially declared—(4) to some periodically due action, or other recurring obligation.
10. **PLENARY:** Term describing a—(7) or meeting where all—(7) are present. It also means complete, absolute (as in the term 'plenary powers') in the sense of being fully —(9).

THE DECIPHERING GAME

Answer as many of the clues as you can and place your letters above the dashes opposite each clue. Then, transfer the identified letters down to the QUOTATION blanks below according to the matching numbers below the dashes. You can thus work back and forth between CLUE and QUOTATION words till you decipher the complete quotation.

To assist smooth going, we have ensured that no consonant repeats itself in the CLUE WORD section. All the repeat letters there are vowels. The printed 'hint' letters do not occur in the QUOTATION at all.

CLUE WORDS

Vivacious, full of verve $\overline{12} \overline{17} \overline{16} \overline{4} \overline{8} \overline{7} \overline{6} \overline{14} \overline{Y}$

Stamp a stamp? Disfigure! $\overline{13} \overline{3} \overline{F} \overline{9} \overline{5} \overline{3}$

Slang term for liquor $\overline{10} \overline{1} \overline{1} \overline{Z} \overline{3}$

CROSS-SUM

Simple arithmetic? Certainly. But these cross-number puzzles (whose digits 'cross' instead of letters) can help you become nimble with numbers (Solution in next issue)

(a) ENCODED

| | | | |
|---|---|---|---|
| | | E | F |
| D | D | B | D |
| B | D | C | B |
| A | A | | |

In the ENCODED diagram above, each letter stands for a specific digit between 1 and 9. Now study the data and use them to decode the letters into numbers in the blank square on the next page.

DATA

1. Number EF is three times (E+F)
2. $F < D < B$
3. The digits of each of the four-figure numbers total up to equal the two 2-figure numbers.

Solution to CROSS SUM of Dec issue
(c)

| | 1 | 2 | 3 | 4 |
|---|---|---|---|---|
| A | 1 | 4 | 8 | 5 |
| B | 6 | 3 | 3 | 6 |
| C | 5 | 4 | 4 | 5 |
| D | 6 | 7 | 3 | 2 |

Step 1. Row-B must equal six E's (as $F=2E$). Thus, $E=3$ and $F=6$.

Step 2: In Column-1, A and D must be 1,5 or 5,1 as they cannot be 2,4/4,2. This requirement flows from $F+F$ being already equal to 12 in the same column. Step 3: If D is 1, Column-4 would read 1,6,1,7, where the missing number would have to be greater than 9. So D is 5. Row-B is thus: 6,3,3,6 and Column-4 is 5,6,5,2. Row-C becomes 5,4,4,5. Filling in the 4 at square A-2 the others automatically follow.

Solution To Quotation

Clue Words: SPRIGHTLY, DEFACE.
BOOZE, JUNK
Quotation: ONE NICE THING ABOUT AN EGOTIST—HE DOESN'T TALK ABOUT OTHER PEOPLE!

Flexicon Definitions

1. **ABDICATE:** To abandon a throne [or other high office]. To abdicate responsibility means to shirk a basic or bounden duty.
2. **ATTACHE:** A member of the diplomatic corps attached to his embassy in a technical capacity, like a naval attache or cultural attache. His badge of office is the small, stiff briefcase he usually carries.

In world affairs a **bloc** is a group of nations acting together or in concert or united by treaty or agreement for mutual support.

4. **CONSUL:** One appointed to aid, advise and assist his country's citizens while in another country. He heads the consulate and his duties are more commercial than diplomatic.
5. **DETENTE:** An easing or lessening of tensions between major nations or blocs.
6. **EMBARGO:** Suspension of trade with a country by governmental order. A general trade embargo cuts off all trade ties. There can also be a partial embargo, restricting some specific categories of commerce [as of military hardware, for example]. It's also an order of a government prohibiting the departure of commercial ships from its ports.
7. **IMPERIALIST:** A term used to describe countries or governments that

economic control over other nations.

8. **IMPASSE:** A deadlock or dead-end. A situation from which there seems no way out. An impasse is a failure of diplomacy and an admission of irreconcilable differences.
9. **MORATORIUM:** The legal authorisation for a delay or temporary suspension of payments of instalments due from an institution or government. During the '70s it even meant by extension, a mass gathering or nationwide rallying of groups to call for such action. It applies to any officially declared halt to some periodically due action, or other recurring obligation.
10. **PLENARY:** Term describing a session or meeting where all members are present. It also means complete, absolute (as in the term 'plenary powers') in the sense of being fully empowered.

V.D. Velegar, Bombay

On The Lighter Side

The lady was nearly 90 years old when she won Rs 20,00,000 on the 'Prince Charming' in a horse race. Her family was extremely worried about her heart and feared that news of her large win could prove a great shock for her.

"I think we had better call in the doctor to tell her the news," suggested the eldest son.

The doctor soon arrived and the situation was explained to him.

"Now, you don't have to worry about anything," said the doctor. "I am fully trained in such delicate matters and I feel sure I can break this news to her gently. I assure you, there is absolutely no need for you to fear for her health. Everything will be quite safe if left to me."

The doctor went in to see the old lady and gradually brought the conversation around to the race.

"Tell me," said the doctor, "what would you do if you had a large win in the races—say over Rs 20 lakhs?"

"Why," replied the old lady, "I'd give half of it to you, of course."

The doctor fell down dead with shock.

Raajesh Pandit, Sonapat

When Lord Halifax was a young man, he travelled one day from London to Bath, seated between two sober-faced spinsters. No one spoke during the long journey.

Just before reaching Bath the train entered a tunnel and young Halifax put the back of his hand to his lips and made loud kissing noises. As the train emerged into daylight he looked from one to the other of the startled women, rose, tipped his hat and said with a mischievous twinkle, "To which of you two charming ladies am I indebted for that most delightful interlude?"

Then he stepped out leaving the two spinsters glaring suspiciously at each other.

L. Jacqueline Chithra, Tirunelveli

"Will you stop smoking, before we are married?"

"No doubt!"

"Will you stop drinking?"

"Of course!"

"Will you stop going to the coffee house?"

"I must!"

"What else will you give up?"

"Well, I shall give up the idea of marriage!"

Subir Kumar Das, Calcutta

DID YOU KNOW THAT...

1. The onion is named after the Latin word *unio*, which means a large pearl?
2. Over 30 states in the US produce petrol?

3. Sunglasses were first worn by film stars, not in an attempt to look mysterious, but to relieve their eyes from the dazzling glare of the studio lights?
4. The North Pole is 2,799 m lower than the South Pole?
5. The left side of your brain controls the right side of your body and vice versa?
6. President Jimmy Carter saw a UFO in 1969, during his birth month?
7. Hindus cannot be excommunicated from their religion no matter what they do?
8. 120 drops of water are needed to fill a teaspoon?
9. From the bottom of a deep well it is possible to see the stars during the day?

Shuchita Sharma, Delhi

WATCH OUT! IT TALKS

Next time you hear your friend's 'wrist' asking you to hurry up, don't take to your heels. It's nothing sinister—just his new talking wristwatch.

The first of its kind has been recently developed by a Munich-based firm. Resembling any modern digital wristwatch, it can 'tell' the wearer the time of the day. Its recorded voice can also tell you when to "wake up" or hurry to keep your appointments.

No excuses for latecomers!

Saurabh Sinha, Muzaffarpur

SOLUTIONS

CCTIMES QUIZ CONTEST-6

1. Hades, son of Cronus and Rhea. His name in Greek, Aides, meant 'The Invisible', and he was an object of dread. After the fifth century B.C., Greeks and Romans called him Pluto and the name Hades was used for the abode of the dead he ruled.
2. Portugal to Charles II in 1662.
3. Japan.
4. Il Duce, meaning the leader.
5. Avions Marcel Dassault, a French company.
6. Hebrew and Arabic.
7. Dr Konrad Adenauer.
8. 50 white stars, one for each state, and 13 stripes—seven red and six white alternating horizontal stripes. The stripes represent the 13 original states.
9. The Leopard Moth.
10. Sputnik I, which was launched by the Russians on October 4, 1957. It weighed 184 pounds.

Winners

(Since there were too many all-correct entries, one-error and two-error entries could not be included in the draw of lots.)

First Prize: 1. Indrajit Sinha, Calcutta 2. Birendra Narayan Singh, Ranchi. 3. Devaraja B.P., Mangalore 4. Nirmal Kumar Goenka, Sitamarhi (Bihar). 5. Jokhu Ram Sonker, Varanasi 6. Srimathi Rajalakshmi, Madras. 7. S. Palani, Tiruchi. 8. Beena A.K., Distt. Trichur. 9. Badre Alam Ansari, Gorakhpur. 10. Dev Kumar Nair, Mhow (MP).

Second Prize: 1. T.S. Vaidyanathan, Bhubaneswar. 2. S. Sudarshan, Hyderabad. 3. Rohini Vaidya, New Delhi. 4. S. Srinivasaga Raghavan, Distt. Tirunelveli. 5. M. Vamsimohan, Mandapeta.

Third Prize: 1. Anand Vardhan Chaturvedi, Allahabad. 2. Benny Jose, Durgapur. 3. V.S.P.V. Rao, Patna. 4. Rizu, Cuttack. 5. M.V.V. Subba Rao, Mandapeta.

Consolation Prize: 1. Prashanth Kumar, Hyderabad. 2. T.R.P. Kumar, Hyderabad. 3. Laxman Kumar Panda, Sambalpur. 4. Amin Bimal R., Ahmedabad 5. P.C. Saratchandran, Calicut. 6. S. Satish, Madras. 7. Mrudula Shrivastava, Akola. 8. Rajesh Inamdar, Ahmedabad 9. Sushil Bhagat, Delhi. 10. D.A. Tambe, Pantnagar, Distt. Nainital.

SPORTS QUIZ-14

1. Z.R. Irani of Cricket Control Board of India
2. March 1960, New Delhi
3. Ravi Shastri—he took 9 wickets for 101 for Bombay against Rest of

India at Indore in 1981

4. Yes. A bowler can bowl upto a maximum of 10 overs only
5. Team title—North Zone 'A'; individual title—Ranjeet Grewal
6. South Africa (0-4) and Pakistan (0-3)
7. 33

Winners

(Since there were not enough all-correct entries, one-error entries were also considered for the Consolation Prize.)

First Prize: 1. Nirmal Kumar Goenka, Sitamarhi (Bihar) 2. R. Subramanian, Madurai.

Consolation Prize: 1. Pankaj Kumar, Varanasi. 2. Prem Lata Goenka, Sitamarhi (Bihar). 3. V. Anandha Nageswaran, Madurai. 4. Arita Paranjpe, Raipur. 5. Mohinder Kumar, Delhi.

ROCK TIDINGS

● Following the massive success of their *Freeze Frame* LP, the white, rowdy R&B act, The J. Geils Band, fronted by vocalist Peter Wolf, have released their second live album, *Showtime*. Their first live one was the two-record set, *Blow Your Faces Out*. Caught full-throttle on this offering are originals *Love Stinks*, *Centerfold* and a racy cover version of *Land Of A Thousand Dances*.

● *Greatest Hits* from Australia's most popular pop-rock outfit, Little River Band, is a unique "best of" package in that it features songs by both former lead vocalist Glenn Shorrock, who has now gone solo, and his new replacement John Farnham. Local fans and listeners will surely remember LRB's famous hits like *Happy Anniversary*, *Lady*, *Man On Your Mind*, etc.

● Billy Joel, whose records are now available here (*52nd Street* was released courtesy CBS), has smashed his way into the Top 10 with *The Nylon Curtain*. Joel's latest work has happily received favourable reviews, since he is known to keep

on a running battle with over-the-hill media men.

● Rightly topping the jazz charts is an

Peter Wolf: It's 'showtime' now.

irrepressible, cool jazz album entitled *Two Of A Kind*. It's a joint venture by guitarist Earl Klugh (who plays acoustic guitar) and keyboard man Bob James. If you do come across it grab it. It's some of the most relaxed jazz I've ever heard.

● One of the most surprising hits on the pop charts in 1982 was Jane Fonda's *Workout Record*, which surprised every-

CCTIMES QUIZ CONTEST-8

WIN Rs 24,000
IN PRIZES
EVERY YEAR
Rs 2,000
A MONTH

1. What is the full name of NTR, the Andhra cine star and founder of the Telugu Desam?
2. The film, *Gandhi*, is dedicated to three men no longer alive. Who are they?
3. What is the name of the first Arab satellite, to be launched in October 1984?
4. What was the real name of George Orwell?
5. Which country is called a boot because of its shape?
6. What is a cataract in Geography?
7. What do these three novelists have in common: Somerset Maugham, A.J. Cronin and Sir Arthur Conan Doyle?
8. Who is the designer of the world's first man-made heart, implanted on Barney Clark, a 61-year-old retired dentist of Seattle, by surgeons at the University of Utah Medical Center?
9. What is the currency of Israel?
10. What do the French call the English Channel?

HOW TO ENTER

- Print the answers neatly in capital letters alongwith your name, age and address
- You may send in any number of entries, but each must be accompanied with its respective COUPON
- Though all your entries will be included in the draw of lots, you will be entitled to only one prize—the highest in case you're getting more than one
- The decision of the judges is final and binding. No correspondence will be entered into.

Closing date for the three contests: February 27.

Address your entries to: The Editor, Career & Competition Times, 10 Daryaganj, New Delhi-110 002

Solutions to this issue's contests will be published in April.

Solution to SPORTS QUIZ-14, KENWORDS-14 AND CCTIMES QUIZ CONTEST-6 on page 86.

Sports Quiz-16

BY NAROTTAM PURI

WIN Rs 100 IN BOOKS

1. What unique record did Murofushi of Japan set in the hammer throw event during the IX Asiad?
2. Which was Bahrain's first medal in the IX Asiad?

INDIAN ECONOMY: A PROGRESS REPORT

BANK RECRUITMENT

PROBATIONARY OFFICERS/CLERKS

"Specialised Training in NSB Regular/Correspondence Courses has proved to be the guaranteed way to secure jobs in Banks as Probationary Officers & Clerks."
-says Editor, Citylight, Bombay.

If you have applied to State Bank of India or any Nationalised Bank Boards, for PO or Clerical Post, join our Course now.

Banking: A Rewarding Career:

Nearly 2,500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. An graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And, after nationalisation, Bank jobs have acquired a new status because now the Banks have taken upon themselves the responsibility of building a better India. Today, in our Banks, our social ideals find a dynamic expression. Bank jobs therefore offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects: (1) Reasoning (verbal, logical, non-verbal) (2) Quantitative Aptitude (3) General Awareness and Current Affairs (4) English Comprehension (5) Essays, letters, press writing are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, ECGC as Officers. The subjects, syllabus, pattern of tests and examining body (NIRM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success oriented students join the Course well in advance of the test and benefit by our step by step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

NSB's Faith in Specialisation:

National School of Banking, head-quartered at Bombay, was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams—of POs and Clerks. It has grown rapidly and is now the largest pre recruitment training institute in the country. Our continuous research and on-going study of objective and descriptive exam question papers have contributed to our present pre-eminence as the central institute for BANK RECRUITMENT training.

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers, Clerks are declared of tens of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants 2300 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A provenly competent, specialised and thorough coaching becomes a MUST.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

JOIN NOW AND PREPARE FOR A RICH AND REWARDING CAREER. For details of vacancies, application forms and our special courses, write today with Rs 2/- P.O. or M.O. to:

LETTERS

Apostle Of Doom

The US President, Ronald Reagan, has taken up a promethean venture—to deploy the MX experimental nuclear missiles (*Current Events*, Jan '83) which will be about 10,000-times more powerful than the Hiroshima Bomb. Reagan assumes it will be a "deterrent to the Russians from firing the first shot". And paradoxically enough he labels this \$ 26-billion Armageddon as "peacekeeper".

But it is tragic indeed to note that both the superpowers have always tried to excel each other and the balance of power has never been reached. Can we be sure that the USSR will not take a retaliatory measure to outweigh the MX? And if it does, can we still accept the idiosyncratic Reagan as an "Apostle of Peace"?

Batuman Nayak, Barpeta (Orissa)
Best Letter: Rs 40

Nation Before Self

Sanjeev K Gupta's article *Turning The Back Pages* (Jan '83) made interesting reading as it was more than a mere recapitulation of dry statistics.

The way we hosted the just-concluded Asian Games has proved to the world and the sceptics among us what the nation is capable of. The same dedication and singleness of purpose assured, we can aspire to eradicate poverty and take rapid strides to prosperity through manifold increase in production in all sectors of the economy. Unfortunately, these are precisely the virtues we lack. The all-pervading ethos in every walk of life is how to make a fast buck. It erodes the possibility of dedication to the tasks of nation-building at the individual level and united, purposeful action at the political level.

Raghu S. Nay, Baroda
Prize-winning Letter: Rs 25

Give All A Chance

Apropos *Dissidence On The Rise* (*Current Events*, Jan '83), after defections dissidence has now become a part of the Indian political set-up. A few years ago, the University Grants Commission introduced a scheme under which there is no permanent head of a teaching department. All the senior teachers become heads of their departments by turn and for a specified period. The results have been quite encouraging.

Why not make chief ministership a revolving post on the same pattern? I am sure dissidence will be checked, scandals will minimise and efficiency will increase.

Maharaj K. Koul, Srinagar

Agony And The Ecstasy

While our leaders watched the Asiad, (*Asian Games*, Jan '83) clapping with joy, millions of Indians suffered the agonies of increasing poverty. Whatever the state of the nation, the Asiad certainly seems to have eradicated the poverty of some officers, engineers, contractors and organisers!

Arvind Kumar Shukla, Allahabad

Lasting Impression

The editorial on letter writing (Dec '82) was excellent. Job applicants in particular should remember that the first impression could well be the last. However, the letter

is only an initial phase. The more difficult one is, perhaps, living up to the image.

Vasanth Nayak, Hubli

Albeit I am no authority to challenge the point of view of your intelligent friend, Narayan, I feel his statement—"who cares for his desire, I am interested in what I desire"—proves he is an egotist. In this regard, it must be noted that dexterity in one's field obviates sycophancy in the form of well-polished letters.

Brij Sharma, Bikaner

A Real Help.

I am a regular reader of *CCTimes*. *What's Banking About?* (Nov '82) was a real help specially for the Maharashtra Public Service Commission's main exam held recently. Your feature had covered almost 100 per cent of the question paper.

Sahebrao Himmatrao Patil, Thane

'Record-breaking' Performance

The review *India In 1982* (Jan '83) was excellent. Last year, India improved its relations considerably with many Asian and European countries, besides keeping a perfect balance with the two superpowers. However, the national scene is another matter. Besides agitations in Assam and Punjab and spreading communal tension, the country's economy faced a serious recession. In the

productivity of the country, the loss of working days, in spite of the supposed record production.

G. Devaki Devi, Nizamabad

Make It Meaningful

The prize-winning entry on *What's Wrong With Our Education System?* (Jan '83) was lucid. Instead of the stress on abstruse theory our students should be taught some useful craft and the development of an independent spirit should be encouraged.

Subhasis Ghosh, Cuttack

A Paradox

The Citizenship Articles 5 to 11 of the Constitution (*Know Your Constitution*, Dec '82) ensure single citizenship to Indians throughout India. But doesn't the requirement of bonafide certificates of their own state, such as bonafide Himachali or Haryanvi certificates, lead to a dual citizenship system?

Parveen Kumar Mittal, Chandigarh

Just One Point

The duration of the Lok Sabha (*Know Your Constitution*, Jan '83) under Art 83(2) is five years and not six as mentioned.

R. B. Jeswani, Ulhasnagar

The Rajya Sabha is a permanent body with one-third of its members retiring after every second year.

S. Asif Quli, Patna

"Internal disturbance" is no longer a reason for proclaiming emergency. The expression was substituted by "armed rebellion" by the 44th Amendment Act.

Asha Narula, New Delhi

The Bihar Legislative Assembly (*Know Your India: Bihar*, Jan '83) consists of 324 elected members and not 318 as mentioned.

Narendra Kumar Pandey, Delhi

There are 32 districts in Bihar, not 31. The 32nd is Madimpura

J.R. Prasad, Gaya

Vidyapati belonged to the 14th and not the 15th century.

Pramod Kumar Jha, Ranchi

WIN A PRIZE

Do our articles interest you? Do you say something? If so, write to us. We also pay you for your letters. Here's your chance to make money. Write to us now. The more you write, the more you win.

Sudha, an antiquarian, bought an ancient lamp. On reaching home, she rubbed it clean and BANG! A strange looking person suddenly appeared in the room. Terrified, the lady yelled: "Who are you?"

"I am Chirag Jin. Whoever owns the lamp is my master," the Jin bowed and replied.

"But what do you want?" the bewildered lady enquired.

"I am at your command, ma'am. Whatever you desire will be done."

The lady ordered him to clean the house. He did it pronto. She gave him another assignment which he finished in a jiffy. Quite stupefied and wondering what else to give him she saw a heap of apples in the kitchen and directed him to sort them out into various sizes—large, medium and small. Then she left the house. Coming back, Sudha was surprised to see a confused Jin. "Why haven't you done the job?" she demanded. The Jin explained he had been unable to decide between the larger apples and the smaller ones!

Decision-making is a vital factor for effective planning. You have to take decisions at every step and as you move up the ladder, the number of decisions you take goes up. Decision-making involves more responsibility at a higher level because your decisions affect a larger

number of people and involve utilisation of valuable resources. Managers, officers and administrators are paid for taking decisions. Their efficiency is judged by the efficacy of their decisions.

Decision-making is a skill in which some people are more apt than others. However, it can be learnt and improved upon if you are willing to make an effort. You can learn it the same way you learnt how to add numbers in school—through regular practice.

Just like any other skill, there are certain techniques which can help you master this skill. The following four-step formula can be useful in arriving at a good decision: identifying the problem; making an inventory of your resources; identifying alternate solutions; and, idea evaluation.

First, identify your problem. Every decision is related to one or several issues. Find out the root cause. If you cannot, you will certainly not be able to arrive at a solution. It is important to identify the problem clearly and exactly. You cannot afford to be vague. For example, instead of saying the problem is about 'lack of concentration', say it is about 'how to improve concentration'. A clearly identified problem is half the battle won.

Next, make an inventory of your resources. Identify all the available resources, financial or non-financial, you can mobilise. However, be clear about all the help you will be able to get when you implement the decision. If you have a vague idea about your resources, you may probably take a wrong decision.

As a third step, known as brainstorming, let your imagination run free and come up with as many solutions as possible. As evaluation inhibits the discovery of new and creative solutions, do not discard any idea because it does not seem practical. When you think you have exhausted yourself, try for a few more. You can almost say that the

quality of your final decision will be proportionate to the number of possible solutions you first encountered. Sometimes the solutions which you initially discard as improbable, prove more valuable than those you considered viable.

Idea evaluation and arriving at the best solution is the final step in decision-making. Assess the pros and cons of each solution from two angles: how close it comes to completely satisfying the goals you have set, and, the amount of available resources it will consume. At this stage, invite responsible criticism and do not be diverted by appreciation. Do not bother about who came up with the solution, i.e., delink the solution from its sponsor.

Consider possible, probable and preferable solutions. Consult a few knowledgeable persons. The final decision should combine maximum return with the minimum utilisation of resources.

Decision-making should not end with this. Two more things are important: prepare an implementation plan, and decide on the persons who have to be informed about the decision and who is going to do what, when and how. Distribute work and fix responsibilities on specific persons. This is very important as a badly implemented decision is worse than taking no decision.

A good feedback system is *sine qua non* to decision-making. Once the decision has been taken and implemented, you should try to discover the shortcomings in its execution. Find out what worked well, what did not; whether the system functioned efficiently—if not, where it failed. This exercise should make you wiser, and enable you to take better decisions next time.

R. Thalan.

CORRESPONDENCE COURSES

Correspondence Education helps extension of knowledge. Continuing education forms part of any fast developing industrial economy.

H I E T has a unique record of having on its rolls students from all parts of India and over 20 foreign countries doing Engineering courses by Correspondence. Full time Collegiate training also available at Madras

FACILITIES:

Concession for defence personnel. Text book supplied on important subjects. Apprenticeship training offered in our well equipped Workshops, Labs during vacations.

The Management Page

is now a special feature in THE ECONOMIC TIMES
Every Wednesday & Saturday covering eight Management areas.

| Wednesday | | Saturday |
|-----------|---|---|
| First | Finance Management | General Management |
| Second | Marketing Management
(including sales & advertising) | Information Management
(including system & communications) |
| Third | Legal Management | Taxation Management |
| Fourth | Production Management
(including materials management) | Personnel Management
(including manpower development) |

The Management Page raises issues presents techniques and approaches, studies the actual experience of decision makers at all levels and deals with specific problem oriented situations in all management areas. Mainly written by managers, the articles are brief, practical and frank. Principles emerge, wherever possible from the way specific problems are handled.

Plus three extra pages on these two days, focussing on many a sector of the economy — industries, commodities etc.

THE ECONOMIC TIMES

A paper for decision-makers.
Published simultaneously from New Delhi, Bombay & Calcutta.

It takes less time to do a thing right than to explain why you did it wrong
Henry Wadsworth Longfellow
In war, whichever side may call itself the victor, there are no winners, but all are losers.

Neville Chamberlain

Nothing great was ever achieved without enthusiasm.

Ralph Waldo Emerson

NON-ALIGNMENT

CREDIBILITY AT STAKE

The first conference of the heads of state of non-aligned countries, which may be said to mark the beginning of the non-aligned movement, took place in September 1961 in Belgrade. Twenty-five countries attended this conference—and brought the movement into existence. Over the years the movement has grown and in 1979, at the Havana Summit, its membership had more than tripled.

Beginning in a small way, with a few statesmen taking the initiative and largely ignored by more powerful nations, the movement today is a force to be reckoned with. Its membership ranges from the oil-rich Arab states to leftist nations such as Cuba and revolutionary countries like Libya, and constitutes a clear majority of the global population.

The third quarter of the present century witnessed rapid decolonisation mainly as a result of national movements in various African and Asian nations. The resolve of these newly-independent states—to preserve and protect their independence in the face of persistent attempts by the superpowers to draw them into their fold—led to the birth of what is today known as non-alignment. Obviously, the foreign policies of the various non-aligned states are determined by factors arising out of their own domestic and international compulsions. The one common refrain is 'anti-imperialism' (i.e., an anti-Western stance).

Though the movement proper came into existence in 1961, its origin can be traced further back in time. The Asian relations conference held in New Delhi in March 1947, five months before India's independence, saw Jawaharlal Nehru, the head of the interim government of India, declare an independent foreign policy, free from superpower influence. The term non-alignment was not used

Nasser, Nehru and Tito (from l to r): The founding fathers of the non-aligned movement.

then. Participating Asian states declared a similar policy for themselves and expressed their solidarity against imperialism. The gains of the 1947 conference were further consolidated by the conference of the Asian states, held in 1949, in support of Indonesia's independence from the Netherlands. The Bandung Conference of Afro-Asian states in 1955 further extended the base of the movement.

The preparatory conference to the first non-aligned summit was called in June 1961 in Cairo and was attended by the three founding fathers—Presidents Josip Tito of Yugoslavia, Gamel Abdul Nasser of Egypt and PM Nehru—and Brazil as an observer. As a result of these talks, the first non-aligned summit was held in Belgrade later that year. The criteria for invitations were an independent foreign policy, an anti-imperialist stance and avoidance of military alliances with big powers. These later on became the criteria for membership of the non-aligned movement itself.

The Belgrade Conference concerned itself with broad political issues: it called for an end to colonialism in various parts of the world, condemned the "imperialist policies" pursued in the Middle East, demanded the abolishment of apartheid in South Africa, called for "general, complete and strictly—and internationally—controlled disarmament", peaceful co-existence and national self-determination. And while more factors are being taken into account, particularly the economic factor, in

subsequent conferences, the non-aligned movement never quite lost sight of these fundamental issues.

Besides the six summit conferences held so far (see box), there have been various 'informal' and 'consultative' meetings and preparatory conferences. The preparatory conferences take care of the organisational aspects—determining the venue, agenda, draft resolutions to be adopted at summits, etc—thus playing an important role in the evolution of non-alignment. The non-aligned states also organise informal meetings of their delegations in New York before the commencement of the UN General Assembly session, in order to formulate a common strategy. A mini-summit was also held in New Delhi in July 1976 to decide on the setting up of a Non-aligned News Agency Pool.

The movement has been accused of partiality towards the Soviet Union, and with good reason, though most accusations fail to take into account the historical base of the movement. For most of the Afro-Asian states the Soviet Union has been, during their freedom struggle, an enemy of the enemy and so, indirectly, a friend. Again, the Soviet Union has always voted against all forms of racist prejudices and has confined its activities (military) to Eastern Europe, mostly. In fact, at the Havana Summit in 1979, radical members led by the host Cuba went to the extent of pressing for a pro-Kremlin stance, arguing that the Soviet Union was their 'natural ally.' Fortunately, the move was defeated, thanks to the efforts of Tito, who has always

Natural ally or not, globally the non-aligned nations have to be wary of both the superpowers, each of which has a worldwide interest. If the Americans are rightly suspect in Central America and the Caribbean, the Soviets are positively in the wrong in Afghanistan and indirectly so in Poland. With the process of decolonisation practically completed (except in South Africa), the anti-Western

movement has almost lost its meaning.

Yet, after the three-and-a-half-year gap since the Havana Summit in 1979, the New Delhi Summit, scheduled to begin on March 7, 1983, is still dogged by the 'natural ally' question. Just this January, during the five-day meeting of the non-aligned coordinating bureau in Managua, Nicaragua's capital, Cuba and other Soviet proxies again took up the 'natural ally' and 'anti-

non-alignment could not be divorced from these.

The Managua meeting had been called to consider the situation in Latin America and the Caribbean. But in the light of strong Cuban and Nicaraguan feelings that the US was to blame for most of the region's problems and for its intervention in El Salvador, the draft was essentially anti-American and had to be toned down, with the intervention of mediating countries like India.

The centrist and rightist nations maintain that the pro-Soviet attitude of the movement has gone too far, with its soft attitude towards Afghanistan and the Polish crisis, and of Cuban and Libyan involvement in the affairs of some of the African states. Strong attempts to have Egypt expelled from the movement for having signed the Camp David peace treaty with Israel in 1979, are also a pointer to the lengths the movement can go to identify with Soviet interests.

These and other differences are bound to surface in the March summit. Among the major ones:

- The future of the Palestinians, following the June-6 Israeli invasion of Lebanon and the subsequent expulsion of the PLO from its redoubts in West Beirut. Under review would be the Reagan and the Fez plan for a Palestinian homeland. The issue becomes all the more important since Israeli settlements in occupied West Bank have been growing at a fearful pace.

- Trouble between Iraq and Iran and Ethiopia and Somalia, the independence question of Namibia and the problem of Western Sahara.

- Who will fill the vacant Kampuchean seat? China and ASEAN are intensifying pressure on India to invite Prince Norodom Sihanouk, representing the anti-Vietnamese Kampuchean coalition, to the summit and thus pave way for his group to fill the seat. They argue that since the UN has recognised his coalition government-in-exile, the non-aligned summit should follow suit. The other contender to the seat is the Vietnam-installed Heng Samrin Government, now in power.

- Objections of several African delegations to the assignment of the chairmanship (of the plenary

THE SIX CONFERENCES

- The First Non-aligned Conference was held in Belgrade in 1961. It was attended by 25 nations. The problems under discussion were disarmament and world peace.

- The Second Conference was held in Cairo in 1964 in which 47 states participated. Nuclear disarmament was still a live issue, despite the fact that the Partial Test Ban Treaty was signed between the US and the Soviet Union in 1963. China's intrusion into the Indian border had also created a new situation in India.

Mrs Gandhi, Presidents Nasser and Tito met in New Delhi in October 1966. They emphasised that consolidation of world peace required correction of political and economic imbalances in the world. They urged for more favourable conditions to promote economic progress in developing countries.

- This theme was further elaborated at the Third Non-aligned Conference in Lusaka in 1970, where representatives of 60 non-aligned nations met. The summit marked a milestone in the evolution of the movement. It chalked out a new course for mutual help and economic cooperation among non-aligned nations in the post-colonial phase. The main issues were the Indo-China dispute, the unfinished liberation struggles in Rhodesia, South Africa and Portugal's African colonies and the West Asian situation.

- The Fourth Non-aligned Conference was held in Algiers in 1973, where 74 full members participated. New complications regarding superpower

rivalries were reviewed. The decision to formulate press agencies of the non-aligned nations (Non-aligned News Agencies Pool) was also mooted.

- The Fifth Non-aligned Summit, held in Colombo in 1976, was attended by 86 non-aligned nations. The conference stressed the need for the composition and mandate of a Coordinating Bureau to act as an organ of the non-aligned countries. It would have 25 seats, with a proviso that these seats shall be allocated as Africa 12, Asia eight Latin America four and Europe one. The conference also reviewed the movement, its achievements and limitations.

- The Sixth Non-aligned Conference was held in Havana in 1979 and was attended by over 90 countries. Stress was laid on action programmes for economic cooperation. It was agreed to hold the next summit at Baghdad in Iraq in 1982. But that was not to be. The continuing Iran-Iraq conflict raised questions about the propriety of holding the summit in Baghdad. From early last year, the question figured prominently in bilateral and multilateral consultations among non-aligned nations. At last, in mid-year, President Fidel Castro of Cuba (the present Chairman of the non-aligned group) asked India to host the seventh summit. India agreed, for even otherwise, it had offered to host the next (1985) summit.

- The Seventh Non-aligned Conference, scheduled for March 7, '83, is to be attended by 100 heads of state in New Delhi.

B.M.

recognition to Nicaragua and regional vice-chairmanships to Mozambique, Guyana, India, Yugoslavia and the PLO, with Algeria as the rapporteur, without consulting them.

A way out could be not to take a decision at all. For example, on the Kampuchean issue, both parties may not be invited, as was decided in the last summit. New Delhi has left it to the other non-aligned nations to decide who should occupy the vacant Kampuchean seat, but has stuck to its principle, much to the chagrin of ASEAN, that only a government which is in the country's territory deserves recognition.

Yet, deferring a decision or vaguely-worded declarations seriously undermine a movement's credibility. The same goes for non-alignment too. A solution is to

take an unambiguous stand on some issues and leave it to future summits to tackle the others. Easier said than done though, given the members' widely-differing political commitments.

Even so, reactions from various capitals to the forthcoming New Delhi Summit have been encouraging. For one, Pakistan has assured India it would not allow the Afghanistan and Kampuchea questions to become disruptive issues at the summit. Islamabad said the declaration on Afghanistan adopted at the 1981 New Delhi non-aligned foreign ministers' meeting, which had held good for two years, should be acceptable to the member countries. However, it would reiterate its stand on these vexed problems during the debate on international affairs at the

summit.

The main task before India now is to enable the member countries to see regional and national problems before them in a global perspective. Much has changed since the last summit: Reaganite America demands positive signs of support from the Third World countries it befriends; East-West relations have worsened and there is no telling what shape they will take under the new Soviet leader, Yuri Andropov; disarmament has received a setback, the arms race is on and so-called peace movements have sprung up all over Western Europe; and there is the worldwide economic crisis which has spurred the West to erect protectionist barriers, reduce aid and loans to a trickle and throw the North-South question to the winds.

A.P. & B.M.

Answers to TEST YOUR WORD POWER

- apathy:** C: indifference, lack of interest. India honifies the ordinary Westerner by virtue of its poverty, squalor, unhygienic conditions and most of all, the apathy of its people.
- callisthenics:** B: exercises designed to promote agility, health, or strong and graceful bodies. In Japan, at the plants of electronics giant Matsushita, workers start the day by following callisthenics instructions broadcast over a national radio programme.
- complacency:** A: self satisfaction; smugness; unconcern. Official complacency has caused the failure of the malaria control programme throughout the country after the spread of the disease was checked in the 1950s.
- controversy:** C: prolonged argument, dispute, debate. There have been books on the Raj before, but none have raised such intense controversy as Larry Collins and Dominique Lapierre's latest book, *Mountbatten And The Partition Of India*.
- crucial:** B: decisive, critical. It is an undeniable fact that crucial umpiring decisions can tilt the course of any match considerably.
- deploy:** A: to spread out, utilise or arrange especially strategically; to place in battle formation. The Soviets are believed to have deployed nearly 300 SS-20 missiles in European Russia.
- despondency:** C: dejection, loss of hope, melancholy; a feeling of depression or hopelessness. Poverty, unemployment and lack of institutional care are the main causes for despondency among the aged.
- eclectic:** D: composed of elements selected from various sources, accepting freely from various sources. APPLE's technology was indigenous, its fabrication eclectic.
- evince:** A: to show openly; indicate; make evident. Primary hypertension, nicknamed the silent killer, evinces no obvious symptoms until it is well-advanced.
- evoke:** A: to draw forth; to produce a reaction; to bring out. Twenty-eight years ago, *Pathar Panchali*, Satyajit Ray's first film, evoked a concert of praise from critics all

over the world.

- influx:** B: constant inflow of large numbers or quantities, flowing in; inrush. The influx of Indian students into France—and Germany too, for that matter—is considerably lesser than that into the US or UK due to the language barrier as all classes in these countries are, obviously, conducted in their own languages.
- install:** D: place in position for use, establish. The Soviets have threatened that if the US proceeds with its plan to install Pershing IIs in West Germany, they will subject the US to a similar threat.
- malignant:** D: deadly; harmful to life. The more malignant form of malaria, known as *Plasmodium falciparum*—the killer malaria—is on the rise in certain areas including the Union territory of Delhi.
- moratorium:** A: suspension of activity. Ten years ago, the UN unanimously called for a moratorium on all commercial whaling, but the whalers have slaughtered more than 3,00,000 of the giant marine mammals since then.
- paltry:** B: trifling; petty; insignificant. In 1978, our space budget was a paltry Rs 46 crores, in 1979 it inched up to Rs 49 crores; and by 1982 it had hit Rs 88 crores.
- premature:** C: happening before proper time. India's most ambitious satellite, INSAT-1A, died a premature death, scarcely five months after its launch, in April 1982.
- prominence:** D: importance. The battle to restore natural rubber to its former prominence is being led by Malaysia.
- repugnant:** C: distasteful. The very idea of going into an old people's home is repugnant to many Indians, unlike their American counterparts.
- sprinter:** B: short-distance runner; one who runs short distances at great speed. Harry Jerome of Canada was one of the greatest sprinters of his time.
- yore:** D: of long ago; in olden days. The student-teacher relationship of yore has undergone a drastic change.

AND NOW...

Hero-Majestic Deluxe Model

*An Ideal Power-Packed MOPED
to carry two persons at most economical Price
and minimum maintenance cost, with all the
advantages of expensive two-wheeler automobiles.*

Better braking efficiency through increased brake drum diameter. Bigger axle via heavy duty bearings and new freewheel for more load carrying capacity. A 48 teeth sprocket (matched with 100 link chain) provides quicker acceleration.

New multiple electrical switch with Engine cut off facility and dipper arrangement.

Sheet metal levers for brakes, choke and decompression with springs for positive return.

A reinforced frame for shocker mountings and better clutch lever for greater wear resistance coupled with improved V-Belt for durability and detachable V-Belt cover for easy replacement. A modified silencer with detachable components for decarbonising and better engine performance.

At its price, Hero-Majestic outclasses any other moped in quality, in economy, in looks, it offers you a lot more. Virtually noiseless air-cooled petrol engine with hard chromed cylinder and telescopic front suspension to ensure comfortable ride. Various attractive colours. A product of extensive research to suit Indian conditions.

Difference in prices in different states/destinations is on account of difference in freight.

The cost of moped with pillion seat will be less by Rs. 30/-.

READING THE RAPID WAY

You may be a student facing a crucial examination on the morrow, with time impossibly short to go through an overcrowded syllabus. Or you could be a job-seeker hard pressed to scan a month's newspapers to freshen up on the current happenings that could help you make the right impression in that all-important interview this evening. Or perhaps you are a journalist working to keep a deadline with tonnes of research material to sift through to hunt out that obscure but all-important fact. If you are one of these, you can stop worrying now. 'Speed-reading', a concept devised by efficiency experts to help people like you to get over your blues, is here. Just follow these instructions given to you in an easy-to-follow question-answer format and who knows you might, very soon, surprise yourself.

How can I improve my reading? There are two basic methods for improving your reading: the first method stresses the training of the eyes; the second method stresses the training of the mind.

Is it possible for me to improve my speed of comprehension by these methods?

Yes you can, within one month, not only double your speed of comprehension, i.e., your quickness in understanding, but also increase your degree of comprehension, i.e., the depth of your understanding of what you read. Let's start with the first method: the training of the eye and its movements.

What do you mean by 'eye training'?

'Eye training' here means three things:

1. Increasing your eye-span or the number of words you can grasp in one glance.
2. Reducing the number of times your eyes regress, or re-read.
3. Getting a more rhythmical and regular way of moving the eyes while reading.

What do you mean by 'increasing your eye-span'?

It means to see more with one glance of our eyes. A great footballer like Pele, for example, sees not only the field in front of him but far to the left and right.

Why is that important for reading?

Well, it's like this. Suppose I told you that I had a tin of sweets and that you could put your hand in and take out as many as you could with one grasp, but one grasp only. What would you do?

I would stretch my hand as much as I could so that it could grasp the maximum number of sweets.

That's right, and that's what we must train our eyes to do when we are reading: to grasp as many words as they can in one glance. It is amazing how little most of us see at a glance.

Why is that?

Because of the way we were taught to read, because we learnt to read word-by-word. So our glance covers only one word. The following sentence illustrates this point—

Just as we
do not listen
word-by-word
but according to
thought units, so
we should not
read word-by-
word but according
to thought units.

We picked up this habit of reading word-by-word because that is the way we were taught to read. And after those first lessons in reading at school, we paid no further attention to how we read.

Word-by-word reading

Word-by-word reading makes us read *word units* instead of *thought units*, thereby slowing the pace of our minds to the pace of our lips and greatly increasing the fatigue of our eyes; also, by going too slowly it becomes very hard to follow the thought.

But many people read word-by-word. You can see their lips moving quietly while they read.

Yes, I know. It's very sad. They may have advanced in other respects to the B.A. or M.A. level, but their reading stays at the L.P. level.

Can anything be done to break the habit of moving one's lips when reading?

Certainly. Concentrate on *thought units*, on *meaning*, and put a pencil between your lips when you read.

You said that word-by-word reading also tires the eyes. Why is that?

I think you can answer your own question if you do the following small exercise. It's called the 'Eye-to-Eye Exercise'. Choose another person to work with you. Here is what you do:

With an ordinary pin make a pin-hole at the centre of this page. Now have your friend face towards the light in order to light up his face, especially his eyes. You stand facing your friend and ask him to read this page. Hold the page with the pin-hole at eye level. Try to see through the pin-hole. You will be able to do it after a few attempts. You will see the reader's eyes move along the line with little jerks and stops. At the end of the line you will see his eyes swing back like a typewriter to the beginning of the next line. Count each time the eyes stop in covering one line. What is the average number of stops per line? A good reader makes about three stops per line.

I can see his eyes stopping and starting. What do you call these stops and starts?

These short pauses are called 'eye fixations'. The movements of the eyes are controlled by six

small but strong muscles. These six muscles are at work continually starting and stopping the eyes. When they have to start and stop many times in every line, they get tired quickly, and we say "our eyes are tired". If they stop only a few times in each line, our reading is quick and the eyes remain fresh.

There were frequent little backward movements of the eyes from right to left, even though he was reading across the line from left to right.

Those little backward glances and re-readings are just as bad and harmful as moving our lips while reading. They must be dealt with severely for they will cripple one's reading efforts.

Why is that?

Well, for example, one study of high school students showed that on an average, they were looking back 15 times in every 100 words. This is a tremendous waste. While not all going back is harmful, often it is unnecessary. It's like taking one step backwards after five steps forward. You don't do this when you are walking. So you shouldn't do it when you are reading.

Why do we glance back while reading?

There are frequently two reasons either we are day-dreaming, or we have formed a habit that continues to make us do it. Our eyes are open but we are asleep mentally.

What should I do next time I catch myself going back or re-reading?

Scold yourself. Shake yourself. Tell yourself to wake up. Force yourself onward. Do not give in to the temptation to re-read. Stop day-dreaming and READ. THINK. ASK QUESTIONS. If you have lost the sense completely, then at least do not go back until you finish the paragraph. When you read, READ.

I will try but are there any exercises that will increase my eye-span and help me overcome the habit of re-reading?

Yes. Here are two exercises that will help you. Also, I'll tell you later how to make your own reading machine.

First Exercise: Pyramid Practice

a. Take a postcard and put a small arrow in the top middle as shown in fig. 1.

Fig. 1

b. Put the card with its arrow-head on top of the arrow-head of one of the word pyramids given below. Fix your eye sharply on the arrow-head of the card and do not let your eyes move or shift. Now draw the card down slowly along the vertical line. Do not move your eyes. How far down can you go before you fail to see all the words in the line? Don't let your eyes shift or slip. Steady. No cheating. Stretch your eyes. Practise this every day for five minutes. Keep records. The numbers on the side tell you in type units how large an eye-span you have at this time.

Try to see further and further on each side but keep looking at the point of the arrow, as you move the card down the vertical line.

| Look for the flow of thought | 28 |
| Concentrate all your attention | 30 |

| | |
|---|----|
| Read on | 7 |
| Big jumps | 9 |
| Greedy eyes | 11 |
| Don't go back | 13 |
| Don't move lips | 15 |
| Catch the meaning | 17 |
| Reading is thinking | 19 |
| Watch first sentences | 21 |
| Watch out for key words | 23 |
| One thought one paragraph | 25 |
| Grasp quickly central ideas | 27 |
| Scan all headings and italics | 29 |
| Increase your general knowledge | 31 |
| Read daily | 10 |
| Remain alert | 12 |
| Read half hour | 14 |
| Read as you ride | 16 |
| Search for meaning | 18 |
| Meaning is the thing | 20 |
| Only meaning satisfies | 22 |
| Mind is made for meaning | 24 |
| Read last paragraphs first | 26 |
| Always note words in italics | 28 |
| Meaning is what really matters | 30 |
| Read at least half an hour a day | 32 |
| You'll probably start with 17 type units but with daily practice will be able to get to 30. Then you will not only get more meaning from reading but also find it less tiring because the eye muscles will have less work and your mind will get more food for thought with each glance. Read the newspaper every day and practise with that. | |

Practise with the newspaper?

Yes. Draw a line down the centre of a column. Now focus on that line and see whether you can grasp the whole line at one glance. This is difficult at first but gradually you force the corners of your eyes to wake up and work. Then your eye-span increases. Again less work for the eyes, more food for the mind.

NEWS IN PIX

S.K. Chaudha

Above: Not A Taylor-made Role: Hollywood star Elizabeth Taylor's "mission of peace and understanding in the Middle East" ended mostly in Israeli hospitals—first for a breathing problem and then as an accident victim. But undeterred, and swathed in a neck brace with a bandaged leg and finger, she met PM Menachem Begin. Israel hasn't vacated West Bank because of her visit, but she won something very personal: Begin's sympathy for her woeful appearance and his admiration for the brave front she put up. Centre top: The Prince And The PM: Prince Karim Agha Khan, the 49th hereditary Imam of Shia Ismaili Muslims and direct descendant of Hazrat Ali, son-in-law of Prophet Mohammed, with the PM during his recent visit to India. His followers, spread over 25 countries, are celebrating the 25th anniversary of his imamate. Right, Nemesis Of Aircraft: Fresh from the Army's wardrobe was the battle ready Kvadrat Weapon System (KWS) which broke the 'classified barrier' on the 34th Republic Day celebrations in New Delhi. KWS consists of twin vehicles, one accommodating the high-tech self-propelled acquisition and guidance unit (SPAGU) and the other the deadly, 20-foot-long, 640-kg, 24-km-range SAM-6 missiles mounted on self-propelled launchers atop a tank chassis. SPAGU performs its basic task of 'acquiring' and 'locking' onto the target 'through a powerful half-a-dozen radar combination' and relays the details to the SAM-6. Leading these on January 26 was the Rs 1-crore, Soviet-built, deep-strike T-72 tank.

Century 21B

Above: "Never Again Fascism": On January 30, 1933, a disgruntled World War I corporal assumed power in Germany—and 12 years later his war-machine left 51 million dead, a Germany in ruins and split into two, and two mutually antagonistic superpower blocs. Today fascism is not evident but a different type of war threatens to destroy Germany—and the world: nuclear war. Speaking for themselves and the world, about 10,000 demonstrators passed through streets of downtown Frankfurt during the 50th anniversary of Hitler's accession to power. A poster they carried read: "Never again fascism, never again wa., no nuclear missiles." **Top: Getting Nowhere:** British PM Margaret Thatcher with survivors of the September 13 Logar massacre south of Kabul, allegedly committed by Soviet troops. She met them in mid-January when the issue was raised in the British Parliament. Anti-Russian feeling in Afghanistan is so strong now that future governments—if, that is, Babrak Karmal goes—even suspected of having links with the Soviets will be overthrown. The Afghan rebels are as determined to expel the Soviets as they were three years back, when the USSR intervened in Afghanistan. The Soviets are just as determined to stay.

INTERVIEWS

HOW TO GIVE THEM

BY EDGAR M. THORPE

It's not enough to display your knowledge acquired from books, newspapers and magazines. The interview board also assesses your personality for psychological traits and sociological qualities before it comes to the vital decision. To ensure that the decision goes in your favour, some invaluable hints in this first instalment.

Interview may be regarded as a systematic method by which a person enters more or less imaginatively into the life of a comparative stranger.

—Pauline Young

An interview is a direct method of enquiry that enables the interviewer to assess the personality of the interviewee by posing questions—general and technical—that allow him to exhibit his behaviour in a given situation. It is a depth study of a candidate which is not possible in the examination system.

The aims of the interview can be summed up as follows:

To establish a rapport:

A direct contact is established between the interviewer and the candidate so that both may know each other, understand their respective needs and help the interviewer to perceive the personal disposition of the applicant.

To get to know the candidate's views.

The interviewer exposes the candidate to certain questions in order to gauge his ideas, views and knowledge and to determine his suitability for recruitment.

To form a hypothesis.

Through the technique of interview, the committee or interview board is able to form a hypothesis about the personal qualities of the candidate through initial questions, like

"Please tell us in brief about your family background."

"Why do you consider yourself suitable for this job?"

To confirm the hypothesis:

After the initial questions, the candidate is exposed to more detailed and planned questions through which the hypothesis established is confirmed and suitability of the candidate determined for the job in question.

Through an interview one can thus analyse the personality of the candidate—his attitudes, prejudices, likes and dislikes as revealed by his verbal behaviour, including the subtle gestures that accompany it such as facial expressions and tone of voice.

The physical and mental qualities of the candidate are also analysed in order to gauge his behaviour in a particular situation, his perception of a problem and mode of responding to the same. Some qualities/traits generally assessed include:

General personality traits:

Appearance; speech; mannerisms and gesticulation; self-confidence; mental alertness; type of approach (positive/negative); leadership qualities, etc.

Knowledge and intelligence.

Knowledge of his subject; applicability of his subject in day-to-day life; knowledge about other general subjects; I.Q. and common sense.

There is no reason to panic if one is lacking in one or more of these qualities. All these can be suitably developed step by step and one can improve one's personality in general. As Locke said: "We are born like a blank sheet and all the ideas are written by experience." With the suggestions and model question given (in our forthcoming issues), one can easily overcome one's shortcomings and improve one's characteristics and personality. Let's begin with defining personality.

In general parlance, personality depicts the outward appearance of a person. When we see a well-dressed man, the general remark we often hear is—"he has a good

personality". This is a very superficial and incomplete meaning of the word. There is a lot more to 'personality' than physical attributes (looks, appearance, physique). A personality test also includes an assessment of psychological traits (attitudes, adaptability, motivation, perseverance) and sociological qualities (behaviour in a group, social interaction, reaction to problems). Personality, therefore, is the result of the combination of four factors: physical environment, heredity, culture—all *not* controllable—and experience and education (controllable). The controllable factors can be improved upon to project an above-average personality.

General personality traits and how to improve them

Appearance

This small word which means 'outward look' or 'visual impression', has a vital role to play in interviews. A lot depends on how you impress the interview board on your first meeting. It was a wise man who said "the first impression is the last impression". Appearance includes your overall look, which is the sum total of:

- your clothes
- your hairstyle
- your facial expressions
- your way of walking and entering the hall
- your way of sitting before the interviewers
- your way of turning back and leaving the interview hall.

Are you convinced that you can't be faulted on any of these factors, that you can leave behind a lasting impression on the interview board? If not, here are some vital hints on each factor that can make all the difference between acceptance and rejection.

(a) Your clothes

Your dress is always important. The right dress enhances your appearance. It should be well-tailored and not outdated. This does not mean that it should be very fashionable. Your dress/suit should be in tune with the fashion in vogue so that you do not present a conspicuous appearance. Avoid gaudy colours or combinations as these do not help to improve your look. Clean and well-ironed clothes are equally important.

Some people prefer to wear a new dress to interviews. If it's

not a good fit, it could make you restless and irritated. Most girls who wear saris for the first time to an interview, often find themselves ill at ease as they are too worried about their *pallu*. Wouldn't it be better, therefore, to wear clothes you have worn in the past and found comfortable to walk and sit in? This will help you to avoid 'dress consciousness' which leaves an unfavourable impression on the interviewers.

Do not carry unnecessary diaries, too many pens, a heavy purse, etc. for these only make your pockets bulge and add to your feeling of uneasiness.

Pay equal attention to your shoes as well. They should look clean and well-polished. Do not wear a new pair of shoes to an interview.

Lastly, if possible, wear a tie that matches with your suit.

If an interviewer happens to appreciate your dress (or tie), do not hesitate to thank him. You should not become nervous when you are asked odd questions concerning, say, the colour of your shirt, tie or trousers. Such questions are put to judge the mental make-up of the candidate.

(b) Your hairstyle

Before entering the interview hall, you should see that your hair is neatly combed. A hair-cut just before the interview should, as far as possible, be avoided. It changes the appearance of the face for some time, and could make you feel on edge with yourself. I am not suggesting that you should have long hair. Remember, long hair is not associated with the scholarly types. Needless to mention that you should be well-shaved in order to project a healthy look. If you wear a turban, ensure it is clean and tied in a neat style.

(c) Your facial expressions

An interviewer can judge a lot from your facial expressions. Wear a smile on your face when you knock on the door and say, "May I come in please?" The smile should continue once you are in and are wishing the members of the interview board. This indicates a confident and relaxed attitude and will help you to develop a quick rapport with the interview board. A long and serious face, just on entering the interview hall, strains the atmosphere for both you and the interviewers. A ready,

pleasant and spontaneous smile creates a favourable impression on the interview board.

However, don't continue to smile once the interview gets going, especially if your interviewers mean business from the very start. There are chances you could be taken for an idiot. Keep a well-balanced facial expression during the whole session, changing it with the type of questions you are asked. It would be even better if you could match your facial expressions with that of the member interviewing you. This would create a feeling of mutual agreement between your view and that of the board. In other words, the interviewers accept your line of thinking, which is a point in your favour—and you are bound to come out successful.

(d) Your way of walking

The sum total of your appearance depends to quite an extent on the way you walk and carry yourself. Cultivate a dashing forward way of walking with an upright military bearing. Your way of walking depicts your confidence in yourself and your 'forward walking' shows fearlessness and ambition to rise in life, overcoming all obstacles. Your way of walking can thus be psychologically analysed to reveal your character.

An example here will illustrate what I mean by 'dashing forward walking' and 'upright military bearing'.

Illustration

(Dressed smartly, the candidate reaches the door of the interview hall.)

Candidate (Puts right foot in and says): "May I come in, sirs?"

Chairman: "Yes, please come in Mr Singh."

The moment he hears the words 'come in', he dashes in immediately with a forward action that exhibits his confidence and says, "Good morning to you" with a pleasing smile on his face.

(Note: When asked to enter, a candidate should not pause or walk slowly. Slow action at this stage will not exhibit his dynamism.)

Chairman: "Good morning, Mr Singh. Please be seated."

Candidate: "Thank you, sir." (The candidate should not pause when he is asked to sit but quickly take a seat with a smile.)

(To be continued)

REACTIONS

If our 'Points' in the January issue encouraged you to 'Ponder', your overwhelming 'Reactions' made the very exercise of selecting the prize-winning entries a stimulating affair.

Bihar Press Bill

The draconian legislation to gag the press in Bihar is contemptible. It will arm the state government with arbitrary powers to deal with the journalists at large in order to terrorise them into becoming its docile agents. Apart from the deplorable haste and manner in which it was passed in the Legislature, the Bill went against all cherished values of freedom of expression. On the pretext of preventing "grossly indecent and scurrilous matter" from being published, the Bihar Government seeks to prevent exposure of corruption, moral turpitude and other anti-social activities by those in authority. Rampant corruption and maladministration, increasing economic backwardness and social bigotry, atrocities like the Bhagalpur blindings, growing scarcities and misappropriation of state and central government funds have reduced life in the state to a nightmarish ordeal. Bihar has assumed the image of some terrible geographical aberration, a grim backwater that only sinks deeper into its morass of collective evil. The Bill is a face-saving device, an attempt to apply cosmetics on the diseased face. The action of Dr Jagannath Mishra has made a mockery of democratic norms and has destroyed the credibility of the party.

In the case of the press in India (since every other mass medium, barring cinema, is an official organ of propaganda) the medium is the message. And the message is the safeguarding of public freedom. Any abridgement of its freedom is a smothering of the public voice. If the press were to be shackled,

public freedom would be severely crippled, for the press is one of the most effective means by which public freedom is exercised.

RAJ RATAN SAHAY, Patna
First Prize: Rs 150

IX Asian Games

The IX Asian Games, recently concluded with much fanfare and pageantry in New Delhi, offers such a picture of irony that any responsible citizen of the country must hang down his head in shame. Though brazenly lauded and glorified by the press and media, as a glittering example of India's organisational might, in retrospect it served no better purpose than the Festival of India in Britain, except to uphold an unrealistic picture of a progressive, prosperous and peaceful India. India's position was a lowly fifth and our performance in swimming and basketball and our debacle in hockey do not justify the cost.

It has now been computed that some Rs 1,000 crores had been spent at various stages of the Games, though the actual figure has not been disclosed. Hopes to net precious foreign exchange through publicity, advertisements and tourism were sadly dashed to the ground when only about 200 visitors from abroad turned up. Thus, in a land where 300 million people are living below the poverty line, where even drinking water is a farce in numerous villages and districts, a mammoth sum was expended on sports when it could have been better utilised to eradicate poverty, root out hunger and illiteracy or to implement population control, adult education, irrigation schemes or even to aid countless sick industries.

Some might aver that the Asiad could be an "investment for the future" and might usher in a new era for Indian sports considering the facilities New Delhi can now provide. But only stadia and modern equipment will not make India a sports power—we must develop a new outlook towards sports. And the government must ensure that all sportsmen can eke out a decent living for themselves.

For those who see dreams of India hosting the 1992 Olympics, her severe economic problems and

her anti-Israel and anti-South Africa stand may never make it come true.

INDRAJIT SINHA, Calcutta
Second Prize: Rs 100

The IX Asian Games were doubtlessly a most majestic and multi-splendoured sports spectacle of 1982. The excellent arrangements that were made and the smooth manner in which the Games came off, have won the admiration of even the most bitter critics of the IX Asiad and put the prophets of gloom to shame. The encomiums received by the hosts from the global press have put India on the sports map of the world and established her credentials as a competent organiser of international sports events. The President of the International Olympics Committee himself remarked that India could even host the 1992 Olympic Games. This sums up our managerial capacity. In other words, the dazzling success of the Games has added a glorious feather to India's cap. Only a prejudiced or cynical mind would deny this.

But, alas, the hosting of the IX Asiad in a poor country like India has come in, appropriately, for scathing criticism. Nobody questions the glory with which India has covered herself; nobody disputes the successful bringing together of even unfriendly nations on an apolitical and common footing; nobody denies the message of goodwill and universal brotherhood which such events spread. But some inescapable questions, that stare every nationalist Indian in the face are: Weren't the IX Asian Games just a costly riot of colours meant only for the urban rich and middle classes? What have they meant to our ignorant millions who toil day and night to keep themselves alive? What honour can such extravaganza bring to a nation whose weak economy is dogged with shooting prices, joblessness, mounting import bills, acute poverty and almost the lowest standard of living in the world?

It is good to organise games on a vast scale. But nothing seems pleasant over an empty stomach. Till the nation is prosperous unproductive expenditure on such events as Asian Games is misplaced and untimely.

KNOW YOUR CONSTITUTION

Administration Of Justice

THE UNION TERRITORIES:

Special provisions relating to the administration of the Union Territories are provided under Part VIII of the Constitution and the provisions apply specifically to functions named in the Articles (Art. 239-241).

ADMINISTRATION OF JUSTICE:

Supreme Court: (Art. 124-147). The Supreme Court of India consists of a Chief Justice and not more than 17 judges appointed by the President.

Retirement: At the age of 65.

Qualifications: For appointment as a judge of the Supreme Court a person has to be a citizen of India and must have been for at least five years a judge of a High Court or of two or more such Courts in succession; or an advocate of a High Court or two or more such Courts in succession for at least 10 years; or he must be, in the opinion of the President, an eminent jurist.

Removal: A judge of the Supreme Court cannot be removed from office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House voting, has been presented to the President in the same session for such removal on the ground of proved misbehaviour or incapacity.

Original Jurisdiction: The Supreme Court has an exclusive original jurisdiction, which extends to all disputes between the Union and one or more States or between two or more States *inter se* (Art. 131). In addition to this and more significantly, Art. 32 of the Constitution gives an extensive original jurisdiction to the Supreme Court to enforce fundamental rights guaranteed under Part III of the Constitution, by enabling it to issue writs, directions or orders including writs of *habeas corpus*, *mandamus*, *prohibition*, *quo warrant* and *certiorari*. The right guaranteed by Art. 32 cannot be suspended except as provided in the Constitution.

Advisory Jurisdiction: The President may consult the Supreme Court on any question of fact or law of public importance.

Appellate Jurisdiction: An appeal shall lie to the Supreme Court by a certificate of the High Court concerned or by special leave granted by the Supreme Court, in respect of any judgment, decree or final order of the High Court in cases involving substantial questions of law as to the interpretation of the Constitution (Art. 132).

Civil Appeals: An appeal also lies from any judgment, decree or final order in a civil proceeding of a High Court if the High Court certifies (under Art. 134) that the case involves a substantial question of law of general importance and in the opinion of the High Court the said question needs to be decided by the Supreme Court (Art. 133).

Criminal Appeals: An appeal to the Supreme Court lies if the High Court (a) has on appeal reversed an order of acquittal of an accused person and sentenced him to death, (b) has withdrawn for trial before itself any case from any court subordinate to its authority and has in such trial convicted the accused person and sentenced him to death, or (c) certifies that the case is a fit one for appeal to the Supreme Court. Parliament is authorised to confer on the Supreme Court any further powers to hear and entertain appeals from any judgment, final order or sentence in a criminal proceeding of a High Court in Indian territory (Art. 134).

Apart from these, a provision is also made for special leave to appeal to the Supreme Court from any judgment, decree, sentence, determination, or order from any court or tribunal. But leave is at the discretion of the Supreme Court and is not one as of right (Art. 136).

By the 42nd Constitutional Amendment where cases involving the same or substantially the same

questions of law of general importance are pending before the Supreme Court and one or more High Courts, the Attorney General can move the Supreme Court to withdraw the cases pending before the High Court or High Courts to itself and dispose of the same. Further, the Supreme Court has been empowered to transfer cases from one High Court to another High Court, if it is expedient for the ends of justice to do so (Art. 139A).

High Court (Art. 214-231) Every State has a High Court of its own except in the case of Assam and Nagaland and Punjab and Haryana, who share one each between them. Delhi has a High Court of its own.

Appointment: High Court judges are appointed by the President after consulting the Chief Justice of India, the Governor of the State and the Chief Justice of the High Court. They retire at the age of 62.

Qualifications: To be appointed a person has to be a citizen of the country who has either held judicial office or practised as an advocate for 10 years in any State or he must be, in the opinion of the President, an eminent jurist.

Removal: Article 124(4) which lays down the procedure for the removal of a Supreme Court judge, applies to the High Court judges also.

Jurisdiction: The jurisdiction as well as the law administered by a High Court can be altered both by the Union and State Legislatures. Certain High Courts like those at Bombay, Calcutta, Madras and Delhi have Original and Appellate jurisdiction. Under the Original jurisdiction suits, where the subject matter is valued above a certain amount, can be filed directly in the High Court. Under the Appellate jurisdiction only appeals from lower courts and appeals from suits, filed on the Original side of the High Court, can be entertained.

KNOW THE WORLD

WEST GERMANY

Federal Republic of Germany (FRG) or West Germany lies in northern central Europe, with Denmark to its north, the Baltic Sea to its north-east, East Germany and Czechoslovakia to its east, the Alpine countries (Switzerland and Austria) to its south, France, Belgium and Holland to its west and the North Sea to its north-west. There are no natural barriers to the west, east and north.

Area: 2,48,630.32 sq km.

Capital: Bonn.

Time: One hour ahead of the Greenwich Mean Time.

Brief history: The Republic was formed from the British, French and the US zones of Germany, occupied in 1945 after the Second World War. FRG came into being on May 23, 1949, with the promulgation of the Basic Law (Grundgesetz). When it was founded the FRG did not have full sovereignty, and supreme authority remained with the three Western occupation powers. In the following years the occupation regime was eliminated step by step. On May 5, 1955, full sovereignty was restored to the FRG. A treaty between East and West Germany, founded on October 7, 1949, was signed on Decem-

ber 21, 1972, to settle the relationship between the two states.

Government: FRG is a democratic and social, federal state. All state authority emanates from the people.

The Federal President: The head of the state is the Federal President. He is elected for a term of five years, by the Federal Convention, a constitutional body which convenes only for this purpose. Re-election is permitted for only one consecutive term. The Federal President represents the Federation in its international relations and appoints the Federal Chancellor, elected by Bundestag and the Federal ministers. By and large, the President is a titular head.

Bundestag or the House of Representatives is the main legislative body. Members are elected every four years in general, free, direct, equal and secret elections.

Bundesrat or the Council of Constituent States is a second chamber composed of delegates of the Lander (states), allowing the latter to participate in Federal legislation. It is not an elected body.

The Federal Government: The Federal Government consists of the Federal Chancellor and the Federal ministers. The Federal Chancellor is the head of the government and is elected by and responsible to the Bundestag. He lays down the policy guidelines and within these guidelines, each Federal minister runs his own ministry independently. There are at present only four parties in Federal and State Parliaments: the Social Democratic Party of Germany (SPD), the Christian Democratic Union (CDU), the Christian Social Union (CSU) and the Free Democratic Party (FPD). At the national level, the CDU and CSU form one joint parliamentary group in the Bundestag.

Flag: A tri-coloured mast with black, red and yellow horizontal stripes.

Topography: From the coastal areas of the former German Reich lands in the north to Alps in the south, the country is divided into the northern lowlands, the central secondary mountain range, rising upto 1,500 m, the western and southern tableland, the southern German foothills of the Alps, and the Bavarian Alps proper, which give rise to Germany's highest peak, the Zugspitze (2,962 m).

Watzmann (2,713 m) is the other major mountain range.

Climate: It is situated in the temperate oceanic/continental climatic zone. The average temperature in the coldest month of the year (January) ranges from 1.5° C in lowland areas to below -6° C in the mountains. In high summer, the average temperature in the warmest month (July) is around 20° C.

Rivers: The main rivers are the Rhine, Danube, Weser and Elbe. Lake Constance is the biggest lake with an area of 539 sq km.

Forests: Of the country's total area 29 per cent is under forests—4 million (mn) hectares are owned by the state and 3 mn hectares are private property; 30 mn cubic m of timber are harvested in FRG.

Minerals: Coal, lignite, crude oil, natural gas and uranium.

Currency: Deutsche Mark (DM), which is equal to about Rs 4.

Economy: It ranks among the world's foremost industrial nations. Its per capita economic product is only slightly below that of the US. It is one of the largest world traders and its DM is one of the world's highest valued currencies.

National economy: The country's gross national product in 1981 amounted to DM 1,552.9 mn, out of which manufacturing formed 46.3 per cent, commerce and transport 14.7 per cent, service industries 23.4 per cent, the state and private households 13.5 per cent, and agriculture 2.2 per cent.

Per capita income (1981): DM 19,272.

Industry: In 1981 some 7.5 mn persons on an average were employed in mining and manufacturing. In terms of the number of employed, the biggest industries are mechanical, electrical and automotive engineering, the chemical industry and iron and steel manufacturing and processing. In 1981 these branches had a turnover of more than DM 603.5 million.

Craft enterprises, employing some 3.9 million persons, are also an important sector of the economy. Craft enterprises produce for private consumption and for the manufacturing industry, provide repair and other services, and engage in trade. In economic terms, however, their main area of activity is manufacturing and the building trade.

Agriculture: Of the total area, 53 per cent is given over to agriculture. Yet, the FRG is not an agricultural country.

Total area under agriculture (in 1,000 hectares): 12,197 in 1981; **annual average production of farm crops in 1981** (1,000 t): grains: 22,826; potatoes: 7,585; fruit: 1,387; vegetables: 1,134. **Milk production** (in 1,000 t): 24,834.

Foreign trade (DM mn—1981):

imports: 3,69,179; exports: 3,96,898.

Defence: There are 4,90,000 enlisted men, non-commissioned and commissioned officers, in the Bundeswehr (Federal Armed Forces) consisting of the army, air force and navy. Army: 3,41,400; air force: 1,10,550; navy: 38,050, and 5,000 reservists.

Foreign policy: FRG is a member of the North Atlantic Treaty Organisation (NATO) in which its armed forces are integrated. It is a founding member of the European Economic Community (EEC), which conducts its economic and trade relations with third countries on the basis of a dense network of preference, trade, cooperation and association agreements. It also stands for stronger ties to bring about disarmament and arms control.

Cooperation with the UN: FRG committed itself as early as 1954 to support the policies of the UN. It joined the UN in 1973. In 1977 and 1978, FRG was elected a non-permanent member of the UN Security Council. The country's contribution to the UN and UN specialised agencies and funds amounts to well over DM 1,000 million.

Population: 61.713 mn; density: 248 per sq km; birth rate (per 1,000 inhabitants in 1981): 625; death rate: 722.

Language: The main language is German. After English and French,

translated language.

Education: In 1978 there were 2,442 senior high schools in FRG. In 1979 there were 300 vocational training schools; 1.3 million youngsters

WEST BERLIN

The Reich capital, Berlin, was politically and administratively split in 1948 among the four victorious powers—France, Britain, the US and the USSR—of World War II. Located in the middle of the Soviet occupation zone, Berlin (West) formed an 'island' of 'Western enclave'—this the Russians (and the GDR) could not tolerate and led to frequent escalation of tensions in the region, especially along the transit routes between Berlin and FRG.

The Berlin conflict was finally brought to an end by the Four-Power Agreement of September 1971, which went into force in June 1972. The Agreement has put the transit routes on a secure legal footing. The USSR no longer disputes the city's ties with FRG. The Western powers had much earlier permitted its integration into the legal, economic and social systems of the FRG. But, in line with the unchanged legal standpoint of the Western powers, Berlin (West) is still not a part of the FRG, nor is it governed by it. However, the existing economic, financial, legal and cultural ties are being maintained and developed further.

very changes in vocational training.

School attendance is compulsory from the ages of six to 18.

Employment: Of the total population, 26.68 mn persons are employed. The number of employed (per 1,000 in 1981), male—15,961; female—9,719.

Standard of living (per 100 in 1981): refrigerators—83; colour TV sets—79; telephones—90; cars—84; motorcycles—10. Gross income of households in 1981 (with a four-person household of officials and salaried employees with higher incomes): DM 8,253. Monthly private consumption expenditure: DM 3,940.

Health: FRG is one of the world's most medically advanced countries. There are about 1,72,677 doctors and 28,674 pharmacists (1980 census). The average bed occupancy rate (per cent) is 85.

Main cities: Bonn, Berlin (West), Hamburg, Frankfurt, Munich, Cologne, Hanover, Essen and Dusseldorf.

Religion: 90 per cent of the population belongs to Christian churches. The Evangelical Protestants are in the majority in the north and Catholics in the south.

Press: The press is privately owned. Number of newspapers: about 390; periodicals: over 11,000; sale of dailies: 20.6 million. The main dailies are: *Bild* (Hamburg), *Westdeutsche Allgemeine Zeitung* (Essen) and *Express* (Cologne). Among weekly news magazines, *Der Spiegel* (Hamburg)—circulation: 9,56,800 in 1979—is the most important.

B.M.

KNOW YOUR CONSTITUTION

(Continued from page 21)

Most High Courts have only Appellate jurisdiction. Two important aspects of this jurisdiction are that the High Courts are also empowered to issue writs, directions, orders like the Supreme Court for enforcing the Fundamental Rights and in cases where the petitioner can satisfy the Court that he has no other remedy, and there is a contravention of a statutory provision causing substantial injury to the petitioner or there is an illegality resulting in substantial failure (Art. 226 amended by the 42nd Constitutional Amendment). The other aspect is the power of superintendence over all subordinate Courts except those inferior Courts whose judgment is not otherwise subject to appeal or revision (Art. 227).

Subordinate Courts: (Art. 233-237): Except for minor variations, the structure and functions of the subordinate courts are uniform

throughout the country. A State is divided into a number of districts, each under the jurisdiction of a principal civil court presided over by a District Judge. Subordinate to a District Judge is a hierarchy of different grades of civil courts.

The constitution and organisation of criminal courts and their procedure are regulated by the Code of Criminal Procedure 1973, as amended from time to time.

Sheriffs and Official Assignees are attached to the High Courts of Bombay, Calcutta and Madras.

There are Official Assignees in three States—Maharashtra, West Bengal and Tamil Nadu. The appointment is made by the Chief Justice of the High Court concerned.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insol-

vency Act.

Tribunals: Part XIV A has been added by the 42nd Amendment. Parliament may set up Administrative Tribunals for the Union and for each State or for two or more States and define the jurisdiction and powers of such tribunals for determining disputes relating to the recruitment and conditions of service of Union Government servants and servants of the States including the employees of any local or other authority within the territory of India or under the control of the Government of India or of a Corporation owned or controlled by the Government (Art. 323A).

Art. 323B provides for the creation of a hierarchy of Tribunals for the determination of disputes, complaints and offences respectively on various matters specified therein.

(To be continued)

Serialized from THE TIMES OF INDIA DIRECTORY AND YEAR BOOK 1982

TRAVEL GRANTS

Students going abroad for higher studies in August/September 1983 are offered travel grants in the form of interest-free loans of not more than Rs 6,500. To be eligible for the loan, the applicant must have secured admission to any foreign university for academic study or research of not less than one year's duration from September '83 and must also have obtained an assistantship or scholarship. Only those who have obtained the above by 15.4.83 should write for an application form, giving their details.

Application forms will be issued till 15.5.83 and the last date for their submission is 31.5.83. Write to the Executive Secretary, India Foundation, 595, Budhwar Peth, 'Sakal' Building, Pune-411 002.

EXECUTIVE TRAINEES

Graduates with Diploma in Automobile Engineering or with a public school background have an opportunity of making it as Executive Trainees in Sales/Stores/Workshop departments with Sikand & Co., dealers in Tata trucks. Candidates, who should be below 25 years of age, will be given Rs 800 p.m. and free, furnished, accommodation on selection. Apply personally with passport-size photograph to: Sikand & Co., 50 Janpath, New Delhi.

DIRECTORY OF COMPETITIVE EXAMS

For the guidance of those at career crossroads, the Bright Careers Institute has published the *Directory Of Competitive Examinations*, which carries detailed information about more than 60 competitive exams. This book, priced at Rs 5.50, covers all major fields of employment in the country and throws light on the various exams conducted by the UPSC, SSC, banks, defence services, railways, airlines, insurance companies and institutes like the IITs, IIMs and ICAI (Institute of Chartered Accountants of India). It may be of use not only to school and college-going students but also to those seeking a change of job.

FORTHCOMING EXAMS

Admission Test

Master of Computer Applications

Department of Computer Science
University of Delhi

Date of exam: 3.4.83

Last date for receipt of applications: 7.3.83

Eligibility: Bachelor's degree in Science, Engineering, Maths, Statistics, Economics or Commerce/master's degree in Science, Maths, Statistics, Operational Research, Economics, Commerce, Library Science, Business Administration, Business Economics or Education.

Age: Minimum 20 years as on 1.10.83

Subjects to be examined in: Quantitative Ability, Deductive & Logical Ability and English Comprehension.

How to apply: Application forms and details obtainable from office of the Department of Computer Science, Faculty of Mathematics, University of Delhi, Delhi-110 007 on payment of Rs 3 by crossed Indian Postal Order, payable to the Registrar, University of Delhi.

Competitive Entrance Exam (Pre-Medical Test)

Institute of Medical Sciences
Banaras Hindu University (BHU)

Date of exam: 4.6.83

Last date for receipt of applications: 3.3.83

Eligibility: See prospectus.

Age: Not specified.

Subjects to be examined in: See prospectus.

How to apply: Application forms and prospectus may be obtained personally from the office of the Director, Institute of Medical Sciences, BHU, Varanasi-221 005 on payment of Rs 3, till 2.3.83.

Indian Economic Service (IES)/Statistical Service (ISS) Exam

Union Public Service Commission

Date of exam: 28.6.83 onwards

Last date for receipt of applications: 14.3.83

Eligibility: For IES—degree with Economics/Statistics; for ISS—degree with Statistics/Mathematics/Economics

Age: Candidates should have been born after 1.1.55 and before 2.1.62

Subjects to be examined in: English, General Studies and Economics/Statistics

How to apply: Details and application forms may be obtained personally from the UPSC counter on payment of Rs 2 or by sending money order or crossed Indian Postal Order payable to Secretary, UPSC at New Delhi G.P.O.

Clerks' Grade Exam

Staff Selection Commission

Date of exam: 3.7.83

Last date for receipt of applications: 7.3.83

Eligibility: Matriculation or equivalent.

Age: 18 to 25 years as on 1.8.83

Subjects to be examined in: Written exam in English Language and General Knowledge and a type-writing test.

How to apply: For format of application and other details, see *Employment News* dated 15.1.83.

Special Class Railway Apprentices' Exam

Union Public Service Commission

Date of exam: 14.7.83 onwards

Last date for receipt of applications: 21.3.83

Eligibility: Intermediate or Hr. Sec. under 10+2 pattern (1st or 2nd div.) with Maths and Physics/Chemistry.

Age: Candidates should have been born after 1.1.63 and before 2.1.67

Subjects to be examined in: English, G.K., Physics, Chemistry, Mathematics and Psychological tests.

How to apply: Same as in Indian Economic/Statistical Service Exam. □

WHERE DID WE GO WRONG?

BY V. KRISHNASWAMY

Why is it that we conduct a post-mortem only when we lose and thoughtlessly bask in glory when we are winning? Inexplicable, but then so is human nature. Since it's our nature, let us proceed with yet another post-mortem. The 'national calamity' this time was our cricket debacle in Pakistan.

We lost a six-Test series 0-3, and what's more, the losses were twice by an innings and once by 10 wickets. Total annihilation, indeed.

Where does our deficiency lie? We have a batting line-up in which Madan Lal comes at No. 9, so we are not really short of batsmen. What we are really lacking in is 'reliable' batsmen. Except for Mohinder Amarnath, who has played Test cricket in doses (thanks to our whimsical selectors), and to a certain extent skipper Sunil Gavaskar, all others have played a good innings only once or twice in the series.

It is about time the 'once-great batsman', G.R. Viswanath, bowed out. One would prefer to nurse memories of his spectacular debut of 137, his 145 against Pakistan and his 222 against England, rather than have them clouded by his recent pathetic displays. Understandably, he was dropped from the current India-West Indies series.

K. Srikkanth, Sandip Patil and Kapil Dev must learn to play with greater control and curb their natural instinct for trying to hit every ball out of the ground. They are talented, no doubt, but it's not the way to play in the dire circum-

stances the Indians were in, in Pakistan. Dilip Vengsarkar and Arun Lal have time and again displayed their fallibility against the outgoing ball, not that the other players have done much better.

Indian bowling on this tour has been the weakest ever. One cannot expect Kapil to take wickets all the time. We just do not have an ideal foil for him at the other end. Apart from Madan Lal, the other seamers are just not good enough. The fault lies totally with our selectors who have never gone all out to find some new seamers.

Uneasy lies the head that wears the 'captaincy'? No. Kapil Dev's reaction to being chosen as the new cricket captain is: "It's a challenge." Yet, upper-most in everyone's mind is the thought: "Will he bring back a successful XI after the rout in Pakistan?" Kapil's leadership qualities, his undoubted cricketing genius and a steely interior may make the difference

Our present spinners are nowhere near the class of their predecessors. Maninder Singh, given time, will no doubt become a great bowler. Dilip Doshi is now over the hill and unfortunately young V.S. Sivaramakrishnan was not played at all. What was the big idea of taking him along if he was not to be played? This fault partially lies in the fact that we had always assumed that our quartet of Bishen Singh Bedi, B.S. Chandrasekhar, E.A.S. Prasanna and S. Venkataraghavan would go on forever. But then, all good things must come to an end. We had better find some new specialist bowlers or else we are in for another hiding in the West Indies.

The only department where we have no cause for immediate concern is wicket-keeping, where S.M.H. Kirmani has been superb. But still, we must dispense with this habit of using Yashpal Sharma as the 'second' keeper and instead get a specialist as an understudy for Kirmani. Surinder Khanna or Zulfikar Parkar could be the ideal choices.

Our fielding, to say the least, has been tardy. Dropped catches and poor throws have only helped our opponents to score more. Through out the tour, it seemed, the

(Continued on page 88)

IN SECOND CABINET RESHUFFLE (Feb 14) Mrs Gandhi drops two Cabinet Ministers: A.P. Sharma, Minister, Communications and Bhishma Narain Singh, Minister, Civil Supplies and Supply.

H.K.L. Bhagat, Minister of State, Parliamentary Affairs, will in addition hold independent charge of I & B Ministry as Minister of State. He replaces N.K.P. Salve who takes over as Minister of State, Steel & Mines (independent charge). Ram Dulari Sinha takes over as Minister of State, Commerce and Bhagwat Jha Azad as Minister of State, Food (now separated from Agriculture) and Civil Supplies (independent charge). His Civil Aviation portfolio has been clubbed together with Tourism under the independent charge of Khurshid Alam Khan, Minister of State for Tourism. V.N. Gadgil, Minister of State, Communications, will now hold independent charge of the portfolio. V.P. Singh, Commerce Minister, will temporarily look after Supply. Usman Arif, Deputy Minister for Supply, joins Works and Housing.

NEW GOVERNORS: Former Nagaland CM Hokishe Sema takes over as Governor of Himachal Pradesh replacing A.N. Banerji who becomes Karnataka Governor in place of Govind Narain who retires; former Cabinet minister A.P. Sharma becomes Punjab Governor replacing Chenna Reddy who resigned recently. (Feb 14 & 15)

BIHAR CM Jagannath Mishra drops 11 ministers, seeking his ouster, from his 37-member Cabinet. (Feb 15)

ELECTION COMMISSION ORDERS REPOLL in 137 of the 6,300 polling booths in 16 of Assam's 60 Assembly constituencies; death toll in 2-week-old anti-poll agitation rises to 274. (Feb 15)

ARIEL SHARON QUILTS as Israeli Defence Minister when indicted by Yitzhak Kahan Commission, inquiring into the massacre of Palestinians in West Beirut's Shatila and Sabra refugee camps in Sept last; Israel's Ambassador to the US, Moshe Arens replaces him; Sharon to remain in the Cabinet. (Feb 11 & 12)

A PROGRESS REPORT

Appearing for a competition shortly? Questions on the Indian economy are likely to figure prominently in your papers. To help you become an expert on things economic this feature discusses Five Year Plans, inflation, unemployment, agricultural and industrial sectors, role of foreign aid, important economic terms...

Sprawling over an area of 32,87,782 sq km, and inhabited by more than 700 million people, India is today the world's tenth industrial power. In the 35 years since independence the country has developed from a stagnant to a dominant economy in spite of the almost 100 per cent increase in population.

Though agriculture was even then the dominant sector on which 72 per cent of the population depended, it suffered from an extremely low level of productivity. The agrarian society was typically feudalistic in nature and the methods of production were primitive. The net production of foodgrains was hardly 50 million tonnes.

The industrial sector was very small as compared to the agricultural one, contributing only 17 per cent to the total national output. It employed hardly nine per cent of the working force and was dominated by consumer goods industries. The infrastructure, defined in terms of roads, communications, energy production and provision of facilities for training of managers and scientists, was almost non-existent.

Despite the tremendous pro-

gress we have made since then, ours is still a dual economy having a large underdeveloped, backward and poverty-stricken sector along with a highly developed elite modern sector. A progress report of the last 35 years shows that while the real Gross National Product (GNP) during 1950-51 to 1981-82 increased by about 180 per cent, the increase in the per capita income was only 50 per cent, as the population almost doubled during this period.

However, in the agricultural sector, the production of foodgrains showed an increase of 87 per cent. The index of industrial production went up at a much faster rate, by 524 per cent, from 26.5 per cent in 1950-51 to 164.8 per cent in 1981-82 (base 1970=100). Fertiliser production showed an increase of 733 per cent and electricity generation went up by 2,219 per cent.

Though our achievements are many, our economy suffers from drawbacks in several areas. For example, our trade balance deficit increased from Rs 49 crores in 1950-51 to Rs 5,793 crores in 1981-82, an increase of 11,702 per cent. The wholesale price index (WPI) during the period went up by 491 per cent. This was partly due to the increase in money supply and bank credit by 2,576 per cent and 5,319 per cent, respectively. The employment situation worsened as the number of unemployed increased by 236 per cent since the beginning of the Second Five Year Plan.

This, in brief, is a picture of the Indian economy. We present here a review and analysis of a few important sectors and problems of our economy.

FIVE YEAR PLANS

Economic planning aims at realisation of some predetermined objectives within a time-bound framework by making the most optimum and well-conceived utilisation of resources. It also helps the government to effect desired changes in the economic and social structure of the country.

In India, planned growth of the economy was initiated only after independence through the mechanism of Five Year Plans. The First Plan was launched in 1951. The main objectives of planning were to achieve a rapid increase in national and per capita incomes, reduce inequalities in the distribution of income and wealth, check concentration of economic power in few private hands, increase employment opportunities, develop infrastructure and basic industries, achieve self-sufficiency in agricultural production and improve the balance-of-payments position. A study of these objectives reveals that the basic aims of planning in India has been 'growth with social justice' and 'self-reliance'.

The Second Plan model, which has been the basis of planning in India ever since, was made by Mahalanobis. The Mahalanobis model followed the Feldman model which was applied in the USSR for setting up heavy industries.

Though Indian planning has been inspired by Soviet planning, it is different from the latter in at least two respects. First, unlike the Soviet Union, India is a parliamentary democracy and therefore, our plan, although socialist in its objective, also has to be democratic in its approach and methods. Second, while there is a dominant public sector in India for which direct planning is possible, unlike the Soviet Union private enterprise contributes largely to the economy not only in the agricultural sector but also in the case of large and small industries, trade, construction, etc. Planning has to operate in this area through persuasion, promotion and acceptance rather than compulsion. India has, therefore, tried to evolve a procedure of economic planning which is not too rigid or centralised (as in Communist countries) and is yet able to mobilise the cooperation of the people for a balanced pro-

The procedure of planning that has been evolved in India over the last 30 years is a combination, on the one hand, of prospective (long-term) planning, five-year planning and annual planning, and on the other, of national planning, sectoral planning and regional planning. Each Five Year Plan is executed through a series of Annual Plans. Targets are broken into annual targets. These Annual Plans are the main operational instruments for a Five Year Plan.

An over-view of performance

One has to sum up the net results of 30 years of economic planning, one can broadly distinguish two periods: 1951-1963 and 1963 onwards. During the first 12 years (1951-63), there was all-round growth and, in particular, phenomenal growth of the industrial economy. During the First Plan, national income rose by 19 per cent and the per capita income by 17.6 per cent. Investment as a proportion of national income rose from 5 per cent to 7.5 per cent, domestic saving from 5.3 per cent to 9 per cent and industrial production by 22 per cent. Even during the Second Plan, despite its shortfalls, national income rose by 20 per cent, i.e., 4 per cent per annum and industrial production by 18.5 per cent.

From the mid '60s the growth rate slumped spectacularly and never came near the level attained earlier. Industrial activity has been notoriously sluggish since then. During the Third Plan, the growth rate was 2.5 per cent per annum. During the three Annual Plans, it fell further to 1.6 per cent, 1.3 per cent and 0.7 per cent respectively. The only bright spot has been in the agricultural sector during the green revolution period from 1968 onwards. But this did not alter the overall perspective. During the

last 3 per cent per annum and the record of this Plan was generally one of significant shortfalls without much headway being made against growing poverty, and unemployment in particular. The Fifth Plan almost remained still-born, and the Sixth Plan frame has already been overtaken by national and international developments.

The performance of the Third, Fourth and Fifth Plans has made many doubt the efficacy of formal centralised national planning in an age of uncertainty and constantly changing environment. The planning perspective throughout the 1970s has been full of uncertainties, disruptions and controversies and large gaps in most sectors between promise and performance.

The table given below, compiled from Prof Brahmananda's study, confirms the general downward trend of Indian economy since '63.

Though the target set up for annual growth during the last 30 years of planning was 5 per cent or so, the actual growth on an average has been 3.4 per cent. The main causes for this poor performance after '63 can be grouped into two categories: (i) external constraints and (ii) lack of planning strategy.

External constraints:

Firstly, these arose out of the sharp rise in defence expenditure from 1962 onwards which upset all resource calculation and planning assumptions. Secondly, the crude price rise from 1973 onwards, which brought about a world economic crisis, also had its disastrous effects on the Indian economy. Thirdly, population was growing steadily at a higher rate of 2.5 per cent per annum since 1961 as against the rate of 2 per cent and 1.5 per cent during the previous decade and the decade before. This wiped out the entire

Average Annual Growth Rates (in per cent)

| Items | 1950-63 | 1963-76 |
|---|---------|---------|
| National income (at 60-61 prices) | 3.8 | 2.9 |
| Output of agricultural sector | 2.31 | 2.08 |
| Index of industrial output | 6.96 | 4.21 |
| Index of heavy industries output | 10.7 | 3.00 |
| Labour productivity in manufacturing sector | 2.4 | 2.00 |
| Index of general employability | 2.9 | 1.9 |
| Real wages of workers | 0.9 | -1.8 |
| Wholesale prices | 1.9 | 8.1 |
| Money supply | 5.1 | 10.5 |
| Population | 2.0 | 2.2 |

real wages, incomes, foodgrains availability, etc. achieved during the 1951-64 period. The population explosion from 361 million in 1951 and 439 million in 1961 to 684 million in 1981 is reflected in the steady decline in the per capita income and the gradually rising number of people below the poverty line. However, it can be argued that our planners should have anticipated this growth of population and taken corrective measures in advance.

Planning strategy:

How correct is India's planning strategy? The basic strategy from the Second to the Fifth Plan is based on the Mahalanobis model of setting up heavy industries and has emphasised industrialisation, particularly the growth of basic and heavy industries as the key to economic advancement. The Mahalanobis strategy failed to appreciate the crucial role of agriculture. On the other hand, in the industrial sector, as the projected demand was grossly over-assessed, large unutilised capacities have been created, locking up huge capital.

Plans for development financing have depended heavily on increasing taxation, transfers of private savings to the government sector, reliance on deficit financing at the risk of accentuating inflation, and on external assistance specially during the Second and Third Plan periods.

Another drawback of our planning has been that stress has always been laid on the disbursement and expenditure of funds rather than on the physical achievement of the targeted additional production. This has resulted in inflation, more so with the non-utilisation of industrial capacity and the absence of return on the investment made.

The conspicuous failure of India's planning strategy has been in its inability to significantly improve the conditions of the poor, especially the rural poor. There has not been enough effort to alter property relations in favour of the poor, specially the landless cultivators, and to launch a tangible and meaningful programme to provide employment and eradicate poverty. In the absence of such down-to-earth programmes, planning does not have relevance for the great majority of the people

AGRICULTURE

No matter where we go in India today, we cannot escape the agricultural transition that is sweeping the countryside. Agriculture is the key sector that determines the overall growth rate in real national income in India. It has to satisfy the expanding demand for food and agricultural raw materials. More than two-thirds of the national income is contributed by this sector. It provides employment to over 60 per cent of the working force.

Performance

A study of the true nature of growth in agricultural production requires the decomposition of various contributory factors such as the growth in area, shifts in the cropping patterns, use of fertilisers, etc. However, a simple but correct method to assess growth performance is to observe production in years of comparable weather. A review of the overall growth rates in agricultural production—particularly in foodgrains during the past 30 years—brings forth two discerning trends: a slow growth rate up to mid 60s and a faster growth rate thereafter. The average annual production of foodgrains in aggregate terms was around 75 million tonnes upto mid '60s except for 1964-65, when it reached the peak level of 89 million tonnes.

But the production jumped to 95 million tonnes in 1967-68 and in the subsequent years, even with scanty rainfall, the aggregate output stood around the same level. India entered the era of the much-awaited 'green revolution' after the mid '60s. The foodgrain production reached the record level of over 130 million tonnes in 1981-82.

New Agricultural Strategy

A new agricultural strategy, High Yielding Variety Programme (HYVP), was evolved in 1965. Some parts of the new strategy were already in operation under certain intensive programmes like the package programme (IADP) and the area programme (IAAP). The new strategy attempted to put all these into an integrated and comprehensive two pronged programme to raise farm output by (a) concentrating resources and managerial initiative in areas

Food for thought Despite the green revolution our production continues to be below target.

with assured water supply and (b) raising rapidly the proportion of irrigated area which is double-cropped by introducing quick-maturing seed varieties of cereals.

The main plank of the new strategy was high-yielding seeds and fertilisers. At present, the total area under HYVP is around 45 million hectares—roughly 25 per cent of the gross cropped area in the country. According to a study made by Dharam Narain, over 60 per cent of the increase in productivity after 1960-61 was the result of 'pure' increase in per hectare yield while it was only about 30 per cent upto 1960-61.

During the decade 1970-71 to 1980-81, the production of all cereals rose by 28.4 per cent, the area by 3 per cent and the productivity by 18.5 per cent.

There is no denying the fact that HYV technology brought about a significant improvement in the productivity of cereal crops. But the

~~...rate of growth of agricultural~~ production has not been impressive in the past 30 years. The production of pulses has been almost stagnant. The same is true of oilseeds and jute. The compound rate of growth of foodgrains production during 1967-79 was 2.77 per cent as against 2.52 per cent achieved during 1952-65. The corresponding figures for non foodgrains were 2.88 and 3.87. These rates of growth were below the targets set for different Plans.

Problems

Even after 30 years of economic planning, agriculture in India depends on rainfall to a large extent. Failure of timely and adequate rains means a sharp fall in output, like the one witnessed in 1979-80 and in the kharif season of 1982-83, for less than a third of the gross cropped area is irrigated. Of a total of 53 million hectares of irrigated land in 1979-80, as much as 16 million hectares are under rice and 15 million hectares under wheat. Irrigated area under pulses and oilseeds in 1979-80 was 1.88 and 1.65 million hectares, which was only eight and nine per cent of the total area under these crops.

Irrigated land generally yields at least four to five tonnes of grain per hectare, as it does in Japan and many South Asian countries. But in India, the average yield of rice was 1.07 tonnes per hectare in 1979-80 and 1.57 tonnes per hectare with regard to wheat. This is because a large area under these major crops is not irrigated.

This means that over a large part of the country, the scope for adopting the water-fertiliser HYV seeds package just does not exist. Therefore, it is difficult to secure increases in productivity per hectare. It is important to note that success in the sphere of HYV seeds has been limited to wheat and rice and there has been similar breakthrough in pulses and oilseeds. The percentage increase in production between 1950-51 and 1980-81 in respect of wheat and rice was 464 and 158. In the case of coarse cereals, pulses and five major oilseeds, the percentage increase during the same period was 88, 33 and 61 respectively.

No real breakthrough has been achieved in the adoption of HYV of paddy in the traditional rice-fed areas where paddy is cultivated, mainly due to water-logging, pests and

diseases. In the non-traditional areas like Punjab, where water and pest control are easier, significant increase in productivity has been achieved. Punjab increased its share of rice output in the country from about 1.5 per cent in 1966-67 to approximately 5 per cent in 1977-78. Retrospectively, the gains made by Tamil Nadu - the leader of the mid 60s - appear less impressive and the performance of Bihar and West Bengal seem to border on stagnation during the same period.

A policy of price support and procurement plays an important role in the adoption of new technology. The adoption of the improved package of HYV seeds and fertilisers results in an increase in the cost of cultivation. For example, the cultivation cost of wheat per hectare in Punjab recorded an increase of 84 per cent between 1970-71 and 1978-79. In the case of Haryana, the uptrend was even steeper.

143 per cent during the same period. As such, it is necessary to provide remunerative procurement and support prices to the producer before sowing. A comprehensive programme has been evolved for wheat, rice and sugarcane. But no such scheme has been evolved for other crops, particularly pulses and major oilseeds.

Credit is as important for agriculture as water is. Institutional credit for agriculture flows from two main sources, namely, the cooperatives and commercial banks, including Regional Rural Banks. Institutional credit accounts for roughly 40 per cent of the total credit requirement of the agricultural sector. Clearly, the traditional money-lender is the most effective agency for credit today. Mounting overdues (43 per cent of short-term loans of co-operatives) is the most serious problem affecting the flow of institutional credit to the agricultural sector.

Prospects

The government, though belatedly, has taken steps to reverse this sector's bleak financial future. A little over 25 per cent of the Sixth Plan's total financial outlay has been allocated to this sector, and the development of agriculture has been accorded a high priority in the Plan. The production of foodgrains is targeted to increase at an annual average of approximately 4 per cent and oilseeds at 5 per cent over

the Plan period. The central government has also chalked out an action programme. Its salient features: (i) reclamation of fallow lands. According to land-use statistics, there are about 9.5 million hectares of fallow land in the country; (ii) development of pulses and oilseeds production under a centrally-sponsored scheme; (iii) stepping up the production of seeds of high yielding varieties of cereals and pulses from the actual level of 25 lakh quintals to about 40 lakh quintals during 1982-83; (iv) increasing the consumption of fertilisers; and (v) development of dry land farming through the adoption of both extensive as well as intensive approaches. An area of 13.46 million hectares has been brought under the schemes for the development of dry land farming in 17 states and one Union territory during 1982-83 to boost agricultural production.

Will all this help the country attain self sufficiency in agriculture in the near future? This depends largely on the most important determinant of agricultural development, namely, the availability of assured water supply. The significant increase in yield per hectare in Punjab in respect of rice and wheat is largely the result of extensive irrigation facilities. Nearly three-fourths of the gross cropped area in Punjab is irrigated. That is why the average yield of wheat in Punjab was 2,537 kg per hectare, which was twice the national mean in 1977-78. In respect of rice, the average yield per hectare in Punjab was 152 per cent higher than the national average.

It has been assessed that about 67 million hectare metres of surface water and 26.5 million hectare metres of ground water can be tapped and utilised. The land area that can ultimately be irrigated has been assessed to be 113 million hectares as against a possible gross cropped area of 210 million hectares. As stated earlier, less than half of the potential has been actually utilised so far.

The Union Irrigation Ministry has formulated a Rs 50,000-crore scheme which envisages the transfer of surplus river water for utilisation in deficit regions through interconnecting links. Over 20 dams and 7,200 km of canals will be constructed. The scheme will irrigate 25 million hectares by surface flows.

INDUSTRY

✓ Till the beginning of the First World War, industrial growth in India was very slow. But with the Swadeshi movement and the two world wars, industries run by the Indians got a fillip. This was mainly due to the stoppage and reduction of imports, as also to meet the defence needs of the British Government. The partition of the country in 1947, however, adversely affected the Indian industry as certain raw materials, mainly cotton and jute, became scarce.

Real industrial growth started in 1951 and intensified after 1956 with the Five Year Plans giving high priority to industrial development. During the first two Plans (1951-52 to 1960-61), the growth and diversification of industries was remarkable. Several new industries including three new steel plants were set up commencing the development of heavy and basic industries. The progress of the industrial sector was reflected in the index of industrial production which increased by 94 per cent during the '50s.

Uneven growth. While the coking unit at the Barauni oil refinery showed a record unbroken performance of 150 days, total industrial output fell due to frequent strikes and power-cuts.

Industrial production during the following eight years (1961-66 to 1966-69) was markedly uneven and its growth rate fell after '60. It came down to 8.8 per cent in 1964-65 from 11.3 per cent in 1961-62. In 1966-67, it was as low as 0.6 per cent. Only during 1968-69 did it register a rise of 6.8 per cent. The wars with China and Pakistan and the two successive droughts in 1965-66 and 1966-67 were to a great extent responsible for the deteriorating industrial growth. Industrial production during the '70s was uneven and fluctuating. The highest rate of 9.5 per cent was achieved in 1976-77 and the lowest, 1.4 per cent, in 1979-80. The '80s began with a rate of 4 per cent in 1980-81. The year 1981 again saw a rise in industrial development as industrial output increased by 9.5 per cent, as compared to a rate of 5 per cent, in '82.

It is difficult to predict the shape of things in 1983. With strikes all around, frequent and prolonged power-cuts and a precarious foreign exchange situation, the current year may end up with a meagre growth of 4 to 5 per cent.

INDUSTRIAL RELATIONS

“Strike threatens to disrupt production” is a headline we frequently come across in newspapers. Such headlines describe the breakdown of industrial relations—the relationship between the union and the management. The unions work for an improvement in the wages and working conditions of their members and the management wants increasing productivity which enables it to earn higher profits. Various devices like negotiations, arbitrations, etc. are used to maintain good industrial relations. When these fail, strikes and lockouts are resorted to. The government often interferes to regulate industrial disputes so that good relations between the labour and management are maintained.

Industrial relations have a significant place in a developing country like India where the levels of productivity are low. Frequent disruptions in production further depress productivity levels. Therefore, a strike in India is considered legal

only when it is called after the conciliation efforts by the government have failed. However, the success of governmental efforts depends on two factors: the efficiency of its conciliatory machinery and the willingness of the trade unions to use this machinery.

Unfortunately, both these factors have not been favourable. The settlement of disputes through legislative process has been found to be very expensive and time-consuming, leading to frustration among both workers and employers, forcing them to resort to direct action, i.e., strikes and lockouts, respectively. A study of the record of trade union movement in India reveals that there has been an alarming increase in strikes in recent times. This is mainly due to the fact that labour movement has not been organised and developed on healthy lines. As the important national trade unions are politicised, the interests and welfare of the workers are often ignored with the unions being used to achieve political ends. This, along with disunity in the ranks of workers are some of the issues responsible for disturbed industrial relations.

With the spread of industrialisation and growth of labour as an organised class, industrial disputes have been gradually on the rise. The magnitude of these disputes is measured by the stoppage of work and the number of mandays lost in a year. The latter increased from about 38 lakhs in 1951 to 66 lakhs in 1960 and further to 206 lakhs in 1970 and reached a record level of 403 lakhs in 1974. The upward trend in the number of disputes and mandays lost continued over the first half of the '70s due mainly to inflationary pressures.

The declaration of emergency in 1975 reduced the number of industrial disputes for a while, but after the emergency labour unrest manifested itself again. An important feature in recent times is that the average duration of disputes has increased. The percentage of strikes lasting for a day or upto a week has markedly decreased, while strikes ranging over longer periods, i.e., more than 10 to 30 days, have increased. This indicates the increasing pressure of problems, strengthening of organised means of protest and failure of machinery for prevention

and settlement of disputes.

One of the main causes of industrial disputes is that there has been a sharp increase in prices in the last three decades, but the wages of labourers have not increased proportionately. As such, the real wages of labourers have eroded considerably. For instance, the index of real wages declined from 103 in 1962 to 65 in 1975.

The second major cause can be attributed to the question of payment of bonus to workers. Over the years, bonus has come to be regarded as a right by the labour, but the government has not been adhering to any consistent policy on this issue. Other causes relate to victimisation of employees by management, retrenchment, unsatisfactory working conditions, etc.

For the prevention and settlement of industrial disputes statutory and voluntary methods are followed. Statutory: resolving disputes through work committees, conciliation, arbitration and adjudication. The Industrial Disputes Act of 1947 controls the statutory ways.

Voluntary: recognition of trade unions; promotion of the practice of mutual negotiations between employers and workers through collective bargaining, evolving a common procedure for timely removal of grievances, prompt implementation of agreements and settlements by employers, encouraging workers' participation in management at all levels; and the setting up of industrywide wage-boards.

In India the government plays a major role in resolving industrial disputes. Unfortunately the voluntary arrangements for maintaining stable industrial relations have not been used effectively. The labour organisations and employers have acted more under legal compulsions and state intervention, than on their own. This indicates a lack of pragmatic approach to the issue of industrial relations on the part of both employers and workers in our country in contrast to countries like the US, the UK, Germany and Japan where most disputes are avoided and settled through voluntary efforts, collective bargaining and better understanding between labour and the management. State intervention is rare. In India, on the other hand, industrial relations rely rather heavily on adjudication and third party intervention in dispute.

INDUSTRIAL LICENSING

India is one of the few countries in the world with an industrial licensing system. And, perhaps, in no other country is the system so complicated. It all started with the Industrial Policy Resolution of 1948 which in its turn gave rise to the Industries Development and Regulation Act (IDRA) of 1951. The 1948 Resolution was amended in 1956. The 1956 Resolution lays emphasis on heavy and machine-building industries, expansion of the public sector industry, encouragement to the cooperative sector and diffusion of ownership and management in the private sector.

Appended to the document are two schedules. The first lists 17 industries ranging from atomic energy and air transport to generation and distribution of electricity. The development of these is the exclusive concern of the state. The second comprises of 12 industries in which the private sector is expected to supplement the government's efforts. This list includes fertilisers, chemicals, pulp, aluminium and other non-ferrous metals, machine tools, road and sea transport. The remaining industries are left to the initiative and enterprise of the private sector.

The IDRA provides for an elaborate system of industrial licensing and policing of industry. The items embraced by the licensing policy are listed in the Act's schedule. In theory, other industries are exempt from licensing but, being general, the list is in practice all-embracing. Small-scale and ancillary units are exempt from licensing. Undertakings, popularly known as large industrial houses, attract the provisions of the Monopolies and Restrictive Trade Practices (MRTP) Act and the Foreign Exchange Regulation Act (FERA). They have to get clearance from the appropriate authorities for setting up new units or expanding the existing ones.

In 1975 and 1976 there was some attempt at liberalisation of the industrial policy, in contrast to the previous decade when the Industrial Policy Licensing Committee

(Dutt Committee) with its monopoly policies Commission sprang upon the concept of large industrial houses. The Dutt Committee identified large business houses as those with assets of over Rs 35 crores while the Monopolies Commission fixed the lower ceiling of Rs 20 crores.

The liberalisation in the '70s allowed full utilisation of installed capacity in 29 industries and automatic expansion at the rate of 25 per cent in five years. In addition, diversification within the licensed capacity was permitted for a wide range of industries. Research and development was also sought to be encouraged. In August 1977, the Janata Government announced that the maximum encouragement would be given to the khadi and village industries and it introduced the concept of a 'tiny' sector of industry.

ROBOT MOVES IN

It is no beauty, but it has brains— to the extent that it needs to be commanded by man. The object Walrobo II, India's second robot. The designers and builders, Walchandnagar Industries Ltd and the Hyderabad Science Society. The purpose, to use it in environments unsuitable for human labour.

Walrobo II is little more than life-size, silver painted and made of plastic and metal. It performed its antics in a ringed enclosure in the pavilion of the Walchandnagar Industries Ltd at the Fifth Indian Engineering Trade Fair (IETF) held in New Delhi from January 19-28, 1983. The fair was organised by the Association of Indian Engineering Industries, which has earlier held four such exhibitions in 1975, 1977, 1979 and 1981. A wide range of industrial sectors was covered in the present fair. On view was a separate electrical-equipment sector with giants such as Philips and BHEL participating; the burgeoning automobile industry was all too evident through its factory-fresh products in eye-catching positions; and the earthmover division demanded attention because of its very size. One such

list of items reserved for production in the small-scale sector was also widened.

In April 1982, the government announced that the industrial licensing policy as also the constraints on capacity utilisation were relaxed. The list of the core-sector industries as given in Appendix I of the Industrial Policy was thrown open to large houses as well as the FERA companies in respect of five more areas. The new groups of industries added to the list are: high technology production and multiplication equipment, carbon products, high-pressure RCC pipes, rubber and printing machinery. The government also allowed the industry 33 per cent capacity over and above the 25 per cent excess production. It was claimed that the liberalisation would stimulate growth po-

lution. The changes, it was also stated, would promote economies of scale and adoption of advanced technology.

All this is good as far as it goes, but then the basic framework of licensing, the irritants of clearances and the bureaucratic inertia and apathy remain intact. A medley of control measures in the Indian economy have by now developed into a highly complex system of regulations. Price controls have not checked prices, industrial licensing has not promoted priority industries, and the MRTP law has not stopped the growth of large houses. The controls have just provided a protected market placing a premium on inefficiency.

Despite several steps taken over the years, albeit haltingly, industry has lost its initial momentum

needs to be increased and diversified. For this purpose, production has to be encouraged in both private and public sectors. The industrial policy should become a catalyst for industrial growth which will spur growth in other sectors of the economy. A series of control measures and frequent changes in the production policy do more harm than good. Positive incentives need to be provided, particularly for filling in the gaps in items of production and in the matter of balanced regional industrial development of the country. Although the government has been giving incentives for industrial development in the backward areas of the country, these have not helped as there is still too much concentration of industrial units, new and old, in a few places.

Walrobo: High-tech humanoid from India.

was a gigantic 85-tonne Rear Dumper. TEREX 33-11C, manufactured by Hindustan Motors. But as an electronic gadget and industrial machine, it was Walrobo II that drew the maximum crowds—and with reason.

Consider the facts:

Walrobo has been built in India without any foreign collaboration or participation.

It is remote-controlled, powered by rechargeable batteries.

It can move on hard flooring in any direction, unlike Western robots. Specially Japanese robots, which are immobile, are plugged on to electrical lines and can perform only programmed functions.

It has two arms capable of vertical movement (up and down). Each arm is provided with an independent wrist movement which can rotate clockwise or anti-clockwise. The arm terminates in a steel gripper which can open and close, and can pick up objects and place them in required positions—literally with kid gloves. For, the grippers—or hands—are provided with pressure sensors (preset) so that the object picked up is not crushed by a strong force. Walrobo I, India's first robot, was an all-metal affair and less sophisticated, especially its arm unit. Ten motors in all—four in each arm and two in the wheel base

plus' the semi-plastic body structure makes Walrobo II more manipulative and mobile.

All these combine to make Walrobo a replacement for man in dangerous shop-floor jobs. This silver-coloured high-tech humanoid can be used in radioactive environments, reactors and hot cells for handling nuclear wastes and materials, in chemically toxic and explosives-experimentation areas, in difficult locations in mining operations; in oceanographic and space experiments; and in welding and spray painting.

When, and if, Walrobo II will take its legitimate place in the Indian industry is too early to answer, given the opposition to computers and their byproducts. As such, welding and spray painting aren't yet considered hazardous by the Indian industry. Anyway, Walrobo II's builders had the export market primarily in mind—and with good reason. The international demand for industrial robots is rising steeply, and Japan as the world's largest producer may fill the gap. India can corner some of it too, what with its technical capability and low production costs of machines. Walrobo II is a testimony to this and the theme of the Fifth Indian Engineering Trade Fair: "An Innovation for Innovation."

FOREIGN AID

Foreign aid has become the backbone of economic development in recent times. The economic development of the US and some decades later of Canada and Australia would never have attained its astounding dimensions without the influx of huge amounts of capital from UK. The US, in turn, provided massive aid to European countries and Japan, under the Marshall Plan, for reconstructing their economies, devastated by World War II. The latest example is that of the USSR which, in spite of being a centralised economy and the most bitter critic of the capitalist West, has taken a multi-million-dollar financial and technological aid from West European countries for its Siberian natural-gas pipeline project.

In the post-war period, the transfer of capital and technology from advanced countries to underdeveloped ones became a common feature. International aid-giving institutions like the International Monetary Fund (IMF), International Bank for Reconstruction and Development (better known as the World Bank) and International Development Association (IDA) were created immediately after the end of the war mainly to provide assistance to less developed countries, for boosting their economy and overcoming balance-of-payments difficulties.

When India launched the Five Year Plans for its economic development, our planners adopted the strategy of heavy industrialisation and building infrastructure for rapid development. The government decided to welcome foreign capital and accept foreign aid from all sources, subject to national interests. The reason behind this policy was that domestic savings were not sufficient to finance the massive investment programmes. The alternative would have been stagnation or crawling growth. Moreover, our exports, consisting mainly of primary commodities, were not sufficient to pay for the increasing import of capital goods and technology required for industrialisation and modernisation of the economy. Thus, India's requirement was primarily determined by three factors: to meet the

savings-investment gap, the import-export gap and the technological gap.

India has utilised a total external assistance of Rs 22,763 crores, in the form of loans and grants, during the last 30 years between 1951-52 and 1980-81. This is in addition to direct investment made by foreign firms and multinationals by opening their branches, subsidiaries and affiliates in India. As regards inflow of private foreign capital, the government has adopted the policy of encouraging enterprises with foreign collaborations in industry, so that the majority participation in equity is Indian.

About 90 per cent of the total aid utilised by India till the end of 1980-81 has been contributed by Aid-India Consortium, formed in 1957-58 for coordinating external assistance to India from different sources. The members of this consortium are the World Bank, IDA and individual countries such as the US, UK, Canada, West Germany, Japan and other countries of the European Economic Community (EEC). Individually, the US has been the largest contributor (25.3 per cent of total assistance), followed by the World Bank and IDA, which together contributed 23 per cent of the aid till 1980-81, as compared to only 1.5 per cent from the USSR.

However, recent trends reveal that the share of the US in total aid to India has declined sharply. Its contribution, which stood at 57.7 per cent during the first three Plan periods (1951-52 to 1965-66), fell to 27 per cent during the

Coming to our aid: Hot strip mill in operation at the Bokaro Steel Plant, built with foreign collaboration.

Fourth Plan and touched a low level of 4.8 per cent and 3.1 per cent during the Fifth Plan and the first three years of the Sixth Plan respectively. IDA, which had been providing the most liberal aid on soft terms in recent years, too has curtailed its aid-programmes substantially, due largely to cut in contributions from donor countries, mainly the US.

On the whole, the traditional channels of soft and liberal aid, whether from individual countries or from international agencies, are drying up. The economies of advanced countries are themselves passing through a difficult phase, while the US Government under President Ronald Reagan is following conservative policies, aimed at reducing all concessional aid to less-developed countries. These developments have forced the latter to resort to commercial borrowings to finance their development programmes.

Borrowings at commercial rates of interest, ranging from 14 to 16 per cent, have again proved too burdensome for underdeveloped economies which have already been pushed to the wall, due to hike in oil prices and heavy repayment burden of past loans. These two factors alone are responsible, to a large extent, for the massive current balance-of-payments difficulties faced by India. While it was the savings-investment gap

(Continued on page 67)

PRACTICE TESTS

In preparing these tests we have tried to visualise the questions you are likely to face in your actual exam. Great care has been taken to frame questions which are of the same standard as those you'll encounter in your exam.

Rating: Evaluate your performance on the basis of the following score-card:

| | | |
|-----------------------------|---|-----------|
| 100 questions in 60 minutes | — | Excellent |
| 60 questions in 60 minutes | — | Good |
| 50 questions in 60 minutes | — | Fair |
| 35 questions in 60 minutes | — | Poor |

Tips: 1. Do not waste time over questions you are not sure about. 2. Give the problems some thought before choosing the answers. 3. Do not try to guess the answer.

TEST OF REASONING

BY LT COL I. R. MANCHANDA, former Dy President, S. S. S.

FOR AFMC ENTRANCE EXAM

This section forms an important part of the LOGIC & REASONING paper of the entrance exam for the Armed Forces Medical College (Pune) to be held in May.

Time: 35 minutes.

Scores: 1. Give yourself one mark for each correct answer. 2. Deduct one mark for each wrong answer. 3. Then rate your score as under:
Excellent 45-50 Very Good 42-44 Good 39-41 Fair 35-40 Poor Below 35

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Answers are given at the end of this supplement.

Directions Questions 1 to 4 are based on the following table:

Annual Premium And Instalment

Payment per Rs 1,000 on endowment life insurance (for 25 years) at ages 26 through 30

| Age | Annual Premium | Half-yearly Instalment | Quarterly Instalment |
|-----|----------------|------------------------|----------------------|
| 26 | Rs 39 50 | Rs 19.88 | Rs 10.06 |
| 27 | Rs 39 65 | Rs 19 95 | Rs 10 10 |
| 28 | Rs 39.85 | Rs 20.05 | Rs 10 15 |
| 29 | Rs 40 05 | Rs 20 15 | Rs 10 20 |
| 30 | Rs 40.30 | Rs 20.28 | Rs 10.26 |

- how much would a 28-year-old person save over a period of 10 years on a Rs 1,000 policy by paying the premium half yearly rather than quarterly?
- (a) Rs 2.50
(b) Rs 3.50
(c) Rs 5.00
(d) Rs 7.50
2. When Ram and Sham, identical twins, attain the age of 28, Ram takes a Rs 2,000 policy. Two years later, Sham takes a similar policy. When they attain the age of 32 and pay the premium for that year, how much more than Sham did Ram pay on life insurance? Assume that they both pay their premiums annually.
- (a) Rs 78.35
(b) Rs 156.70
(c) Rs 241.80
(d) None of the above
3. At the age of 29, the annual charge for making quarterly instalments instead of annual payments is best expressed as approximately—paise on the rupee.
- (a) 2
(b) 3
(c) 4
(d) 5
4. If the quarterly instalment for a Rs 1,000 policy at the age of 28 is expressed by Rs x , the annual premium may be represented as
- (a) Rs $4x$
(b) Rs $(4x-75)$
(c) Rs $(4x-0.75)$
(d) $x-3$
4

Directions: Questions 5 to 10 are based on the following table:

| Countries | Medals Tally—Asiad '78 & Asiad '82 | | | | | |
|-------------|------------------------------------|--------|--------|-----------|--------|--------|
| | Asiad '78 | | | Asiad '82 | | |
| | Gold | Silver | Bronze | Gold | Silver | Bronze |
| China | 51 | 54 | 46 | 61 | 51 | 41 |
| Japan | 70 | 59 | 49 | 57 | 52 | 44 |
| South Korea | 28 | 20 | 31 | 28 | 28 | 37 |
| North Korea | 14 | 13 | 15 | 17 | 19 | 20 |
| India | 11 | 11 | 11 | 13 | 19 | 25 |
| Indonesia | 8 | 7 | 18 | 4 | 4 | 7 |
| Thailand | 11 | 12 | 19 | 1 | 5 | 4 |
| OTHERS | 17 | 19 | 39 | 18 | 22 | 37 |
| Total | 291 | 305 | 223 | 199 | 200 | 215 |

Note: 'OTHERS' include countries other than those whose names are mentioned in this table.

5. Approximately _____ percent of the total medals were won by India taking into account Asiad '78 and Asiad '82.
- (a) 5
(b) 7
(c) 9
(d) 11
6. Excluding 'OTHERS', how many countries improved their tally of gold medals in Asiad '82 compared with Asiad '78?
- (a) 1
(b) 2
(c) 4
(d) 6
7. The total number of gold medals won by North Korea in Asiad '78 and Asiad '82 were approximately—percent of the

total medals won by OTHERS
in Asiad '82.

- (a) 15
- (b) 21
- (c) 42
- (d) 177

8. Excluding 'OTHERS',—
showed the greatest percent-
age increase in its tally of
medals in Asiad '82 compared
with Asiad '78.

- (a) South Korea
- (b) North Korea
- (c) India
- (d) Indonesia

9. Assume that, at the next Asiad
in 1986, India improves its
tally of medals (all types) by
100 per cent at the cost of
'OTHERS'. Then India's
tally of gold medals at Asiad
'86 would be——per cent of
that of 'OTHERS'.

- (a) Approximately 40.6
- (b) Approximately 144.4
- (c) 520
- (d) 570

10. Refer to question 9. Fur-
ther, if the medals tally of
other countries remains the
same at Asiad '86, India's
tally of bronze medals at
Asiad '86 would be approxi-
mately——per cent of the
bronze medals tally of China.
(a) 22

(b) 88

(c) 110

(d) 122

11. Twelve-and-a-half per cent of
the people eligible to vote are
between 21 and 25. In an
election, 80 per cent of them
actually voted. Thus, they
constitute——per cent of those
eligible to vote.

- (a) 5
- (b) 7.5
- (c) 10
- (d) 12.5

12. If it costs x paise a km for pet-
rol and y paise a km for all
other expenses required for
running a two-wheeler, it
will cost Rs——to run it for
500 km.

- (a) $500x + 500y$
- (b) $50(x + y)$
- (c) $5x + 5y$
- (d) $x + y$

13. Ambala is 192 km from Delhi.
If a motorcyclist takes 2 hours
to cover the first 92 km, he
will take——min to cover the
final 100 km in order to average
60 km an hour for the entire
trip.

- (a) 60
- (b) 72
- (c) 84
- (d) None of the above

Directions: Questions 14 to 20 are based on the following table:

Trends In India's Foreign Trade

| Year | Imports
(Rs in million) | Exports
(Rs in million) |
|---------|----------------------------|----------------------------|
| 1975-76 | 52,652 | 40,422 |
| 1976-77 | 50,738 | 51,423 |
| 1977-78 | 60,253 | 54,043 |
| 1978-79 | 68,143 | 57,263 |
| 1979-80 | 90,218 | 64,588 |
| 1980-81 | 1,25,240 | 67,100 |
| 1981-82 | 1,32,720 | 75,570 |

14. In ~~1981-82~~ India had the most unfavourable balance of trade.
 (a) 1976-77
 (b) 1977-78
 (c) 1980-81
 (d) 1981-82
15. India's imports exceeded its exports during the year 1979-80 by approximately——per cent
 (a) 32
 (b) 35
 (c) 40
 (d) 45
16. India's exports during 1977-78 were approximately——per cent of her exports in 1975-76.
 (a) 120
 (b) 134
 (c) 140
 (d) 145
17. During the year India had favourable balance of trade, its exports were nearly——per cent of its exports in the year it had the most unfavourable balance of trade.
 (a) 33
 (b) 66
 (c) 77
 (d) 82
18. India's exports during 1978-79 exceeded its imports for the year 1975-76 by approximately ——per cent.
 (a) 9
 (b) 19
 (c) 23
 (d) 27
19. Assume that India's imports during 1982-83 and subsequent years decrease at the rate of 10 per cent of the preceding year and that its exports increase at the rate of 10 per cent of the preceding year. Based on these assumptions, state in which year its balance of trade would at first become favourable.
 (a) 1982-83

- (b) 1983-84
 (c) 1984-85
 (d) 1985-86
20. Based on the assumptions given in question 19, how much more or less in crores of rupees would India's balance of trade be in 1984-85 than its balance of trade in 1976-77?
 (a) Rs 314.579 crores more
 (b) Rs 383.079 crores more
 (c) Rs 3,145.79 crores less
 (d) Rs 3,830.79 crores more
21. In an exam 70 per cent of the candidates fail in both Physics and Chemistry. If 25 per cent of the candidates pass in Physics and 29 per cent in Chemistry, — per cent of the candidates pass in both subjects.
 (a) 20
 (b) 24
 (c) 25
 (d) 30
22. If you increase the numerator and decrease the denominator of a fraction by 60 per cent each, the value of the resulting fraction becomes $\frac{8}{9}$. The original fraction was
 (a) $\frac{8}{9}$
 (b) $\frac{1}{9}$
 (c) $\frac{9}{1}$
 (d) $\frac{1}{8}$
23. If a 25-per cent reduction in the price of a TV set enables a dealer to buy two more sets than he could previously get for Rs 30,000, the original price of the set was
 (a) Rs 3,750
 (b) Rs 4,637.50
 (c) Rs 5,000
 (d) Can't be worked out
24. What will be the next two numbers in the series given below?
 4, 7, 9, 14, 17, 19, —, —.
25. Insert the two missing numbers in the series below.
 —, —, 8, $\frac{1}{8}$, 2, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$.

26. The scale of a sketch is 1:100, i.e., 1 cm on the sketch equals 100 cm or 1 m on the ground. A triangular patch marked ABC has two of its sides equal to 10 cm and 15 cm on the sketch. If the area of the triangular

patch on the ground is 60 sq m, the length of the third side on the sketch would be——cm.

- (a) 8
(b) 10
(c) 12
(d) 14

Directions: Questions 27 to 31 are based on the figures below:

AGRICULTURAL PRODUCTION

Note: The diagrams are not to scale.

27. Sugarcane production in 1960-61 was approximately 7 per cent of
- (a) The total agricultural production during 1960-61
(b) The sugarcane production during 1981-82
(c) The total agricultural production during 1981-82
(d) The production of foodgrains during 1960-61
28. The quantity of foodgrain was approximately——of the total agricultural production for 1960-61 and 1981-82.
- (a) $\frac{1}{4}$
(b) $\frac{1}{3}$
(c) $\frac{1}{2}$
(d) $\frac{2}{3}$
29. Foodgrain production during 1960-61 was approximately——per cent of the sugarcane production during 1981-82.
- (a) 1204
(b) 300
(c) 436
(d) 490
30. Oilseed production was——per cent of the sugarcane production in 1981-82.
- (a) 0.7
(b) 70
(c) 80
(d) 1424
31. Sugarcane production in 1960-61 should have been——per cent more approximately so that it could equal the production in 1981-82.
- (a) 35
(b) 46
(c) 56
(d) Can't be worked out
32. A monkey climbs 3 m at the beginning of each hour and slips back 2 m hourly. If he

he will make contact with a point 12 m above the ground at—p.m.

- (a) 2
 - (b) 3
 - (c) 5
 - (d) 6
33. A waiter's income consists of his salary and tips. His monthly salary is Rs 329. In January this year, his tips were $\frac{1}{4}$ th of his salary. What fraction of his income for January came from tips?
- (a) $\frac{1}{11}$
 - (b) $\frac{1}{8}$
 - (c) $\frac{1}{11}$
 - (d) $\frac{1}{8}$
34. In the diagram given below (not to scale), the area of the square ABCD is—sq units.

- (a) $\frac{1}{2}$
 - (b) $1\frac{1}{2}$
 - (c) 3
 - (d) Can't be worked out
35. If 'All men are cultured' is true, which of the following statements must be true?
- (a) Some cultured beings are not men
 - (b) Only men are cultured
 - (c) No men are uncultured
 - (d) None of the above
36. If 'All S is P' is true, which of the following must be true?
- (a) Some S is not P
 - (b) Some P is not S
 - (c) All non-P is non-S
 - (d) No S is non-P
37. If 'Some S is not P' is true, which of the following must be true?
- (a) Some non-P is not non-S

- (c) No non-P is S
- (d) Some S is P

38. If 'Some metals are conductors' is true, which of the following must be true?
- (a) All conductors are metals
 - (b) Some metals are not conductors
 - (c) Some metals are not non-conductors
 - (d) No conductors are non-metals
39. If 'Some S is P' is false, which of the following must be true?
- (a) None but S is P
 - (b) All S is P
 - (c) No S is non-P
 - (d) No S is P
40. All conscientious officers do not like interference by their superiors. So X too must not be liking it. Which one of the following statements completes the argument?
- (a) X may be a conscientious officer
 - (b) X is a conscientious officer
 - (c) X is the son of a conscientious officer
 - (d) None of the above
41. No true democrat is abrupt, but some members of Parliament are abrupt. Therefore
- (a) Some true democrats are also abrupt
 - (b) Some members of Parliament are not true democrats
 - (c) Some members of Parliament are true democrats
 - (d) No valid conclusion can be drawn
42. Naresh is interested only in making money, but you cannot serve both Mammon and the people! Which one of the following can be validly inferred from the above?

- (a) Naresh is not a person who serves the people
 (b) Naresh is a person who serves the people
 (c) No one who serves Mammon has ever made money and, therefore, Naresh could not have made money
 (d) None of the above
43. The last train did not stop at Basin Bridge station, so it must have been the air-conditioned train. Which one of the following statements completes the argument?
 (a) Some air-conditioned trains do not stop at Basin Bridge station
 (b) The air-conditioned train alone does not stop at Basin Bridge station
 (c) The air-conditioned train does not stop at small stations
 (d) No air-conditioned train stops at Basin Bridge station
44. If 'If a person does not struggle, he does not improve' is true, which of the following must be true?
 (a) X has struggled, and he, therefore, must have improved
 (b) X has not improved, and he, therefore, must not have struggled
 (c) X has improved, and he, therefore, must have struggled
 (d) None of the above

45. If women, numbering 32.5 lakhs, constituted 38.1 per cent of the labour force in 1980, the total labour force that year was— lakhs approximately.

(a) 10
 (b) 38
 (c) 75
 (d) 85

Directions: Questions 46 to 50 are based on a letter series from which some of the letters are missing. You are required to find from amongst the alternatives the one that gives the missing letters in the proper sequence.

46. a - - b a a - b a - a b

(1) a b a b
 (2) a b b a
 (3) a a a a
 (4) b b b b

47. a a - b b - a a - b b -

(1) a b a b
 (2) b b b a
 (3) b a b a
 (4) a a a b

48. b a b - b - b - - a b b

(1) a b a b
 (2) a a a b
 (3) b b b a
 (4) b a b b

49. b b a - b a - b a - b

(1) b b a a
 (2) a b b b
 (3) b a a a
 (4) a a a a

50. - a a - b b a - a - b b

(1) b b b b
 (2) a b b a
 (3) b a a b
 (4) a b a b

From *TEST YOUR OWN APTITUDE* by J. Barrett and G. Williams

ARITHMETIC

BY R.P. GOEL

FOR JEE, CDS AND NDA EXAMS

This section forms an important part of the MATHEMATICS paper in the Combined Defence Services (CDS) and National Defence Academy (NDA) exams and the Joint Entrance Exam (JEE) conducted by the IITs, all to be held in May.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. In the Roman system of numeration a bar is placed over a symbol to make its value—times.
(a) 10
(b) 100
(c) 1,000
(d) 10,000
2. The smallest five-digit number that is exactly divisible by 319 is
(a) 10,031
(b) 10,111
(c) 10,208
(d) 10,238
3. The least number, which when increased by 3 is exactly divisible by 12, 15, 18 and 24, is
(a) 120
(b) 357
(c) 360
(d) 363
4. The greatest weight which can be contained exactly in 6 kg 7 hg 4 dag 3 g and 9 kg 9 dag 7 g is
(a) 7g
(b) 9g
(c) 11g
(d) 13g
5. Rita, Prabha and Susan begin skipping at exactly the same moment. After that they skip at intervals of $\frac{1}{4}$ sec, $\frac{1}{3}$ sec and $\frac{1}{5}$ sec respectively. They will again skip simultaneously after—secs
(a) 9
(b) 12
(c) 16
(d) 20
6. The least whole number by which 3,468 should be divided to make it a perfect square is
(a) 2
(b) 3
(c) 17
(d) None of the above
7. Which is the smallest fraction among $\frac{3}{4}$, $\frac{7}{8}$, $\frac{1}{2}$ and $\frac{5}{6}$?
(a) $\frac{3}{4}$
(b) $\frac{7}{8}$
(c) $\frac{1}{2}$
(d) $\frac{5}{6}$
8. $\sqrt{0.2}$, correct to two decimal places, is
(a) 0.12
(b) 0.21
(c) 0.44
(d) 0.45
9. Of the four numbers, the first is double the second, the second three times the third, and the third half the fourth. If the average of these four numbers is 30, the third number is
(a) 5
(b) 7.5
(c) 10
(d) 15
10. The average weight of 10 men is 62.3 kg. If two of them weigh 62.5 kg each and

three 61 kg each, the average weight of the remaining five men is

- (a) 62.8 kg
- (b) 63 kg
- (c) 63.2 kg
- (d) 63.5 kg

11. In an exam 45 per cent students failed and 550 students were successful. The total number of students who appeared in the exam were

- (a) 800
- (b) 900
- (c) 1,000
- (d) 1,200

12. Rajan earns $33\frac{1}{3}$ per cent less than Vasu. Vasu's income is thus—per cent higher than Rajan's.

- (a) $33\frac{1}{3}$
- (b) 50
- (c) $66\frac{2}{3}$
- (d) None of the above

13. A dealer sold a shirt at a profit of 15 per cent. Had he sold it for Rs 4 more, his profit would have increased by 5 per cent. The cost price of the shirt was

- (a) Rs 60
- (b) Rs 75
- (c) Rs 80
- (d) Rs 135

14. In a clearance sale, how much per cent above the cost price must a shopkeeper mark a sari so as to get a net profit of 10 per cent after allowing a customer a discount of 12 per cent?

- (a) 11 per cent
- (b) 22 per cent
- (c) 25 per cent
- (d) None of the above

15. A shopkeeper allows his customers 10 per cent off the marked price of goods and still makes a profit of 26 per cent. If the marked price of a fan is Rs 560, then its

actual cost is

- (a) Rs 360
- (b) Rs 396
- (c) Rs 400
- (d) Rs 504

16. A manufacturer makes a profit of 20 per cent by selling hot plates to a wholesale dealer, who in turn, sells it to a retailer at a profit of 15 per cent. The retailer makes a profit of 30 per cent by selling it to a customer for Rs 897. The manufacturing cost of the hot plate is

- (a) Rs 475
- (b) Rs 500
- (c) Rs 550
- (d) Rs 600

17. If the rate of simple interest is—per cent, a sum of money will double itself in 20 years.

- (a) 2
- (b) 5
- (c) 10
- (d) 20

18. Sat Pal invests Rs 1,900 partly for 2 years and partly for 5 years, both at 4 per cent simple interest per annum. If the amount received back from both investments is the same, the sum invested for 2 years was

- (a) Rs 900
- (b) Rs 1,000
- (c) Rs 1,100
- (d) Rs 1,200

19. Shri Chand borrowed a sum of money on simple interest at 4 per cent and another at 6 per cent. In all he borrowed Rs 2,000. If he paid an interest of Rs 520 in all at the end of 5 years, the sum borrowed by him at 4 per cent was

- (a) Rs 600
- (b) Rs 800
- (c) Rs 1,000
- (d) Rs 1,200

20. The compound interest on Rs 4,000 for 9 months at 12 per cent per annum, interest being payable quarterly, is
 (a) Rs 360
 (b) Rs 370.91
 (c) Rs 376.20
 (d) Rs 392.40
21. In how many years will Rs 6,250 amount to Rs 7,290 at 8 per cent per annum compound interest?
 (a) $1\frac{1}{2}$ years
 (b) 2 years
 (c) $2\frac{1}{2}$ years
 (d) 3 years
22. If the compound interest for 2 years on a certain sum is Rs 63 and the simple interest for 3 years on the same sum is Rs 90, the sum is
 (a) Rs 300
 (b) Rs 315
 (c) Rs 450
 (d) Rs 765
23. Six women or nine girls do a piece of work in 10 days. Eight women and three girls will do the same work in
 (a) 4 days
 (b) 6 days
 (c) 9 days
 (d) None of the above
24. Dina Nath started a business with an investment of Rs 4,500. After some time, Ashok Kumar joined him with an investment of Rs 6,000. At year's end their profits were in the ratio 9:8. So, Ashok Kumar joined the business after—month(s)
 (a) 1
 (b) 3
 (c) 4
 (d) 8
25. A 20-litre mixture of alcohol and water contains 5 per cent water. How much water must be added to increase its content to 10 per cent?
 (a) $1\frac{1}{2}$ litres
 (b) $1\frac{3}{4}$ litres
 (c) $1\frac{1}{4}$ litres
 (d) 2 litres
26. How much water should be mixed with 20 litres of milk at Rs 3 per litre so that the mixture will be worth Rs 2.40 per litre?
 (a) 2 litres
 (b) 3 litres
 (c) 4 litres
 (d) 5 litres
27. Two taps can separately fill a cistern in 2 and 3 hours respectively. If both taps are opened simultaneously, the cistern will be filled completely in—hours.
 (a) 0.5
 (b) 1.2
 (c) 1.25
 (d) 2.5
28. Two cars are travelling along the same straight road. The first one travels at a speed of 30 kmph and starts 6 hours ahead of the second one, which travels at the speed of 50 kmph. The second car will overtake the first after—hours.
 (a) 6
 (b) 9
 (c) 12
 (d) 15
29. Two trains travel in the same direction at 40 kmph and 30 kmph respectively. The faster train passes a man in the slower train in 27 sec. The length of the faster train is
 (a) 37.5 m
 (b) 75 m
 (c) 262.5 m
 (d) 525 m
30. John can row 3 km an hour in still water. A stream flows at 2 km an hour. The time taken by him to go 2 km downstream and return to the starting point is

- (a) 24 min
(b) 1 hour 36 min
(c) 2 hours
(d) 2 hours 24 min
31. Mohan Kumar gains—per cent if he invests in shares selling at 10 per cent premium, when the dividend declared is 10 per cent.
(a) 9
(b) $9\frac{1}{11}$
(c) 10
(d) 11
32. The sum of money to be invested in a 5-per cent stock at 102 to obtain an income of Rs 400 per year is
(a) Rs 4,080
(b) Rs 5,100
(c) Rs 8,000
(d) Rs 8,160
33. A bill of Rs 950 drawn for 6 months is discounted after 3 months at 8 per cent. The approximate cash value of the bill would be Rs——less than the face value.
(a) 8
(b) 18
(c) 24
(d) 48
34. Suresh Chand invested $\frac{1}{3}$ rd of his capital at 4 per cent, $\frac{1}{4}$ th at 3 per cent and the remaining at 5 per cent. His annual income was Rs 50. His total capital was
(a) Rs 900
(b) Rs 1,000
(c) Rs 1,200
(d) Rs 1,500
35. Baba Ram gives 60 per cent of his property to his son, $\frac{1}{3}$ th of the remainder to his daughter and the rest to his wife. His wife receives—of the property.
(a) $\frac{1}{3}$ th
(b) $\frac{1}{4}$ th
(c) $\frac{1}{5}$ th
(d) $\frac{1}{6}$ th
- (d) $\frac{1}{11}$ th
36. If r , the radius of a circle, is increased by 2 units, then the area of the circle increases by—square units.
(a) 4
(b) $2\pi r^2$
(c) $4\pi r^2$
(d) $4\pi(r+1)$
37. A's mother is twice as old as A's brother. A is 6 years younger than his brother but 4 years older than his sister. If A's sister is 15, his mother's age is
(a) 38
(b) 40
(c) 42
(d) 50
38. The rent of a flat is Rs 250 per month. The house-tax is to be charged 10 per cent yearly, but 12 per cent of the rent is deducted for repairs and other expenses. The house-tax is
(a) Rs 264
(b) Rs 300
(c) Rs 316.80
(d) Rs 360
39. The radius of a sphere, whose surface area is equal to the area of a circle whose radius is 1 m, is
(a) 25 cm
(b) 50 cm
(c) 75 cm
(d) 100 cm
40. Rajat and Rajesh are 12.5 km apart. If they travel in opposite directions, they meet each other after 30 min. If they travel in the same direction, they meet after $2\frac{1}{2}$ hours. If Rajesh travels faster than Rajat, his speed is
(a) 5 kmph
(b) 10 kmph
(c) 12.5 kmph
(d) 15 kmph

FOR NDA & CDS EXAMS

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. Who announced on December 31, 1929, that the goal of the freedom movement would be *Purna Swaraj* (full and total independence)?
 - (a) Mahatma Gandhi
 - (b) Jawaharlal Nehru
 - (c) Sardar Vallabhbhai Patel
 - (d) Maulana Abul Kalam Azad
2. British rule in India is said to have started with the
 - (a) Battle of Plassey in 1757
 - (b) Treaty of Seringapatam in 1792
 - (c) Second Sikh War of 1848-49
 - (d) Sepoy revolt of 1857
3. The first province to be conquered by the British was
 - (a) Madras
 - (b) Bombay
 - (c) Sind
 - (d) Bengal
4. The East India Company in India was interested only in
 - (a) Acquiring political power in India
 - (b) A monopoly of the trade with India and the East
 - (c) Dividing the country
 - (d) Creating communal disharmony
5. To achieve its economic objectives the British rule in India initially
 - (a) Gave protection to selected Indian industries
 - (b) Encouraged exports to India
 - (c) Encouraged exports from India
 - (d) Adopted a free trade policy
6. Which country claimed to be the saviour of Asia during the second half of the 19th century?
 - (a) China
 - (b) Japan
 - (c) India
 - (d) Indonesia
7. The standing army towards the beginning of the 20th century absorbed——per cent of Indian revenues.
 - (a) 5
 - (b) 15
 - (c) 35
 - (d) 52
8. The effect of the Zamindari system, introduced by the Britishers, was that
 - (a) Tillers of land became better off
 - (b) Agriculture developed
 - (c) Rents went down
 - (d) Rents went up
9. The impact of British rule led to the evolution of a new structure of agrarian relations that was
 - (a) Extremely regressive
 - (b) Progressive
 - (c) Not regressive
 - (d) None of the above
10. Industrial development in India until the beginning of the 20th century was mainly confined to
 - (a) Cotton, jute and woollen textiles and paper indus-

- 77
- (b) Cotton and jute textiles, coal mines and tea plantations
 - (c) Cotton and jute textiles, coal mines and sugar industry
 - (d) Cotton and jute textiles, paper industry and coal mines
11. During the first half of the 20th century, Indian agriculture was in a state of
 - (a) Stagnation
 - (b) Decline
 - (c) Progress
 - (d) None of the above
 12. The National Planning Committee of 1935 was headed by
 - (a) Mahatma Gandhi
 - (b) Rajendra Prasad
 - (c) Jawaharlal Nehru
 - (d) Gobind Ballabh Pant
 13. The Five Year Plan in India when approved by Parliament
 - (a) Becomes a law
 - (b) Authorises states to formulate laws keeping the Plan in view
 - (c) Provides goals and targets for the future development in India
 - (d) Has to be compulsorily implemented by the Centre and states
 14. The choices in respect of most of the economic activities in India are made
 - (a) By the central government
 - (b) By the state governments
 - (c) By the Planning Commission
 - (d) In the market
 15. The sum and substance of India's Five Year Plans is
 - (a) Defence-oriented
 - (b) Consumer-oriented
 - (c) Development-oriented
 - (d) Administration-oriented
 16. The main objective of the

- Five Year Plan was
- (a) Rapid industrialisation
 - (b) Development of agriculture
 - (c) Social Welfare
 - (d) To initiate a process of development

17. When Nehru spoke about a "tryst with destiny", he was referring to the
 - (a) Events of 1857
 - (b) Emergence of the Indian Bhakti Movement
 - (c) Events of 1929-30
 - (d) Entire freedom movement
18. Helmut Kohl, the West German Chancellor, is a
 - (a) Conservative
 - (b) Liberal
 - (c) Radical
 - (d) Whig
19. *Annie*, a musical play, had 2,377 performances on Broadway, New York. The gross earnings to producers were——million.
 - (a) \$ 100
 - (b) \$ 200
 - (c) \$ 300
 - (d) \$ 400

- Japan is
 (a) Kakuei Tanaka
 (b) Yasuhiro Nakasone
 (c) Zenko Suzuki
 (d) Takeo Fukuda
21. Pentagon is the
 (a) Office of the American President
 (b) Office of the Defence Secretary
 (c) Headquarters of the American military
 (d) Residence of the American Vice-President
22. The Prime Minister of South Africa is
 (a) Chris Heunis
 (b) Pieter Botha
 (c) David Curry
 (d) Andries Treurnicht
23. The President of Israel is
 (a) Ezer Weizman
 (b) Ariel Sharon
 (c) Ehud Olmert
 (d) Yitzhak Navon
24. Surinam is surrounded by
 (a) Venezuela, Brazil and French Guiana
 (b) Guyana, Brazil and French Guiana
 (c) Colombia, Venezuela and Brazil
 (d) Brazil, Peru and Colombia
25. The currency of Israel is
 (a) Won
 (b) Shekel
 (c) Pataca
 (d) Ringgit
26. Oil production in India is believed to have increased by 31 per cent in 1982 compared to 1981. The estimated production in 1982 was about—million tonnes.
 (a) 16
 (b) 18
 (c) 20
 (d) 22
27. The second Indian expedition to Antarctica was led by

- Director of the
 (a) Geological Survey of India
 (b) Space Research Department
 (c) Bhaba Atomic Research Centre
 (d) Central Forest Research Institute
28. Recession is associated with fall in
 (a) Demand
 (b) The value of money
 (c) Unemployment
 (d) Taxes
29. The number of principal tributaries of Narmada is
 (a) 21
 (b) 31
 (c) 41
 (d) 51
30. ——— is a direct tax.
 (a) Sales-tax
 (b) Excise duty
 (c) Customs duty
 (d) Income-tax
31. Devaluation means
 (a) Appreciation in the value of money
 (b) Increase in the value of money in terms of foreign currency
 (c) Fall in the value of money
 (d) Fall in the value of money in terms of foreign currency
32. The Olympics are allotted to a
 (a) City
 (b) District
 (c) State
 (d) Country
33. One rouble (USSR) is equivalent to Rs——approximately.
 (a) 10.5
 (b) 11.5
 (c) 12.5
 (d) 13.5
34. The currency of Thailand is
 (a) Shilling
 (b) Baht

- (c) Dollar
- (d) Rupee

35. The Sanjivni Society for Mental Health received the 1982 Sanskriti Award for

- (a) Outstanding economic achievement
- (b) Political achievement
- (c) Social achievement
- (d) Artistic achievement

36. Who said at the death of Mahatma Gandhi that though the light had gone out, it was yet a light that would never be extinguished and would illumine the world for a thousand years?

- (a) Sardar Vallabhbhai Patel
- (b) Jawaharlal Nehru
- (c) Maulana Azad
- (d) Rajendra Prasad

37. Lalgudi Jayaraman, the noted violinist, has received the

- (a) R D. Birla Memorial Award
- (b) Chowdajiah Memorial Award
- (c) Soviet Land Nehru Award

(d) Sangeet-Natak Academy Award

38. V. Ramalingaswami, who is the Chairman of WHO's Global Advisory Committee on Medical Research, is a

- (a) Radiologist
- (b) Surgeon
- (c) Paediatrician
- (d) Pathologist

39. The ratio of levy and free-sale sugar is -- per cent.

- (a) 50 : 50
- (b) 55 : 45
- (c) 60 : 40
- (d) 65 : 35

40. The GNP in India during 1981-82 went up by -- per cent.

- (a) 3.0
- (b) 3.5
- (c) 4.0
- (d) 4.5

41. -- plans to launch a 110-tonne manned space station in 1985

- (a) The US
- (b) The Soviet Union
- (c) Great Britain
- (d) France

42. Total wheat imports from the US in 1983 would be approximately -- million tonnes

- (a) 3
- (b) 3.5
- (c) 4
- (d) 4.5

43. India's first multi access rural radio telephone system was commissioned in

- (a) Maharashtra
- (b) Gujarat
- (c) Punjab
- (d) Uttar Pradesh

44. The gross investment rate during the 1950s and 1970s has increased by -- times

- (a) 1½
- (b) 2
- (c) 2½
- (d) 3

FOR IIT—JEE. . .

This section has been specially prepared for those appearing in the Joint Entrance Exam for the IITs, which is to be held in May. It will also be of help to those appearing in the CDS and NDA exams to be held in the same month and the Geologists' exam in March.

COMPREHENSION—A

1 Read the following passage carefully and answer the questions that follow by choosing the best alternative:

The benefits conferred on the world in general by science have been manifold and varied. It has helped man to live a more comfortable life, and has extended the boundaries of human knowledge, bringing light to many dark places. No educated man would deny this, but many would point out that it has brought evils as well as blessings. Marie Curie's discovery of radium led to a much-improved treatment for cancer, but the eventual discovery of the full properties of radium and uranium has brought great destruction in its train.

The use of anaesthetics in surgery is one of those discoveries that seem to be wholly good in their effect. Before they were discovered, the suffering which a man had often to endure in an operation was indescribable. There were times when it was utterly unendurable, and surgeons would refuse to operate for fear of causing excessive pain. Nowadays even delicate surgery on the heart or brain can be carried out whilst the patient is blissfully unconscious. What has still to be solved, however, is the problem of the nausea which is experienced while coming

round from some anaesthetics.

1. The first sentence implies that
 - (a) science has benefited most parts of the world
 - (b) science has in most cases benefited the world
 - (c) most parts of science have benefited the world
 - (d) most benefits of science have been varied
2. [It] has extended the boundaries of human knowledge... means
 - (a) it has made more geographic discoveries possible
 - (b) more people are now benefiting from science
 - (c) that science has made human knowledge more profound
 - (d) that science has helped man know more and newer things
3. ...bringing light to many dark places' suggests that
 - (a) many new areas have been electrified
 - (b) many new lighting facilities have been made available
 - (c) many areas of ignorance have been removed
 - (d) many more people have been made knowledgeable
4. The phrase 'in its train' in the last sentence of the first para-

graph means

- (a) as a consequence
- (b) in large quantities
- (c) in quick succession
- (d) as followers

5. The main theme of the first paragraph can be summed up thus:

- (a) science and its benefits
- (b) science, a mixed blessing
- (c) science and human comforts
- (d) science and the discovery of uranium

6. The second paragraph is about

- (a) a particular benefit from science
- (b) the modern surgeon's best aid
- (c) anaesthetics' role in modern surgery
- (d) surgery, old and new

COMPREHENSION—B

II Read the following passage carefully and answer the questions that follow in one sentence each. Base your answers on the information given in the passage:

Over the entire period of recorded history human beings have systematically increased the per capita production of food, of various kinds of materials, of housing and of energy. We have always had the potential for producing a lot more materials of all kinds than is actually needed. This potential could become a reality if the means of production in some of the advanced countries were used wherever necessary, and if the social and economic systems of distribution of products, especially food, were operated with an eye to satisfying the real needs of people and not in the interests of the profit-seeking owners of resources and means of production.

The natural resources necessary for production, both real and poten-

tial, have always been available in sufficient quantities in most countries and on our planet as a whole. The land surface of the globe still has enough room for accommodating a population far larger than its present size.

People's needs can be rather clearly defined with regard to food, but it is far more difficult to say what their requirements are as to living space, clothes, household goods, etc. Therefore, one cannot say to what extent such requirements of the earth's population could be satisfied in the future. On the other hand, the potential for satisfying these and other of humanity's basic requirements has always grown and will continue to grow at a more rapid rate than that of population growth.

1. How has the per capita production of many things increased during recorded history?
2. Which potential have we always had?
3. Name two conditions necessary for making the above potential a reality.
4. What is the ground for optimism regarding the population problem?
5. Which prediction is not possible?
6. Which fact is contradicted or modified in the last sentence of the passage?

SPOT THE ODD ONE OUT

III In the following passage there are three sentences which are not relevant to its main theme. Pick them out and rewrite them:

Happiness depends more than anything else upon what may be called a friendly interest in persons and things. A friendly interest in persons is a form of affection but not the form which is

grasping and possessive and seeking always an emphatic response. Happiness is what everyone is after. The latter form is very frequently a source of unhappiness. The kind that makes for happiness is the kind that likes to observe people and find pleasure in their individual traits, that wishes to afford scope for the interests and pleasures of those with whom it is brought into contact without desiring to acquire power over them or to secure their enthusiastic admiration. Many persons simply cannot give happiness to others, particularly to those who are strangers to them. The person whose attitude towards others is genuinely of this kind will be a source of happiness and a recipient of reciprocal kindness. His relations with others, whether slight or serious, will satisfy both his interests and his affections; he will not be soured by ingratitude, since he will seldom suffer it and will not notice it when he does. They are so obsessed with their personal narrow interests that they have hardly any time to occupy themselves with issues of wider import.

USAGE

IV Write in the space provided the correct form of every verb given in the brackets.

Now that we (be)...a free people, it (be)...up to us to make good use of the blessings of nature. This (be) ...possible only if all of us (have) the will and determination to work hard for the good of the country. Fortunately, nature (give) us rich resources of land, water, forests, minerals and so many other things. And as for manpower, we (have)... the second biggest population of any country in the world. (be)...we making the necessary effort? Yes, we (begin)...to

make it—through our Five Year Plans. And we (achieve)...a great deal, already. We (build)... new townships, (start)... many irrigation projects and (bring)... thousands of acres of barren land under cultivation. Thanks to the factories which we (build)... , we (produce)... now more cloth for our people, (make)... more cement for the construction of houses, (manufacture)... engines to draw our railway trains, (build)...ships, and (produce)... so many other things which we (have)... to get from abroad before. Through these and other projects, we (provide) ...employment to more and more people.

SENTENCE FORMATION

V Given below are five groups of words and phrases. Arrange those in each group so as to produce a correct sentence.

1. the development — satellites—
has stimulated—of new techniques—the use of—remote control—by—for probing—the atmosphere.
2. for making—those responsible for teaching—to a variety of means—their pupils learn—
young people—have resorted—in different periods of history.
3. to ban—in all spheres—the nuclear powers—at present—for concluding—nuclear weapons tests—have every possibility—a treaty.
4. to a minimum—and private enterprise—in states—private property—a communistic system—are reduced—which have
5. that were—our young men—their frustration—took to—some of—in the depths of—completely futile—violent courses.

WATCHING PAIRS

VI Match items in columns A and B:

- | A | B |
|-----------------|------------------------------------|
| 1. excitedly | careful examination. |
| 2. tally | with feelings roused or stirred |
| 3. snatch | having or showing excitement |
| 4. nervously | agree or correspond exactly |
| 5. a close look | put out the hand suddenly and take |

PRECIS

VII Make a precis of the following passage:

Yet how frequently it has been said that if women do not occupy themselves with domestic work their minds will be empty and they will be unhappy. But the exact opposite is proving to be the case. We find women busily buying every conceivable gadget to avoid having to do monotonous repetitive work.

(Answers are given at the end of the supplement)

And as a result they have more time to devote to their children, their husbands, and their homes, more time to making themselves look pretty and attractive, and more time to raise the general cultural level of their lives. Surely we must grant women themselves the right to know best where to look for happiness, and, in spite of the traditional argument that leisure breeds unhappiness, you do not find these American women rushing to factories and offices looking for work, just because they have bought a dish-washer.

ESSAY

VIII Write an essay on any one of the following topics (300 to 400 words):

1. Youth movement in India.
2. To what extent has our scientific and technological progress made our outlook on life truly rational.
3. Where there is a will, there is a way.

PRONUNCIATION KEY

BY THE AARBES

Good and correct pronunciation is one of the greatest recommendations, more so in relation to a foreign language. Any foolproof system of indicating correct pronunciation through the written symbols is a near impossibility. However, readers can be helped to acquire good pronunciation with varying degrees of approximation to correctness. For this it is essential to understand a scheme using certain familiar symbols and marks *in relation* to known sounds and their combinations in words. We are giving it in the form of a pull-out which you may like to preserve

for reference until you have mastered the scheme. This pronunciation key should be consulted for our regular features, *Test Your Word Power* and *Foreign Words*. What you have to do is to look up each symbol, as it occurs in the pronunciation indicated against a word or phrase, in the scheme and learn to pronounce it as it would be pronounced in the familiar example given. Thus 'th' will be pronounced as in three and 'dh' as in this. Similarly 'ar' will be pronounced as in far. The symbols represent the sounds associated with the underlined parts in the examples.

Scheme Of Pronunciation

Consonant sounds

b as in ball
 ch as in chair
 d as in dog
 dh as in this
 f as in field
 g as in go
 h as in horse
 j as in jail
 k as in kill
 l as in lady
 m as in man
 n as in name
 ng as in sing (g is silent)
 ngg as in finger
 p as in press
 r as in rad
 s as in sea
 sh as ship
 t as in tree
 th as in three
 v as in very
 w as in way
 y as in yes
 z as in zoo
 zh as in pleasure

Vowel sounds

ā as in late
 ă as in rat
 ʌ as in about
 ah as in father
 āf as in fair
 āf as in far
 aw as in saw or caught
 ē as in meet
 ē as in men
 i as in sit
 ēf as in fear
 ēf as in bird
 T as in light
 Tr as in fire
 ō as in goat
 ō as in got
 oi as in boil
 ōō as in root
 ōō as in book
 oor as in poor
 ōr as in port
 ow as in cow
 ovr as in sour
 ū as in few
 ū as in mug

Note on stress mark ('): That part of the word which immediately precedes the stress mark (') is to be pronounced with greater force or emphasis on its vowel sound.

EDITOR'S NOTE

All possible care is taken to check the information given in this supplement. But we do not take responsibility for chance errors or omissions. Authoritative corrections will be gratefully received.

TEST OF REASONING

1. (c), i.e., Rs 5. Savings on the policy would equal the payments made on quarterly basis minus payments made on half-yearly basis for 10 years, i.e., $\text{Rs } 10.15 \times 4 \times 10 - \text{Rs } 20.05 \times 2 \times 10 = \text{Rs } 5$.
2. (b), i.e., Rs 156.70. Since Ram takes a Rs 2,000 policy at the age of 28, his annual premium would be $\text{Rs } 39.85 \times 2 = \text{Rs } 79.70$. Further, since Sham takes a similar policy two years later (which means at the age of 30), his annual premium would be $\text{Rs } 40.30 \times 2 = 80.60$. Total premium paid by Ram upto and including the date he is 32 years would be $\text{Rs } 79.70 \times 5 = \text{Rs } 398.50$, whereas Sham would have paid $\text{Rs } 80.60 \times 3 = \text{Rs } 241.80$. Ram, therefore, must have paid $\text{Rs } 398.50 - \text{Rs } 241.80 = \text{Rs } 156.70$ more than Sham.
3. (a), i.e., approximately 2 paise on the rupee. At the age of 29, the annual premium is Rs 40.05, while the amount paid at that age on quarterly basis in a year works out to $\text{Rs } 10.20 \times 4 = \text{Rs } 40.80$. In other words, a person who pays on quarterly basis pays 75 paise more on Rs 40.05. The annual charge on the rupee would, therefore, equal $\frac{75}{40.05} \times 100 = 1.87$ paise, which is approximately 2 paise.
4. (c), i.e., Rs $(4x - 0.75)$. Annual premium at the age of 28 is four times the quarterly instalment minus 75 paise.
5. (b), i.e., approximately 7 per cent. The total medals won by India in Asiad '78 and Asiad '82 are 28 and 57 respectively. Since the total medals involved in the two Asiads work out to $619 + 614$, i.e., 1,233, India's percentage will equal $\frac{85}{1233} \times 100$, which is approximately 7 per cent.
6. (c), i.e., 4. Four countries—China, South Korea, North Korea and India—improved their tally of gold medals.
7. (c), i.e., approximately 42 per cent. North Korea won a total of 32 gold medals in Asiad '78 and '82, whereas the total medals won by 'OTHERS' in Asiad '82 were 77. When expressed in percentage, it works out to $\frac{32}{77} \times 100$, i.e., approximately 42 per cent.
8. (c), i.e., India. India won 57 medals in Asiad '82 compared with the 28 in Asiad '78. Percentage-wise, this happens to be greater than those secured by all the other countries.
9. (c), i.e., 520 per cent. According to the stated assumption, India's tally of medals at the next Asiad in 1986 would be—gold (26); silver (38); and bronze (50). Since this has to be at the cost of 'OTHERS', the tally of 'OTHERS' would be—gold (5); silver (3); and bronze (12). India's tally of gold medals at Asiad '86 would, therefore, be $\frac{26}{5} \times 100$, i.e., 520 per cent of the gold medals tally of 'OTHERS'.
10. (d), i.e., approximately 122 per cent. According to the stipulation laid down in this question, there would be no change in the medals tally of China at Asiad '86. According to the assumption given in question 9, India's tally of bronze medals would be 50. India's bronze medals tally at Asiad '86 would, therefore, be $\frac{50 \times 100}{41}$, i.e., approximately 122 per cent of the bronze medals tally of China.

Note: To solve questions 5 to 10 speedily, total up the medals tally of each country for Asiad '78 and Asiad '82. Also, keep in mind the difference between other countries and 'OTHERS'.

11. (c), i.e., 10 per cent. Since $12\frac{1}{2}$ per cent is $\frac{1}{4}$, assume that the total number of eligible voters is 800. Therefore, 100 of them would be between 21 and 25. Of these 80 per cent, i.e., 80 people actually voted. Therefore, people between 21 and 25 who actually voted were $\frac{80}{800} \times 100$, i.e., 10 per cent of the total number of people eligible to vote.
12. (c), i.e., Rs $(5x + 5y)$. The cost of running a two-wheeler for a km would be $(x+y)$ paise. For 500 km, it would be 500 $(x+y)$ paise. Since we have to express our answer in rupees, it will be $\frac{500(x+y)}{100} = (5x+5y)$ rupees. One is likely to mark (a) as the correct answer!
13. (b), i.e., 72 min. To average 60 km an hour, the motorcyclist should take $\frac{192}{60}$, i.e., 3 hours and 12 mins to cover the distance between Delhi and Ambala. If he has already taken 2 hours to cover 92 km, he must cover the final 100 km in 1 hour 12 mins, i.e., 72 mins.

Hint: For solving questions 14 to 20 speedily, you must work out the balance of trade for each year.

14. (c), i.e., 1980-81. India's balance of trade in 1980-81 was (minus) Rs 58,140 million (mn), i.e., its imports exceeded its exports by Rs 58,140 mn. This figure is higher than the figure of all the other years, when the balance of trade was unfavourable.
15. (c), i.e., approximately 40 per cent. In 1979-80, India's imports exceeded its exports by Rs 25,630 mn. When expressed in percentage, it works out to $\frac{25,630}{64,588} \times 100 =$ approximately 40 per cent.
16. (b), i.e., approximately 134 per cent. $\frac{\text{Exports in 1977-78}}{\text{Exports in 1975-76}} \times 100 = \frac{\text{Rs } 54,043 \text{ mn}}{\text{Rs } 40,422 \text{ mn}} \times 100$, which is approximately 134 per cent.
17. (c), i.e., nearly 77 per cent. India had a favourable balance of trade in 1976-77, and its exports during that year were Rs 51,423 mn; its exports during the year it had the most unfavourable balance of trade, i.e., in 1980-81, was Rs 67,100 mn. Therefore, her exports in 1976-77 were $\frac{\text{Rs } 51,423 \text{ mn}}{\text{Rs } 67,100 \text{ mn}} \times 100$, i.e., nearly 77 per cent of her exports in 1980-81.
18. (a), i.e., approximately 9 per cent. India's exports during 1978-79 were Rs 57,263 mn, while her imports in 1975-76 were Rs 52,652 mn. In other words, exports in 1978-79 exceeded the imports in 1975-76 by Rs 4,611 mn. When expressed in percentage, it will equal $\frac{4,611}{52,652} \times 100$, i.e., approximately 9 per cent.
19. (c), i.e., 1984-85. In 1982-83, her imports and exports would be

ns (1,32,720-13,272) mn, i.e., Rs 1,19,448 mn and Rs (75,570+7,557) mn, i.e., Rs 83,127 mn respectively. In 1983-84, its imports and exports would be Rs 1,07,503.2 mn and Rs 91,439.7 mn respectively. In 1984-85, its imports would be Rs 96,752.88 mn and exports Rs 1,00,583.67 mn. In other words, its balance of trade would at first become favourable during 1984-85.

20. (a), i.e., Rs 314.579 crores more. Using the information in answer 19, we find India's balance of trade in 1984-85 would be Rs (1,00,583.67—96,752.88) mn = (+) Rs 3,830.79 mn. In 1976-77, India's balance of trade was (+) Rs 645 mn. In other words its balance of trade in 1984-85 would be Rs 3,145.79 mn more than that in 1976-77. When expressed in crores it would be Rs 314.579 crores more, since 10 mn equals 1 crore.
21. (b), i.e., 24 per cent. Assume the total number of candidates is 100. Since 70 per cent fail in both subjects, we are left with 30 candidates who pass in either Physics or both. Further, since 29 per cent, i.e., 29, pass in Chemistry and 25 per cent, i.e., 25, pass in Physics, there must be (29+25) —30=24 candidates who pass in both Physics and Chemistry. The diagram below illustrates the position.

22. (c), i.e., $\frac{9}{32}$. If the original fraction were $\frac{x}{y}$, then $\frac{160 \text{ per cent of } x}{40 \text{ per cent of } y}$ must equal $\frac{9}{8}$. This gives us $\frac{x}{y}$ equal to $\frac{9}{32}$.
23. (c) i.e., Rs 5,000. A reduction of 25 per cent will mean a saving of Rs 30,000 $\times \frac{1}{4}$, i.e., Rs 7,500. Since this amount will help the dealer to buy two more sets, the new cost of each set must be Rs 3,750. Since this is 75 per cent of the original price, the original price of the set must have been Rs $\frac{100}{75} \times 3,750 = \text{Rs } 5,000$.
24. 24 and 27. The series follows the pattern—4+3=7, 7+2=9; 9+5=14; 14+3=17; 17+2=19. The next two numbers should, therefore, be 19+5=24, and 24+3=27.
25. 32 and $\frac{1}{32}$. The numbers at odd places are obtained by dividing the preceding number at odd places by 4, while the numbers at even places by multiplying the preceding number at the even place by 2. Numbers at odd places—32, 8, 2, $\frac{1}{2}$ and so on. Numbers at

over places— $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{8}$, $\frac{1}{4}$ and so on.

26. (c), i.e., 12 cm. A rough diagram as shown above will help. Let $AB = 10 \text{ cm} = 10 \text{ m}$, and $BC = 15 \text{ cm} = 15 \text{ m}$. If the altitude on BC is AD , then the area of the patch must equal $\frac{1}{2} \times 15 \times AD = 60 \text{ sq m}$. AD , therefore, should equal 8 m. BD in that case would be $\sqrt{(10)^2 - (8)^2} = 6 \text{ m}$. If $BD = 6 \text{ m}$, DC will be 9 m. AC , the third side, therefore, must equal $\sqrt{9^2 + 8^2} \text{ m} = \sqrt{145} \text{ m}$, which is nearly 12 m. On the sketch, the third side would, therefore, be nearly 12 cm.
27. (c), i.e., the total agricultural production during 1981-82. Sugar-cane production in 1960-61 was approximately 11.26 million tonnes (mn. t.) and total agricultural production in 1981-82 was 164.4 mn. t. $\frac{11.26}{164.4} \times 100$ gives us approximately 7 per cent. Choice (a) is obviously wrong. Choice (d) is also incorrect since the sugar-cane production in 1960-61 was $\frac{11 \text{ per cent}}{80 \text{ per cent}} \times 100 = \frac{1,100}{80} =$ approximately 14 per cent of the foodgrain production during the same year. This leaves us with choices (b) and (c). Since 11.26 mn. t. cannot be 7 per cent of 16.44 mn. t., choice (c) has to be correct. There is no need to work out figures meticulously; approximations give the answer unless the choices give figures which are very close.
28. (d), i.e., $\frac{4}{5}$ approximately. In 1960-61, foodgrains constituted 80 per cent of the agricultural production that year, while it constituted 81 per cent of the agricultural production in 1981-82. Irrespective of the total production in each of the two years, the overall percentage taking both the years into account cannot be less than 80 per cent or more than 81 per cent. We can, therefore, straightaway eliminate choices (a), (b) and (c), since these represent 50 per cent, $33\frac{1}{3}$ per cent and 40 per cent respectively. There is no need to get involved in working out the actual quantity of foodgrain for both the years.
29. (d), i.e., approximately 498 per cent. Foodgrain production in 1960-61 was $\frac{102.4 \times 4}{5}$ mn. t., i.e., approximately 81.9 mn. t., while sugar-cane production during 1981-82 was 16.44 mn. t. When expressed in percentage, foodgrain production in 1960-61 would be $\frac{81.9}{16.44} \times 100 =$ approximately 498 per cent of sugarcane production during 1981-82.
30. (b), i.e., 70 per cent. Simply put, this question means: "What per cent is 7 per cent of 10 per cent?"

1981-82 was 5.18 mn. t. more than that in 1960-61. Therefore, sugarcane production in 1960-61 should have been $\frac{5.18}{11.26} \times 100$,

which is approximately 46 per cent more, to equal the sugarcane production of 1981-82.

32. (b), i.e., 3 p.m. At the beginning of the first hour, i.e., at 6 a.m., the monkey ascends 3 m. At 7 a.m., i.e., the second hour, he ascends from a point 1 m above the ground (since he slips back 2 m hourly) to a point 4 m above the ground. At 8 a.m., i.e., the third hour, he ascends from a point 2 m to a point 5 m above the ground. At 9 a.m., i.e., the fifth hour, he ascends to a point 7 m above the ground and so on. At 3 p.m., i.e., the beginning of the tenth hour, he ascends to a point 12 m from the ground, even though he slips back to a point 10 m from the ground during that hour.
33. (c), i.e., $\frac{1}{11}$. If the waiter's salary for January is a rupee, tips would be $\frac{1}{10}$. His income would be $1 + \frac{1}{10} = \frac{11}{10}$. Therefore, the fraction of the income that came from tips = $\frac{1}{10} \div \frac{11}{10} = \frac{1}{11}$.
34. (a), i.e., $\frac{1}{3}$. In the right triangle BFE, $\angle EBF$ must also be equal to 45 degrees. This means BE must equal EF. If $BE = EF = x$, we can say $x^2 + x^2 = (\sqrt{2})^2 = 2$ or $2x^2 = 2$ or $x^2 = 1$, which means $BE = EF = 1$. Since triangle CEB is also a right triangle, $BC^2 + (1)^2$ must equal $(\frac{2}{\sqrt{3}})^2$. $BC^2 = \frac{4}{3} - 1 = \frac{1}{3}$, which, therefore, is the same as

the area of the square ABCD.

Hint: A rough diagram will help solve questions 35 to 44 speedily. In the diagrams with the answers, thick lines indicate certainty; dotted ones uncertainty.

35. (c), i.e., no men are uncultured. The opening statement does not imply whether or not there are beings other than men in the domain of cultured beings. Therefore, we cannot say for certain that choice (a) is correct. Choice (b) is not correct because of the preceding argument as also because it does not lead us to the positive conclusion that all men are cultured.

Cultured Beings

36. (c) and (d), i.e., all non-P is non-S and that no S is non-P. The diagram given below illustrates the correctness of choices (c)

and (d). Choice (a) is obviously incorrect. We cannot, however, say for certain whether choice (b) is true; it may be and at the same time, it may not be. Remember P and non-P are mutually exclusive.

37. (a), i.e., some non-P is not non-S. The above diagram illustrates the correctness of the answer. Not non-S is equivalent to S. Also remember that P and non-P are mutually exclusive and that anyone outside the circle of P is non-P. Choices (b) and (d) remain undetermined. Choice (c) is obviously wrong

38. (c), i.e., some metals are not non-conductors. Not non-conductors is equivalent to conductors. Look at the above diagram. Choices (a), (b) and (d) cannot be determined with certainty.
39. (d), i.e., no S is P. The answer is self-explanatory if we keep in mind that some S is P is *false*. Choices (a) and (b) are obviously wrong. In the light of the fact that no S is P, choice (c) is also wrong.
40. (b), i.e., X is a conscientious officer. The argument takes the following form: (1) All conscientious officers are officers who do not like interference by their superiors. (2) X is a conscientious officer. (3) Therefore, X must not be liking interference by his superiors. If we mark (a) as the correct answer, then the conclusion cannot be stated in the form of 'must'
41. (b), i.e., some members of Parliament are not true democrats. Self-explanatory. Choice (a) is obviously wrong. Choice (c) cannot be determined. See following figure.

42. (a), i.e., Naresh is not a person who serves the people. "Those who are interested only in making money" means the same as "those who serve Mammon". Since you cannot serve both Mammon and the people, the two characteristics are mutually exclusive. Since Naresh falls in the category of those who serve Mammon, he cannot be the one who serves the people. The other choices are obviously wrong. See figure below.

43. (b), i.e., the air-conditioned train alone does not stop at Basin Bridge station. The argument takes the following form: (1) All trains other than the air-conditioned train stop at Basin Bridge station—this is the same as saying that the air-conditioned train alone does not stop at Basin Bridge station; (2) The last train did not stop at Basin Bridge station; (3) Therefore, the last train must have been air-conditioned. Choices (a) and (c) are obviously wrong. Choice (d) does not preclude the possibility of other trains, such as express or mail trains, not stopping at Basin Bridge station, and is, therefore, wrong.
44. (c), i.e., X has improved, and he, therefore, must have struggled. If 'A, then C' means that all cases of A are cases of C; it, however, does not mean that all cases of 'Not A' are cases of 'Not C'. Nor does it mean that all cases of C are cases of A. It, however, does mean that all cases of 'Not C' are cases of 'Not A'. Equate 'a person does not struggle' with A and 'he does not improve' with C and you shall know why choice (c) is correct and choices (a) and (b) are wrong.
45. (d), i.e., 85. 38.1 per cent of the labour force equals 32.5 lakhs. Therefore, the labour force must equal $\frac{32.5 \times 100}{38.1} = \frac{32,500}{381}$, which is about 85 lakhs.
46. (3), i.e., a a a a. The letter series becomes a a a b, a a a b, a a a b. No other choice gives a proper sequence.

47. (1), i.e., a b a b. The letter series becomes a a a, b b b, a a a, b b b.
48. (4), i.e., b a b b. The series takes the form—b a b b, b a b b, b a b b.
49. (2), i.e., a b b b. The series pattern is—a b b, a b b, a b b, a b b.
50. (4), i.e., a b a b. The series pattern is—a a a, b b b, a a a, b b b.

ARITHMETIC

- (c). Recall the rules of Roman numeration. The bar increases the value 1,000 times.
- (c). The smallest five-digit number is 10,000. On dividing it by 319, the remainder is 111. So the required number is $10,000 + (319 - 111)$, i.e., 10,208.
- (b). L.C.M. of 12, 15, 18 and 24 is $2 \times 2 \times 3 \times 5 \times 3 \times 2$, i.e., 360. The required number is $360 - 3$, i.e., 357.
- (c). $6 \text{ kg } 7 \text{ hg } 4 \text{ dag } 3 \text{ g} = 6,743 \text{ g}$ and $9 \text{ kg } 0 \text{ hg } 9 \text{ dag } 7 \text{ g} = 9,097 \text{ g}$. Their H.C.F. is 11g.
- (b). The required time = L.C.M. of $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{2}$ sec

$$\frac{\text{L.C.M. of } 4, 3, 3}{\text{G.C.M. of } 5, 4, 5} = \frac{12}{1} \text{ sec} = 12 \text{ sec}.$$
- (b). Factors of 3,468 are $(2 \times 2) \times 3 \times (17 \times 17)$. So the given number should be divided by 3 to get a perfect square.
- (c). Expressing the given fractions as decimals, we get $\frac{3}{8} = .375$, $\frac{2}{5} = .4$, $\frac{1}{3} = .333$ and $\frac{1}{4} = .25$. Thus, $\frac{1}{4}$ is the smallest fraction.
- (d). By long division method, $\sqrt{0.2}$ is 0.4472, i.e., 0.45.
- (c). Let the fourth number be $2x$. The third number is x , the second is $3x$ and the first is $6x$. Then, $\frac{6x + 3x + x + 2x}{4} = 30$, or $3x = 30$, i.e., $x = 10$.
- (b). Total weight of 10 men = $10 \times 62.3 \text{ kg}$, i.e., 623 kg. Total weight of the remaining 5 men = $623 \text{ kg} - 2 \times 62.5 \text{ kg} - 3 \times 61 \text{ kg} = 315 \text{ kg}$. Their average weight = $315 \text{ kg} \div 5 = 63 \text{ kg}$.
- (c). 55 per cent of the total number of students = 550. So the total number of students = $\frac{550 \times 100}{55}$, i.e., 1,000.
- (b). Let Vasu's income be Rs 100. Then Rajan earns Rs 150% . If Rajan earns Rs 100, Vasu will earn Rs $\frac{100 \times 100}{150} = \text{Rs } 66\frac{2}{3}$. So Vasu earns 50 per cent more than Rajan.
- (c). Let the C.P. be Rs 100. S.P. in the first case is Rs 115 and in the second case is Rs 120. The difference in the two selling prices is Rs 5, but the actual difference is Rs 4. So the C.P. = Rs $\frac{100 \times 4}{5}$, i.e., Rs 80.
- (c). Let the C.P. be Rs 100. Then S.P. is Rs 110. Therefore, M.P. = Rs $\frac{100 \times 110}{88}$, i.e., Rs 125. Hence, M.P. should be 25 per cent above the C.P.
- (c). M.P. = Rs 560. Then S.P. = Rs $10\% \times 560$, i.e., Rs 504. Gain = 26 per cent. So C.P. = Rs $\frac{100 \times 504}{126}$, i.e., Rs 400.

... the manufacturer is Rs 100. Then C.I. for the wholesale dealer is Rs 120; for the retailer it is Rs $\left(\frac{115 \times 120}{100}\right)$, i.e.,

Rs 138, and for the customer it is Rs $\left(\frac{130 \times 138}{100}\right)$, i.e., Rs 179.40. But the customer paid Rs 897 only. So the manufacturing cost of the hot plate = Rs $\left(\frac{100 \times 897}{179.40}\right)$, i.e., Rs 500.

17. (b). Here $P = \text{Rs } 100$, $I = \text{Rs } 100$, $R = ?$ and $T = 20$ years. Then $R = \frac{100 \times I}{P \times T} = \frac{100 \times 100}{100 \times 20} = 5$ per cent.

18. (b). Let the sum invested for 2 years be Rs x .

$$\text{Then, } x + \frac{x \times 4 \times 2}{100} = 1,900 - x + \frac{(1,900 - x) \times 4 \times 5}{100} \text{ or } x + \frac{2x}{25} = 1,900 - x + \frac{1,900 - x}{5}, \text{ which gives } x = 1,000.$$

19. (b). Let the sum borrowed at 4 per cent be Rs x .

$$\text{Then } \frac{x \times 4 \times 5}{100} + \frac{(2,000 - x) \times 6 \times 5}{100} = 520 \text{ or } \frac{x}{5} + \frac{3(2,000 - x)}{10} = 520, \text{ which gives } x = 800.$$

20. (b). Here $P = \text{Rs } 4,000$, $R = 12$ per cent $\div 4 = 3$ per cent, $n = 3$.

$$\text{C.I.} = \text{Rs } 4,000 \left(1 + \frac{3}{100}\right)^3 - \text{Rs } 4,000 = \text{Rs } 4,370.91 - \text{Rs } 4,000$$

Therefore, C.I. = Rs 370.91.

21. (b). Using compound interest formula, $7,290 = 6,250 \left(1 + \frac{8}{100}\right)^n$
or $\left(\frac{27}{25}\right)^n = \left(\frac{7,290}{6,250}\right)$ or $\left(\frac{27}{25}\right)^n = \left(\frac{27}{25}\right)^2$. Therefore, $n = 2$.

22. (a). S.I. on the given sum for 1 year is Rs 30 and for 2 years is Rs 60. Interest for 1 year on the interest of the sum for 1 year = Rs $(63 - 60)$ or interest for 1 year on Rs 30 = Rs 3. So Rs 30 is the interest for 1 year on Rs 300.

23. (b). Work done by 6 women equals the work done by 9 girls. So the work done by 8 women will equal the work done by 12 girls. Then

| girls | work | days |
|-------|------|------|
| 9 | 1 | 10 |
| 15 | 1 | x |

Therefore, $15 : 9 :: 10 : x$, which gives $15x = 9 \times 10$ or $x = 6$ days.

24. (c). Dina Nath's investment for 1 month = Rs $(12 \times 4,500)$, i.e., Rs 54,000. Ashok Kumar's investment for 1 month = $\frac{8}{9} \times \text{Rs } 54,000 = \text{Rs } 48,000$. Since he joined with Rs 6,000, he joined after 4 months.

25. (c). In the given mixture, alcohol = 19 litres and water = 1 litre. If x litres of water is added, then $\frac{(20+x) \times 10}{100} = 1 + x$ or $20 + x = 10 + 10x$. Therefore, $x = 1\frac{1}{9}$ litres.

26. (a). Ratio of the quantities of milk and water in the mixture = 3:1. Therefore, water to be added = $\frac{1}{3} \times 20$ litres, i.e., 5 litres.
27. (b). The first tap can fill $\frac{1}{2}$ of the cistern in 1 hour and the second tap can fill $\frac{1}{3}$ of the cistern in 1 hour. The part of the cistern to be filled in 1 hour by both the taps = $\frac{1}{2} + \frac{1}{3}$, i.e., $\frac{5}{6}$. So the cistern will be filled completely in $\frac{6}{5}$ hours, i.e., 1.2 hours.
28. (b). Distance covered by the first car in 6 hours = 6×30 km, i.e., 180 km. Difference of speeds between the two cars = $(50 - 30)$, i.e., 20 kmph. Time taken by the second car to overtake the first car = $(180 \div 20)$ hours, i.e., 9 hours.
29. (b). Relative speed = $(40 - 30)$ kmph, i.e., 10 kmph. Distance covered in 27 sec = 75 m, which is the length of the faster train.
30. (d). John's speed downstream = 5 kmph and upstream = 1 kmph. Time taken to cover 2 km downstream = $\frac{2}{5}$ hour, i.e., 24 min. Time taken to cover 2 km upstream = $\frac{2}{1}$ hours, i.e., 2 hours. So the total time taken = 2 hours 24 min.
31. (b). Income from an investment of Rs 110 is Rs 10. Therefore, percentage of gain = $\text{Rs } \frac{10}{110} \times 100$, i.e., $9\frac{1}{11}$ per cent.
32. (d). To get Rs 5, the investment should be Rs 102. To get Rs 400, the investment should be $\text{Rs } \frac{102 \times 400}{5}$, i.e., Rs 8,160.
33. (b). Here $S = \text{Rs } 950$, $R = 8$ per cent, $T = \frac{1}{4}$ year. Then B.D. = $\text{Rs } \frac{950 \times 8 \times 1}{100 \times 4} = \text{Rs } 19$. Hence, the answer is Rs 18 less than the face value.
34. (c). Let the total capital be Rs x . Then $\frac{x \times 4 \times 1}{3 \times 100} + \frac{x \times 3 \times 1}{4 \times 100} + \frac{5x \times 5 \times 1}{12 \times 100} = 50$ or $\frac{4x}{300} + \frac{3x}{400} + \frac{25x}{1,200} = 50$ or $50x = 50 \times 1,200$. Therefore, $x = 1,200$.
35. (a). The son gets $\frac{3}{8}$ th of the property and the daughter gets $\frac{3}{8} \times \frac{2}{5}$, i.e., $\frac{3}{20}$ th of the property. Then his wife will get $1 - (\frac{3}{8} + \frac{3}{20})$, i.e., $\frac{4}{5}$ th of the property.
36. (d). Increase in the area of the circle = $\pi(r+2)^2 - \pi r^2 = 4\pi(r+1)$.
37. (d). A's age is $(15+4)$ years, i.e., 19 years. His brother's age is $(19+6)$ years, i.e., 25 years. Then A's mother's age is 2×25 years, i.e., 50 years.
38. (a). The yearly rent = $\text{Rs } (12 \times 250) = \text{Rs } 3,000$. Deduction = 12 per cent of Rs 3,000 = Rs 360. House-tax = 10 per cent of Rs 2,640 = Rs 264.
39. (b). Surface area of the sphere = $4\pi r^2$ and the area of the circle = $\pi \cdot 1^2$. Then $4\pi r^2 = \pi$ or $r^2 = \frac{1}{4}$. Therefore, $r = \frac{1}{2}$ m = 50 cm.
40. (d). Let Rajat's speed be x kmph and that of Rajesh be y kmph. When they travel in opposite directions, $\frac{12.5}{x+y} + \frac{1}{2}$ or $x+y=25$. When they travel in the same direction, $\frac{12.5}{y-x} = \frac{5}{2}$ or $y-x=5$. From these equations we get $y=15$ kmph.

ENGLISH

- I 1. (b) 2. (d) 3. (c) 4. (a) 5. (b) 6. (c)

II 1. It has increased systematically. 2. We have always had the potential for producing a lot more materials of all kinds than is actually needed. 3. First, the means of production in advanced countries should be used to satisfy the real needs of people. Secondly, the social and economic system of distribution should also be operated for the same purpose. 4. The available land in the world can still accommodate a far larger population. 5. To say to what extent people's requirements of space, clothes, household goods, etc can be satisfied in the future. 6. The fact that creates doubts about the future's capacity to meet human requirements.

III 1. Happiness is what everyone is after. 2. Many persons simply cannot give happiness to others, particularly to those who are strangers to them. 3. They are so obsessed with their personal narrow interests that they have hardly any time to occupy themselves with issues of wider import.

IV. are, is; will be; have; has given; have; are; began; have achieved; have built; (have) started; (have) brought; have built; are producing; (are) making; (are) manufacturing; (are) building; (are) producing; had; are providing.

V 1 The use of satellites has stimulated the development of new techniques for probing the atmosphere by remote control. 2. Those responsible for teaching young people have resorted, in different periods of history, to a variety of means for making their pupils learn. 3. At present, the nuclear powers have every possibility for concluding a treaty to ban nuclear weapons tests in all spheres. 4. In states which have a communistic system, private property and private enterprise are reduced to a minimum. 5. Some of our young men in the depths of their frustration took to violent courses that were completely futile.

VI 1. excitedly—with feelings roused or stirred; 2 tally—agree or correspond exactly; 3. snatch—put out the hand suddenly and take; 4. nervously—having or showing excitement; 5. a close look—careful examination.

VII Contrary to the traditional belief that leisure breeds unhappiness,

one finds modern American women putting faith in all kinds of gadgets to get relief from domestic drudgery, thus finding more time for personal, familial and cultural betterment, rather than escaping monotony through factory or office work.

VIII

Youth movement in India

Youth movement in India is essentially confined to educated, urban young men and women in the country. In modern Indian history it can be traced to the post-1919 period when the fight for independence had started gathering momentum under the leadership of Mahatma Gandhi. It was then part of the culture of the national movement to include the youth, particularly the students, among those who were called upon to wage a battle against the British, though in the form of peaceful civil disobedience. Student involvement in political activities thus became a respectable phenomenon having been blessed by the Father of the Nation himself.

In the recent past a parallel thing happened when Jayaprakash Narayan, then called Loknayak by many, first gave a call to the students in Gujarat and later in Bihar and elsewhere in the country to actively take part in toppling the Congress governments both in the states and at the Centre.

It appears that the entire youth activity in India has been inspired by the misconceived notion that what was true under uniquely special circumstances is equally valid in normal times. It is for this reason that most student activity on Indian campuses derives its sustenance, both moral and material, from various political parties. It has all the trappings of a political fight between rival adversaries contending for power and position.

One unfortunate result is the exclusive preoccupation of the youth with issues of a purely local and sectarian, even non-academic, kind. Perhaps, the Assam agitation can be cited as an exception, since the issues involved in it are of a far-reaching character.

The reasons behind much youth unrest in the country today lie in the feeling of insecurity and despair caused by unemployment, unequal opportunities and a lack of direction and purpose. In this sense, the youth movement only reflects the overall state of the nation

INDIAN ECONOMY

(Continued from page 34)

which necessitated large-scale foreign aid during the 1950s and 1960s, now it is the trade-gap which is forcing us into the 'debt-trap'.

One of the important reasons for the continuing and tremendous deficit in our balance of trade, estimated at more than Rs 5,500 crores in 1980-81, is the worsening terms of trade with developed countries. This is due to the sharp increase in prices of import goods, while prices of export goods have remained more or less stagnant. For instance, while the quantity index of imports increased merely by 3.8 per cent, during 1977-78 and 1979-80, the value index rose sharply by 44.6 per cent. The value index of exports, on the other hand, remained stagnant during the same period. This simply means that we have to pay much more for our imports, while we get less real value exports. The price of oil, accounting for almost half of our total import bill, has more than quadrupled since 1973. In fact, it was the first oil hike in 1973 which started the international debt carnival.

India should, therefore, try, alongwith other underdeveloped countries, to obtain better terms of trade, so that the need for aid itself is reduced considerably. We also need to cut down imports of non-essentials, while trying to be self-sufficient, as far as possible, in oil and other essential goods currently being imported in large quantities at very high costs.

Tied aid

More than two-thirds of the aid received by India from various sources is in the form of tied aid. This means that the borrowing country is forced to purchase goods or equipment only from the lending country, and use aid only for specific projects, giving no freedom to the borrowing country to use it in the manner it considers best. It has been observed that the prices charged by lending countries are always 10 to 20 per cent and in some cases even 30 to 40 per cent higher as compared to international prices. This reduces the real benefit of foreign aid, besides preventing full utilisation of the sanctioned aid.

Debt-servicing burden

Since 90 per cent of the total aid received by India has been in the form of loans, foreign aid has given rise to the problem of debt-servicing that has assumed serious dimensions in recent years. Debt-servicing refers to repayment of the principal and interest payment. As most of the loans taken during the Second and Third Plans have become due for repayment, debt-servicing burden is mounting year after year. For instance, it has increased from Rs 238 crores during the First Plan to as much as Rs 3,776 crores in the Fifth Plan.

The gravity of the problem can be better appreciated from the fact that 20 to 25 per cent of our annual export earnings are being absorbed by debt-servicing, aggravating the already adverse balance-of-payments situation. Almost 65 per cent of external assistance received in 1979-80 was used for debt servicing. This means only one-third of the aid being received now is available for financing further development. Or, to put it simply, we are currently borrowing more for servicing of past loans, which means passing on the burden to future generations.

To the current debt-servicing burden of Rs 850 crores per year is to be added the servicing of the recent IMF loan, which may amount to a staggering figure of about Rs 9,000 crores over the period 1985-86 to 1993-94. According to present estimates, the debt-servicing burden may increase to Rs 2,500 crores per year by the end of the decade.

IMF loan and its implications

The government contracted a loan agreement with the IMF in November 1981, for a total amount of 5 billion SDRs (equivalent to about Rs 5,000 crores) to be made available over a period of three years (1981-84). In all, 18 per cent of the total loan was to be received in the first year, 36 per cent in the second and the remaining 46 per cent in the third year—the average rate of interest on the total loan being 9 to 10 per cent.

The deteriorating balance-of-payments position has been the principal reason for compelling the government to go in for this huge

loan, which had generated a lot of controversy in the recent past. The objections to the IMF loan have been made on two grounds. Firstly, it is said that had the government been more prudent in classifying imports into essential and non-essential categories, the balance-of-payments deficit would have been kept within manageable limits, obviating the need to go in for a loan of this magnitude. There is some justification in this argument, because a rapid increase in the balance-of-trade deficit has been caused mainly by a policy of indiscriminate import liberalisation pursued by the government since 1975.

Moreover, the government has failed to find an early solution to the Assam crisis, which has affected the domestic production of petroleum, causing an increase in the import bill of oil. It increased from Rs 3,267 crores in 1979-80 to Rs 5,586 crores in 1980-81.

The second reason for tough opposition to the IMF loan in the country is a host of conditions attached by the Fund, which are said to be against the national interest. Some have even gone to the extent of saying that India has surrendered her economic sovereignty by accepting the various conditions of the loan. Even as sober an economist as Prof V.K.R.V. Rao protests against these conditions when he says:

The "IMF believes in private enterprise, private foreign investment, freedom for the operation of multinationals and general relaxation on imports. It is in these respects that national objectives differ from that of [the] IMF."

Thus, with the IMF loan, the gates have been thrown open for multinationals to enter the country in a big way, even in non-essential areas. The policy of further liberalisation of imports may aggravate the already massive trade deficit if exports fail to increase substantially. The IMF conditions are, therefore, pushing the economy on to a very slippery road. The policy of import-led growth with multinationals spearheading the growth process, as prescribed by the IMF, will increase our dependence on foreign private capital and thus self-reliance as a goal will recede further.

INFLATION

A persistent and appreciable rise in the wholesale price index (WPI) can be termed as inflation. In the past, the price situation has strained the Indian economy to a great extent, though it remained satisfactory in 1981-82.

Trend

The rising trend in prices started in June 1955 and continued for nearly two decades. The WPI for all commodities rose by roughly 78 per cent (1952-53=100) during the 10-year period of the Second and Third Five Year Plans. Between 1970-71 to 1979-80 (1970-71=100) the price index on a point-to-point basis increased by 132 per cent. The highest rise was witnessed in 1973-74 when the price index increased by 30.2 per cent over the preceding year.

There was a significant improvement in the price situation during 1981-82 when the price index showed a rise of just 2.1 per cent as against 16.7 per cent in 1980-81. During the calendar year 1982, it is estimated to have gone up by 2.6 per cent.

Inflation has been quite a serious problem in the industrialised nations also. Between 1970-79, prices rose by 854 per cent in Brazil, 124 per cent in Japan and 227 per cent in the UK.

Causes

The price level in an economy will rise whenever the aggregate demand exceeds the aggregate supply. Any increase in the money supply (i.e., purchasing power of the people) beyond the permitted level of increase in the quantity of goods and services will push the price index upwards. Similarly, any shortfall in the production of essential commodities, like food articles because of drought, will also have the same effect. Edible oil and oilseeds have played a major role in escalating inflationary pressures in the past few years.

In a developing country like India there are bottlenecks at various stages of production. There are transport bottlenecks that hamper the movement of coal wagons to thermal power stations, thereby seriously affecting the generation of power. Shortage of items like steel, copper and other metals also affect production. In the past, food scarcity was the

main cause for the rise in the WPI. For instance in 1973-74 (when the WPI rose by 30.2 per cent), the food articles group contributed as much as 29 per cent of the total price increase.

Various international forces too affect prices at home. For example, frequent rise in petroleum prices has been one of the important reasons for the sharp rise in prices in the past. However, since petroleum products do not have a high weightage in the calculation of the price index, the maximum increase in the price index due to the rise in oil prices cannot be more than 4 per cent.

On the demand side, the major cause of inflation is over-expenditure by the governments—both central as well as state. When the government spends more money than it is earning, a budgetary deficit is created. This deficit (central government's annual average deficit alone was Rs 1,700 crores during the six-year period from 1976-77 to 1982-83) is covered by taking loans from the Reserve Bank of India. Such loans generate more supply of money in the hands of the government with which it creates more demand for goods and services in the market. Money supply, in turn, goes up.

If the growth of money supply is not matched by the growth of real output, prices start rising. For instance, between 1970-71 to 1974-75 (five years) the cumulative increase in real net national product (NNP) was only 6.3 per cent. On the other hand, money supply increased by 63.5 per cent during these five years. As a result, the WPI registered a sharp rise of 75 per cent. A similar trend was observed during 1979-80 and 1980-81.

On the supply side, the shortfall in the output of food and other essential commodities was further aggravated by the export of these commodities. In 1979-80, when inflationary pressure was intense, 5.7 lakh tonnes of sugar were exported. Exports of fish and fish products, meat and onions in periods of inflation further aggravated the situation. In the case of sugar, while on the one hand the government exported the commodity, on the other, it had to import about two lakh tonnes to keep the sugar prices stable.

Measures

Controlling inflation is an important aspect of the government's economic policy. The various measures taken to moderate the rate of inflation are focussed both on the demand and supply sides.

On the demand side, a number of steps are taken to effectively contain the expansion of money supply and bank credit. The Reserve Bank has been consistently pursuing a credit policy of restricting the growth of overall liquidity and containing monetary expansion. The cash reserve ratio (CRR) was raised from 6 per cent in April 1981 to 7.25 per cent in November 1981. However, in view of the continued sluggishness in deposit growth, it was reduced to 7 per cent in June 1982. The bank rate was raised from 9 to 10 per cent in July 1981 and the statutory liquidity ratio to 35 per cent in October 1981. The scheme of special bearer bonds was introduced to mop up undeclared money. Efforts are also being made to limit the budgetary deficit.

On the supply side, the effort is directed towards increased production of food articles, industrial raw materials and the generation of power. These efforts are supplemented by imports, particularly of edible oils, wheat and sugar in significant quantities. These measures are necessary to improve the resilience and viability of the public distribution system.

A major task in the years ahead is to sustain a non-inflationary environment for faster growth and development. The following measures can be suggested to bring stability in prices:

- Augmenting domestic production of foodgrains, edible oils and other essential raw materials.
- Government's budgetary deficit should be brought to zero level or at least within reasonable bounds.
- Essential items of mass consumption like onions, sugar, fish and meat should be exported only if exports do not raise the domestic price.
- The creation of sufficient stocks of foodgrains and sugar to meet their requirement through the public distribution system. These stocks should be built up through higher domestic procurement and partly through imports.
- The growth of money supply should be restricted to 8-10 per cent p.a. and should be shared by the government and commercial sectors.

ECONOMIC DICTIONARY

Aggregate demand: Total value of output that all sectors of the economy are willing to purchase at any given time or level of income.

Aggregate supply: Total value of output produced or available for purchase by the economy at any given time or level of income.

Assets: Resources or things of value owned by an economic entity, such as an individual, household or firm. *Examples:* cash, property, and the rights to property.

Balanced Budget: Budget with total revenues and total expenditures that are equal.

Balance of Payments: Statement of the money value of all transactions between a nation and the rest of the world during a given period. These transactions may consist of imports and exports of goods and services, and movements of short-term and long-term investments, gifts, currency and gold; they may be classified as current account, capital account, unilateral transfer account and gold account.

Balance of trade: That part of a nation's balance of payments dealing with merchandise imports and exports. A 'favourable' balance of trade exists when the value of exports exceeds the value of imports; an 'unfavourable' balance exists when the value of imports exceeds the value of exports.

Budget deficit: Budget in which total expenditures exceed total revenues.

Budget surplus: Budget in which total revenues exceed total expenditures.

Deflationary gap: Amount by which aggregate demand falls short of full-employment aggregate supply, thereby pulling down the real value of a nation's output.

Depression: Lower phase of a business cycle in which the economy is operating with substantial unemployment of its resources, and a sluggish rate of capital investment and consumption resulting from little business and consumer optimism.

Devaluation: Official act which makes a domestic currency cheaper in terms of gold or foreign currencies. It is typically designed to

increase a nation's exports while reducing its imports.

Direct tax: Tax that is not shifted—that is, its burden is borne by the persons or firms originally taxed. *Examples:* personal income taxes, social security taxes paid by employees and death taxes.

Disposable personal income: Income remaining after payment of personal taxes.

Floating exchange rates: Foreign exchange rates determined in a free market by supply and demand.

Foreign exchange: Instruments used for international payments. Such instruments consist not only of currency, but also of cheques, drafts and bills of exchange (which are orders to pay currency).

Gross national income: The equivalent of gross national product from the 'income' viewpoint. It consists of national income at factor cost (i.e., the sum of wages, rent, interest and profit) plus two non-income or business expense items: indirect business taxes and capital consumption allowance.

Gross national product: Total market value of all final goods and services produced by an economy during a year.

Inflation: Rise in the general price level (or average level of prices) of all goods and services—or equivalently, a decline in the purchasing power of a unit of money (such as the dollar). The general price level thus varies inversely with the purchasing power of a unit of money. For example, if prices double, purchasing power decreases by one-half; if prices halve, purchasing power doubles.

Inflationary gap: Amount by which aggregate demand exceeds aggregate supply at full employment, thereby causing inflationary pressures.

Mixed economy: Economic system in which the questions of what to produce, how much to produce and for whom to produce are decided partially by the free market and partially by a central government authority. There are varying forms and degrees of mixed economies.

National income (at factor cost): 1. Total of all net incomes earned by or ascribed to the factors of production—that is, the sum of wages, rent, interest and profit which accrues to the suppliers of labour, land, capital and enter-

preneurship. (Note: It should not be confused with the total income received by people from all sources, i.e., personal income. The difference between the two is based on various accounting considerations.) 2. In general terms and in theoretical discussions, the expression 'national income' is often used in a simple generic sense to represent the income or output of an economy.

Net national product: Total sales value of goods and services available for society's consumption and for adding to its stock of capital equipment. It represents society's net output for the year and may be obtained by deducting a capital consumption allowance from gross national product.

Personal income: In national-income accounting, the total income received by persons from all sources.

Planned economy: Economic system in which the government, according to a preconceived plan, plays a primary role in directing economic resources for the purpose of deciding what to produce, how much and possibly for whom. A planned economy may or may not be a command economy, depending on whether the government operates within a substantially authoritarian or democratic framework.

Recession: Downward phase of a business cycle in which the economy's income, output and employment are decreasing, and a falling off of business and consumer optimism is reflected by a declining rate of capital investment and consumption.

Recovery: Upward phase of a business cycle in which the economy's income, output and employment are rising, and a growing degree of business and consumer optimism is reflected by an expanding rate of capital investment and consumption.

Underemployment (disguised unemployment): State of affairs in which employed resources are not being used in their most efficient ways.

Unemployment: Situation which exists whenever resources are out of work or are not being used efficiently. There are various types of unemployment such as technological, frictional, structural, disguised, involuntary and cyclical.

From CONTEMPORARY ECONOMICS
by Milton H. Spencer

UNEMPLOYMENT

One of the most cherished goals of economic planning in India has been the achievement of full employment. And yet after over 30 years of economic planning this is, perhaps, the single gravest problem the country is faced with. The nature of unemployment in India is quite different from that in the developed countries of the West. Nearly 60 per cent of the labour force (mostly in rural areas) is self-employed and they are well outside the Western concept of 'open unemployment'. The nature of unemployment in rural areas differs from that in urban areas.

Rural unemployment

The existence of large, disguised and seasonal unemployment is an important aspect of rural unemployment. Conceptually, disguised unemployment refers to a condition where the withdrawal of a few members from the family farm will have no impact on the total output using the same technique. This surplus labour, technically called disguised unemployed persons, in fact, makes no contribution towards the output. The cultivators hardly have any work between sowing and harvesting. This leads to seasonal unemployment. Besides open unemployment, where able and willing workers do not have jobs, also exists in rural areas.

Urban unemployment

Urban unemployment is characterised more by the existence of 'educated unemployed'. Many with general and technical education do not find jobs in secondary and tertiary services. The problem is acute among the educated middle class in towns and cities.

Magnitude of the problem

The Planning Commission has stopped estimating the backlog of unemployment since 1970-71. Raj Krishna and Amartya Sen two noted economists estimated 9.25 million unemployed and 12.20 million severely under employed for the year 1971. The Bhagwati Committee on Unemployment estimated the total number of jobless at 18.7 million in 1971. Of this, 16.1 million (86 per cent) were in rural areas and 2.6 (14 per cent) in urban areas.

The Sixth Five Year Plan (1980-85) document indicates the num-

ber of unemployed persons in the 15-59 age-group at 11.31 million in March 1980. If 31.27 million new entrants who are likely to join the working force during the Sixth Plan period are added, a total figure of 42.58 million emerges as the 'required' employment.

Employment programmes

A number of programmes have been launched to generate employment opportunities in rural areas for different segments of the society—unskilled workers, semi-educated and educated persons. The important programmes started recently are

National Rural Employment Programme (NREP):

The erstwhile 'food for work' programme has now been replaced by the National Rural Employment Programme (NREP). The 'food for work' programme was started in April 1977 to generate additional employment through utilisation of available stocks of foodgrains. During the three-year period (1977-80), additional employment to the tune of 9.338 lakh mandays was generated under this programme.

The NREP which is included in the Sixth Plan, has three basic objectives: generation of additional employment, creation

of durable community assets and improvement in the living standards of the rural folk. In addition to foodgrains, cash funds are now being provided to the states. Afforestation and social forestry has been given priority under the programme.

Integrated Rural Development Programme (IRDP):

The IRDP was started in 1978 and aims at reducing unemployment in the rural areas besides providing assets and inputs to the rural poor. The benefits under the programme would flow exclusively to rural people living below the poverty line, i.e., those with an annual income below Rs 3,500. Employment opportunities are to be generated through investment in agriculture, cottage and small-scale industries and in viable economic activity which suits the beneficiary family and is acceptable to the banking institution. The programme aims at providing employment to 600 poor families in each development block every year.

The labour absorption capacity of the farm sector is limited. In order to provide maximum employment opportunities in secondary and tertiary sectors, the Industries, Services and Business Component (ISB) was built into the IRDP in February 1979. About 200 poor families are to be covered under ISB in each of the 5,011 development blocks every year—this is roughly about 10 lakh families.

Training of Rural Youth for Self-employment (TRYSEM):

This scheme was launched in August 1978 with the basic objective of removing unemployment among rural youth. The scheme equips the rural youth with requisite skills and technology so that they can take to vocations that lead to self-employment. Trainees can be paid a stipend. TRYSEM is an integral part of the IRDP and the entire expenditure on the scheme is shared on a fifty-fifty basis by the Centre and the states.

Employment Guarantee Scheme (EGS):

This scheme was launched in May 1972 by the Maharashtra Government. It was given the statutory status in January 1979. The aim of EGS is to provide gainful and productive employment in approved works to all unskilled

... rural areas. The guaranteed of work is restricted to unskilled manual work and the participant has no choice in the type of work. Unskilled workers are given jobs in durable community projects like minor irrigation works, soil conservation, construction of roads etc. Since its inception up to February 1979, the scheme had resulted in the generation of 56.27 crore man-days of employment.

In urban areas, the annual rate of absorption of labour in the organised sector, i.e., factories, shops, establishment, was only 0.91 per cent between 1965-76. Between 1965-77, the public sector averaged a 3.65 per cent annual rise in employment compared to the private sector's 0.04 per cent. Yet, these four major employment programmes have not made an appreciable dent in today's burgeoning problem of unemployment. Some suggested steps to create mass employment opportunities:

(a) There should be rapid expansion of wage goods industries, which, in turn, should generate large surpluses that can be profitably employed in the creation of capital assets, particularly in rural areas.

(b) Rural capital formation works based on labour intensive techniques should be undertaken on a large scale. It is estimated that an investment of Rs 1 crore can provide employment to 5,000 persons in such works.

(c) Light industries producing consumer and capital goods should be developed in all parts of the country. Labour absorption in such industries is very large. It is estimated that a gross investment of Rs 1 crore in cotton textiles can provide employment to 1,458 persons. The figures for other light industries are: leather - 1,192, electrical appliances - 763 and radio and television - 857.

On the other hand, a gross investment of Rs 1 crore in heavy industries in the public sector provides employment to only 98 persons.

While it is important to effectively implement employment programmes and generate more opportunities, it is becoming increasingly obvious that unless we take speedy steps to control our population the problem will remain unsolved.

& KRISHNA KUMAR

ECONOMIC CAPSULE

Trade gap: Imports during the year 1980-81 totalled Rs 12,524 crores against exports of Rs 6,711 crores. In the subsequent year, imports increased to Rs 13,560 crores with the exports rising to Rs 7,781 crores. For the current financial year (1982-83), official data is available only for the period April to August and this shows that the trade gap was as much as Rs 3,069 crores, indicating that the yearly foreign trade gap might not be lower than Rs 5,900 crores during the year 1982-83. During the five-month period, exports have risen by 6 per cent to Rs 4,130 crores while imports have come down marginally by 0.7 per cent to Rs 3,522 crores.

What is more disturbing is that our foreign exchange reserves situation threatens to run into a crisis unless serious action is taken now to stop the rot. In 1978-79, when the policy of liberalised imports was initiated, the foreign exchange reserves were a comfortable Rs 5,603 crores, having risen by no less than Rs 935 crores during the year. These reserves increased to Rs 5,706 crores in the subsequent year, but began to decline in 1980-81 when they showed a fall of Rs 390 crores and came down to Rs 5,316 crores. In 1981-82, they showed a further sharp fall by Rs 1,519 crores to Rs 3,797 crores and the downhill trend has continued despite the government negotiating a loan of SDR 5 billion from the IMF under its extended facility and drawing a sum of Rs 948 crores up to June 30, 1982, under this arrangement. Between March end and the middle of November these reserves have come down further by Rs 169 crores which means that they are not even sufficient for three months of imports.

The tourism industry undoubtedly has the potential to make an effective contribution to the country's economic growth. The Finance Ministry's economic survey of 1981-82 and the *Reserve Bank Of India Bulletin* indicate that the nation's foreign exchange earnings from international tourism for the year 1979-80, were Rs 831.8 crores—only marginally less than that earned by the top spot handicrafts industry (Rs 832.5 crores). Only four years earlier (1975-76), tourism ranked a humble tenth in the nation's foreign exchange earners' league. In this short span, net earnings from the tourism industry—which multiplied as much as five times—have quietly overtaken those from traditional high-profile sectors such as tea, sugar, jute, leather, engineering

goods among others.

Oil production in India is believed to have reached 19.6 million tonnes in 1981-82, 31 per cent more than the 14.9 million tonnes produced in 1980-81. Refinery production was 32 million tonnes as against 29.5 million tonnes in 1981.

Record sugar production: With a record production of 84 lakh tonnes of sugar during the 1981-82 sugar season, India has earned the distinction of being the largest sugar-producing country in the world, surpassing Brazil and Cuba. At this level it has also crossed the target of 76 lakh tonnes set for the terminal year (1984-85) of the Sixth Five Year Plan. With an installed capacity of 64.8 lakh tonnes and production of 84 lakh tonnes, the capacity utilisation of sugar mills during 1981-82 worked out to be 130 per cent, again a record. In an economy characterised by shortages, sugar represents one of the few areas which face the crisis of surplus. With the expected production of about 80 lakh tonnes of sugar during the 1982-83 sugar season (October 1982-September 1983), the total availability (taking into account the opening stock of 33 lakh tonnes) is likely to be of the order of 113 lakh tonnes during the current year. Even with liberal releases of about 66 lakh tonnes of sugar for internal consumption and exports of about 5 to 6 lakh tonnes, the current sugar season is likely to close with a stock of more than 40 lakh tonnes.

Food stocks: On October 1, 1982, the foodstocks were about 11.50 million tonnes as against 18.50 million tonnes on the corresponding date in 1979. Similarly, despite the IMF loan, the foreign exchange reserves have eroded by about Rs 3,000 crores. Because of foreign exchange constraints the government is restrained in matters of food imports. This year the government has contracted to import 2.5 million tonnes of wheat. However, in order to maintain a safe level of stocks and to avert a breakdown in the public distribution system, by now 5 million tonnes of grain should have been imported.

Drought situation: Thirteen of the 22 states in India are facing a drought situation. With the monsoon having almost receded from the country, the current year's drought may turn out to be almost as severe as that of 1979, the worst drought year in recent history when cultivable land in 11 states was parched and foodgrain production in the country plummeted from the record high of 131.9 million tonnes in 1978-79 to 109 million tonnes in 1979-80.

Out of 416 districts in the country, almost 200 in Andhra Pradesh, Bihar, Gujarat, Karnataka, Maharashtra, Orissa, Rajasthan, Tamil Nadu, Uttar Pradesh and

Still, for a drop of water! With just one-third of the crop area irrigated, the poor farmer is still at the mercy of monsoons.

West Bengal are reeling under the impact of drought. Of these 200 districts, about 90 have been officially declared as drought-affected.

About 20 million hectares of cropped area have been ravaged and the value of crop loss in Andhra Pradesh, Maharashtra, Orissa and West Bengal is estimated at a staggering Rs 2,000 crores. Confronted with an acute shortage of water, food-grains and fodder, state after state has been approaching the Centre for financial assistance. According to the latest information, nine states have sought central allocations totalling Rs 1,650 crores for relief measures.

Power generation in 1981 was 110.8 billion kwh. It was expected to increase by 7.5 per cent in 1982. However, in most states, power availability fell short of requirement by about 8 to 9 per cent. The most severely hit states were Gujarat, Kerala, Himachal Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu and West Bengal, where the power cuts ranged between 20 and 100 per cent. The main cause for the crisis is that power generated is only 45 per cent of

its capacity. One of the reasons given for power shortage is paucity of funds. This, however, does not seem to be true. Between 1951 and 1979, the Five Year Plans invested a total of Rs 13,973 crores in power programmes. The Sixth Plan proposes an outlay of Rs 19,265 crores.

The problem has been created because the achievements of physical targets during the last two Plans have been slow. During the Fourth Plan, only 50 per cent of the targets were achieved and in the first three years of the Sixth Plan, the achievement was 64 per cent. The high rate of transmission and distribution losses have also added to the problem. The average rate of such losses is about 20 per cent.

Oilseed production reached a new peak of 12.1 million tonnes in 1981-82, surpassing the target of 11.2 million tonnes and the previous record of 10.6 million tonnes during 1975-76. The prospects for 1982-83, however, are not bright. It is expected that the production would be around 9.5 million tonnes which would be 22.5 per cent less than last year's level.

As a result of inadequate oilseed production, we are forced to spend between Rs 500 to Rs 700 crores on its imports. Also, our per capita edible oil consump-

tion is hardly 4 kg per year against the world figure of 11 kg and more than 25 kg in many developed countries.

Indian equity participation in joint ventures abroad has crossed Rs 120 crores, according to the Indian Investment Centre. At September-end last year there were 226 Indian joint ventures abroad of which 137 were in operation and the remaining at various stages of implementation.

Road accidents cost dear: Road accidents cause nearly 25,000 deaths per year or an average of 70 deaths every day. These accidents also result in loss of limb and damage to property. It has been found by a recent study carried out by the Central Road Research Institute that a loss of Rs 230 crores is incurred by the nation every year on account of loss of production, hospitalisation charges, expenses on courts and administration charges incurred by the police, insurance and the courts. This represents 0.3 per cent of the national income and is thus a serious loss. As against 4 million vehicles, there are 15 million bullock-carts and 45 million cycles occupying the same road space.

CAREER COUNSELLING

BY G.J. UNNITHAN

Director, Students' Advisory Bureau, University of Rajasthan

I have passed my All-India Higher Secondary exam (subjects Physics, Chemistry, Maths and English) with 67 per cent marks and am interested in further studies in Agriculture and Dairy Technology. Which Indian institutes conduct the above-mentioned courses? What is the scope for employment?

Mukul Goyal, Lucknow

India remains predominantly an agricultural country and for training in this sector with its various branches, there are many agricultural colleges and universities, some set up with foreign collaboration and of a very good standard. The Dairy Science College of the National Dairy Research Institute at Karnal is the best. Admission is open to Science/Mathematics students (10+2 level) on the basis of an entrance test held in June. The course is of four years duration.

Diploma courses of two years duration in Dairy Technology are available at the Dairy Science Institute Aarey Milk Colony, Bombay; Allahabad Agricultural Institute, Allahabad; Southern Regional Station, N D R I, Bangalore and

the State Institute of Animal Husbandry and Dairying Haringhata. Other colleges which offer B.Sc. in Dairy Technology: S.M.C. College of Dairy Science, Anand (Gujarat); and Rajasthan Agricultural College, Udaipur (Rajasthan). The scope for employment is bright for well-qualified dairy technologists.

Many undergraduate agricultural courses in colleges and universities are now restricted to residents of the states in which these institutions are located. For an agricultural degree in UP, apply to: Govind Ballabh Pant University of Agriculture & Technology, Pantnagar-263 145, Distt. Nainital; Chandra Shekhar Azad University of Agriculture & Technology, Kanpur-208 092; and Narendra Dev University of Agriculture & Technology, Faizabad-224 001.

I'm interested in joining the London School of Economics. Please give me full details regarding the admission procedure, the eligibility criteria and hostel facilities

Nita Nath Singh, Dhanbad

The London School of Economics is one of the most prestigious institutions of higher learning in the world in the fields of social sciences and related subjects. Although you have not indicated whether you are interested in undergraduate or postgraduate studies, we presume you are requiring details for admission to the graduate school. More than 50 per cent of its students today are foreigners and they mostly work towards the M.A., M.Sc., LL.M., M.Phil. and Ph.D. degrees of London University.

Applications should be made on the school's application form before February 1, which are available from the Graduate Admissions Office, London School of Economics and Political Science, Houghton Street, Aldwych, London WC2A 2AE. A second-class honours degree is the minimum entrance re-

quirement for postgraduate courses, as well as an adequate score on the Graduate Record Examination of the Educational Testing Service, Princeton, USA. (Details about the G.R.E. in India are available from: Institute of Psychological & Educational Measurement [IPEM] E.C. College Campus, Allahabad-211 003.)

There are no hostel facilities at the London School of Economics. Fees for overseas students in UK are extremely high and your annual expenditure could work out to almost Rs 1,00,000. Why not apply to the Delhi School of Economics, University of Delhi, Delhi-110 007 or other prestigious institutions in Bombay and Pune?

I've just completed first year B.Com. (Hons) from a prestigious college in Delhi. I also took my Chartered Accountancy entrance examination and hope to pass it. If I clear my C.A. entrance examination, should I leave my regular classes of B.Com., take up a correspondence course and join up as an articled clerk? Or should I complete B.Com. and then get my training from a company? Moreover, if I do my B.Com. by correspondence will there be any hindrance in my trying for M.B.A.? Please advise.

Rima Takkar, New Delhi

After passing your C.A. entrance examination, when you are appointed as an articled clerk, it will be better to complete your B.Com. by correspondence. The entrance rules for C.A. are about to be changed. Under these new rules, if you complete your B.Com. as a regular student at a later date, you will be required to reappear at the C.A. entrance examination. Under the proposed rules, graduation in any faculty is the minimum qualification for appearing in the C.A. entrance examination. Students passing their degree examination by correspondence will face no difficulty on that account in applying for M.B.A. courses. □

NOTE TO READERS

Before rushing in your career problem, check if it can be solved by looking up our sections on *Careers* or *Career Counselling* in the earlier issues. Space is limited, the mail received staggering. Letters chosen are those of general interest or in particular cases where the information is hard to find or has not been published before. Many students ask for a personal reply. Sorry, this is not possible. So please don't send postage or envelopes. Make your queries specific and brief. Send them to Career Counselling, Career & Competition Times, 10 Daryaganj, New Delhi 110 002. Your letters should be accompanied by the coupon.

January 3 Centre finalises strategy for Assam tripartite talks

70th session of Indian Science Congress Association inaugurated by PM Indira Gandhi at Tirupati.

January 5 Andhra Pradesh, Karnataka and Tripura go to polls; four killed in Andhra poll violence.

January 4 Assam tripartite talks open; compromise on aliens likely as AASU, government soften attitudes; government to delink poll from aliens' issue.

January 5 Andhra Pradesh, Karnataka and Tripura go to polls; four killed in Andhra poll violence.

Assam talks break down.

January 6 Assam, Meghalaya to go to polls in February. Assam agitation leaders oppose poll decision.

Congress (I) voted out in Andhra Pradesh, Karnataka; Telugu Desam wins absolute majority in Andhra Pradesh.

January 7 Six top AASU leaders detained under NSA

Home Minister P. C. Sethi invites Akalis for talks

January 8 Kranti Ranga merges with Janata Party in Karnataka

India and Bangladesh reach accord on sharing of Ganga waters for another two years.

January 9 First non-Congress government sworn in in Andhra Pradesh; 15-member ministry takes oath in public.

Akali Dal accepts Centre's invitation for resumption of talks.

January 10 Eight-member Janata-Kranti Ranga coalition Ministry takes oath in Karnataka.

US suggests new agenda for talks on troops withdrawal from Lebanon

January 11 Centre's talks with Akalis remain inconclusive; to be resumed soon.

12-member Tripura Left-Front Ministry sworn in.

January 12 Election process set in motion in Assam, notifications issued, agitators continue stir against poll.

January 13 Israel, Lebanon agree on agenda; US compromise formula accepted.

Justice Baharul Islam quits Supreme Court to join active politics.

Rohini-560 rocket successfully launched from Sriharikota.

January 14 UP Government orders probe into Meerut riots.

Janata Party not to contest Assam polls.

Japan to begin military exports to US a special exception to its ban on arms exports, says Japanese Chief Cabinet Secretary Motooari Gotoda.

January 15 Pakistan receives three F-16s.

Opposition asks PM to defer Assam poll.

Centre invites Akalis for further talks on January 18, Akalis accept invitation.

January 16 India to buy Soviet combat vehicles.

Pakistan President Zia-ul-Haq to attend non-aligned summit.

January 17 Centre rejects Opposition plea for putting off Assam poll

External Affairs Secretary Nitwar Singh arrives in Pakistan for talks on bilateral issues and those concerning non-aligned summit

Textile strike a year old, stir to continue, says Datta Samant

Ninth IFFI awards presented, no film found worthy of Golden Peacock.

January 18 Akali talks resume in Chandigarh; end in uncertainty.

Large-scale arson and kidnappings in Assam, 36-hour statewide anti-poll bandh begins.

January 19 India and Pakistan conclude talks; agree to set up three sub-commissions.

Chief ministers of Punjab, Haryana and Rajasthan invited to Delhi for talks on Akali demands.

January 20 PM decides to discuss Akali issue with Opposition

Sri Lanka emergency lapses.

Moscow warns Japan of retaliatory strike in event of weapons deployment against USSR.

January 21 Tripartite talks to be held on Akali tangle; decision taken at meeting with Opposition.

Five Assam officials held for refusing election duty.

US nuclear plan in Europe to stay on schedule, says US President Ronald Reagan.

January 22 Centre invites Akalis for talks on January 24; Dal President Longowal indicates acceptance.

Assam PCC (I) office damaged by bomb blast.

January 23 Akalis accept government invitation for talks; three-man Akali

panel departed

AASU announces another phase of agitation, threaten to disrupt PM's campaign

Sanjay Verma Manch Convener Akbar Ahmed and around 250 others held in clash with police in Lucknow

January 24 Supreme Court stays curbs on Assam newspapers

Tripartite talks on Akali tangle begin; first session ends on optimistic note.

January 25 President Zail Singh calls for preservation of unity and cohesion, in his Republic Day message

Tripartite leaders agree to reopen Ravi-Beas water sharing issue

January 26 Republic Day celebrated throughout the country, Nigerian President Shugu Shagan chief guest at the Republic Day parade in New Delhi.

January 27 Entire Union Council of Ministers resigns, major changes likely.

35 Akali MLAs in Punjab submit resignations, post dated for February 21.

January 28 Chief Justice of state High Courts to be appointed from outside the state, government announces policy decision

"Agitation will be taken to streets if demands not accepted by February 21," warns Longowal

Indian delegation arrives in Beijing for third round of talks

January 29 Cabinet reshuffled, nine ministers dropped

Sino-Indian talks begin in Beijing.

January 30 Mahatma Gandhi's 35th death anniversary observed.

Political and economic drafts for New Delhi Non-aligned Summit ready; to be handed over to nations for consideration.

January 31 Reagan presents US fiscal 1983-84 budget, massive funds asked for defence.

February 1 India and China agree on expanding trade and scientific exchanges.

US offers to sign pact with Russia to ban nuclear missiles

Talks with Akalis on February 8

Lebanon talks end in Khaldé with no sign of progress.

February 2 Third round of Sino-Indian talks conclude, major differences persist, talks to resume in Delhi later.

13 persons killed in mass murders in UP.

A.P.

CABINET RESHUFFLE WELL-TIMED MOVE

The lessons of the South haven't been learnt yet, apparently. When minister after minister submitted his resignation, and when, through dramatic press briefings, it was made clear that a central reshuffle was in the offing, many felt that Prime Minister Indira Gandhi had at last come to grips with the Congress (I)'s defeat in Andhra Pradesh and Karnataka and was firmly set to root out the rot that had set within the party. It was also seen as a prelude to a major overhauling of the leadership of maladministered Congress (I)-ruled states. The move was well-timed as it came just a little before the civic elections in Delhi and the Assembly elections in Meghalaya and Assam.

In the event, it was a routine reshuffle, hardly meriting the fanfare, and unlikely to make an appreciable impact. Basically, the old Cabinet remains intact, except for a few changes here and there. Among the new faces: Vijay Bhaskara Reddy, former Andhra Pradesh Chief Minister, as Minister without portfolio and Vishwanath Pratap Singh, former UP Chief Minister, as Minister for Commerce. Among the conspicuous casualties: Kedar Pandey, Union Minister for Irrigation who may become the next Chief Minister of Bihar, and Ministers of State Sitaram Kesari and Vikram Mahajan. For making a success of Asiad '82, Buta Singh was elevated to the Cabinet rank, taking charge of the Ministries of Parliamentary Affairs and Sports and additionally that of the Ministry of Works and Housing. More changes are expected in a few days.

After initiating limited reforms in the central apparatus, Mrs Gandhi turned her attention to the administrative front to fight corruption, inefficiency and callousness. She wrote to ministers giving clear-cut instructions on issues ranging from the upkeep of office building to the influence of industrial and business lobbies in the ministries.

Among her major directives

The new faces: V.P. Singh (left) and Ram Nivas Mirdha at the swearing-in ceremony.

- excepting defence personnel holding civilian posts and scientists, super-annuated employees must not be re-employed. This would check frustration and loss of initiative among the younger employees. Canvassing by industrialists for posting and extension in cases of officials "will make them [officials] liable to severe action". Officers on deputation with the central government should be sent back to their respective states by April 30, 1983. No foreign posting should be given to those who have less than two years' service left to their credit. Inter-cadre transfers of officers should be the exception and not the rule. Promotions should be based on performance.

- the need to tighten security arrangements for ensuring secrecy of information in the ministries, since some contact men have even managed to secure copies of government documents on important matters and projects.

- punctuality, regular attendance and due discharge of work by government employees must be ensured.

- employees should keep the work-place clean and be prompt and polite in attending to queries from the public.

An official spokesman said no shake-up of personnel was as yet envisaged, except in specific cases of corruption or wrong-doing. He added that the aim of the Prime Minister's directives was to tone up the working of the ministries and bring changes in proce-

dures and methods of operation if need be. The Union ministries have started action on the Prime Minister's instructions and will keep her "informed", as she desires.

ASSAM

BATTLE OF THE BALLOT

Happenings just before the Assam Assembly elections indicate that it promises to be more of a battle of the bullet than of the ballot. On January 6, the Election Commission announced elections for the 126-member Assembly and 12 Lok Sabha constituencies. Just a day before, another round of talks between Assam agitation leaders and the Centre ended inconclusively, and the former stuck to their position: without a solution to the 'foreigners' problem, no election should be held. More precisely, they wanted a revision of the electoral rolls within whatever cut-off date was mutually agreed upon. This meant the detection of foreigners, deletion of their names from the electoral rolls and their eventual deportation from Assam.

Without any such accord, the government decided to hold elections and announced the voters list the same day. The electoral rolls were of 1978. The Opposition and agitation leaders charged that it contained a large number of foreigners whom the Assam

movement had been vainly attempting to expel from the state for four years. The pre-poll violence that followed is one for the books.

Came first the agitation leaders' call for a boycott of the elections. Then, bombs exploded with disconcerting rapidity, blowing bridges and railway lines, damaging houses and cars of candidates. They were issued with death threats—some even escaped assassination attempts—as were others opposing the boycott call. In a vain bid to control the situation, 50 battalions of armed police were flown in. Central Assam's Mangaldoi sub-division was literally the centrepiece in the militant pre-poll response. Night-long violence, rampaging mobs, curfew and police firing were the set routine. Three persons were killed in a police firing there—the all-Assam figure was 10—as late as February 5.

That day it was yet another round of success for the agitation leaders. In response to their call for an 18 day "total non-cooperation", beginning February 5, work was paralysed in virtually all government offices all over Assam, except in Dhubri (Goalpara district) and in Cachar and North Cachar districts. Cachar and Goalpara districts have an over 70 per cent Bengali and Muslim electorate or "foreigners".

In such a tense build-up to the elections, the government hardly helped the Congress (I)'s case by arresting top agitation leaders under the National Security Act and invoking the Assam Special Powers Act to gag pro-agitation newspapers. Bringing in government officials from outside the state—mainly from Bihar, and after much trouble—to conduct the polls has further heightened tension, though the state government hadn't much choice after the near-total refusal of state officials to perform election duties.

There was no such justification for imposing the Assam Government Order restraining the *Assam Tribune* and *Dainik Asom* from publishing any story related to the pre-poll agitation. The Supreme Court thought as much when it stayed the Assam Government Order.

Newspaper censorship, uncertainty over who will conduct the polls, massive deployment of ar-

med police and the use of contentious electoral rolls have given way to charges that the polls will be rigged. This, plus the escalating violence, led to appeals in the Gauhati High Court and the Supreme Court to stay the polls. The appeal was struck down. Still, the dominant view in Assam is that the polls will not be held at all. For one, the present circumstances are not conducive for an election, as the Election Commission has itself admitted. For another, the agitation leaders have an elaborate scheme to disrupt the elections. They plan to create no-man zones around each polling booth, shift in advance those living within these zones, and confine those of them who do not move out on their own.

If a poll is held, it will be a very bizarre one. There are no issues on which opposing candidates can offer promises or solutions, save the foreign nationals problem, which, says former Chief Minister and Left Democratic Alliance (LDA) Chairman Sarat Sinha, "...is a far too complicated issue to expect any state government to solve in the near future". Sinha, one of the very few candidates who has refused police protection, says: "I refuse to go to the people seeking their vote with a bayonet-carrying policeman guarding me."

Against the 1978 Assembly election figure of 1,049, only 630 candidates have filed nominations for the oncoming polls. Fear, in part, and the decision of the four national parties—the BJP, the Janata Party and the two factions of the Lok Dal—to boycott the "fake elections" are responsible for this decrease in number. The non-communist Opposition's decision to stay away has bolstered the agitationists—and discomfited the Congress (I) because the BJP and the Janata Party have stepped up their boycott campaign. Massive attendance at rallies they have called indicate the extent of the people's opposition to the elections—and the Congress (I).

The Congress (I) has only itself to blame for this. Going by past performances, it never had much credibility in Assam. In the 1978 elections, it secured just eight of the 126 Assembly seats, way behind the Janata Party's 53 and the Congress (U)'s 26. Ever

since, Assam has reeled under President's rule alternating with do-nothing ministries under Anwar Taimur and Keshab Chandra Gogoi, formed by wooing MLAs from the Janata and other parties. The Congress (I) was, however, convinced it could form a ministry in the state following this election on the basis of a survey of Assam that it commissioned in November last.

This partly explains the suddenness of the election announcement. Previously, the idea was to extend President's rule in Assam by two years by a constitutional amendment. The Congress (I) had consulted the Opposition—non communist as well—to secure their cooperation. A majority of the opposition parties urged the Centre to proceed with the constitutional amendment by calling a special session of Parliament only if negotiations with the agitationists failed. In the event, negotiations failed, the special session was never called. President's rule was never extended and elections were, all too hastily announced.

The move is legally valid, as the Supreme Court has upheld, but to the Assamese it is still inherently wrong. In the final analysis, elections may be held and a ministry may be formed. But will it bear any relationship with popular feelings? Judging by current trends, the turn-out on election day may be abysmally low (See page 26.)

DELHI ELECTIONS CAPITAL VICTORY

After losing hands down in the Andhra Pradesh and Karnataka Assembly elections, the Congress (I) regained its prestige by obtaining an absolute majority in the elections to the Delhi Metropolitan Council and the Municipal Corporation. Of the 56 open seats in the Metropolitan Council, the Congress (I) bagged 34 seats, the BJP 19, the Lok Dal (C) two and the Janata one. In the 100-member Municipal Corporation, Congress (I) won 57 seats, BJP 38, Lok Dal (C) three, Janata one and one Independent.

MAHARASHTRA MOVING TOWARDS STABILITY

Vasantao Patil, popularly known as Vasantdada Patil, was chosen the new Chief Minister of

...in an atmosphere of high drama. The 'secret consensus' method showed that he enjoyed the maximum support of MLAs. The unanimous demand that the Prime Minister should nominate the leader was turned down by the All India Congress Committee (AICC) observers. A.R. Antulay, the former Chief Minister, tried a comeback, first by proxy and finally, directly. He and a few suspended MLAs created an ugly situation. While his supporters shouted rowdy and unprintable slogans in corridors, he warned that "many evils would follow in the near future" because the consensus was "pre-planned and stage-managed". He even demanded a repoll. It was a direct attack on the President of the Congress (I), Indira Gandhi, who advised him not to contest the election.

With Antulay side-tracked, the two contenders for the chief ministership were Patil and Ramrao Adik. Both belong to the Maratha lobby. Both are reported to have received almost equal number of votes. Patil enjoyed the patronage of Y.B. Chavan and is regarded as the man of the masses and has extensive contacts with people all over Maharashtra. His return brings back to power the particular Maratha lobby which was calculatedly relegated to the background by the leadership.

With such impeccable credentials, Patil is expected to bring a measure of stability to the state. This highly industrialised state is passing through a critical phase. Intra-party squabbles, increasing corruption, the falling morale of a bureaucracy because of senseless transfers, and severe drought in several districts have converted this once best-managed state into a poorly-managed one.

Recognising the need to check internal dissension if Maharashtra is to be brought back on an even keel, Adik has been made the Deputy Chief Minister. Including him, Patil has selected a 36-member ministry — 15 Cabinet ministers and 21 ministers.

AKALI ISSUE

KNOTTY PROBLEM

The negotiations between the Akalis and the Centre were resumed following the decision of the former to respond to the Centre's invitation. How-

ever, no understanding could be reached during the talks held in Chandigarh on January 11 and 12.

Prime Minister Indira Gandhi held a meeting with the leaders of opposition parties, during which it was agreed that they would also be invited to participate in the talks with the Akalis. Tripartite talks on the Akali demands were held in New Delhi on January 24 and 25 in a "cordial atmosphere".

The 37 MLAs and four MPs belonging to the Akali Dal submitted their post-dated resignations on January 27. These resignations will become effective from February 21. This was seen as a compromise between their commitment to resign on January 27 and the concession made to the Centre and the Opposition in view of the cordiality of the tripartite talks.

In response to a call from Akali Dal President Sant Harchand Singh Longowal, the Shiromani Gurdwara Prabandhak Committee (SGPC) President G.S. Tohra, and other SGPC officials also submitted their resignations to the SGPC executive.

Meanwhile, the chief ministers of Haryana and Rajasthan requested the Centre not to reach an agreement with the Akalis without consulting them, since some of the demands like reopening of the Ravi-Beas river-waters issue and the readjustment of territorial boundaries, will affect their states.

The next round of tripartite talks were held in New Delhi on February 8, 9 and 10 and ended in a stalemate. Another round of talks, beginning February 15, were adjourned till February 18.

APPOINTMENT OF CHIEF JUSTICES A CONTROVERSIAL ISSUE

Chief Justices of all high courts must be from outside the states. This decision was taken by the government after "consulting the Chief Justice of India". Whether he agreed to this is not known. The announcement laid down three guidelines for the implementation of the policy. First, the *inter se* seniority of puisne judges will be reckoned on the basis of their seniority in their own high courts and, subject to suitability, they would be considered for appointment as Chief Justices in other high courts.

Second, a Chief Justice who has

only one year or less to retire, may not be transferred to other high courts. Third, a puisne judge in a high court, who has one year or less to retire when his turn for being considered for elevation as Chief Justice comes, may, subject to suitability, be considered for appointment as Chief Justice in his own high court if vacancy is to occur during that period.

There was a mixed reaction to this decision. *The Statesman* in its editorial, commented: "In retrospect, judges themselves are to an extent to blame for what has been happening to them. There have been persistent complaints of relatives and friends receiving the most favoured treatment. Judges who allowed others to exploit their position cannot but suffer as a result."

The reaction of *The Hindustan Times*: "Because for some time new appointments to 86 vacancies in various high courts have not taken place, considerable doubts arose whether the government had a plan to pack the courts... As it is, insiders are horrified at the nature and extent of politicking judges of the Supreme Court and the high courts have to engage in; unabridged ambitions are propelling many judges to forget the etiquette of judicial conduct in a liberal polity."

Eminent jurists and advocates have reacted differently. V.M. Tarkunde feels that transfers might discourage good lawyers from opting for the bench. L.M. Singhvi, the President of the Supreme Court Bar Association, wished there were fuller discussions on this controversial matter and a clear consensus should have been arrived at.

ASSEMBLY ELECTIONS NEW MINISTRIES

After the Congress (I) debacle in the Assembly elections, a 15-member ministry headed by N.T. Rama Rao (NTR) was sworn into office in Andhra Pradesh on January 9, an 8-member ministry headed by Ramakrishna Hegde was sworn into office in Karnataka on January 10, and a 12-member ministry headed by Nripen Chakraborty was sworn into office in Tripura on January 11.

Both the southern states have got non-Congress ministries for the first time: in Andhra Pradesh it is the Telugu Desam; in Karnataka

It is the Janata-Karnataka Kranti Ranga combine. Both NTR and Hegde have made similar promises: to fight corruption and provide an honest and responsible administration. They have made it clear that while they want cordial relations with the Centre, they will press for more autonomy for the states. Indira Gandhi has welcomed their offer of cooperation.

The merger of the Kranti Ranga in Janata Party, and the support of the BJP, CPI, CPI(M) and several independents to his ministry, has not solved Hegde's problems. Kranti Ranga leader S. Bangarappa has turned down the offer of deputy chief ministership and is said to be keeping his fingers crossed over his next move.

The Left Front in Tripura has returned to office for the second consecutive term, though with a reduced majority. The Congress (I)-TUJS (Tripura Upajati Juba Samiti) alliance seems to have encouraged the extremists, who have indulged in several violent acts in the recent past.

INDO-NEPALESE RELATIONS MAJOR BREAKTHROUGH

A major breakthrough was achieved in Indo-Nepalese relations on February 3 and 4 when the two countries agreed upon the joint execution of three major multipurpose river-valley projects. The agreement will enable the two governments to harness the waters of the Karnali, the Rapti and the Pancheshwar rivers for irrigation and power generation. The two sides also gave an ad hoc extension to the five-year treaty expiring by February end. There is hope that the treaty will be renewed. The accords were arrived at during the two-day visit of the Nepalese Prime Minister, Surya Bahadur Thapa.

Nepal, strategically situated between India and China, is the only Hindu kingdom in the world. It has the aspiration of becoming a zone of peace—Asia's Switzerland. Experimenting with partyless democracy, Nepal considers India its greatest and strongest friend.

Thus, India has agreed to continue its economic aid to Nepal. It will provide Nepal Rs 3.5 crores in aid to set up industrial estates and other projects. A cement factory will also be set up with the help of the Cement Cor-

poration of India. Its capacity will be 1,200 tonnes per day and is likely to go into production by 1989. A ministerial-level joint economic commission will regulate, plan and monitor economic cooperation between the two countries.

SIKKIM

INDIANISATION BEGINS

An ordinance issued on the midnight of January 31-February 1 extended the Central Excise and Salt Act to Sikkim. This would mean that the 14 manufacturing companies in Sikkim—nine cigarette and five cosmetic companies—would require an excise licence for manufacturing and shipping goods. It is likely to be followed by the extension of the Industries (Development and Regulation) Act. The Governor is also likely to give his assent to the Sikkim Industries Licencing Bill, 1982. It would permit only those industries in Sikkim which have majority equity participation by the Sikkimese.

When Sikkim became a part of India in 1975, it was decided that India's tax and regulatory laws would not be extended immediately to it. The idea was that industries based on local resources would be promoted. Sikkim has good deposits of non-ferrous metals. Horticulture-based industries are also suited to Sikkim. The forest wealth of Sikkim can also support timber and plywood industries. Instead, cigarette, cosmetic and toiletry industries were set up to avoid excise duties ranging from 105 to 440 per cent. This caused a loss of about Rs 250 crores to the Indian Government. It is being set right now.

SINO-INDIAN TALKS NO HEADWAY

An Indian team led by K.S. Bajpai, Secretary in the External Affairs Ministry and former Indian Ambassador to China, visited Beijing from January 29 to February 2 to hold the third round of Sino-Indian talks. (The next round of talks will be held in Delhi.) Fu Hue, Adviser to the Chinese Ministry of Foreign Affairs, was the head of the Chinese team. The talks failed to narrow down major differences and thus ended without any substantial achievement. The Chinese official news

agency, Xinhua, however, said the two countries "got to the heart of the matter", and discussions on trade, economic cooperation and cultural exchanges were held in a friendly atmosphere.

Though the two countries have not resolved the boundary dispute, *The Times* (London) feels that detente may be possible. The reason: during the last four years the two countries have shown a real desire to mend their fences. China has revived its 23-year old status quo proposals that is, China will give up its claim in the eastern sector if India forgets what happened in the west.

Notwithstanding differences on the border question, there has been an improvement in Sino-Indian trade. It amounted to \$ 139 million in 1982 (1981 - 111.3 million). China having a favourable balance of trade of \$ 33 million. India imported steel products, pig iron, medicine and electrical ceramics while China imported sugar and tobacco.

ECONOMY

AN UPWARD TREND

A special report from the US Commerce Department, published in the February 7 issue of *Business America*, a leading magazine for American businessmen, ranks India, which has become virtually self-sufficient in many industries, among the world's top 10 industrial nations. Though agriculture is still the dominating sector in the economy, the share of industry in the GNP has gone up to 25 per cent. The share of manufactured products in exports, which was 45 per cent in 1960, has gone up to 60 per cent now. While many of India's 700 million people remain outside the market economy, more than 100 million are members of an expanding modern sector, the report said.

The report considers the performance of the Indian economy quite good. It expanded at an annual rate of 6.1 per cent during 1974-1979, well above the historical trend. The year 1979-80 was bad due to one of the worst droughts in recent history. The economy, however, again showed an upturn in 1980-81 by achieving a 7.5 per cent growth rate. The report is likely to encourage American businessmen to invest in India.

AJAY AHUJA & N.V.S

WARSAW PACT SUMMIT COURTING THE WEST

The new Soviet leader, Yuri Andropov, launched a new peace offensive in the new year. The venue was Prague, the occasion, the Warsaw Pact summit. The gathering issued a long declaration which contained a minimum of Marxist-Leninist jingoism. Its main suggestions: all nuclear powers should renounce the first use of nuclear weapons; the Soviet Union and the US should freeze their long-range nuclear arsenal at present levels; nuclear-free zones should be established in northern Europe and the Balkans; conventions should be drafted prohibiting all tests of nuclear weapons and outlawing the neutron bomb at the 40-nation Geneva disarmament conference; and that NATO and the Warsaw Pact should sign a treaty renouncing the use of force against each other.

Although the American news media denounced the Prague declaration for being "strong on peaceful posturing, weak on specific concessions", it rang some responsive bells in Western Europe, especially in West Germany, where a mid-term general election is due this month. A government-sponsored opinion study late last year showed that a majority of the West German population is against the NATO proposal to station 108 new Pershing II missiles on West German soil beginning December 1983.

Andropov's proposals may tilt the balance in favour of the Social Democrats whose leader, Hans-Jochen Vogel, visited Moscow recently to talk to Andropov about the peace plans. As matters stand, the pro-missile and increasingly anti-American Green Party holds the balance between the Christian and Social Democrats. Taking the popular feeling into consideration, the Social Democrats may be tempted to overlook their previous support for the deployment of the American missiles.

US Vice-President George Bush with West German Chancellor Helmut Kohl Selling the US viewpoint to Europe

and side with the Greens. If that happens, the Kohl Government would fall.

In Britain, too, the response, after a brief delay, was responsive. Foreign Secretary Francis Pym declared the Prague document was of "great significance" and the Western alliance "should look for the valuable elements and see what progress can be made". It is noteworthy that elections are also due in Britain, and the peace movement has been gaining ground there too. Only in France, where no general elections are in the offing, was the response sceptical. American Vice President George Bush, however, visited Europe (beginning January 30) to work out a joint Western response to Russia's new peace offensive.

At home, Andropov began a new campaign to "Strengthen Discipline"—the new slogan forged for Soviet workers by Propaganda Chief Boris Stukalin. The campaign was aimed at making workers work harder and removing labour indiscipline. Incompetent officials, too, were removed, the best known being the Minister of Railways, Ivan Pavlovsky. A new man,

Vitaly Fedorchuk, has been appointed to root out petty corruption. The image that Andropov wants to build for Russia is what the Russians call 'zhostky'—hard and tough.

ISRAELI-LEBANESE TALKS STEADY PROGRESS

On January 13, a breakthrough was made at Kiryat Shemona, a north-Israeli frontier town, when, after three weeks of bargaining, Lebanon and Israel succeeded in reaching an agreement on an agenda for peace talks. The agenda has five items: termination of the state of war between Israel and Lebanon; a framework for mutual relations, security arrangements in South Lebanon; the withdrawal from Lebanon of Israeli, Syrian and PLO forces; and "guarantees". Two American negotiators, Morris Draper and Philip Habib, were largely responsible for hastening the pace of negotiations. In fact, it was through the good offices of the former that Lebanese and Israeli delegations apparently provisionally agreed on January 17 on the first item of the agenda. The other items are obviously much more difficult to negotiate. The Israelis will try to extract the most generous political, diplomatic and security concessions from the Lebanese because they hold the best cards. The Lebanese will probably resist any measure which may seek to separate them from the Arab world. President Amin Gemayel has repeatedly emphasised that Lebanon wants to strengthen its links with the Arab world. At the same time, however, he will have to allay Israeli misgivings in order to get all the foreign troops out. The situation is extremely tricky and one wrong move may result in the undoing of what ever little has been achieved so far.

Meanwhile, the PLO's Executive Council met in Damascus in mid-January to work out the details of the Palestine National Council meeting which was to be held in Algiers on February 14. Yasser

Arafat, the PLO chief, would try to get the body, which serves as the Palestinians' Parliament-in-exile, to endorse his efforts to seek a peace agreement with Israel alongside Jordan's King Hussein. Arafat also visited Moscow in January and held talks with Andropov on peace plans. However, the chief opponents of his peace plans were radical factions within the PLO, who met in Tripoli to reject the Reagan plan, the Fez Summit plan as well as the Arafat-Hussein initiative. Later, however, the most important of the radical factions, George Habash's Popular Front for the Liberation of Palestine, declared that it had not signed this all-embracing rejection. It is believed that the Syrians, who are against the Arafat-Hussein alliance, are behind the rejection by the other factions.

WEST BANK AN ISRAELI INFLUX

At what price the Promised Land? Very cheap indeed, now that the Menachem Begin Government has embarked on a crash programme to colonise the contested West Bank area—the biblical Judea and Samaria—as quickly as possible. The Israeli Government is backing the settlements programme and providing low-cost land to developers and low-interest mortgages and loans to buyers. Villas, which would have been priced at \$ 2,50,000 in Israeli cities, cost only \$ 90,000 in the new settlements.

Israel had occupied West Bank during the Six-Day War in 1967. Over the next 15 years the pace of settlement was relatively slow. But in the past one month the building programme has accelerated and 6,000 new units will be completed by the middle of this year. About 35,000 Israelis are expected to move in, increasing the current Jewish population in the area to 60,000. There are about 1.6 million Arabs in the West Bank. If the current pace continues, the Israelis will match this figure by 2010.

This is exactly the opposite of what the rest of the world wants. The Begin plan runs directly counter to the Reagan administration's efforts at bringing peace in the region. The Reagan plan, presented last September, envisaged the linking of the West Bank and

the Gaza Strip with Jordan and called on Israel to halt its expansion in these areas. But Begin has obviously been listening to the Lord who told Abraham that the land of "Canaan" belonged, "for an ever-lasting possession", to his descendants. What he is overlooking, however, is that the Arabs too trace their antecedents to Abraham. Begin has no intention of allowing anyone to establish a Palestinian state in the West Bank and Gaza and Israel's critics feel the blitzkrieg on Palestinians last year as well as the Israeli reluctance to withdraw its troops from Lebanon, all stem from this motive."

US-JAPAN RELATIONS ON THE MEND

Japanese Prime Minister Yasuhiro Nakasone went to the US on a five-day official trip beginning January 17. Relations between the two countries, which had deteriorated considerably during the last few years, received a boost from the goodwill visit. Yet much more than a visit is necessary for the easing of tensions.

The Nakasone Government has been trying to ease the situation for the past one month. Tariffs on a wide variety of articles have been reduced, the defence expenditure for 1983 has been increased by nine per cent and a 15-year-old ban on the export of major weapons and weapons technology to the US has been withdrawn. Furthermore, before his visit to the US, Nakasone made a surprise trip to South Korea and promised substantial aid to improve security ties between the US, Japan and South Korea. All these measures go to show that Nakasone is not interested in allowing US-Japan relations to deteriorate further.

The biggest breakthrough came on the question of defence. During his visit, Nakasone indirectly endorsed the greater militarisation of Japan. He said he was willing to strengthen the Japanese Air Force to the point where it could detect and stop overflight by the Soviet Union's long-range backfire bombers. Japan will also strengthen its defence forces in order to prevent the entry of Soviet submarines and surface ships. So far, Japan had spent very little on defence, and the US had begun to

resent its commitments to Japan which were saddling it with excessive defence expenditures. Nakasone has increased Japan's defence expenditure, though the increase is much less than what Washington wants. Even so, this provoked Moscow and the leadership at the Kremlin declared that the rearmament of Japan would lead to a "national disaster".

Although giant strides were made in the field of defence and defence technology, the US and Japan differed on some trade issues. A further reduction in tariffs would endanger the position of Nakasone's party. While Japanese goods have been flooding American markets, America has failed to penetrate Japan. Nakasone bluntly told the Americans that the fault was theirs: the Americans did not understand Japanese markets because of their refusal to study Japanese culture, institutions and language.

NARCOTICS TRADE IN THE RED

January is the harvest time in the Golden Triangle, the month when the \$ 800-million opium trade gets a new lease every year. Though the weather has been especially beneficial for the poppy crop, the opium warlords will probably spoil it all by battling among themselves in the mountainous region where the borders of Burma, Thailand and Laos converge, much to the relief of the US Drug Enforcement Administration.

About half-a-dozen "liberation" armies are scrambling for a share of the \$800-million annual opium haul, and the result is pure chaos. The biggest opium smuggler, Klun Sa, and his 3000-strong Shan United Army were ousted from the border town of Ban Hin Tack last February by the Thai army, and many smaller warlords are fighting for a larger piece of the pie as a result of the power vacuum created by his departure. Klun Sa, who fled to Burma, has been trying to muscle his way into the opium trade there. The prospects for drug control appear brighter as long as the battles last.

In Pakistan, too, the narcotics trade has been facing problems of late. But the reason is not a battle of the warlords. It is the crackdown by the authorities.

...which may, or late, become the single most important conduit for illegal narcotics, and the issue had figured high on the agenda when President Zia-ul-Haq visited Washington recently. His government has declared that heroin production and its use is un-Islamic. To back up its policy, Pakistan is probably also ready to use force. In a traditional assembly held at Landi Kotwal in the Khyber region, the tribal elders put their thumbprints on an undertaking to stop all production and trade in heroin and morphine-related products.

THATCHER IN FALKLANDS ELECTION GIMMICKRY?

Almost seven months after Britain recaptured the Falklands from Argentina, Prime Minister Margaret Thatcher undertook a long secret flight to Stanley airport—the scene of heavy gunfire during the Falklands war. Her flight was kept secret to prevent any Argentine attempt to intercept her aircraft. Her visit, beginning January 9, was made just five days after the 150th anniversary of Britain's seizure of the islands from Argentina.

While some saw the trip as a move to boost the morale of the 1,800 islanders and 4,000-strong British garrison on Falklands, others suggested that she was trying to bolster her own popularity, which soared during the South-Atlantic war. The general elections are due to be held in the UK late this year or early next year, and the Prime Minister obviously wants to keep her victory very much in the public eye.

While she earned "kudos" from US President Ronald Reagan for her courage in visiting the islands, which are close to Argentina, she outraged the political and military leaders at Buenos Aires, who called her visit "a new act of provocation and aggression". They called for a "tougher line" towards London and warned of "repercussions".

US BUDGET

THE BATTLE BEGINS

The budget battle began in the US on January 31 when President Reagan presented the Congress with a \$848.5-billion budget. The budget projects a \$189-billion deficit for the financial year beginning October 1,

Mrs Thatcher with the royal troops in Falklands: Keeping in the public eye.

which is only slightly lower than the record \$208-billion deficit anticipated for the current year. Both these deficits are about three times the size of any recorded budget before Reagan took office after a campaign in which he pledged to balance the budget by 1984.

The biggest battle will be over defence spending for which the President is seeking \$238.6 billion, \$29.7 billion over last year's level. It includes \$6.6 billion in long-range spending for the controversial MX missile and \$6.9 billion for the new B-1 bomber. The Pentagon also requested a \$1.6-billion addition to its 1983 budget to restore the money rejected by Congress for MX and Pershing II missile production and to support key NATO programmes. The administration feels all this is necessary to make amends for the neglect "of US military spending in the 1970s and to counter the growing Soviet challenge". However, the Democrats in Congress are going to try and reduce the defence budget, arguing that huge cuts in domestic programmes cannot be justified unless the military also bears its share.

Reagan further asked Congress to approve a one-year freeze on

spending for most non-defence programmes and called for major reforms to reduce the growth of benefits in a variety of social-welfare programmes. The budget also outlined several new proposals for dealing with the country's 10.8 per cent unemployment rate, including a six-month extension of jobless benefits for workers who have already exhausted their payments. It also promised new funds for training workers whose skills have become obsolete. It further called for a special tax credit for firms that would hire unemployed people. Thus, Reagan has, to some extent, abandoned Reaganomics, although he continues to stand firm on massive rearmament.

RACIAL RIOTS

WASTEFUL KILLINGS

Violent race riots shook numerous cities in the US as the decade of the '60s drew to a close. The next 10 years were relatively quiet as the two communities, blacks and whites, assimilated the progress initiated in race relations by the civil-rights move-

riots, but as the sun began the racial flare-ups again became part of the annual scenario. The March-1980 Miami riots shook Americans out of their sense of racial well-being. Last year, ugly incidents took place when blacks protested against a planned Ku Klux Klan meeting in Washington D.C. And as the year turned, two persons were killed, 26 injured and 45 arrested, when Miami again erupted with racial violence.

The riots were sparked off on January 4 by the death of a black clerk, Nevell Johnson, at the hands of a uniformed Miami policeman, Luis Alvarez, in a video-games arcade. He was shot simply because he was carrying a gun, since eye-witnesses say he made no move to attack or resist the policeman. Within hours of the shooting, blacks from the poorer sections of the town rioted as Johnson's death seemed patently unjust. Other similar incidents had been building up the tension. In the past few months two blacks had been shot to death by white policemen in separate incidents.

The situation, however, cannot be analysed simply in terms of blacks and whites any longer, especially in Miami. Tension has been building up among various minority ethnic communities, each of which has been vying for a bigger piece of the American pie. In Miami, the Hispanics, who make up 58 per cent of the population of the city, are strong rivals of the blacks, who are in a minority (27 per cent). The city police force is 39.2 per cent Hispanic, 44.2 per cent white and 16.6 per cent black. The blacks, who led the civil-rights movement and broke the first barriers of segregation, resent the rise of other minorities who, though latecomers in the struggle for equality, have often been overtaking them of late. It is significant that Alvarez, who shot Johnson, and his companion policeman Louis Cruz, are Hispanics and not whites, and thus do not belong to the majority race.

COLOMBO MEET FOR REGIONAL COOPERATION

The "Committee of the whole", set up by the foreign secretaries of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Britain

and Bangladesh, met in Islamabad last August, met at Colombo in the second week of January to draw up an integrated programme for regional cooperation. Reports of panels which had been working on agriculture, rural development, telecommunications, meteorology, health and population control, postal services, transport and science and technology were discussed.

Although the senior officials put together a programme blueprint for regional cooperation, no consensus was reached on a move to keep the decision-making authority at a political level. Bangladesh, which had launched the movement for regional cooperation two years ago, pleaded that the concept of cooperation should be given political support by ministerial-level decisions to make it effective in the various spheres of activity. Pakistan, however, opposed this move, and it was decided to keep the issue open. The foreign secretaries of these seven nations will meet in Sri Lanka this month to prepare for a ministerial-level conference, likely to be held in September-October.

CHINA SEEKING PASTURES ANEW

With the US not being exactly on the best of terms with China, Beijing has been looking for other pastures. Much has been heard of the improvement in Sino-Soviet relations, but little has been written about the defence contracts China has signed with the UK and France. Under a £ 100-million contract a consortium of British public- and private-sector companies will refit the Chinese Navy's Luda-class destroyers with Sea Dart anti-aircraft missiles and advanced electronic equipment. China has nine Luda-class destroyers which are based on the design of the Soviet Kotlin-class destroyers. All are expected to be modernised with British system radars and other equipment which will substantially improve the standard of the Chinese navy.

France, too, is helping China to modernise its armed forces. Last August, the French Government announced it had decided to sell its most advanced fighter, the Mirage 2000, to China and the two sides were discussing a multi-billion-dollar deal. However, the negotia-

tions have run into difficulty since other Western nations have objected to a communist country getting a large supply of such high-technology aircraft. French Dauphin helicopters and long-range radar networks are already being used by the Chinese armed forces. China is also said to be pressing France for the sale of Cortale anti-aircraft missiles and Milan anti-tank missiles, which India has just begun receiving. The Chinese forces which are formidable, if only for sheer manpower, will become almost invincible once the modernisation process is completed.

COSMOS 1402

DRAMA IS OVER

Exactly five years after a Soviet nuclear-powered satellite re-entered the earth's atmosphere and disintegrated in a remote area of north-west Canada, leaving only one mildly radioactive piece behind, another Soviet nuclear 'spy in the sky', Cosmos 1402, crashed in a shower of debris into the Indian Ocean. It was launched on August 30, ostensibly to monitor ship movements, particularly those of the American fleet. It began its descent a month back and the Soviet Union notified the UN as is mandatory in such cases. The UN announced that the satellite would disintegrate over the Arabian Sea region and accordingly, India, Sri Lanka, Oman, the United Arab Emirates and other neighbouring countries issued alerts. The satellite finally crashed into the ocean on August 24, about 1,814 km from the island of Diego Garcia.

About 9,000 satellites have so far fallen out of the sky, although most of them have burnt up on entering the atmosphere. The Cosmos 1402, however, created a mild flutter because of its load of 100 lbs of uranium. US observers feel that the major part of the satellite's main body, containing its reactor and control module, burnt up in the atmosphere, but some pieces may have fallen into the ocean. American ships and planes in the area are on the lookout for increased levels of activity. Meanwhile, on February 7, the radioactive remnants of Cosmos tumbled down over the South Atlantic, 1,770 km east of Brazil. The re-entry was harmless.

SANJUKTA BANERJI

ABBREVIATIONS

AALCC - Asian-African Legal Consultative Committee
ASTE - Aircraft Systems Testing Establishment
FFSI - Federation of Film Societies of India
PSLV - Polar Satellite Launch Vehicle
UNRWA - United Nations Relief and Works Agency for Palestine refugees in the Near East

AWARDED

The 1982 Symons Award instituted by the Association of Commonwealth Universities to Dr Anwar Singh, former Vice-Chancellor of Panjab University, Punjab, for his contribution to universities of the Commonwealth.

Dadabhai Naoroji Memorial Prize for 1982 to Arun Shourie, Magsaysay Award winner and well-known journalist, for his outstanding contribution in the field of journalism

The Rameshwardasji Birla Smarak Kesh National Award of Rs one lakh for outstanding research in medical related fields for 1982-83 to Dr Avtar Singh Pantai, Director of the Patel Chest Research Institute, Delhi

Martin Luther King (Jr) Non-Violent Peace Prize to Sir Richard Attenborough for his film on Mahatma Gandhi. The prize is awarded annually for "outstanding work and commitment to the ideals of peace and non-violence"

The Bharat Ratna posthumously, to Acharya Vinoba Bhave, who died at the Paunar Ashram on November 15.

The Padma Shri to table tennis player Vijay Amritraj, the only Indian to reach the Wimbledon semi-finals after Ramanathan Krishnan.

The Jerusalem Prize for writings that celebrate "the freedom of the individual in society" to English-language novelist V.S. Naipaul

The Gold Medal of the Olympic Order to Prime Minister Indira Gandhi for her devotion to sports and for spreading Olympism in India, by the International Olympic Committee

APPOINTED

Rajiv Gandhi and **C.M. Stephen** as General Secretaries of the All India Congress Committee(I)

Michael Haseltine, who held the Environment portfolio till recently, as

Britain's new Defence Secretary, succeeding John Nott, who had earlier announced his retirement.

J.R. Hiramath, Additional Secretary in the External Affairs Ministry, as India's Ambassador to Yugoslavia.

Jagdish Rana, former Nepalese Ambassador in Moscow and Nepalese Foreign Secretary, as Ambassador to India.

Serge Boidevaix, Secretary in the French Foreign Office for North Africa and Middle East, as French Ambassador to India replacing Andre Ross, who takes over as Ambassador to Japan.

Vasily Ryakov, member of the Soviet Communist Party Central Committee, as Soviet Ambassador to India, succeeding Yuri Vorontsov who has been posted to France

ELECTED

Nandamuri Taraka Rama Rao as leader of the Andhra Pradesh Telugu Desam Legislature Party.

Ramakrishna Hegde as leader of the Janata Kranti Ranga Legislature Party in Karnataka.

Nripen Chakraborty as leader of the Tripura Left Front Legislature Party.

Vasantao Patil as leader of the Maharashtra Congress(I) Legislature Party.

N. Krishnan, India's Permanent Representative at the UN, as one of the Vice-Presidents (re-elected) of the UN Council for Namibia

R. Raghupathy, Chairman and Managing Director of the Syndicate Bank, as Chairman of the Indian Banks Association.

Thomas "Tip" O'Neill a Democratic representative from Massachusetts, as Speaker of the House of Representatives for his fourth successive term.

RESIGNED

C.M. Stephen as Union Minister for Shipping and Transport.

Sitaram Kesari as Minister of State for Shipping and Transport.

SCIENCE

Breakthrough in heart diseases: A team of researchers, led by a scientist of Indian origin, has discovered a blood component in heart disease patients that could, within a decade, lead to the development of a vaccine against the disease. The discovery could also lead to an early

warning signal for susceptibility to heart diseases in people of a young age.

What could be the largest stellar black hole has been discovered by a team of astronomers. The black hole is about 1,80,000 light-years from the earth, a tiny distance in cosmic terms. (A light-year is the distance light can travel in a year, at nearly 30,00,000 km a sec.) Black holes are invisible concentrations of matter, so compact and dense that they swallow everything, even light, within their gravitational field. The new black hole, christened LMC-X3 and discovered by three astronomers at the Inter-American observatory in Chile has a mass between eight and 12 times that of the sun.

The world's smallest television set, slightly larger than a cigarette pack, was unveiled on January 6 in an industry trade show at Las Vegas in the US. The screen measures 2 inches and the set weighs about 13 ounces.

An artificial magnetic heart pump system that can assist or replace a failing human heart and allow the recipient to be fully mobile, has been developed by two American scientists. Called magnetically actuated left ventricular assist device or Malvad, it can be operated on battery power or electricity. Electrical impulses create magnetic fields, activating an electromagnet, which forces the pump diaphragm to move forward and backward

ECONOMY

Cut in IMF interest rates: The International Monetary Fund (IMF) on January 3 announced cuts in two of its interest rates according to which the annual rates on its Special Drawing Rights (SDRs) will be 8.47 per cent instead of 8.9 per cent. Creditor countries in the Fund's general department will get 7.2 per cent instead of 7.5 per cent. The rates, based on short-term interest paid in the latter part of December in the US, West Germany, Japan, Britain and France, reflect the recent drop of interest rates in the countries.

The World Bank has reduced its interest rate on IBRD loans from 11.43 per cent to 10.97 per cent to give relief to developing countries in servicing their IBRD borrowings.

The US unemployment rate soared to a 42-year high of 10.8 per cent in December, more than at any time since

employment has now risen to 4.2 million since the economic downturn began in July 1981—an increase of over 50 per cent.

WFP aid for Rajasthan: The World Food Programme (WFP) will provide 31,018 tonnes of wheat, 2,482 tonnes of vegetable oil and 2,482 tonnes of pulses for settlers in the Rajasthan Canal area. About 30,000 families are expected to benefit. The WFP has till date approved a total of \$ 28.5 million (Rs 27.2 crores) worth of food aid for workers engaged in the construction of the Rajasthan Canal.

India's population was 685.2 million by March 1981, according to final figures of the 1981 census, representing an increase of nearly 25 per cent over the 1971 census.

Asia's economic growth rate will be the world's highest in 1983, according to a report issued by economists at the Chemical Bank, the sixth-largest bank in the US. The Asian contribution to the rise in world gross national product (GNP) will nearly equal that of the US and will be double that of Europe, a study by the Bank said. It also said the Asian countries will experience better growth in 1983 than in 1982.

India-Indonesia agreement: India and Indonesia have signed an agreement for the building of a \$ eight-million small-industry training centre in Surabaya in Indonesia. Under the agreement, India will provide a loan of \$ five million and 19 technicians for the project to be equipped with Japanese, Swiss, Indian and domestic machinery.

Wheat import: India will import an additional 1.4 million tonnes of wheat from the US, raising the total foodgrain imports from that country to nearly 3.5 million tonnes. Delay in winter rains and the threat of drought conditions in some areas had necessitated the increase.

Aggregate deposits of scheduled commercial banks have crossed the Rs 50,000-crore mark in 1982. Total deposits increased by Rs 6179 crores in 1982. However, 1981 showed a growth of 19.4 per cent compared to 13.9 per cent for the year ending December 31, 1982. Bank credit expanded by Rs 3,062 crores to Rs 33,238 crores, a rise of 10.1 per cent against 1981's expansion of 22.2 per cent. Food credit recorded an expansion of Rs 631 crores to Rs 3,051 crores (26.1 per cent) against Rs 333 crores to Rs 2,420 crores (16 per cent) in the previous year.

Comparative taxes in India and ASEAN: Indian tax rates are higher at each level of income than in the ASEAN countries, according to a study by the

comparative tax structure of India and ASEAN countries. While most ASEAN countries have adhered to the principle that no person should be taxed more than half his income, the Indian tax system continues with a high rate structure. The study advocates reduction of tax rates and a statutory ceiling on the level of direct taxes payable by an individual in India.

Bijapur fertiliser project: The government has approved collaboration of Kellogg of the US and Snam Progetti of Italy for the Rs 650-crore gas-based fertiliser project of Bijapur in Madhya Pradesh. The collaboration will be for supply of technological knowhow and engineering services.

Belgium loan: Belgium will provide India with a loan of Rs seven crores in 1982-83, according to an agreement signed between the two countries in New Delhi on January 17. Of the Rs seven crores, Rs 1.2 crore has been provided as debt relief and Rs 5.8 crores for the purchase of capital goods, including industrial equipment and related services.

Industrial output greater in Socialist countries: Socialist countries contribute more than 40 per cent of the world industrial output at present, while the production of capitalist developed countries has shrunk to nearly 50 per cent. The Soviet Union alone produces as much as all West European countries together. The developing countries' share in the world output is roughly seven per cent, according to latest figures published in a Soviet economic weekly.

Spain now has the highest percentage of unemployment in Europe (16.53 per cent). The number of unemployed persons (Spaniards) rose to 21,51,000 during 1982.

Oil production by OPEC countries rose to 19.3 million barrels per day (BPD) in November 1982, 70 per cent down on the production rate in November 1981. Non-OPEC countries' output rose by 2,20,000 BPD, boosting the total world output to 57.3 million BPD, the highest in 10 months.

US aid to India: The US Export Import Bank on January 24 offered to provide loan assistance in excess of \$1 billion to India to finance import of US goods and services.

Japanese technology for BHEL: Bharat Heavy Electricals Ltd (BHEL) on January 24 signed an agreement with a Japanese firm for the latest technology in ceramics for the manufacture of insulators. The agreement provided for the setting up of the second insulator factory of BHEL in UP involving a capital outlay of Rs 17.65 crores. The plant will com-

plete production in 1984-85.

The UAE will raise its oil production to 1.6 million BPD following OPEC's failure to agree on production quotas in their recent deliberations.

Japanese Grant: Japan will provide Rs 15.27 crores worth of grant assistance to India during 1982-83. Notes for the grant were exchanged between India and Japan on February 1.

IMF credit: Finance ministers from leading industrial nations decided on January 18 to make more than \$ 18 billion in credit available to the IMF to help countries struggling with debts and ease the global financial strain. The agreement, a compromise after the US opposed a larger increase, forms part of a multi-billion-dollar package aid to help ease the shaky world economy.

EVENTS

New government in Namibia: South African administrator, General Danie Hough, announced on January 18 the takeover of the interim government of Namibia, following the resignation of Dir Mudge, the internal leader. Under legislation providing for Namibia's interim government, the council of ministers was automatically dissolved.

West German officials have threatened to drop plans to order American-built weapons in retaliation to a recent vote by the US Congress preventing purchase by the Pentagon of specific foreign arms parts. The restriction was passed in the 1982-83 military budget and particularly affects West German industry.

West German Parliament dissolved: West German President Karl Carstens on January 7 dissolved Parliament and called for general elections on March 6. The President's widely expected decision came three weeks after Chancellor Helmut Kohl deliberately lost a vote of confidence on December 17. As the West German Constitution does not permit Parliament to dissolve itself, this was the only option for Kohl to fulfil his pledge of new elections after his centre-right coalition took power in a Parliamentary manoeuvre.

Committee for development of Western Ghats: The Planning Commission has set up a high-level committee of chief ministers to guide the development of the Western Ghats and to take required policy decisions. The committee is headed by Planning Minister S.B. Chavan and comprises the chief ministers of Maharashtra, Kerala, Tamil Nadu, Karnataka and the Union territory of Goa, Daman and Diu.

Election preparation in Bangladesh: The Bangladesh martial law autho-

PILOO MODY IS DEAD

Piloo Mody, 57, a veteran parliamentarian and a known architect, died on January 29, following a heart attack. Mody left an indelible mark on Indian politics with his pungent wit and humour. In 1972, he came to the Rajya Sabha wearing a badge. 'I am a CIA agent.' At home, his dogs were the same badge. The reason, Mrs Gandhi had accused some members of the Opposition of being CIA agents. He used to address notes to Mrs Gandhi as 'My dear IG.' Her reply: 'My dear PM.'

On January 3 announced preparatory measures to hold elections and set the date of commencement of enumeration of voters from January 28. The final electoral rolls will be published on August 5 and one lakh people will be engaged in the preparation of the final electoral rolls. All persons of 18 years of age will be eligible to vote.

Congressmen call for N-arms freeze: Several US Congressmen, including the chairman of the House Foreign Affairs Committee, introduced resolutions in the House of Representatives on January 2 calling for a freeze on nuclear arms production. The Chairman, Clement J. Zablocki, called his legislation a package of objectives representing the most comprehensive and effective means of enhancing US national security through mutual and verifiable arms control.

Matra Magic missiles tested: The Indian Air Force's Jaguars have successfully test fired live Matra R-550 Magic air-to-air missiles on their overwing pylons. India thus became the first country to integrate sophisticated air-to-air missiles on the overwing pylon of a fighter plane. The French-supplied Matra Magic missiles have now been cleared for operational use by the IAF.

Klibi invited as observer to non-aligned summit: India has invited the Secretary-General of the Arab League, Chedli Klibi, to attend the coming non-aligned summit in New Delhi as an observer.

Bolivia and Cuba resumed diplomatic relations in January, broken off in 1964 when Bolivia accused the latter of interference in its internal affairs.

Indo-Soviet agreement: India and the Soviet Union on January 12 exchanged instruments of ratification of an agreement on scientific and technical co-operation and utilisation of atomic energy for peaceful purposes.

Rohini-560 launched: A Rohini-560 rocket, with a technological pay-load fully developed by the Vikram Sarabhai

Space Centre at Thumba, was successfully launched from the Sriharikota range on January 12. The successful flight of the rocket, carrying equipment to evaluate aerodynamical and structural parameters was significant in that it has opened up possibilities for various applications of rocket technology.

India to receive Soviet ICVs: India has signed a pact with the Soviet Union for the purchase of new Infantry Combat Vehicles (ICV) fitted with anti-tank missiles, machine guns and a main gun capable of firing high explosives. The improved versions of the ICVs will equip the newly-formed infantry units in the country.

UN peace-keeping force to stay in Lebanon: The UN Security Council, ignoring Israel's assertion that the UN peace-keeping force had outlived its usefulness in Lebanon, on January 18 extended the mandate for six months. Thirteen of the 15 members approved the resolution, with Poland and the USSR abstaining.

The USSR launched eight more satellites of the Cosmos series on January 19, bringing to 1,436 the number of Cosmos satellites put into orbit by the Soviet Union.

Sri Lanka's state of emergency lapsed at the midnight of January 20, three months after its imposition following elections in the island state. Several opposition leaders who had been arrested in its wake were released a day before the emergency was to lapse.

Sentence for murdering Aldo Moro: A Rome court on January 24 sentenced 32 Red Brigade leftist guerrillas for the 1978 kidnapping and murder of former Prime Minister Aldo Moro.

Jiang Qing's death sentence commuted: China's Supreme Court on January 25 commuted the sentence of death awarded to Chairman Mao's widow, Jiang Qing, to life imprisonment. She was sentenced on January 25, 1981, to death but with a two-year reprieve to allow

her to reform in prison. The court took the same action for Zhang Chunqiao, co-accused and a member of the "Gang of Four".

India received the first Sea Harrier multi-role missile-fitted fighter aircraft for the Indian Navy on January 27. This was the first of the eight Sea Harriers ordered from its manufacturers, British Aerospace. The Sea Harriers will form Squadron No. 300 called 'White Tigers' in the Indian Navy, replacing the Sea Hawks.

India-Egypt memorandum: India and Egypt on January 27 signed a memorandum of understanding for industrial and technical cooperation. The agreement provides for the setting up of joint ventures and industrial estates for small units in Egypt with Indian assistance.

Delhi colleges reopen: Students and teachers of Delhi University returned to classes on January 31, after a lapse of 109 days. The University had been closed due to a strike by the teachers. The strike was called off on January 30.

Greek Parliament adopts equality law: The Greek Parliament has adopted a law that gives equal responsibility to women in all decisions pertaining to the family. The law ends the dowry system, permits divorce by mutual consent and ends the paternity system that gives men the final say in all family matters.

Coup attempt in Surinam foiled: Surinam's military leader, Desi Bouterse, foiled a coup attempt on January 1 with the arrest of 15 persons, including a former army commander and a minister.

DIED

Dick Emery, 63, one of Britain's highly-paid comedians, creator of many comic characters in popular television shows, on January 2 in London.

Benjamin Rosenthal, 59, the New York Democrat who championed consumer causes and spoke out against the Vietnam war, of cancer on January 4 in Washington.

Walter Ullmann, 72, renowned historian who specialised in medieval law and politics, on January 18 at his home in Cambridge.

Admiral Ram Das Katarl, 71, the first Indian Chief of the Naval Staff, on January 21 in Hyderabad.

George Cukor, director of such film hits as *My Fair Lady*, of heart failure on January 24 in Los Angeles.

Georges Bidault, 83, former French Prime Minister who went into exile in the '60s at the height of the crisis over Algeria's independence from France, in Paris, where he was undergoing treatment, following a heart stroke on January 27.

ANIL PENNA

SPORTS

CRICKET

Pakistan won the six-Test series against India 3-0. The break-up results: Pakistan won the Second, Third and Fourth Tests held in Karachi (December 23-27), Faisalabad (January 3-8) and Hyderabad (January 14-19) respectively. The First, Fifth and Sixth Tests held in Lahore (December 10-15), Lahore again (January 23-26) and Karachi (January 30-February 4) were drawn.

India won the third and Pakistan the fourth 1-day International matches held in Lahore on December 31 and Karachi on January 21. Pakistan clinched the 4-match limited-overs series 3-1.

Australia won the five-Test series against England 2-1, thus regaining the Ashes. Australia had won the Second and Third Tests, England the Fourth Test, while the First and Fifth Tests were drawn.

MOTOR RALLY

The first event on the 1983 World Championship circuit, the Monte Carlo Rally which ended on January 28, was won by the reigning world champion, Walter Rohrl of West Germany, driving a Lancia. This was his third win in four years. His teammate Markku Alen (Finland) was second, while Steve Blomqvist (Sweden), driving a Audi Quattro, was third.

Above: Lendl: Peak form. Right: Rohrl: Ace racer.

SQUASH

The Pakistan Open Championships, sponsored by Hamdard, which ended in Karachi on January 16, was won for the third consecutive time by the young Jahangir Khan, defeating fellow-Pakistani Hidayat Jahan 9-1, 9-2, 8-10, 9-2 in the final.

HOCKEY

Punjab Police defeated Army Service Corps 3-2 in the final of the Jawaharlal Nehru Tournament at Shivaji Stadium, New Delhi, on January 16. This is the third time they've won the trophy.

TENNIS

Following were the major international tournaments held in January:

The 11th WCT World Doubles Championship, which ended on January 9, at London's Royal Albert Hall, was won by defending champions Heinz Gunthardt (Switzerland) and Balazs Taroczy (Hungary). They beat the 1975 and 1980 winners, Brian Gottfried (USA) and Raul Ramirez (Mexico) 6-3, 7-5, 7-6. This is the first time that the title was retained.

Ivan Lendl (Czech) aced his way past defending champion Jimmy Connors (USA) to win the final of the \$2,50,000 Challenge of Champions Exhibition Tournament in Chicago on January 9.

The \$4,00,000 Volvo Grand Prix Masters Tournament held in New York's Madison Square Gardens saw Lendl beat John McEnroe (USA) 6-4, 6-4, 6-2 in the final on January 23. For the first time this year the championships were held on a knock-out basis between the top twelve on the points table--the first four seeds getting byes into the quarter-finals--instead of the usual league-cum-knock-out basis between the top eight players.

The King's Cup, an indoor tournament for European nations on the lines of the Davis Cup, was retained by West Germany, when they defeated Czechoslovakia by two matches to one in the final at Uppsala in Sweden on January 30.

The WCT winter final in Detroit (USA) was won by Lendl, who beat Guillermo Vilas (Argentina) 7-5, 6-2, 2-6, 6-4 on January 30.

Jose-Luis Clerc (Argentina) beat Mats Wilander (Sweden) 3-6, 7-5, 6-1 to win the \$2,55,000 Hollywood classic tournament held in Sao Paulo, Brazil, on January 30.

Indian tennis ace Vijay Amritraj married Shyamala Wenceslaus, daughter of an industrialist and managing director of *Weerakesari*, the largest circulating Tamil daily in Sri Lanka, on January 17.

A STAR IS GONE

Bjorn Borg, the 26-year-old Swede, confirmed his retirement from competitive tennis after an exhibition match in Bangkok on January 24, saying he had no motivation to play. Earlier, his coach Lennart Bergelin said Borg had lost the drive and spirit to win.

At 15, Borg represented Sweden in the Davis Cup, and led them to victory in 1975, winning all his singles matches. He won the Italian title at 17, and the French Open (on clay surface) at 18 years, in 1974, which he retained in 1975 and then rounded off with four straight wins, ending in 1981. Thus he overtook Frenchman Henri Cochet's record of five titles between 1922-32.

His most remarkable achievement was the unprecedented five men's singles titles at Wimbledon (on grass) consecutively from 1976 to 1980—a record since the challenge round was abolished in 1922. Thus, he left behind Fred

Perry and John Newcombe's three and Rod Laver's four title wins. Surprisingly, he never won the US Open, despite reaching four finals. Also, the top spot on the Grand Prix points table eluded him, though he won the Masters title twice—in 1979 and 1980.

beating M.G. Jayaram by 5 frames to 2.

BADMINTON

Twenty-year-old Iruk Sugianto (Indonesia) beat India's Prakash Padukone 15-10, 15-8 to clinch the men's singles title on January 17 at the Masters Invitational Championship held in Taipei (Taiwan). The women's singles title went to Denmark's Kirsten Larsen with an 11-3, 11-5 win over Taiwan's Sherry Liou. The respective doubles titles were won by Bobby Ertanto and Hadibowo of Indonesia and Gillian Gilks and Gillian Clark of England.

The 1982 Asian Games gold medalist, Han Jian of China, beat Padukone 6-15, 15-8, 15-9 to win the men's singles title in the Yonex Cup Japan Open International Championships which ended in Yokohama on January 22.

The other results:

Women's singles: H. Aiping (China) b Kirsten 11-2, 11-4; Men's doubles: Thomas Kihlstrom and Steven Karlsson (Sweden) b Razif Sidek (Malaysia) and Hadyanto (Indonesia) 18-14, 6-15, 15-6; Women's doubles: Gillian G. and Gillian C. b Nora Perry and Jane Webster (England) 15-6, 15-8; Mixed doubles: Kihlstrom and Nora b Martin Dew and Gillian G. (England) 15-5, 15-2.

FOOTBALL

The youngsters from Incheon University (South Korea) lifted the DCM Trophy, outplaying the celebrated club Mohammedan Sporting from Calcutta 3-0, in the replay of the final at the Ambedkar Stadium in Delhi on January 3. The earlier match had ended in a goalless draw.

'The Little Bird' or Garrincha, whose

real name was Manuel Francisco Do Santos, one of the greatest Brazilian forwards, died in a local hospital of Rio De Janeiro on January 21, following a seemingly never-ending battle with alcohol and psychiatric problems. He was 50.

SNOOKER

O.B. Agarwal won the National Championship in Patna on January 29,

ATHLETICS

The 58th running of the traditional Round-the-Houses-Race in Sao Paulo over the New Year's eve was dominated by Portuguese runners, who took both titles. Carlos Lopes finished first among men, covering the 13-km course in 39:41 sec, while Rosa Motta became the first woman to finish the race, clocking 47:21 sec.

SANJEEV KUMAR

CRICKET

(Continued from page 25)

Indian side had resigned themselves to losing. Veterans stared askance at the field placings.

It might sound like 'cribbing', but the Pakistani umpiring, to put it mildly, has been a little more than suspect. And their premier batsmen Zaheer Abbas and Javed Miandad have had more than their share of lucky decisions. Imran Khan and Sarfaraz Nawaz got too many wickets, some of which came their way more due to the dubious lbw decisions than anything else.

As far as tactics go, Gavaskar's defensive attitude to the game

proved disastrous. The Indian skipper, again, relied little on his spinners. Many a time, Doshi did not get the field he wanted and did not enjoy the skipper's confidence. Eventually, he made way for Maninder who, though backed by Gavaskar, could never really pierce the Pakistani batting line-up. Imran Khan was a study in contrast. With his blatantly offensive attitude to the game and by reposing his trust in the none-too-good leg-spinner Abdul Qadir, he made the latter look like a demon.

Psychologically, the Indians were not at their best, and they have only themselves to blame. They

put Imran on a pedestal—one sportswriter calls him the 'peerless pathan'—and brought themselves to believe he is superhuman. He bowled well but not all that well. Umpiring and injudicious batting fetched him quite a few victims. At times, Mohinder, Balwinder Sandhu in Hyderabad and Ravi Shastri in Karachi (Sixth Test) made him look a bowler just above mediocre.

Last but not the least, our big-wigs in cricket—selectors, players and others—must put aside their personal interests and petty politics and work in the interest of the game.

IX IFFI: A FESTIVAL IN NAME ONLY

Above: Sophia Loren in a tense scene from Lina Wertmüller's *Blood Fued*. Left: An FRG entry, Reinhard Hauff's *The Man On The Wall* had a spell-binding effect on viewers.

For the first time since the inception of the International Film Festival of India (IFFI) in 1952, and the introduction of Golden Peacock in 1965, no film was found worthy of this award. The reasons: poor selection of entries by the selection panel; mismanagement; and reluctance of most countries to send in entries since the Golden Peacock carries no weight in international cinema. Richard Attenborough's *Gandhi* (in which India was a co-producer) was not granted for screening as the opening film. Instead, it was withheld as the closing film for the Manila Festival (which commences soon after the IFFI).

The competitive section had 24 films and the Information section 96 (including

13 short or documentary films) and not 150 as proclaimed earlier. The Indian Panorama included 21 feature films, 12 short and nine student films.

The overall selection for the competitive section was mediocre. Among the few good entries were Bruce Beresford's *Tender Mercies* and Reinhard Hauff's *The Man On The Wall*. An FRG entry, the latter is a spell-binding story of an East Berliner with an obsession to cross over the Berlin Wall. However, the film won no awards.

The USSR entry *Open Heart*, directed by Aleksi Pollikov bagged the Silver Peacock for best direction and Martina Starikh the best actress (Silver Peacock) for the same film. The film revolves around Lyuba, a young medical worker, saddled

with the responsibility of a friend's (Vera) child, Petya, who is abandoned by his mother in a children's home. Lyuba brings up Petya as her own son at the cost of losing her lover who deserts her to marry another girl. Petya grows into a young man and Vera comes back after 14 years to claim her son. In an open confrontation between the three, Vera tells Petya who his actual mother is. Shocked, Petya leaves only to come back to Lyuba in the end.

The Silver Peacock for the best actor was won by Nouri El Cherif for his lead role in the Egyptian entry, *The Bus Driver*. He played with distinction the role of a harassed son burdened with the task of clearing his father's debt. Ironically, when he finally manages to

Above: Shabana Azmi in *Masoom*—a much-talked about entry at the festival. Top: The Bulgarian entry *Avalanche* received special accolades for technical excellence, photography and direction.

collect a part of the sum his father is already dead.

Special commendation went to *Avalanche* (Bulgaria) and *Grey Fox* (Canada) for high technical excellence, photography and direction. *Avalanche*, directed by Irina Aktasheva and Hristo Piskov and marvellously shot partly in the snow-capped Pamir mountains, is a social and philosophical allegory about the fate of man in the face of nature's insurmountable odds. Another commendable film was *Violent Streets* (USA).

Utpalendu Chakraborty, director of *Chukh* (Bengali), received a special jury award. This highly sensitive film exposes the duplicity of the rulers, industrialists and the bureaucracy.

The special prize of the jury for short films was jointly bagged by two Indian films—*Gift Of Love* by Meera Dewan and *Faces After The Storm* by

Prakash Jha—for their "powerful use of documentary film to draw attention to urgent and painful social problems". *Labyrinths Of The World* (Czechoslovakia) was yet another short film that won a special award.

Some of the better moments of an otherwise dull sojourn were provided by the entries of some of the internationally-acclaimed directors like Claude Chabrol, Ingmar Bergman, Glauber Rocha and the socially incisive American film-maker, Fredrick Wiseman, in the information and retrospective sections.

The late Glauber Rocha was a film critic who spearheaded the new cinema movement in Brazil by examining the political contradictions in his country in films like *Black God, White Devil, Terra Em Transe* and *Antonio Das Mortes*.

Claude Chabrol, one of the pioneers of the new wave in French cinema with films like *Le Beau Serge* to his credit, continued to enthrall his viewers with his murder melodrama in the tradition of the great master Alfred Hitchcock. Screened at the festival was his film *Les Fantomes Du Chapelier* about a psychopathic killer in the mould of Jack the Ripper.

The Swedish director Ingmar Bergman's *From The Life Of Marionettes* is a story of a successful young businessman who murders a prostitute. Events preceding and following the catastrophe are superbly presented.

Other retrospective films were devoted to some of the renowned directors like Claude Sautet (France), Sergei Bondarchuk (USSR)—a member of the jury whose films like *War And Peace* (parts I and II) are a household name in every country—and Lester James Peries (Sri Lanka).

The presence of Robert Wise, the renowned 68-year-old director of *Sound Of Music* and *The West Side Story* (winner of 10 Oscars) fame, was another additional attraction in the festival. Wise is known to have tried every kind of film in his 40 years of film-making. Among some of his other highly acclaimed films are *Star Trek, The Andromeda Strain* and *Sand Pebbles*. Ironically his films couldn't be screened as the prints were languishing with the Delhi customs! He is at present engaged in making 13 TV films on Asia.

An interesting entry in the information section was *German Sisters* by the German director, Margarethe Von Trotta. It is a daring and provocative film about a young woman imprisoned for terrorist action in West Germany, who commits suicide in her cell. But was it suicide or murder?

The film, according to its maker, was inspired by the life of a terrorist Gurdun Ensilin. The film depicts the volatile relationship between two sisters—Juliane, a journalist, and Marianne, a terrorist. In tracing the past life of the sisters—their rivalry since childhood, yet their basic solidarity—the film seems to trace the whole recent German past, the guilt about Nazism. The different methods employed by the two sisters to fight injustice form a perfect foil—one through violence and the underground and the other through investigative journalism. *Britannia Hospital* (UK), directed by Lindsay Anderson (who launched the free cinema in 1956, and was the Chairman of the jury this time), was another outstanding film. It is about the ruthless endeavour of modern scientists who use human guinea pigs for their experiments and glory.

The French Lieutenant's Woman by Karel Reisz, based on the popular novel by John Fowles was yet another masterpiece with Meryl Streep (*Deer Hunter* and *Kramer vs Kramer*) in the lead role.

Apart from sub-standard entries, the high price of tickets and the mismanagement and chaos that reigned over the sale of tickets were also responsible for the lack of public response.

Critics complained that they were not given a chance to preview the films and in the initial stages, screenings of many films clashed with each other. The excerpts from award winning films on the final day too attracted bitter criticism.

The National Film Development Corporation (NFDC) announced at the end of the festival that henceforth the timing of the festival would be shifted from January to August. Obviously, the idea is not to compete directly with the Manila festival, which starts in the last week of January.

One wonders about the participation of foreigners as August is also the month when the Montreal and Venice film festivals are held.

To relieve the boredom, probably around 200 films were entered in the film market at the Kanishka Hotel in the capital, including over 150 foreign films. Wise decision, for the foreign buyers evinced a keen interest in the films which included those like *Sadgati* (Satyajit Ray), *Chakra* (Rabindra Dharamraj), *Duvidha* (Mani Kaul), *Phaniyamma* (Prema Karanth), and *Elippathayam* (Adoor Gopalakrishnan).

The festival fiasco has ended on a sombre note. Let's hope we've learnt the lesson that film festivals nowadays are specialised business needing specialists to ensure their success. Keep your fingers crossed till the tenth IFFI!

BANDANA MAJUMDAR

TEST YOUR CREATIVITY

Tests designed to reveal creative ability are becoming increasingly popular. Some big firms already use them to find suitable employees. Curious to know about your level of creativity? Give the following tests a try.

I Word hints to creativity

Object: Think of a fourth word related to all three words listed below:

Example: cakes heart sixteen

The answer is sweet. Cakes are sweet. Sweet is a part of the word 'sweetheart'. It also forms a part of the phrase 'sweet sixteen'. Now try these words:

- | | | | |
|-------------|---------|----------|-------|
| 1. surprise | line | birthday | _____ |
| 2. foot | snow | dance | _____ |
| 3. mouse | blue | cottage | _____ |
| 4. nap | bird | call | _____ |
| 5. golf | foot | country | _____ |
| 6. tiger | news | plate | _____ |
| 7. painting | bowl | nail | _____ |
| 8. maple | beet | loaf | _____ |
| 9. show | oak | plan | _____ |
| 10. light | village | golf | _____ |

II Analyse yourself

Object: Tick the responses that you feel apply to you:

- Would you rather be considered
(a) practical? (b) ingenious?
- Does following a schedule

- appeal to you? (b) cramp you?
3. Do you often get behind in your work?
(a) yes (b) no
- Do you get hunches just before you fall asleep?
(a) yes (b) no
- Do you often fret about daily chores?
(a) yes (b) no
- Do you like to introduce a speaker at a meeting?
(a) yes (b) no
- Do you sometimes feel anxious about the success of your efforts?
(a) yes (b) no
- Do you like to influence others by working hard?
(a) yes (b) no
- Are you fundamentally contented?
(a) yes (b) no
- Do you spend many evenings with friends?
(a) yes (b) no
- Do you frequently daydream?
(a) yes (b) no
- Do you remember the names of people you meet?
(a) yes (b) no

III Which traits describe you?

Object: Tick the adjectives that you believe describe you best:

- | | | |
|--------------|----------------|------------|
| determined | life-of-the- | tolerant |
| sensitive | party | |
| inventive | independent | restless |
| enthusiastic | impulsive | reflective |
| | clear-thinking | popular |

- | | | |
|---------------|------------|--------------|
| understanding | cheerful | organised |
| dependable | unassuming | moody |
| absent-minded | worrying | logical |
| loyal | versatile | good-natured |

Rajesh Sharma, Sonapat

Answers

1. party 2. ball 3. cheese 4. cat 5. club 6. paper 7. finger 8. sugar 9. floor 10. green
Note: Creative individuals get seven or more of these words right.
// Creative individuals usually tick these responses:
(1) b (2) b (3) a (4) a (5) a (6) b (7) a (8) b (9) b (10) b
// Highly creative individuals tend to describe themselves by these adjectives: determined, sensitive, inventive, enthusiastic, absent-minded, independent, impulsive, unassuming, worrying, versatile, restless, reflective, moody.

On The Lighter Side

The school teacher was teaching the principle of Archimedes.

"When a body is totally or partially immersed in water it loses its weight."

"But remember, there is an exception: When ministers are immersed in the 'Ocean of Power', their weight instead of decreasing increases many times."

"Tell me truly, doctor, what are my chances of recovery?"

"Just 100 per cent! Statistics show that only nine out of 10 patients die from your kind of disease-- and nine of my patients have already died. You are the tenth!"

After a thorough check-up, the doctor got up and muttered to the patient. "Er... I do not want to hide the fact that you are pretty serious. Is there anyone you would like to see before it is late?"

"Sure, sure," exclaimed the patient. "another doctor!"

Subir Kumar Das, Calcutta

There was a young lady of Niger, Who smiled as she rode on a tiger, They came back from the ride, With the lady inside, And the smile on the face of the tiger!

Sanjeev Agarwal, Jyotipuram

An optimist is a man who marries his secretary and thinks he will be able to continue dictating to her.

Murli Dar, New Delhi

A SPEEDY AFFAIR

Scircery,
Physics House,
Feb. 14, 1983

Respected Motion,

Being the father of a daughter Velocity, you are a responsible man rather worried. I want to lighten your weight of worries. You may not be knowing that your daughter is deeply in love with my son, Acceleration. All physics students often talk about their 'fast' friendship. The following lines prove it:

"The rate of change of Velocity is the simple definition of Acceleration.

How related they are! Perhaps you too would like to marry your daughter to my son. He is quite brilliant and fast but still guided by Velocity. Waiting for a favourable reply, I remain.

Yours sincerely,
Distance M.Sc. (Physics)
Neerja Bhatnagar, Hissar

CCTIMES QUIZ CONTEST-7

1. Vostok 1, launched by the USSR on April 12, 1961. The cosmonaut was Yuri Gagarin
2. 'General of the Army', whose insignia is five stars
3. *Ben Hur* - 11 Oscars
4. *Gone With The Wind*
5. Fatchsingh Rao Gaekwad
6. The turtles, though aquatic creatures, lay their eggs on land, usually on sandy beaches
7. Xu Hua (New China News Agency)
8. Vladimir Ilyich Lenin, Joseph Stalin, and Nikita Khrushchev
9. Nearly 11 months (from December 13, 1981 to November 11, 1982)
10. Olympic athletics, astroturf, hockey, teflex, handball, hova, Ladmonon

Winners

(Since there were too many all-correct entries, one error and two error entries could not be included in the draw of lots.)

First Prize 1. D.A. Lamba, Panthagar, 2. Babhuo Shukla, Raipur. 3. A.K. Ananth Shenoy, Mangalore. 4. S.K. Srivastava, Panthagar. 5. Awinash, Patna. 6. Leroy Saldanha, Mangalore. 7. Arvind Nayak, Roorkee. 8. Ashutosh Mishra, Varanasi. 9. Neeja Bhutani, New Delhi. 10. Manjul, New Delhi.

Second Prize 1. Rabindra Nath Basak, Delhi. 2. Pargat Singh, Lucknow. 3. Brij Chandra Tripathy, Rourkela. 4. Vipin, New Delhi. 5. M. Sivaram, Secunderabad.

Third Prize 1. Sanjay, Gwalior. 2. Rohit, Vasthi, Pathankot. 3. A. Praveen, Calicut

4. Alok Banerjee, Varanasi. 5. Prem Late Goenka, Sitamarhi.

Consolation Prize: 1. Vishwaroop Shukla, Raipur. 2. Harsh Kumar Singhal, Roorkee. 3. Kapil Puri, Jalandhar. 4. M.G. Sampath Kumar, Bangalore. 5. Deba Jyoti Roy, Patna. 6. Mahadevan Shankar, Secunderabad. 7. B. Suresh, Madras. 8. Sumita Basu, Calcutta. 9. H. Parameswaran, Secunderabad. 10. Rajeev Jain, Delhi.

SPORTS QUIZ-15

1. Lydia de Vega (Philippines)
2. Men's doubles
3. Morio Mai lost her bronze medal. She will be issued a duplicate by the AGSOC
4. Iraq who beat Yemen (Sanaa) 251-33
5. Three—gold in 1951, silver in 1970 and bronze in 1982
6. Kaori Yanase (Japan)
7. At the IX Asiad

Winners

(Since there were too many all-correct entries, one-error entries could not be included in the draw of lots.)

First Prize. 1. Atul Vajpeyi, Kanpur. 2. Avaneesh Kumar, Ajmer.

Consolation Prize: 1. P.C. Rohila, Rohtak. 2. Rajender Kumar Rohila, Rohtak. 3. Prabhat Kumar Sahoo, Bhubaneswar. 4. Sudhir Gupta, Delhi. 5. Hemant Nahta, Jaipur

First prize awarded by

Rupa & Co

3831, Patodi House Road, Daryaganj, New Delhi-110 002.

SOLUTION TO KENWORDS-16

Winners

(Since there were too many all-correct entries, one-error entries could not be included in the draw of lots.)

First Prize: 1. Sanjoy Mohanty, Rourkela. 2. D.J. Sanyal, Nagpur.

Consolation Prize: 1. K.R. Tata, Rourkela. 2. Vinai Kumar Saxena, Lucknow. 3. Upendra Rawat, New Delhi. 4. Jagdish N. Srivastava, Lucknow. 5. M.S. Rama Krishnan, Coimbatore.

First prize awarded by

CCTIMES WATCHWORD Winners

The CCTimes Watchword quiz contest was recently held at Stiram College of Commerce, New Delhi. Fifteen teams (comprising two members each) participated from as many colleges.

The winners are:

1. CBM Chandigarh—Rajdeep Singh & Arvind Jain
2. YMCA Faridabad—Sanjay Khurana & Anil Grover
3. St. Stephens—G.T. Mathew & Rahul Singh

The contest was compered by Arshiya Bawa and Pradeep Gupta, ex-time successive winners of the 'Watchword' quiz programme conducted by Delhi Doordarshan and supported by devisers of the same programme.

Candida & Faith Healer

THE NEW Year opened with a bang for theatre-lovers in Delhi as the National Theatre of Great Britain staged two plays to packed houses at the Kamani Auditorium in January. The plays, Bernard Shaw's *Candida* and Brian Friel's *Faith Healer*, were directed by John Russel Brown and were sponsored by the Indian Council for Cultural Relations and the British Council. Performances of these plays were also given in Calcutta, Madras, Bangalore, Hyderabad and Bombay during the seven-week tour of the British actors. The National Theatre of Great Britain, set up by the British Government, has earned a great name at home and abroad and has had such personalities as Sir Laurence Olivier for its director.

Candida is one of Shaw's early plays which was first staged for the public in 1897 at Aberdeen; it has been repeated a number of times ever since, the last production being in 1977. The play centres around a ravishing beauty, *Candida*, who is confronted with a choice between her self-centred clergyman husband, Morell, and a passionate young poet, Marchbanks, who adores her. There are some hilarious situations in the play replete with Shaw's delightful wit.

In contrast, *Faith Healer*

is much more serious in nature, becoming somewhat tedious at times. It is about an adventurous man called Francis Hardy who travels from town to town, claiming miraculous cures through his supernatural healing powers; he is accompanied by his wife Grace and manager Teddy. These three characters, who comprise the entire cast of the play, appear on the stage turn by turn and each narrates his or her version of the same sequence of events. Through the dramatic device of soliloquy (the act of talking out aloud while or as if alone), light is thrown on the characters and their personal relationships. *Faith Healer* is a play of an unusual nature and hence provides a good change from the regular fare which English theatre fans are subjected to in Delhi.

Among the various actors, two deserve special mention for both the plays: Michael Byrne, who plays Morell in *Candida* and Teddy in *Faith Healer*, has done a good job in both the roles. He is a seasoned stage-actor who has also appeared in films like *A Bridge Too Far*, *The Eagle Has Landed*, *The Medusa Touch* and *Force 10 From Navarone*. Mary Miller, who plays *Candida* in the first play and Grace in *Faith Healer*, is also praise-

Above: A scene from *Kanjoos*. Left: Michael Byrne as Teddy in *Faith Healer*.

worthy, particularly for her wonderful piece of acting as Grace Hardy. Lastly, kudos to John Russel Brown for his excellent direction.

Kamla

VIJAY TENDULKAR'S much-talked-about new play *Kamla* created ripples in the theatre-world of Delhi when it was staged in the latter half of December by 'Abhiyan' under Rajinder Nath's direction. It attracted a good deal of attention from the theatre-lovers and the press as it was based on the real-life story of a journalist, who bought a tribal woman from Madhya Pradesh to expose the flesh-trade racket which still thrives in some parts of our country.

The play focusses on an important social issue — women's position in our society. *Kamla*, the tribal woman, is a symbol of the Indian women who are treated as inanimate objects — commodities which can be bought and sold in the market. In the process, Tendulkar also takes a dig at journalists and the emerging trend of investigative journalism, drawing a sharp contrast between the old and the new-wave journalism.

Kanjoos

THIRD YEAR students of the National School of Drama (NSD), New Delhi, presented *Kanjoos*, a Hindustani adaptation of Moliere's popular comedy, *The Miser*. Adapted into Hindustani by Hazrat

Awara, a byword in Parsi theatre, the play was directed by the NSD Director, Prof B.M. Shah, who is also an actor and playwright. The play, which won much acclaim, had been successfully staged in the past too, dealing as it does with an eternal theme — young love pitted against an old man's follies.

What, however, holds the play together is restrained and well-coordinated acting. Individually, Ravindra Khanwilkar as Mirza, the miser and Manjul Kishore Verma as Nasir, the lover of Azra, Mirza's daughter (played by Sushmita Mukherjee), deserve special mention.

Kal College Band Rahega

KAL COLLEGE Band Rahega is a satire on the university system. Written by Prof C.D. Sidhu, a pillar of the Collegiate Drama Society in New Delhi, the play centres around two innocent students falsely implicated in a sex scandal leading to the 'boys' suicide. What follows is a scathing indictment of teachers, students, disciplinary committees, the work. The playwright says: "The events, characters and dialogues have been lifted straight from life. He who can prove anything in the play to be untrue or concocted shall be given a prize of Rs 1,000." Which is not a very optimistic picture of university life, as it is, in India today.

Hemendra S. Bartwal
& A.P., New Delhi

TO MAKE INTRODUCTIONS

When you are a child you start with "Hello" or "How do you do?"

When you grow up and move among grown-ups what do you say? Lots more besides "Hello". Our last instalment on introductions.

Introducing others indirectly:

Whenever it is desirable or convenient to include someone in your conversation without making an introduction, you can use the so called indirect introduction.

For example, Ali Hassan is talking animatedly to a small group about the Indian marking system. An American, a stranger to Ali, joins the group before he finishes what he has to say. Ali pauses momentarily and looks at the stranger. Someone in the group should rise to the occasion and make an indirect introduction by saying, "Do go on, Ali. I'm sure Ray will enjoy hearing the rest of your talk." Ali smiles at Ray and goes on. The newcomer is thus drawn into the

group without interruption to the others.

How to handle introduction 'situations'

When your name is mispronounced. At a social gathering, when someone mispronounces your name, say nothing. However, if the person you've been introduced to is someone you'll be associating with later, then it is entirely proper to say, "I'm sorry but I think you misunderstood my name. It's *Mitsuko*, not *Machiko*."

When you are called by someone else's name: When someone introduces you as "Mr Lee" when you are Mr Hoshino, smile and say, "I'm Hoshino." (Re-

When your name is difficult to pronounce: If the person introducing you seems to have difficulty pronouncing your name, smile and say it *slowly and distinctly* for all concerned. You might even wish to spell it out for them. Or if you have a nickname, you might smile and say, "But everyone calls me 'Lucky'."

When the person introducing you seems to have difficulty recalling your name. Go to his rescue at once. Smile and say your name slowly and distinctly.

When you are introduced twice: Let the person doing the introducing finish what he has to say. Do not interrupt him with, "Oh, I know him," for this is rude.

When a name has been mumbled: If the name of the person to whom you've been introduced is not understood, it is courteous to ask to have it repeated by saying:

"What did he say your name is?"

"The name again, please?"

Or you might prefer to ask someone else later, so that when you speak to him again you can call him by name.

When you have to introduce someone whose name you have forgotten: "I'm sorry, I have your name at the tip of my tongue, but..." (And he will take the cue and furnish his name.)

"Your name escapes me at the moment."

"Mr. ? (and when he furnishes the name) Of course! Thank you."

It is much better to ask for his name and introduce him than to fail to introduce him altogether.

Booktalk

THE ART OF RECRUITING

If persons meant for the loony bin are voted in to administer a nation—

God help that nation, if duffers are forced on a business house—bankruptcy may not just be an accident. India today may not be an example of these extremes. But that is not to say they don't exist. Making the electorate more responsible and rational in exercising its franchise is still a Himalayan task; making business houses realise the need for the right men to run the show is still possible.

But here lies the catch. Who is the right man and how does one identify him? M.R. Kohli in *Search For Managers* provides the answer. A World War II army officer, ex-Executive Secretary of the Delhi Management Association and former Editor of *Management Review*, Kohli rightly considers "the problem of selection as old as the civilisation itself".

The book begins with an analysis of the selection techniques followed in the past—moving from ancient Rome and Egypt to India under British rule and after. Says Kohli: "In India before the Second World War...there was a haphazard and limited system of selection." In his description of the Indian system (or non-system), he minces no words and omits no names. He credits the British for the careful and methodical recruitment of officers to the Indian Civil Service, but squarely blames them for the vegetative state of Indian management

***SEARCH FOR MANAGERS** by M.R. Kohli; published by Indian Institute of International Understanding, New Delhi. price: Rs 50; pages: 126.

shortly after independence. Nor does he condone the Indians for 'introducing' nepotism and favouritism in the recruitment of personnel which, needless to say, resulted in maladministration and mismanagement after '47. "Whom you knew rather than *What you knew* mattered and still does today." Merit and talent have taken a backseat to blood ties and powerful pulls. The end result: brain drain.

In the subsequent chapters, Kohli suggests forthrightly the ways and means for getting the *right* man for the *right* job. From selecting of dailies for placing 'wanted' ads to the final interview, the book deals with all the steps in depth and quite simply. Of interest to small and medium industries is the format of ads, the various written tests, the different types of interviews and the logic and usefulness of each.

The author has drawn heavily from his visit to the US in 1960 as a member of the National Productivity team. The book is peppered with American sayings—and with good reason. Consider this US Rail Road maxim: "When the President retires an office boy is recruited." That is, recruitment from outside for filling up high-level posts is almost never practised in the US. Kohli advocates this, claiming it boosts the morale and imbues the worker with a sense of loyalty and dedication (remember Japan?). He attributes the ruin of the Indian Iron & Steel Co. Ltd. to its chairman's penchant for recruiting only Englishmen for the higher posts (from the Chief General Manager to Plant Superintendents) without giving suitable Indians even a trial. Many such serious subjects are enlivened with a quote or a personality or an amusing anecdote—and therein lies the book's punch.

N.V.S., New Delhi

BECK STREET

TOPPERS OF '82

Nineteen eighty two was the year of the cat. The biggest success of the year was John Cougar (real name John Mellencamp) who rose from relative obscurity to become the top-selling artiste of 1982 with his multi-platinum album *American Fool*. Three songs from the LP also fared well on the singles charts. Cougar who has been compared to such streetwise rockers like Bob Seger and Bruce Springsteen was voted top male in both pop singles and pop album category.

However, *Eye Of The Tiger* by Survivor was voted top single of the year. It was featured in the film *Rocky III* and the

success of the film made the single as well. Other singles that gave it a close run were *Abracadabra* by The Steve Miller Band and *Centerfold* by the J. Geils Band.

The self-titled debut LP *Asia* by the group of the same name wrested top honours as No. 1 LP of the year. The super group comprises Steve Howe, Jeff Downes, John Wetton and Carl Palmer. Other top groups—The Human League and Men At Work.

Among the recording duos that did big were Hall and Oates who had three hit songs from their album *Private Eyes*, the Canadian beer guzzling brothers Bob and Doug McKenzie and Paul McCartney and Stevie Wonder with their duet single *Ebony And Ivory*.

Greek-born synthesiser player and composer Vangelis picked up two nominations for the best instrumental and best sound-

Anti-clockwise from right: 1. Diana Ross: Won the top spot. 2. Asia: Top of the charts. 3. Stevie: The 'wonder' singer of '82. 4. Willie Nelson: Sang his way to the top. 5. The Human League: Made their presence felt.

Olivia Newton-John with only a single *Heart Attack* and a *Greatest Hits Vol. II* album to her credit bagged the best female vocalist honours. Other leading female contenders were Joan Jett (*I Love Rock & Roll*) and the all-female group Go-Gos (*Beauty And The Beat* and *Vacation*).

Top jazz vocalist was Al Jarreau (*Breaking Away*), top jazz soloist saxman Grover Washington Jr and for the top new jazz artiste the undisputed choice was the young trumpet prodigy Winton Marsalis. The Crusaders were once again voted top jazz group while the top new jazz group was a line-up comprising Chick Corea, Stanley Clarke, Joe Henderson, Chaka Khan, etc.

Top male country artiste turned out to be Willie Nelson who also had the top single (*You Were Always On My Mind*). Top new male singer was Ricky Scaggs and top female artiste was Rosanne Cash for her LP *Somewhere In The Stars* and her run of chart topping singles.

In the gospel selection Barbara Mandrell scored as the foremost female artiste while the Rev. Al Green dominated the male charts for the top spot. Top black artistes were Stevie Wonder and Diana Ross respectively while Rick James scored for the best album.

And finally, the top-selling video cassette for the last year was *Star Wars*, which was one of the biggest films in box-office history as well.

CCTIMES QUIZ CONTEST-9

**WIN Rs 24,000
IN PRIZES
EVERY YEAR
WIN Rs 2,000
A MONTH**

BY PRANAY PIPARSANIA

1. Which famous artist's surname was Buonarroti? Simon?
2. Name the only US President who was a bachelor.
3. What is the most common name for 'adipose tissue'?
4. Who invented the 'zipper' or slide fastener?
5. Adoor Gopalakrishnan's film *Elippathayam* (The Rat Trap) was the second Indian film to have won the British Film Institute's Award in 1982. Which was the first Indian film to win this award?
6. What is Shintoism?
7. Where are the 'Islands of Langerhans' situated?
8. On which ship did the Indian team make its second trip to Antarctica?
9. When was martial law finally suspended in Poland?
10. Which religious sect does the Aga Khan head?

HOW TO ENTER

● Print the answers neatly in capital letters alongwith your name, age and address.

● You may send in any number of entries, but each must be numbered accordingly and accompanied with its respective COUPON.

● Though all your entries will be included in the draw of lots, you will be entitled to only one prize—the highest in case you're getting more than one.

● The decision of the judges is final and binding. No correspondence will be entered into.

Closing date for the three contests: March 27.

Address your entries to: The Editor, Career & Competition Times, 10 Daryaganj, New Delhi-110 002.

Solutions to this issue's contests will be published in May.

Solutions to SPORTS QUIZ-15, KENWORDS-15 and CCTIMES QUIZ CONTEST-7 on page 92.

SPORTS QUIZ-17

BY NAROTTAM PURI

WIN Rs 100 IN BOOKS

1. Where will the 1984 Olympics be held?

APRIL 1983 □ Rs

BANK RECRUITMENT

PROBATIONARY OFFICERS/CLERKS

"Specialised Training in NSB Regular/Correspondence Courses has proved to be the guaranteed way to secure jobs in Banks as Probationary Officers & Clerks."

-says Editor, Citylight, Bombay.

If you have applied to State Bank of India or any Nationalised Bank Boards, for PO or Clerical Post, join our Course now.

Banking: A Rewarding Career:

Nearly 2500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. Any graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And after nationalisation, Bank jobs have acquired a new status because now the Banks have taken upon themselves the responsibility of building a better India. Today in our Banks, our social ideals find a dynamic expression. Bank jobs, therefore, offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects—(1) Reasoning (verbal, logical, non-verbal), (2) Quantitative Aptitude, (3) General Awareness and Current Affairs, (4) English Comprehension, (5) Essays, letters, précis writing—are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old, but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, ECGC as Officers. The subjects, syllabus, pattern of tests and examining body (NIBM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success-oriented students join the Course well in advance of the test and benefit by our step-by-step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers/Clerks are declared at intervals of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants, 2300 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A provenly competent, specialised and thorough coaching becomes a MUST.

NSB's Faith in Specialisation:

National School of Banking, headquartered at Bombay, was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams—of POs and Clerks. It has grown rapidly and is now the largest pre-recruitment training institute in the country. Our continuous research and on-going study of objective and descriptive exam question papers have contributed to our present pre-eminence as the central institute for BANK RECRUITMENT training.

JOIN NOW AND PREPARE FOR A RICH AND REWARDING CAREER. For details of vacancies, application forms and our special courses, write today with Rs 2/- P.O. or M.O. to

Appointments

SHRIRAM

MANAGEMENT TRAINEES

We are an enterprise of the SHRIRAM Group engaged in the manufacture of USHA electric fans, sewing machines and fuel injection equipment.

We have vacancies for result-oriented, self propelling youngmen capable of rapidly qualifying for managerial positions in various Commercial/Technical functions at our factories at Calcutta, Hyderabad and Agra, and Head Office at New Delhi.

MANAGEMENT TRAINEES — COMMERCIAL (P—83/3)

Applicants should be graduates in Commerce, Mathematics, Law, Physical Sciences or Engineering or have Post Graduate degree/diploma in Business Management from reputed institutions.

MANAGEMENT TRAINEES — ACCOUNTS (P—83/4)

Applicants should be Commerce graduates, preferable CA's or ICWA's or Post Graduates in Business Management (majoring in Finance) from reputed institutions.

MANAGEMENT TRAINEES — TECHNICAL (P—83/5)

Applicants should be graduates in Mechanical/Electrical/Metallurgical/Production/Industrial engineering from reputed institutions.

Applicants should have above-average academic and extra curricular record and demonstrable qualities of leadership. Those qualifying this year are also eligible.

Persons with upto two years experience and having the above-mentioned background, may also apply. Credit will be given for suitable experience.

REMUNERATION

Starting emoluments will be over Rs. 1900 per month plus other facilities like contributory provident fund, gratuity etc.

Successful candidates will be put through intensive on-the-job training and will then be placed in key positions with integrated responsibility in assigned operational areas, with attractive pay and perquisites.

Upper age limit for these positions is 26 years.

Please apply within 15 days with details of age, qualifications, experience, extra-curricular activities etc., alongwith a 300 words resume on "WHY I CONSIDER MYSELF SUITABLE FOR THIS POSITION", in an envelope marked with the job code number, to: The Jay Engineering Works Ltd., Post Box No. 692, New Delhi-110 001.

Promises To Keep

People saw in NTR (*Current Events: Assembly Elections, Feb '83*) the do-gooder that he is on the screen, and expecting him to fight against evil as in the celluloid drama, catapulted him to power. They saw only his image in every Telugu Desam candidate, and now every Telugu voter will be keenly watching the establishment of the Rama Rajya he promised.

Some of his promises are high sounding: like women not having to be afraid of walking alone in the streets even at midnight. This is more a moral obligation on the part of every citizen than purely the responsibility of the state; the supply of rice at Rs 2 a quintal and free nutritious mid-day meals and a house to every government servant will make a severe dent in the public exchequer.

Then, the ten commandments that he issued to his party colleagues have to be taken with a pinch of salt. While these form the hard core of his success as a state leader, he should also remember that the people cannot be taken

for a ride with the propaganda of regional languages.

Prashant Kumar Moha, Agartala
Prize-winning Letter: RE-10

States The States

Alongwith Punjab (*Focus, Feb '83*) some other states are also being adversely affected by the growing regionalism and narrow outlook of certain people due to linguistic and regional attachments. Linguistic reorganisation of the states stimulated fissiparous and divisive tendencies, which, in turn, are endangering India's national integration. The need of the hour is to undo this blunder and once again reorganise the states on the basis of similar economic problems, geographical contiguity and administratively-viable zones.

Gurmeet S. Kaushal, Patiala
Prize-winning Letter: RE-10

Reorganise The States

Alongwith Punjab (*Focus, Feb '83*) some other states are also being adversely affected by the growing regionalism and narrow outlook of certain people due to linguistic and regional attachments. Linguistic reorganisation of the states stimulated fissiparous and divisive tendencies, which, in turn, are endangering India's national integration. The need of the hour is to undo this blunder and once again reorganise the states on the basis of similar economic problems, geographical contiguity and administratively-viable zones.

Gurmeet S. Kaushal, Patiala

Prolonged negotiations can't solve the problem. Some use of force by the government is necessary—but only against those indulging in violence. Talks with those who are reasonable can continue.

Manoj K. Sharma, Muzaffarnagar

Computer Rule

Nuclear weapons technology (*Current Events: START Talks, Feb '83*) is rapidly advancing to a point where it may not be controlled by human beings: the decision about whether to launch the weapons will soon be made by computers. Should the two super-powers deploy the next generation of nuclear weapons, the risk of war by accident will increase manifold.

Akhil Kumar Gupta, Agra

An Error Of Judgment

With reference to *Titbits: Some Moony Facts* (Nov '82), I was sorry to find blunders in a reputed magazine like yours. In point (5), 'sunrise' has been wrongly written for 'sunset', and in point (7) '1/400th' has erroneously replaced '1/4th'. Please clarify the points for your readers who, I am afraid, will otherwise cram the facts alongwith such inexcusable blunders.

Pritpal Singh, Amritsar

The writer replies.

Regarding the first point: A nearly-full moon appears shortly after sunrise for many days which helps the harvesting farmers with extended light. Source: *Science Today*, Oct '81. About the second 'error', actually the moon's diameter is 3,476 km, which is only 1/400th of the sun. Since the sun is also 400 times farther from the earth (compared to the moon), both the sun and the moon appear to have the same size when viewed from earth (Diameter of the sun is about 13,92,000 km.) Source: *A Dictionary Of Science* by Uvarov, Chapman and Alan Isaacs, page 434, last line. I think this proves that the reader's claim is erroneous.

Rajesh Sharma, Sonapat

Errata

Regarding *News Capsule* (Feb '83), B.K. Singh was wrongly mentioned as the former Chief Minister of Andamans. He was the Development Commissioner. And with reference to *Know Your Constitution* (Feb '83) Andaman and Nicobar does not have a chief commissioner as mentioned. Like other Union territories, now, Andaman and Nicobar Islands also have a Lt Governor.

Jina Prakash, Bihar

Change For The Better

Presuming that we lack political determination to bring about revolutionary changes in the present education system (*Hello Folks, Feb '83*), I suggest marginal changes to improve it.

In the appointment of lecturers the depth of knowledge and power of expression should be counted equally.

Toppers of every class should be automatically nominated to the executive body of students' union. An equal number should be elected.

At least 75 per cent of those who want to continue studies after schooling should be sent to technical institutions.

Pravin B. Sharan, Ranchi

While it's true that a part of the remedy lies in bringing about organic changes in the education system and policy, we can hardly deny the fact that the malady is primarily an upshot of a sharp decline in our national character. I feel only moral courage on the part of students and teachers can retrieve our universities from the present morass because no enduring reform can be brought about by seeking mechanical solutions of what may virtually be identified as a crisis of character.

Vinod Kumar Sinha, Saharsa (Bihar)

Hello folks...

Some time back I read an interesting story called *Appointment At Samarkand*. The story goes like this: There was a rich man of Isphahan whose greatest desire was to have a long life. One day he heard a loud knock and on opening the door found a *yamdoot* standing before him. "I want to talk to you," said the *yamdoot*. However, before he could finish, the man of Isphahan banged the door and galloped away on his fastest horse. For three days and nights,

he moved around restlessly trying to find a place where no one could find him. Finally, he reached a small unknown inn in Samarkand and booked himself a secluded room. Heaving a sigh of relief he walked into the room. As soon as he entered, he saw the *yamdoot* waiting inside. "I am glad you came," said he. "I was afraid you might be delayed. Three days ago I had come to you in Isphahan to inform you about our date at this time, in this room."

The moral of the story is that you can postpone a problem only for a short time. The man of Isphahan could have lived in peace for three days if he had not tried to run away from the situation. This happens with most of us. We think that by postponing a problem we will be able to escape it. Instead, we land ourselves in a much more serious situation. Handling the problem at that stage gets more difficult and we have to pay a heavier price. This is true at the personal as well as the national level. Most of us keep postponing our studies till exam time. At the national level we have been postponing solutions to problems like the Assam foreigners' issue and the Bombay textile mill-workers' strike. The heavy loss in terms of lives and money is common knowledge.

Life is full of problems; some major, some minor; some affect our lives seriously, some do not. Like Kamraj, the famous diplomat, we are used to saying "*pakaren*" (we will see it later).

The *pakaren* approach can be a very harmful one. The right strategy should be to tackle the situation whenever it arises. It may look difficult and you may buy a little peace by postponing it. But how long can you control a serious illness with a simple painkiller?

You need to develop a positive

attitude to deal with the situation immediately. To develop this approach the first step is to understand the problem—its nature and origin. Find out its various aspects and the people associated with it. Have a discussion and try to get to the root of the problem. The discussion will give you an insight into its causes and you will be able to understand other people's points of view.

The second stage is to grapple with the problem. The emphasis here should be on finding out different persons' views on the best way to tackle it. This should be an interesting exercise as various people will offer various suggestions. Some of them may be contradictory. But you will be able to have a number of alternatives to choose from.

The final stage is to mentally analyse and evaluate the whole situation. By then you will know the exact nature of the problem and the possible ways of solving it. Make a thorough appraisal and decide on what would be the best solution. Once you have made the decision you should try to find the best way of implementing it.

What we have just offered is a general pattern. You don't have to follow it rigidly as no two situations are similar. You may have to choose the best way of handling the situation according to its nature and severity. Some situations demand quick and immediate action while sometimes you get sufficient time to think and act. How you handle the situation and come out of it is a test of your personality.

And give your teeth a long life.

Only Forhan's has an exclusive astringent to strengthen gums.

The tingling sensation tells you it's actually working:

Even healthy teeth need the support of strong gums — if gums become weak and spongy, your teeth no longer have a firm foundation. That's why Forhan's is formulated with an exclusive astringent that helps to tighten and

contract the gum tissue. The tingling sensation you feel when you brush your teeth with Forhan's is the astringent at work — making your gums stronger, firmer. So that your teeth stay healthy longer.

So give your teeth a firm foundation — Use Forhan's the toothpaste with an exclusive astringent.

If your gums are weak, even healthy teeth become loose

Forhan's exclusive astringent tightens gum tissue

making your gums stronger, giving your teeth a long life

Trust Forhan's It's the toothpaste created by a dentist.

ASSAM

BLOODY MANDATE

BY N.D. AROHA

The unseemly drama of the 1980 Lok Sabha elections was repeated during the 1983 Assembly elections in Assam, this time, with poll boycott in greater numbers, and increased bloodshedding. The elections were ordered for the Legislative Assembly in Assam following the failure of negotiations between the Centre and the agitationists, led by the All Assam Students Union (AASU) and the All Assam Gana Sangram Parishad (AAGSP), on the question of the foreign nationals issue. As the Centre went ahead with the preparations for holding elections, the agitationists continued with the plans of boycotting them. The non-communist national political parties save the Congress (S), responding to the agitationists' call, stayed away from the elections.

The agitationists followed up their boycott call by arranging bandhs, announcing total non-cooperation, exploding bombs, blowing bridges and railway lines, burning houses and cars of the candidates, disrupting election meetings, issuing death threats and even attempting assassinations.

On its part, the Centre, determined to compel the people to exercise their franchise in a most uncongenial atmosphere, deputed 50 battalions of armed police, arrested the agitation leaders under the National Security Act, invoked the Assam Special Powers Act, imposed press censorship and brought in officials from outside

the state to conduct elections in place of the hesitant Assamese officials. Tension reached a peak as Assam drew close to the election days.

And then that happened what nobody had dreamt of. The eruption of violence lead to massacres and carnages at Nellie, Gohpur, Mangoldoi, Dhing, Goalpara and other places. Amidst violence, and dead bodies spread over many areas, the elections were conducted, though at places the poll had to be discontinued.

The Congress (I) can hardly rejoice over its victory in Assam, even though it obtained a clear two-thirds majority in the 108-seat Assembly, polling for which had been completed by February 20. Amidst such unprecedented devastation and against an extremely low turnout of voters, where the contest was virtually without any resistive

opposition, the elections hardly bear any meaning or the results any legitimacy.

The Assembly results have not solved the Assam problem. There may be many more complications ahead for the Congress (I) ministry in Assam. It is too optimistic to believe that the pro-agitationists would happily recognise the new ministry and thus would be willing to discuss and resolve issues pertaining to the state, the foreigners problem in particular. It is also too optimistic to think that the Centre would proclaim President's rule in Assam immediately after fulfilling its constitutional obligation of installing the state government, as is required under Article 356, and thereafter would open the dialogue with the agitationists. The state's troubled days are not yet over.

What happened in Assam was

FACTS AND FIGURES

| Year | Population | Territory |
|------|---------------------------|--|
| 1941 | 66,94,790 | 1952 |
| 1951 | 80,28,856 | Assam on the whole of North-East India minus Manipur and Tripura |
| 1961 | 1,08,37,329 | 1962 |
| 1971 | 1,46,25,152 | Nagaland formed out of the 1952 Assam |
| | | 1971 |
| 1981 | 1,99,02,826 (Provisional) | Meghalaya, Arunachal Pradesh and Mizoram formed out of 1962 Assam. |

something that could have been averted. The Centre could have adopted some other means to meet the constitutional requirement. An amendment could have been made in the Constitution to extend the period of President's rule beyond one year. The Centre's plea that such a constitutional amendment would not have been possible without the cooperation of the Opposition members in the Parliament, particularly in the Rajya Sabha, and that such a cooperation was not readily and adequately available, were not sufficient enough to have compelled it for taking a decision to hold elections in Assam. The Centre should have treaded the familiar path of obtaining a constitutional amendment rather than of testing its strength against that of the uncompromising agitationists. The pro-agitationists' responsibility for what has happened in Assam is even greater. Assam has suffered more at the hands of Assamese than that of the others. Instead of boycotting the elections and holding the state to ransom, the agitationists could have utilised the elections as a platform for demonstrating the mass support which they so fondly claim. The agitationists' plea that the present voters' list could only benefit the Congress (I), is hardly acceptable because it was on the basis of this list that the Congress (I) had lost the favour of the Assamese electorate in 1978. The participation of the agitationists in the Assembly elections could have possibly, given them enough power to argue their case with the Centre more forcefully than they can do now.

But the confrontation was

not averted. Elections were not postponed. And Assam met the worst tragedy—a conservative estimate fixes the poll toll around 1,500. All this because of the foreigners' issue on which no settlement relating to the cut-off year could be arrived at between the agitationists and the Centre. It took the form of agitations at the time of Mangoldoi Lok Sabha by-election in March 1979, when the deletion of the names of infiltrators from the voters' list was demanded. The by-election was not held, but the agitation grew in strength day by day. All efforts to resolve the foreigners' issue, since 1979, have met with failure.

To begin with, the agitationists, led by the AASU and the AAGSP, demanded the detection and deportation of all those who had entered Assam after 1951. But later they agreed to accept 1961 as the cut-off year. The agitationists seem to be in no mood to accept those who had entered Assam after 1961. According to their estimate, there had been 38-lakh infiltrators between 1961-1979, from which 18 lakhs had found their way into the voters' list. As a result, the agitationists claim that every fifth voter does not belong to the state. Such an influx of immigrants, the agitation leaders feel, would not only transform the character of political power in Assam, but it may as well result in the dominance of the non-Assamese over the Assamese, in their economy and culture. The Centre, on the other hand, agreed to deport all those who had entered Assam after the emergence of Bangladesh and, in fact, had deported 3,20,000 of the 3,75,000 persons already detected.

between the Centre and the agitationists over those who had entered the state between 1961-1971, whose number is around 1.4 million. Neither did the agitationists appreciate the Centre's desire to help honour the national commitment in accommodating the uprooted people from East Pakistan, nor did the Centre fully share the agitationists' fear that a large influx would do unremedial harm to the Assamese culture.

The state of Assam has had an agonising history. At the time of independence, it had an area of over 2 lakh sq km, excluding the then North East Frontier Agency (NEFA), now Arunachal Pradesh. Today, it has 78,523 sq km. The cut in its area has been necessitated because Nagaland, Meghalaya and Mizoram were carved out of Assam. As the state went on losing its territory, it also naturally went on losing its population. But the figures prove otherwise: between 1941 and 1951, the rate of increase in population in the state was about 20 per cent; between 1951 and 1961, it was 34.97 per cent; between 1961 and 1971, the increase was 34.95 per cent; and between 1971 and 1981, it was about 36 per cent. These figures show that there has been an unnatural growth of population in the state. This may be attributed to the large-scale migration from East Pakistan.

There is truth in the Centre's assertion about Assam's composite character. Of the total 1,652 languages and dialects in the country, 442 are found in Assam only. Similarly, there is hardly any religion which does not exist in the state. The same can be said about the numerous ethnic groups in Assam.

Added to these diversities is Assam's economic poverty. The state's economy is predominantly an agrarian one and 70 per cent of its population derives its livelihood from agriculture, which needs to be developed. In Assam, there are either floods or droughts; its irrigation projects are yet to gain pace. Though rich in industrial raw material, Assam's

INTERVIEWS TALKING YOUR WAY INTO THE IAS

IAS probationers in Mussoorie were suddenly requisitioned for poll duties in Assam. The baptism was bloody no doubt, but the recruitment procedures and training equips Civil Services incumbents to take on these and other more difficult tasks. KHURSHID A GANAI, second in the merit list of the All-India Civil Services Exam '81, writes about one aspect of the selection procedure—the interview—and contends that it is more than a mere test of personality.

Many IAS and allied services aspirants tend to discount the importance of preparing for the interview. They think that since it is a personality test, preparation of a month or two is not likely to yield a good score. True, personality is shaped over long years of growth and maturing, but IAS interviews rely mainly on the test of knowledge as an indicator of personality. This is done through a question-answer session of about half-an-hour. Thus, if you can anticipate the likely questions to be asked in the interview and try to find appropriate answers, your chances of success improve.

The interview is taken by a board and its chairman has your bio-data. He initiates the discussion. The first few questions are invariably general in nature, relating to your educational, job or family background—the emphasis is normally on the first two—depending on what attracts the chairman's attention. You may also be asked why you desire to enter that category of the civil services you prefer most. If you are already working, the questions can be more penetrating. The chairman's questions are very important since they set the tone of the interview and lead other board members to evaluate your performance on the basis of your answers. The atmosphere

your confidence. Hence, it is imperative that you go thoroughly prepared with the important aspects of and the latest developments in your field of study or job. You must have adequate information about your school, college and university, the state of education in your district and state and many more related issues and aspects. Above all, give positive and refreshing answers to questions like why you want to join the IAS or any other service for that matter. Do not point out the negative aspects of your present service which may be compelling you to leave. Emphasise on the positive pull factors like challenge, variety, job satisfaction in the case of the IAS, its public nature and so on. To that extent a limited amount of idealism and enthusiasm is desirable.

More often than not, the chairman, after having satisfied himself with a few questions, requests other members to take over. So you have to take on every member successively. Every member will ask questions generally related to his own academic and professional background but which impinge on the service of your choice. However, there could be purely academic questions if the backgrounds are same or similar. For example, a management expert is sure to ask you mostly academic questions if you are a management student, in addition to some on general topics. It is expected that you are thorough with your field of study. You should, however, be careful about the practice-oriented questions. For example, if you are a History student aspiring to join the IAS, a member with expertise in this subject may ask you to compare the functions of a Rajuka or a Faujdar with the present-day district collector.

Similarly, a Political Science student with the IFS in mind may be asked to express himself on the general foreign-policy patterns in ancient and medieval India. In this connection, Ashoka's relationship with the kings of West Asia and Ceylon and the foreign policies of Cholas and Mughals are important. The implication: members would like to know if you perceive some relationship between what you've read and what you're going to do. Likewise, an engineer might be asked questions on appropriate

pollution control, computer revolution and so on.

Besides, you must go prepared with the major social, political, economic, scientific and technological issues and debates related to India in particular and the world in general. For this, extensive reading of a good newspaper over two to three months will be sufficient. Assimilate the perceptive articles that appear on the editorial page and the special supplement. Remember, it is here that anything—and everything—can be asked. But then even the board members would have read the same newspapers and magazines. Therefore, if you have been keeping yourself abreast of all that's happening around you, you should face no problem in tackling such questions.

It's equally important that you exhibit a process of logical thinking when you're given a problem for solution. If, say, you're asked to name the state bordering Madhya Pradesh and you come out with Andhra Pradesh, Rajasthan, West Bengal, etc, you are obviously not working in a logical manner. Ideally, you must start with one bordering state and then move clockwise or anti-clockwise and list the others. You may miss one, but as long as your approach is correct you'll be awarded good marks.

Questions may not always be factual; they may focus on something true-to-life. The approach for answering them isn't very different, though. If, for instance, you're asked: How will you tackle the student unrest problem in your district? Start by analysing the problem; look for preventive measures and alternative courses of action; then choose the best in the face of the situational constraints.

Some general tips for success in the interview:

- Don't ask counter questions or try to evaluate any member by comments like "that's a good question".
- Don't be sarcastic. It pays to be frank and straightforward but polite.
- Avoid criticising the present set-up in the country and the institutional framework that it has chosen.
- Don't talk high of your achievements because that is self-praise. Show that you are humble and gentle.

1982 was an eventful year when we produced 80,000 mopeds.

1983 promises to be still more rewarding with our production of largest number of mopeds in India!

Hero-Majestic Deluxe Moped

An automotive wonder on two wheels all set to set up a new record of performance

We have always been ahead of time on our production schedule. Quality being the essence and economy being the basic factor, we produced and sold 80,000 Hero-Majestic Mopeds in a single year.

Today, we are riding the crest of popularity with a daily production of 400 mopeds. The finest power-packed machine, Hero-Majestic Moped has won laurels for reliability. The attractive looks in a spectrum of colours goes to make it your best buy. Besides the several outstanding features like fuel economy, braking efficiency, more load carrying capacity, telescopic front suspension, detachable V-Belt cover and multiple electric switch.

No wonder, people looking for an economically priced moped with minimum maintenance cost are going for Hero-Majestic.

IF YOU DON'T HAVE ONE, GET ONE!

MAJESTIC AUTO LIMITED, C-48, Focal Point, Ludhiana-141010

MAJESTIC

Above: The Army Goes East: Lebanese soldiers examine papers at a checkpoint in East Beirut after moving into the area to take control of the Christian half of Beirut (note portrait of assassinated Phalangist President elect Bashir Gemayel atop a building in the background) East Beirut had been controlled by Christian militiamen since the 1975-76 civil war. Right: Historic Hug Cuba's President Fidel Castro hugs Prime Minister Indira Gandhi as he hands over the Chairmanship of the non-aligned conference to her in New Delhi on March 7. In a strikingly colourful opening-day ceremony, in the presence of 95 Kings, Emirs, Presidents and Prime Ministers, Mrs Gandhi delivered a keynote address that was remarkably sombre—an indication of the movement's growing maturity. It grew in numbers too: the strength of the movement has gone up from 97 to 101 with the inclusion of Bahamas, Barbados, Colombia and Vanuatu. Other highlights: Algeria, Comoros, Ghana, Guinea, Tanzania, SWAPO, Bangladesh, Indonesia, Iraq, Syria, Vietnam, South Yemen, PLO, Bolivia, Granada, Nicaragua, Surinam, Cyprus and Malta were elected Vice-Presidents of the movement for three years; India's Natwar Singh was elected Secretary-General of the conference and Benin's Foreign Minister as the Rapporteur-General.

R.B. Bedi

Courtesy AIS

Courtesy AIS

Above: Hawke Makes A Mark: Labour Party leader Robert Hawke (right) defeated Prime Minister Malcolm Fraser to sweep the Australian elections on March 5. Fraser announced a snap election a month back on the same day as Hawke took over the Labour Party leadership. Fraser's tactic boomeranged: first, Hawke shed his hawkish image and with characteristic drive burnished his party's image; and then he took the offensive when Fraser warned the electorate of a decisive trade union hold over government policy if Labour won. Hawke accused Fraser of distorting the Labour manifesto, convinced voters of a balanced approach in dealing with employers and the employed, and thus managed to swing the two per cent floating vote in his favour.

Above: Grapes Of Wrath: A group of wine-growers of the Narbonne region gathered on a bridge (on February 18) to throw a car onto a pile of burning tyres which were set aflame on the rail track of the Narbonne-Bordeaux line on the outskirts of Narbonne, Southern France. They were protesting against imports of Italian wine in the country. **Top left: Kohl Wins Poll:** West German Chancellor Helmut Kohl won the March 6 national elections, strengthening NATO's hopes of deploying US-built intermediate-range Pershing II and Tomahawk cruise missiles in the country, in the event the Washington-Moscow INF talks in Geneva fail. Kohl's Christian-Democrat liberal coalition won an absolute majority in the elections which saw a 90-plus per cent turnout. Hans-Jochen Vogel, the Opposition Social Democrat leader, lost all chances of becoming Chancellor after his party got 38.2 per cent of the votes. Vogel's mistake; he overpitched his election campaign by striking a left-off-centre posture and by playing into the hands of his party's left-wing, the anti-nuclear ecological "Green" Party and an assortment of far-left groups. The result: he frightened the "silent majority" of German voters into believing that to elect him Chancellor would be to weaken links with NATO, thereby jeopardising the country's security.

ECONOMY

SURVEY OF 1982-83

The pre budget Economic Survey (1982-83) proclaims continued stability in prices, despite a fall in agricultural production and some deceleration of industrial output. The GNP growth rate is estimated at 2 per cent for 1982-83 against 8 per cent in 1980-81. The average growth rate recorded for the first three years (1980-83) of the Sixth Plan matches the projected rate of 5 per cent. Population grew at an average annual rate of 2.5 per cent during the decade 1971-81. Hence, per capita income at constant prices (1970-71 prices) increased from Rs 626 in 1971-72 to Rs 720 in 1982-83 - an average annual increase of less than 1.5 per cent.

Agricultural production

Agricultural production is expected to decline by 3 per cent in 1982-83, against an increase of 5.5 per cent in 1981-82. The total foodgrain production is likely to be 6 million tonnes lower than the recorded output of 133 million tonnes achieved in 1981-82. Inadequate and late arrival of monsoons led to a setback in kharif production. The output of cotton is likely to be maintained. However, some shortfall is expected in sugarcane, jute and certain types of oilseeds. In order to attain a sustained growth in the yield of various crops, certain physical inputs like fertilisers, seeds and irrigation facilities should be made available in adequate amounts. During the year 1982-83, irrigation potential is likely to increase by 2.5 million hectares and the use of chemical fertilisers by 10 per cent over the preceding year. However, the target of bringing an additional area of 4.3 million hectares under the High Yielding Variety Programme (HYVP) is not likely to be achieved.

Industrial production

Industrial production is expected to increase by 4.5 per cent in 1982-83 against 8.6 and 5.6 per cent in 1981-82 and 1980-81 respectively. The industrial scenario in the first seven months of

1982-83 (April to October) presents a mixed trend. Impressive increases in production are recorded in certain key industries, e.g., crude petroleum (+32 per cent), coal (+6 per cent), sugar (+300 per cent), cement (+12 per cent), electricity (-8 per cent) and nitrogenous fertilisers (+10 per cent). At the same time production in eight industries fell. Some of these are: saleable steel (-3 per cent), cotton cloth (-27 per cent), jute manufacture (-10 per cent), commercial vehicles (-2 per cent), railway wagons (-21 per cent) and agricultural tractors (-25 per cent). The Survey points out that the causes for decline in the industrial production "are probably more fundamental than can be explained by the special events of a particular year".

For example, bad harvest and the textile strike. Fall in demand, sluggishness in export performance and stringency in bank finance also affected the production of these industries. While industrial production in 1982-83 has halved, 27 per cent more capital has been raised through shares and debentures compared to the record level attained in 1981-82.

Between April-August 1982, total man-days lost due to industrial unrest was 567 lakhs. There was a notable improvement in the performance of Central public sector undertakings. The growth in output was around 20 per cent in 1981-82 against 9 per cent in 1980-81. Output increased by roughly 9 per cent during April-October 1982 over the corresponding period last year.

Price trends

India is one of the few oil-importing countries which have achieved a significant reduction in the rate of inflation. The inflation rate fluctuated around 2 per cent since September 1982. Prices of raw cotton, sugar and crude petroleum registered a fall. At the same time sharp increases were recorded in the prices of seasonal commodities like cereals, pulses, fruits and vegetables, eggs, fish

and meat. The public distribution system played an important role in making adequate quantities of essential commodities available throughout the country. This helped in bringing down the rate of inflation. A decline in international prices, fall in industrial demand and favourable prices abroad also contributed in maintaining price stability.

Foreign trade and balance of payments

The year 1982-83 witnessed continuing strain in the balance-of-payments situation. Provisional data show that the trade deficit (difference between total exports and total imports) during 1982-83 is likely to be lower than 1981-82, though the magnitude of the deficit will be large. Imports grew by 12 per cent during the first half of 1982-83 and exports by 22 per cent. Balance-of-payments data are not available for 1982-83. However, there are indications that this deficit will be more than Rs 2,000 crores. An amount of Rs 638 crores was drawn from the International Monetary Fund under the Extended Fund Facility during 1981-82 and an amount of Rs 1,880 crores will be drawn during 1982-83 to improve the external resources position of the country considerably.

The year 1982-83 has been a 'testing time' for the Indian economy. The optimism expressed in the last survey to 'increase productivity and build a firm foundation for sustained growth' has been largely belied. The industrial structure is yet to regain the dynamism necessary for sustaining high rates of industrial growth. Breakthrough in the yields for rice, pulses and oilseeds is still a far cry. There is hardly any scope for complacency on the price front. Distribution of essential commodities through fair price shops and monetary stringency should continue to be the main plank of the price policy in the coming years. There is an urgent need to boost exports and reduce dependence on oil and fertiliser imports.

AN ANALYSIS

Budget is more than an exercise in raising resources for meeting normal expenditure of the government on civil administration, defence, etc. In a planned economy like ours, budget is the most crucial and concrete instrument for achieving national objectives and Plan targets. The pace of development must be sustained through an appropriate budgetary policy. The specific proposals with regard to allocation of public sector outlay to different sectors, savings of the community, borrowings and additional taxation should be formulated by taking into account, on the one hand, the Five Year Plan estimates and on the other, the prevailing economic conditions—particularly, the prospects with regard to the growth of Gross National Product (GNP), price rise, supply constraints, balance of payments, etc.

Presenting the Central Budget for 1983-84, the Finance Minister declared that the proposed budget "aims at strengthening the productive forces in the economy, keeping a tight rein on inflation, encouraging savings both in the individual and corporate sectors and promoting essential investment". It also aims at discouraging conspicuous consumption which has "no place in a society like ours". The budget also reflects the necessity to attain quickly a viable external payments situation.

It is appropriate to judge the Central Budget for 1983-84 against the aforesaid goals.

Economic development

The Sixth Five Year Plan (1980-85) enters its fourth year in 1983-84 and it is imperative that the budget must allocate adequate resources to attain Plan targets. The Central Plan outlay for 1983-84 is placed at Rs 13,870 crores, which represents an increase of 26 per cent over the preceding year. The proposed increase in the outlay would meet the urgent requirements in critical sectors of the economy and will provide a thrust in respect of programmes meant for the welfare of the weaker sections of the society. Total outlay for agricultural sectors is Rs 608 crores, which includes a sum of Rs 200 crores

earmarked for the National Bank for Agriculture and Rural Development (NABARD). Two major programmes—one for oilseeds development and another for dry-farming, both important elements in the 20-point programme—will also be taken up during the year.

The Sixth Plan has placed considerable emphasis on accelerating investment in the energy sector. The budget provides a sum of Rs 5,014 crores for the development of petroleum, power and coal. This represents 36 per cent of the total Central Plan outlay. Crude oil production is expected to reach around 26 million tonnes in 1983-84.

An additional Rs 300 crores (over and above Rs 13,870 crores) has been set apart for the various schemes in the next year's (i.e., 1983-84) Central Plan. A sum of Rs 50 crores out of this special amount, is earmarked for 'incentive payments' to state electricity boards for 'better performance'.

Budget and the consumer

A budget affects consumers in two ways. First, by reducing or increasing disposable income through an enhancement or reduction in the rates of personal taxes and by changing their exemption limits. Secondly, alteration and fresh imposition of excise duties have a direct impact on the prices of the affected commodities.

The budget for 1983-84 has offered a marginal relief to income-tax payers at the lowest slab (Rs 15,000 to Rs 20,000) by reducing the rate of income-tax from the present 30 per cent to 25 per cent. As a measure of relief to the salaried tax-payer, the ceiling of standard deduction has been increased from the present Rs 5,000 to Rs 6,000. At the same time, the surcharge on income-tax has been raised from the existing 10 per cent to 12.5 per cent.

Such changes are not really worth making and the Finance Minister has, in fact, indulged in a child-like arithmetical manipulation. The total loss of revenue as a result of the above minor concession is expected to be Rs 43 crores in 1983-84. On the other hand, the revenue yield from the increase in the surcharge is expected to be more than Rs 37 crores in the same year. Thus, the

net loss of revenue, in effect, would be an insignificant Rs 5 crores in 1983-84.

Price rise

The reduction of duty on both levy and non-levy sugar and exemption from duty of certain items like low-watt bulbs and fuel-efficient kerosene stoves will not be able to check the high level of prices in the country. On the other hand, a rise in excise duties on several items during the past few months is bound to affect the price situation adversely. A sum of Rs 2,100 crores has already been raised in the past two months by increasing customs and excise duties, increases in the price of petroleum products, particularly diesel, upward revision of railway freight and higher post and telegraph and telephone levies. On top of it, the current budget has proposed an additional taxation of Rs 716 crores. Indirect taxes now add over 60 per cent to the factory price of manufactured goods. The effect of this hefty amount (Rs 2,816 crores) will fall mainly on goods and services and will lead to a general price rise.

A steep increase in basic excise duty on cement from Rs 135 to Rs 205 per tonne, though intended to mop up undue profits, will adversely affect the ordinary house-builder further and is likely to affect labour absorption in construction activities.

Budget and the corporate sector

The budget proposals with respect to the corporate sector are formulated to "ensure that more funds are available for modernisation and reinvestment" and due encouragement is given for higher production, particularly for exports.

The aggregate of specified investment income, which is exempted from tax, would go up from Rs 9,000 to Rs 10,000. This would help to stimulate savings and investment. The general rate of depreciation in respect of plant and machinery has been raised from 10 to 15 per cent. The monetary limit for 100 per cent write-off has also been increased from the present level of Rs 750 to Rs 5,000 in respect of small items of plant and machinery. All these measures will increase the internal funds available with the corporate sector. A reduction in the ceiling rate of

18 per cent may ease the flow of bank funds to the corporate sector.

However, the increase in surcharge on corporate-tax from 2.5 to 5 per cent will reduce the aggregate level of corporate savings. The proposal to disallow 20 per cent of expenses in respect of advertising and business travel by companies will affect the economy of units in the fourth estate. The budget does not make any bold proposals to revamp the sluggish industrial sector.

Several industries are currently suffering from lack of demand, a fact which is admitted by the Finance Minister himself. Some relief by way of lower excise duties was necessary in remedying the situation. The existing tax structure provides enough concessions to promote new investments but discriminates heavily against the renovation of old plants and equipment.

Savings

A significant feature of the budget is the incentive to savings. The exemption limit on incomes derived from specified long-term investments has been raised. 30 per cent ceiling on the gross total savings in the form of life insurance, provident funds, etc is being removed. The absolute monetary ceiling, however, remains unchanged. National Savings Certificates (VI and VII issues) are now covered under the available means for savings. This will be of help to those nearing retirement and finding it difficult to take advantage of life insurance and provident fund schemes. The scheme of compulsory deposit for income-tax payers has been extended by another period of two years. However, people above 65 years are exempted from this deposit. Till now this limit was 70 years. Still, it is doubtful if the bulk of the salaried class will be able to save more than 30 per cent of their gross income.

Budget and the weaker sections

The Sixth Plan (1980-85) has assigned a major role for specific programmes meant for weaker sections of the society and thereby reducing poverty and unemployment. The Plan aims at reducing the poverty percentage from 48 in 1979-80 to 39 in 1984-85. The Plan has emphasised the role of the

programme (NREP) and the Integrated Rural Development Programme (IRDP).

The budget provides an outlay of Rs 480 crores for NREP, IRDP and other schemes. The IRDP will enable about 3 million families in the rural areas to cross the poverty line during 1983-84. An amount of Rs 125 crores is earmarked out of a special amount of Rs 300 crores, to assist small and marginal farmers to improve the productivity of their land. The government has launched a crash programme for providing drinking water facilities in all problem villages. The budget allocates an amount of Rs 200 crores for this scheme. About 48,000 more villages are expected to be covered in 1983-84 under this scheme.

Budget and non-development expenditure

A conscious effort is being made by the Finance Minister to keep non-development expenditure to a minimum. However, in several areas it is almost impossible to be economical. Defence expenditure is proposed to be Rs 5,971 crores—an increase of more than 11 per cent over the revised estimates for the preceding year. It may be stated that defence expenditure alone accounts for 17 per cent of the proposed total budgetary expenditure. Subsidies on food and fertilisers are proposed to be Rs 1,600 crores. A lump-sum of Rs 300 crores is being provided for payment of additional instalments of dearness allowance, pension and other reliefs to Central Government employees.

There is a general feeling that a good part of revenue is used on unproductive expenditure. There is a need to control wasteful expenditure.

A passing reference may be made to the few other minor concessions granted. The free-baggage allowance for passengers coming from abroad has been raised from Rs 1,000 to Rs 1,250. The minimum amount of pension, including dearness relief, has been raised to Rs 160 per month and that of family pension to Rs 150 per month. A sum of roughly Rs 30 crores is provided for Integrated Child Development Services. Nearly 800 villages are likely to be covered under this scheme by the end of 1983-84.

STEEP HIKES

Indian Railways, the largest public sector undertaking of the country (capital-at-charge Rs 7,000 crores as on March 31, 1982), is the most talked-about organisation today. The reasons: feud between the Railway Minister, A.B.A. Ghani Khan Choudhry, and the former Chairman of the Railway Board, Mohan Singh Gujral; and the recent railway budget.

The 1983-84 budget, showing gross traffic receipts of Rs 5,145.68 crores and total working expenses of Rs 4,520.77 crores, proposes to raise Rs 488.9 crores from tariff hikes. Of these Rs 178.90 crores are expected to be collected by revising passenger fares and Rs 310 crores from higher freight tariff.

The effects of the budget have to be analysed in the light of fare hikes during the last two years. In February 1982, passenger and freight tariffs were raised to collect Rs 261 crores. A few months earlier, in December 1981, the Railway Minister had announced

FARE DEAL

Soon after the much-criticised railway budget which proposed a considerable rise in passenger and freight rates, came the toning down. On March 4, the Railway Minister announced concessions worth Rs 57.50 crores in these two categories. The relief totals Rs 27.50 crores in passenger fare and Rs 30 crores in freight rates. The fare for season tickets has also been reduced in the revised budget.

The concessions will not be available for first-class passengers. The proposal to limit facilities to season ticket holders have also been withdrawn. The Railway Minister also accepted the Railway Reforms Committee's recommendations to raise the accident compensation limit from Rs 50,000 to Rs 1 lakh.

Concessions in freight rates cover movement of foodgrains, salt, edible oils, soap, baby food, handloom textiles, leather goods and other such items of common consumption.

● The public sector is coming out of the red. In 1981-82, of the 187 running enterprises, 107 made a net profit of Rs 1,297 crores and the remaining 80 showed a loss of Rs 812 crores. The ratio of gross profit to capital employed (Rs 21,865 crores) improved to 12.2 per cent against an average of 7.5 per cent during the previous 5 years.

● The main profit-earning units were connected with oil: Oil and Natural Gas Commission, Indian Oil Corporation, Oil India Ltd and Indian Petro-Chemicals Corporation Ltd. Sixty per cent of the total profits came from the oil group.

● Thirteen companies accounted for 80 per cent of the losses. The prominent ones are: National Textile Companies Group, Delhi Transport Corporation, Eastern Coalfields Ltd and Hindustan Copper Ltd.

● In public sector undertakings producing steel, lignite, crude petroleum, cement, nitrogenous fertilisers and heavy engineering goods, the output increases in 1981-82 ranged between 21 to 78 per cent.

imposts to net in Rs 300 crores, in a year. Thus, during a 14-month period, rail tariffs have been hiked thrice to earn an additional Rs 1,050 crores.

In fact, the railways collected much more than what they expected. However, what they expected formed roughly 20 per cent of the gross revenue receipts of 1983-84.

The railways should, no doubt, show profits and their prices should be related to their costs. But, from whatever angle you look at it, the Rs 490-crore hike in fares and freight is a harsh step, mainly because it has been levied almost exclusively on second-class and commuter fares. The monthly season ticket holders have been hit hard as they will now have to pay 50 to 131 per cent more for monthly tickets and distance limits have also been shortened.

Freight rates have been increased indiscriminately on almost every commodity. Even essential commodities have not been spared. The Rail Ministry's point of view is that it needed money urgently to replace overused tracks, wagons and coaches and the Planning Commission was not willing to allocate even the minimum resources they needed. This, however, cannot be a strong argu-

bitter dose to the masses.

Much can be done by the Railways to lower down their costs and improve efficiency. The rate of railway accidents is 2 per day (3 per day during the previous year), and many of the accidents are avoidable. While freight traffic increased to 221 million tonnes in 1981-82 and is likely to go up to 227 million tonnes in 1982-83 (not 230 million tonnes as planned), people still prefer road transportation, particularly for short distances. Though the increase in fares and freight rates conform closely to the recommendations of the Rail Tariff Inquiry Commission (the report was submitted about 3 years back), it may retard the growth of traffic. We are living in an inflationary economy and the masses do not have spare purchasing power. Increased fares may curb passenger traffic and the freight hike may push up industrial costs, thereby reducing the demand for goods. This may mean less haulage, as was proved in 1982-83. Against the anticipated 2,193-million suburban and 3,949-million non-suburban passenger trips, the actual number was 1,855 million (14 per cent fall) and 3,469 million (12 per cent fall) respectively. Another possibility is that ticketless travel may go up.

However, the performance of the Indian Railways was excellent during 1982-83. In fact, "World Bank experts have rubbed their eyes in disbelief at this sharp improvement (16 per cent increase during 1980-1982) in the performance of a system that has been brought near breakdown by neglect for decades." Whether the Railways will be able to maintain this in the coming years is a big question. The Planning Commission is granting just half their demands. They have been allocated only Rs 5,100 crores under the Sixth Plan, against their demand for Rs 11,000 crores. Rs 1,000 crores from the Railway Depreciation Fund for the repair and maintenance of rolling stock (it was only Rs 200 crores a few years ago and Rs 850 crores in 1982-83) may not be sufficient to take care of 600 coaches, 18,250 wagons and 550 locomotives which are overaged.

K.C.B. & S.N.M.

INDIA'S EXCELLENCE IN BUILDING CONSTRUCTION... THE TRADITION CONTINUES WITH HSCL...

Change is the order of life, but there are certain things which somehow always remain the same like the longing to reach the unreachable star, the striving for excellence ... for prosperity and power.

These strivings have given the world a Taj Mahal and a Qutab Minar.

In keeping with the changing times and its concomitant needs and demands, HSCL creates the modern counterparts of the Taj and Qutab and they are India's giant steel plants, towering chimneys, key power stations, cement, aluminium, scooter and a host of other major factories, mighty dams, sturdy bridges and large townships.

The HSCL expertise successfully surmounts barriers of distance, time and place—as a result extensive construction work is quickly, efficiently and economically executed by them anywhere—even amidst the adverse conditions of far off Libya.

Upholding a glorious past and heralding a prosperous future—that's the HSCL tradition.

DYNAMIC BUSINESS MANAGEMENT

CENTRE PVT. LTD.

JANAKDEEP (U), 8 COMMUNITY CENTRE

EAST OF KAILASH, NEW DELHI-110006

Tel : 648691

BY G.J. LANNITHAN

Director, Students' Advisory Bureau, University of Rajasthan

I am a Science graduate interested in taking up a B.Ed. correspondence course. Please give me the list of institutions conducting such a course. Are the degrees awarded by Parteeek Career Institute, Delhi, Gyan Bharti College, Agra, and various others recognised by the Union Ministry of Education?

Abdul Waheed, Darbhanga

There are few universities in India which offer a correspondence course in B.Ed. Fresh graduates may seek admission only to the Institute of Correspondence Studies, University of Bhopal. For graduates with three years teaching experience, there are correspondence courses at the Universities of Andhra, Bhopal, Jammu, Rajasthan, Annamalai-nagar and Bhubaneswar. Admission notices are usually advertised early in the year as the courses include attendance at summer camps.

Only B.Ed. degree courses conducted by universities are recognised for employment. The institutions mentioned by you are coaching institutions or 'educational brokers' who obtain admissions for candidates against high fees for their services. A warning is not out of place here against the often unscrupulous methods employed by such institutions and the way they mislead candidates.

Can an Indian student get admission to medical courses at the undergraduate level in foreign universities? This summer I will be finishing school and would like to take up medicine.

Ashish, Punjab

The only country which has special facilities to admit Indian students to undergraduate medical and engineering courses is the USSR. Scholarships to study at the Patrice Lumumba University, Moscow, are annually awarded to Indian students who have passed Higher Secondary (10+2) or

equivalent (but have not graduated) with very good first division marks. Parents' income should be less than Rs 500 p.m. The advertisement for this scholarship is issued by the Scholarship Division of the Ministry of Education, Government of India, Shastri Bhavan, New Delhi.

In other countries it is virtually impossible for Indian students to be admitted to undergraduate medical courses. Moreover, the RBI's rules for grant of foreign exchange debar students from going abroad before graduation. You should seek admission to medical colleges in India, unless you qualify for the 'need' criterion of the USSR scholarships.

I am a pilot in the transport wing of IAF but would like to join Air India or any other international airline. Do they advertise for it? What is their recruitment policy?

Deepak, Patna

Recruitment of pilots in Air India is done through advertisements placed in leading dailies as and when vacancies arise. In the recent recruitments, preference was given to pilots with experience in the air force rather than to commercial pilots. You may send the details of your qualifications, including flying experience, to the Director of Operations, Air India, Santa Cruz (E), Bombay-400 029.

Most of the foreign airlines have offices in the metropolitan cities of India and you may contact them directly to enquire about their recruitment policy for Indian pilots. You may, however, be required to apply through the Department of Administrative Reforms, North Block, Central Secretariat, New Delhi-110 001 (by sending a self-addressed stamped [50p] envelope of size 10 x 22 cm to obtain the application forms) which maintains a panel of quali-

fied professionals seeking employment abroad. Three years experience is required before registration.

I'm a Commerce graduate and am employed in a nationalised bank. I'm keenly interested in sound and recording technology. Please provide me the necessary details and the career prospects.

Pradip S. Biniwale, Amreli

There is an undergraduate diploma course in sound recording and sound engineering at the Film and Television Institute of India, Poona-411 004. This is of three years duration and the minimum educational qualification is intermediate/10+2 with Physics and Mathematics. There are 10 seats, 20 per cent of which are reserved for foreign students. Besides, there are specialisations in these subjects at the postgraduate engineering level, and at the trade or diploma courses level as part of Radio and TV engineering at the different ITIs/polytechnics. However, with your Commerce degree you will find it very difficult to obtain admission to a course in sound and recording technology, except perhaps at the level of hobby classes. □

NOTE TO READERS

Before rushing in your career problem, check if it can be solved by looking up our sections on *Careers* or *Career Counselling* in the earlier issues. Space is limited; the mail received staggering. Letters chosen are those of general interest or in particular cases where the information is hard to find or has not been published before. Many students ask for a personal reply. Sorry, this is not possible. So please don't send postage or envelopes. Make your queries specific and brief. Send them to Career Counselling, Career & Competition Times, 10 Daryaganj, New Delhi-110 002. Your letters should be accompanied by the coupon.

(Continued from page 12)

wealth remains unutilised. There exists a poor transport system because of which the industrial development is greatly handicapped.

Assam's problems are, indeed, many. Among themselves, the numerous ethnic groups are not at peace. Territorially, the plain-dwellers have their differences with the hill-dwellers, the latter staking their claims to be the original natives of the state. Linguistically, the Assamese-speaking people do not see eye to eye with the Bengali-speaking people in the state. Religious tensions further add to the state's problems. Against this background, the foreigners' issue becomes not the cause but a symptom of Assam's discontentment.

The state's problem is not political as it appears to be. What Assam needs is economic development. What enrages the agitationists is the state's continual neglect at the hands of the Centre.

But before everything else, Assam needs peace. The agitationists must learn to live with people of different religious beliefs, languages and cultures. This is not to say that the Centre has to remain complacent after having delivered the state to the Congress (I). The Centre needs to demonstrate a greater sense of responsibility than what it expects from the agitationists. It must assure them the security and protection of their culture and language, and the promotion of their developmental projects. And above all, the Centre must regenerate the confidence it has lost among the inhabitants of the state. It can earn the state's goodwill by conceding the genuine demands of the agitationists, including those relating to the foreigners' issue. A fresh cut-off year can be evolved in a fresh bid of give-and-take atmosphere. The process of detection and deportation can be accelerated and steps can be taken to stop further influx in Assam.

But will the Centre exhibit its concern for the state? Will the agitationists see reason? If both sides fail now, the loss would be greater than what it has been so far. □

U.P. FINANCIAL CORPORATION

14/88, CIVIL LINES, KANPUR

To aid the process of industrial growth, the U.P. Financial Corporation for the first time brought out a new financial assistance programme to spell out its priorities earmarking industry-wise and region-wise financial assistance with added emphasis on growth of industries in decentralised sector and to achieve the following objective -

- (i) Export oriented, import substitutes, Employment oriented Agro-based Ancillary & industries to be set-up in the complexes/industrial estate
- (ii) To improve the capacity utilisation of existing units
- (iii) Rehabilitation of sick units having potential for revival.
- (iv) Maximising assistance in small & decentralised sectors as also to units to be set up in backward areas & hill regions
- (v) Special treatment to industries promoted by weaker sections of the society & technical entrepreneurs

UPFC has following to offer

- (i) Term loan assistance upto Rs. 30 lacs on concessional rate of interest and on lower margin
- (ii) Composite Loan (including working capital need) to assist units promoted by Artisans
- (iii) Various Special Schemes of the Government as to Capital Subsidy Interest Subsidy Generating-set Subsidy Margin Money Loan for Complexes & technical entrepreneurs.
- (iv) Foreign Currency Loan wherever necessary
- (v) Soft loan/equity participation under Special class of Share Capital
- (vi) Soft Term Loan Assistance for Rehabilitation of sick units under IRCI Line of Credit and Seed Capital Assistance under the Scheme of IDBI

SUB-INSPECTORS/ ASSISTANT ENFORCEMENT OFFICERS

The Staff Selection Commission will conduct a written test in May/June 1983, to recruit Sub-Inspectors (CBI) and Assistant Enforcement Officers in the Enforcement Directorate, Ministry of Finance. Graduates between 18 to 25 years of age, as on 9.4.83, are eligible. Application forms may be had from main post offices on payment of 70 paise, or, the standard format of the application form and other details may be had from *Employment News* dated 26.2.83. Last date for submitting applications is 9.4.83.

M.B.A. ADMISSION TEST

The Birla Institute of Technology (BIT), Mesra, Ranchi, will hold a written admission test for M.B.A. full-time (2 years) and part-time (3 years) courses on 29.5.83. Graduates in Arts, Science or Commerce with at least 55 per cent marks and those in Engineering/Technology with at least 60 per cent marks are eligible. Details and application forms may be obtained from BIT, Mesra, or from Technology Centre, Lalpur, Ranchi, by sending a crossed Indian Postal Order (I.P.O.) of Rs 10, payable to the Registrar, BIT, and a self-addressed envelope (9.23 cm) marked 'M.B.A. Course'. Last date for submitting applications is 20.4.83.

PROBATIONARY OFFICERS

The Central Recruitment Board of the State Bank Group will hold a written exam on 26.6.83, for the recruitment of Probationary Officers in the associate banks of SBI, which have approximately 211 vacancies. Graduates between 21 and 28 years of age, as on 1.1.83, are eligible. For format of application form and other details see *The Hindustan Times* and *The Hindu* dated 1.3.83 and *The Tribune* dated 3.3.83. The last date for submitting applications is 4.4.83.

ENGINEERING SERVICES EXAM

The UPSC will conduct the Engineering Services Exam on 7.8.83 to fill over 500 vacancies. To be eligible for this exam, candidates must hold a degree in Engineering or equivalent qualification; M.Sc. degree or equivalent with Wireless Communication, Electronics, Radio Physics or Radio Engineering is also acceptable for certain posts. Candidates should have been born after 1.8.55 and before 2.8.63. Application forms and details may be obtained from Secretary, UPSC, Dholpur House, New Delhi 110 011, by remitting Rs 2 by money order or crossed I.P.O., payable to the above mentioned at New Delhi G.P.O. or on cash payment at UPSC counter. Last date for submitting application forms is 18.4.83.

MEDICAL FELLOWSHIPS

The Indian Council of Medical Research invites applications from candidates with a doctoral degree in any recognised health-science field, with experience in research, for award of fellowships of the National Institutes of Health (USA) for specialised training. Details and application forms are obtainable from the Director General, Indian Council of Medical Research (Division of Administration III), Ansari Nagar, Post Box No. 4508, New Delhi 110 029. Last date for submission of applications is 11.4.83.

TRAINING SHIP RAJENDRA & DMET

Those desirous of making a career in the navy can join the Navigating Officers Training Course at T.S. Rajendra, Bombay, or the Marine Engineering course at the Directorate of Marine Engineering (DMET) at Calcutta. To appear for the admission test to the above-mentioned courses, candidates must first appear in the Joint Entrance Exam (JEE) of the IITs. The eligibility requirements for the

courses at T.S. Rajendra and DMET are the same as those for JEE-1983 (see our Jan issue). Candidates must apply only after they have applied for JEE 1983 and received their registration numbers. Prospectus for these courses may be obtained on payment of Rs 4 by crossed I.P.O. in favour of Director General of Shipping, payable at G.P.O. Bombay. The requests for prospectus must be sent to the Executive Officer (Training), Directorate General of Shipping, Jahaz Bhavan, Wakhand, Hirachand Marg, Bombay-400 038. The last date for submitting applications is 10.5.83.

LOAN SCHOLARSHIPS

Interest-free loan scholarships are offered by K.C. Mahindra Education Trust to Indian students who intend to pursue higher studies abroad in Engineering, Natural Sciences, Medicine, Business Management or Military/Naval/Aviation Sciences. The scholarship is tenable for three years and its amount will not exceed Rs 16,000 per academic year. Candidates must possess a first class degree and must have secured, or at least have applied for admission in foreign universities.

For application forms, write to the Director, K.C. Mahindra Education Trust, Mahindra Spicer Building, 15 J.N. Heredia Marg, Ballard Estate, Bombay-400 038, by 31.3.83. Last date for submission of application forms is 2.5.83.

STENO-TYPISTS

A pharmaceutical company requires steno-typists for its factory at Sahibabad. Candidates should be reasonably qualified, have a minimum of three years experience, a speed of 100/40 w.p.m. in shorthand and typing respectively and should be able to handle correspondence independently. Gross salary will be around Rs 860 p.m., apart from other benefits. Apply to Box 9863, *The Statesman*, New Delhi-110 001. □

COAL NOW AVAILABLE IN PLENTY

Over two crore tonnes of coal of various grades are now in stock at pitheads. A solid pool of energy ready to be tapped by both industrial and domestic consumers.

To help distribute this coal countrywide Coal India has launched a simplified and efficient distribution plan which utilises the maximum possible resources and facilities to help all categories of consumers to grow. Ever dynamic systems have gone into operation like of-the-shelf-sale, round the clock loading, steps to reduce escalation of price to consumers.

Besides Coal India's network of coal/coke Stockyards is being expanded to reach coal even to remote areas. Already such Stockyards are operating in 57 centres all over India. 53 more are being opened. A mother stockyard is being opened in each state and at least one coal depot in every district of each state.

Relations Between The Union & The States...

RELATIONS BETWEEN THE UNION AND THE STATES

Legislative Relations: Under the Constitution, Parliament has the power to make laws for the whole of or any part of the territory of India and the State Legislatures have the power to make laws for the State. The subjects on which Legislation can be made are specified in the Seventh Schedule. Parliament has the exclusive right to legislate in respect of items appearing in List I (called the 'Union List') and the State Legislatures have the exclusive power to make laws in relation to items appearing in List II (called the 'State List'). Both Parliament and the State Legislatures have the power to legislate in respect of items appearing in List III (called the 'Concurrent List'). In case of a clash between the law made by Parliament on the one hand and by the State Legislature on the other, on any item of the Concurrent List, the law of Parliament prevails and the law of the State Legislature becomes void to the extent it repugns the law of Parliament. The right to legislate on residuary powers rests with Parliament. Parliament is also given the power to legislate on items exclusively reserved in the State List during an Emergency (Art. 245-254).

The Union List has 97 items including defence, armed forces, atomic energy, preventive detention, foreign affairs, citizenship, railways, highways, shipping, posts & telegraphs, currency, foreign exchange, foreign loans, income-tax, excise duty, estate duty, etc. The State List has 66 items including public order, police, public health and sanitation, agriculture, forests, fisheries, markets and fairs, money-lending, betting and gambling, taxes on lands and buildings, taxes on electricity, octroi, taxes on luxuries, entertainment, etc. The Concurrent List has 47 items including criminal law, marriage and divorce, transfer of property other

than agricultural land, contracts, trusts and trustees, contempt of court, prevention of cruelty to animals, trade unions, charities and charitable institutions, newspapers, evacuee property, price control, etc.

Administrative Relations: The executive power of the State is exercised in compliance with laws made by Parliament and must not impede or prejudice the executive power of the Union. The executive power of the Union extends to the giving of directions to a State as to (i) the construction and maintenance of means of communication declared to be of national or military importance (ii) the measures to be taken for the protection of the railways within the State. There is a provision of entrusting any matter relating to the executive power of the Union to the officials of the State as is the provision of entrusting any matter relating to the executive power of the State to the officials of the Union Government. Under the Constitution, Parliament has the power to provide for the adjudication of any dispute or complaint relating to the use, distribution or control of waters of inter-state rivers and river valleys. The Constitution empowers the President to establish a Council consisting of more than two States for purposes of bringing about co-ordination between the States (Art. 256-263).

FINANCE, PROPERTY, CONTRACTS AND SUITS (Art. 264-300A): Under the Constitution no tax can be levied or collected except by authority of law (Art. 265). All revenues of the Union and all loans in whatever form raised by it shall form one consolidated fund to be entitled as the 'Consolidated Fund of India' and all revenues of the State and loans raised by it shall form part of the 'Consolidated Fund of the State'. Parliament is also empowered by law to establish the 'Contingency Fund of India' and the Legislature of the State is empo-

wered by law to establish the 'Contingency Fund of the State' (Art. 266-267). Under the Constitution provision is made for duties to be levied by the Union but which are collected and appropriated by the States such as stamp duties and excise duties on medicinal and toilet preparations and also taxes collected by the Union but assigned to the States such as taxes on succession, estate duty, taxes on railway fares and freights, etc. and also income-tax, which is collected by the Union, but distributed between the States and the Union in accordance with such principles of distribution as are recommended by the Finance Commission (Art. 268-270). Similarly, provisions relate to the excise duties collected by the Union but distributed between the States and the Union if a law so provides for their distribution. Provision is also made for grants by the Union to certain States in lieu of export duty on jute and jute products in addition to grants-in-aid to be given to the needy States. There is also a provision for the constitution of a Finance Commission for making recommendations with regard to the distribution of the net proceeds of taxes which are to be divided between the Union and the States (Art. 280).

Under the Constitution the property of the Union is exempt from taxes by the State and vice-versa (Art. 285 and Art. 289). States are restricted from imposing taxes on sales or purchases of goods which are sales or purchases outside the State or in the course of import or export from the territory of India (Art. 286).

Under the Constitution the executive power of the Union and that of the State Government extends to borrowing on the security of the respective Consolidated Funds to the extent permitted by Parliament and the State Legislatures (Art. 292-293).

PUBLIC SECTOR: GROWTH AND PERFORMANCE

BY K.C. BAGADIA & S.N. MOOKERJEE,
University of Delhi

Can you list the top ten profit-making public enterprises? In which of their products do they have 100 per cent monopoly? To help you answer these and many other related questions in competitions and interviews, this feature on public sector discusses its growth, performance, problems, organisational pattern, concept and changing role, pricing principles and policy

The public sector in India came into existence towards the middle of the nineteenth century. The undertakings in this sector were organised as government departments run by bureaucrats. The growth during the following hundred years was very slow. In 1951, the government owned just five undertakings having a total investment of Rs 29 crores. However, since 1951, the sector has grown rapidly. Today, about 200 public sector undertakings, with a massive investment of over Rs 20,000 crores (more than half of the total corporate investment in the organised sector), produce a large variety of goods and services, from steel, aeroplanes, ships, locomotives and watches to textiles, soft drinks and hotel services.

The public sector in India is not bound by any dogma or doctrine: it is dynamic in nature. In the beginning, it was restricted to public utilities like water supply, transport, electricity and communications. However, economic planning in the post-independence era gave it a new role to develop an economy which could function for the welfare of the masses. The public sector is now being increasingly used as the main instrument towards achieving the broad objectives of our economic policy such as self-reliance, equitable distribution of wealth and income, eradication of poverty and balanced regional growth. The Industrial Policy Resolution of 1956 further placed on it the arduous task of developing a strong, broad-based industrial economy.

In the early '50s, the role of the public sector was confined to developing infrastructural and social overhead facilities so that industrial activities could be given a boost. Later, it was found that the private sector was not protecting the interests of consumers. The government, therefore, decided to diversify into other fields. Today, a sick or a mismanaged unit, whether it's a textile mill or a spiritual home at Auroville, can be brought under its ever-expanding domain.

Public sector undertakings have covered many critical gaps in the industrial pattern of the country. Steel plants account for nearly 1/3rd (33 per cent) of the total investment, minerals for 1/7th (14 per cent) and heavy engineering for 1/9th (11 per cent). The turnover (gross sales) amounted to Rs 28,645 crores in 1980-81. More than 18 lakh workers are employed in 168 operational units under the Central Government. The average annual emoluments per employee come to Rs 14,240. The public sector has now become a major earner of foreign exchange. Several public sector undertakings, like Bharat Heavy Electricals Limited (BHEL), Hindustan Machine Tools (HMT) and Engineers India Limited (EIL), have been able to secure several contracts in the Middle East and African countries despite fierce competition from giant Western firms.

This, however, does not mean that all is well with the public sector. It is plagued with several problems. In financial terms,

its performance is hopelessly poor. The net losses of public sector units under the Central Government amounted to Rs 182 crores in 1980-81 against Rs 40 crores in 1978-79. Percentage of gross profits to capital employed in the three-year period 1979-81 was about 7.5. Poor management, unnecessary political interference and the dominance of civil servants are some of the main weaknesses of these undertakings. The major failure of the public sector has been that it has not developed as a model employer. It has also failed to usher in an era of innovative management.

Still, the public sector has a unique place in the Indian economy. Several of its enterprises enjoy a virtual monopoly in the production of basic raw materials such as steel (SAIL), coal (Coal India), minerals and metals (NMDC, Hindustan Copper and Bharat Aluminium), petroleum (ONGC, IOC and other companies), fertilisers, pharmaceuticals and chemicals (FACT, IPC, HOC, IDPC and CCI), heavy-engineering goods (HEC, BHEL, MAMC and Bharat Heavy Plates and Vessels) and electricity (state electricity boards).

In many Western capitalist countries public sector undertakings earn reasonable surpluses and generate internal resources for growth, diversification and research and development. Public sector-holding companies in Italy, France and Sweden operate and conduct their affairs on the basis of accepted sound commercial and industrial practices.

CONCEPT AND ROLE

Public enterprise, as defined by the *Encyclopaedia Britannica*, is an undertaking owned by a national, state or local government, which supplies services or goods at a price and is operated on a more or less self-supporting basis. The concept arose after the industrial revolution, which brought in its wake several economic problems like unbridled competition, exploitation of labour, growth of monopolies and rising prices. These, together with the exigencies of war and concern about the welfare of the masses, led to the direct participation of the State in selected areas in the capitalist economies of the West. Today, public enterprises exist in almost every country, socialist or capitalist.

The treatise of Kautilya and Shukra reveal that it was the duty of the State in India to run productive undertakings, considered to be essential to the prosperity of the community. The construction of irrigation canals, wells, dams, reservoirs and ghats was commonly undertaken by the kings from the ancient to the Moghul periods. A few public enterprises like the Posts and Telegraphs Department were established during the British rule in India in the mid-nineteenth century. State participation, however, remained limited and indirect. It was only after independence that the public

Thriving on competition BHEL has managed to secure several contracts in the Middle East and Africa despite stiff competition from the West.

sector assumed great importance and over the last three decades its growth has been spectacular.

Defining the role of the public sector, the Constitution of India directs the State, as per Article 39 (b) and (c), to ensure that the ownership and distribution of material resources serve the common good and there is no concentration of wealth and means of production. The First Five Year Plan envisaged a progressive widening of the public sector and a reorientation of the private sector to the needs of a planned economy. The adoption of the objective of establishing a socialistic pattern of society in 1955 gave a pivotal role to the public sector.

The Industrial Policy Resolution of 1956 (IPR-1956) declared that 'all industries of basic and strategic importance, or in the nature of public utility services' are to be in the public sector. The Second Plan wanted the two sectors, public and private, to function in unison, i.e., as parts of a single mechanism. While the Third Plan intended to use the public sector to determine the character and functioning of the economy, the Fourth Plan envisaged its emergence as the dominant and effective area of the economy controlling the important sectors.

The Industrial Policy Statement of 1977 envisaged the public sector to steer the distribution of essential commodities and infrastructural facilities and to provide a 'countervailing power' to the growth of large houses and enterprises in the private sector. With the expansion of the public sector, it was realised that these enterprises could generate adequate surpluses to provide the basis for further growth of the economy, including the public sector itself. In the Sixth Plan (1980-85), Central enterprises other than the Railways and Posts and Telegraphs, are expected to generate a gross surplus of Rs 5,800 crores over the five-year period. It is felt that these surpluses would assume greater importance over the surpluses from the tax revenue.

In recent years, the State had also to shoulder the responsibility of rehabilitating a number of 'sick' units to protect the interests of the workers and also to ensure continued production.

Thus, public sector has assumed a significant role in the attainment of various socio-economic goals, such as

- Gaining control of the dominant and effective sectors of the economy.
- Exercising control over industries of basic and strategic importance and promoting their development.
- Providing a countervailing force to the growth of big business houses.
- Providing surpluses with which to finance further economic development.
- Promoting balanced regional development of the country;
- Generating additional employment.

At the commencement of the First Plan (March 1951), India had only five centrally-owned commercial enterprises with a total investment of Rs 29 crores. Today, there are over 200 Central public enterprises and 600 state enterprises. These enterprises account for 80 per cent of the paid-up capital of the corporate sector in the country. Of the top 101 units, 51 public enterprises account for 80 per cent of the total assets and 70 per cent of the total net sales. The 168 centrally-owned operating enterprises

Rs 18,000 crores and sold goods worth Rs 28,645 crores. A variety of goods—from steel and aeroplanes to textiles, bread and aerated water (beverages)—are produced by the public sector. The share of the public sector in the net domestic product has increased from 5 per cent in 1950-51 to roughly 22 per cent today. Nearly 90 per cent of the electricity, gas and water supply come from

Public sector enterprises provide enormous job opportunities. Total employment in Central undertakings of industrial and commercial nature was 18.38 lakhs as of March 1981. Public sector enterprises have also offered their services to a number of developing countries and presently a large number of them are operating in several countries of Asia and Africa.

countries. Engineering Projects (India) Ltd, which undertakes industrial and civil projects, has 14 such ventures, valued at Rs 5,630 million, with various foreign countries. Hindustan Machine Tools (International) Ltd markets its products directly in Australia and the US.

Producing goods for the international and the domestic market is not, however, the only aim of the public sector. Linked with it

Moonline Photos

PERFORMANCE

The public sector has played a crucial role in laying the foundations of economic progress in India. Much of the development of natural resources in India could be undertaken only by the public sector. Private sector had neither the financial resources nor the access to the technological resources needed to fulfill the task. These infrastructural industries require huge capital investment and have long gestation periods. They also have relatively low profitability. Of the total investment in public enterprises, steel accounts for 1/3 (33 per cent), minerals and metals 1/7 (14 per cent), chemicals and pharmaceuticals 1/8 (13 per cent), heavy engineering 1/9 (11 per cent), transport 1/25 (4 per cent), services 1/11 (9 per cent) and others 1/6 (16 per

cent). Public sector has a near monopoly in the production of copper, lead, teleprinters, telephones, locomotives, railway coaches and photo films. It produces 91 per cent of wrist-watches, nearly 80 per cent of zinc and electronic goods for professionals, 65 per cent of bread and 45 per cent of nitrogenous fertilisers.

Public sector products hold tremendous export potential too, even in highly competitive fields. Bharat Heavy Electricals Ltd (BHEL) exported boilers to Malaysia with a total generating capacity of 1,110 Mw—nearly 80 per cent of Malaysia's power-generating capacity. The total export orders outstanding at the end of October 1980 with BHEL stood at Rs 252 crores. Electronics Trade and Technology Development Corporation Ltd exports more than 27 items like telephone cables, computer software and black

The high and the low of it: Above left: ONGC—one of the top-ten profit-making enterprises. Above: Delhi Transport Corporation—almost at the bottom of the rung.

inseparably is the creation of jobs. To this end the public sector has helped in the growth of ancillary industries. All public sector enterprises are required to review their production programmes with a view to vacating such areas or items which can be transferred to the small-scale sector without creating difficulties regarding the utilisation of available capacity. As a result, nearly 900 ancillary units have been set up under the guidance of public enterprises upto the end of March 1979. Public enterprises have helped substantially in the growth of the private sector too by providing financial and technical assistance, and infrastructural

communication.

More important, the public sector helps in the economic development of India. It contributes towards the resources of the government by way of dividends, interest payment of loans, income tax, excise and other duties. Besides, it also generates internal resources. During the Third-Plan period, this was Rs 287 crores and increased to Rs 1,214 crores in 1980-81. Other indices of the public sector's

India (Rs 21 crores). Among the major profit-making enterprises, Indian Oil Corporation earned the highest pre-tax profit worth Rs 108 crores.

The percentage of gross profits to capital employed has been around 7.5 during the four-year period 1977-81. The rate of return on capital employed in private sector undertakings was almost twice the rate earned by the public sector units. Only 50 undertak-

contribution to the country: net domestic product—22 per cent in real terms in 1980-81 against 10.6 per cent in 1960-61; net capital formation—varied between 50 and 60 per cent during 1960-61 to 1980-81.

Despite its contribution to the country's growth, the public sector is still an ailing giant. Units under the Central Government suffered net losses amounting to Rs 182 crores in 1980-81 against that of Rs 40 crores in 1978-79. Of the 168 running enterprises, 93 made a profit of Rs 572 crores while 75 incurred losses amounting to Rs 754 crores in 1980-81. Ten major undertakings accounted for nearly 2/3rd (66 per cent) of the total losses.

Notable among these ten are Fertiliser Corporation of India (Rs 100 crores approximately), Eastern Coalfields Ltd (Rs 82 crores), Delhi Transport

ings paid a dividend amounting to Rs 83 crores in 1980-81.

It is argued that since public sector units generally underpriced their products, the rate of return is low. Generally, the margin between sales revenue and the variable cost of production like wages, raw material, etc indicates whether an enterprise is under or overpricing its products. In 1976-77, when public sector undertakings earned the highest profits, this margin was 10 per cent, that is, variable costs constituted 90 per cent of the revenues. In 1977-78, it was 8 per cent and it remained at 9 per cent during 1979-81. Thus, over the four years, prices rose slightly less than the cost of direct inputs into production.

A good number of public sector undertakings have consumed a large percentage of capital invested initially due to heavy losses. In some cases, the losses

investment. The percentage of lost capital varies between 10 to 20.

Problems

What are the reasons for these mounting losses? What ails our public sector undertakings? The causes are many. Among them, ● Public enterprises enjoying monopoly or near-monopoly positions in the production of their products are not usually permitted to fix high prices. It is feared that this may open an avenue to private enterprises, enjoying the same position, to follow suit. In pursuance of the government's policy of protection of consumers from exploitation, many public sector undertakings are obliged to underprice their products or services, for example, the transport services.

● Under-utilisation of installed capacity caused by a long gestation period, huge in-built capacities and ambitious planning based on inadequate data have compounded this problem. Nearly 40 per cent of the installed capacity in five integrated steel plants under SAIL remained unutilised in the first eight months (April-November) of 1982-83. Besides, there is a problem of increasing inventories. Practically every public enterprise is over-stocked. The degree of inventories to production ranges from 20 to 40 per cent.

● Emphasis on social costs like the development of townships and the provision of adequate amenities to employees has also contributed towards the accumulated deficits. Outlays on townships have involved 15 to 20 per cent of the financial resources of public enterprises. It is also alleged that in the organised industrial sector, public enterprises have been more generous in giving amenities to their employees, taking cover under autonomy.

● Big public sector' undertakings like the steel plants are constantly facing the problem of labour unrest, which often results in work stoppage and loss of production. The time loss due to strikes and lockouts in the public sector was 2.20 million mandays or about 17 per cent of the total time loss during 1980 as against 7.66 million mandays lost in 1979.

● The government is the owner

Dividend on equity and interest on loans go to it. The public enterprises also contribute to the exchequer by way of taxes and duties. Yet, equity-debt ratio means a lot of difference to public enterprises with a different capital structure. For example, public enterprises having greater share of debts feel that they bear a rather heavy burden of interest since it is 'paid out' and is charged to the profit and loss account. Two equally-capitalised public enterprises with different debt-equity ratio will record varying rates of dividend, thus giving an impression that one paying lower dividend is less efficient. Since the government makes decisions in this regard, a fruitful exercise not only on debt-equity ratio but also interest on loans and dividends on equity should be considered periodically to suit the needs of the changing times.

- Many public enterprises spend money and time on developing buildings and townships. Who is to bear this cost? In the private sector, it is a part of their balance sheet. The public sector balance sheets, however, do not always include it. This is provided by the government in many cases—which means a hidden subsidy—because the public sector undertakings do not pay interest on such amounts.

Management problems

- A public enterprise is basically an economic entity under a board. But the management does not fully rest with the board which, in fact, operates within the boundaries zealously set for it by another tier of authority, namely, the government. Many feel that a public enterprise board is nominal or 'decorative' and argue for its replacement by an administrator, custodian or director as is found in many socialist and other countries.

Retired ministers, civil servants and known political figures are often appointed as chairmen of public sector undertakings. They are often dismissed or replaced on political and personal considerations. A year ago nearly 50 undertakings were without a head; the number has come down to 19 now. Political leaders view public enterprises as their important political instruments, and the bureaucrats

nistrative apparatus. This has led to the installation of the secretary as the supervising authority of the public sector with ministers at the top.

The consequence: first, non-technical persons with no experience in industry or management have become the decisive authorities in matters of industrial development. Second, non-industrial procedures are superimposed on public sector undertakings, which cause undue delay in the execution of plans. A proposal, say, for the expansion of the capacity, recommended by the best technical brains of a public sector undertaking, goes through at least three departments—the concerned (parent) ministry, Finance Ministry and the Planning Commission. Many a time the proposals are sent back to the public sector undertaking concerned, requesting certain clarifications. Parkinson has aptly remarked that this is the easiest way by which a set of persons in the administration can justify their existence.

- The public sector undertakings have failed to attract the best talent in the country. The reason is obvious. The basic starting salary of a junior manager at Rs 700 per month is about two-thirds of the minimum wage paid to unskilled workers by a big private undertaking. Even the starting salary for top management in the public sector is Rs 2,250—just about what a young sales executive receives after he finishes his probation in most private firms in Bombay and Delhi.

- It is an established fact that most of the public sector undertakings are over staffed. The dictum of 'too many people for too little work' applies to these undertakings. Most of the jobs are created to accommodate the near and dear ones of political bosses and top bureaucrats. There is no denying the fact that such manipulated appointments cause deep resentment among the employees and dampen their enthusiasm and sincerity to work. A politicised morale does not fit into an ideal industrial culture.

Measures for improvement

The government has attempted to improve production and productivity in public sector enterprises and curtail its losses. In 1980, a

Production and Productivity evolved concrete action plans relating to a cognate group of industries. Among them: steel; coal (including lignite); metals; fertilisers; petroleum and petrochemicals; chemicals, pharmaceuticals and consumer goods, heavy engineering, and transportation equipment.

As a follow-up measure of the workshop, a Standing Coordination Committee was constituted to take concrete action to improve production and productivity.

This Committee had its fifth meeting after adoption of the new 20-point economic programme in which public enterprise got due place. It has tried to make an overall assessment of progress in relation to the objectives of the National Workshop and also to determine strategies in implementation of the new economic programme as it relates to the performance of public sector enterprises. Particular attention is being paid to improve its performance in 1982-83, which has been declared as the Productivity Year by the Central Government.

The Union Government has also constituted a Cabinet Committee on Monitoring of Project Implementation in December 1982 with a view to ensuring the timely execution and commissioning of public sector projects. The Committee, headed by the Union Finance Minister, has decided to meet once a month and adopt a sectoral approach in its monitoring process. The intention is to cover the whole range of public sector projects in a group of industries. Presently, it is intended to cover the entire energy sector, including both onshore and offshore oil-exploration projects, coal mining and the implementation of thermal, hydel and nuclear-power projects.

In order to maintain smooth industrial relations, the Central Government has recently decided that officers of public enterprises will get revised pay scales and dearness allowances with retrospective effect from August 1, 1982. The logic behind the revision is to restore 'relatives' disturbed by the pay revision for chief executives and full-time functional directors of public enterprises.

No smooth-chugging this. Railways the victim of bureaucratic system of functioning.

One of the most remarkable trends in post-independence India has been the growing dominance of the public sector in the economy. At the time of independence, public sector undertakings were organised like government departments. It was, however, realised that this form was not suitable to industrial or business organisations. The government then decided to organise some on the pattern of private sector enterprises. At present, public sector undertakings follow three different organisational patterns

Departmental undertaking is the oldest form. A few good examples are the railways, posts and telegraphs, broadcasting, ordinance factories and irrigation schemes. Departmental undertakings are organised like government departments where the minister and the secretary control all the operations, finances, appointments and day-to-day working. They do not have any freedom or flexibility and are financed by the annual appropriations from the treasury. Their revenues are also deposited into the treasury. Their budgets are part of the government budget and their accounts are audited by government auditors.

There are few departmental undertakings as this system was not found suitable for business and manufacturing units. Because of the bureaucratic methods of operation, decision-making is slow

and it becomes difficult to deliver the goods at economical prices in an efficient way. Therefore, several departmental undertakings were converted into corporations, e.g. Delhi Transport Undertaking was converted into Delhi Transport Corporation in the late '60s.

Statutory corporations or public corporations created by special laws and owned by the government is another form of organising public enterprises. This pattern was followed after independence and several public sector undertakings like Life Insurance Corporation, Oil and Natural Gas Commission and Indian Oil Corporation were established. The corporations are not run through a government department and have a fair amount of autonomy. The corporation has its chairman and a board of directors, which is nominated by the government. The minister to which the corporation is attached overviews its working.

Public corporations were quite popular till the mid-'50s. It was then realised that several corporations were not working successfully and were unable to break the bureaucratic cobweb. Therefore, in November 1950, the government decided to establish **joint-stock companies** under the Companies Act, as in the case of

government, however, owned the entire or 51 per cent of the total capital. Though a better form of organisation, government companies are not 'real' joint-stock organisations as there are no real share-holders. Since the major percentage of shares is with the government, in the long run, these organisations start functioning more or less like government departments.

Based on the practical experience of these three types of organisational patterns, it can be definitely said that departmental undertakings are the least suitable form for business and industrial enterprises. Their main weakness is the fixed structure within which they work. The public corporation category is quite popular in India and the units are working better than government departments. It, however, is not suitable for manufacturing activities where a fairly large amount of autonomy is essential. But the corporation is most suitable for public utilities and services. The government joint-stock companies have become the most popular pattern of organisation and because of their proximity to private sector companies, they are good for manufacturing activities.

PRICING POLICY

The pricing policy of a public enterprise is related to its economic and social obligations. The main aims of any price policy are raising adequate resources for reinvestment, permitting the unit to run at the lowest possible cost with maximum efficiency, and enabling consumers at all levels to buy its products. Public undertakings constantly face the conflict between the 'motive of profit' and the 'motive of service to the community', i.e., should they sell the product at a low price and incur a loss or sell it at a higher price at the cost of the consumer. They have to hit upon a compromise between the two.

All public enterprises do not follow a similar pricing policy. The policy of an undertaking is influenced largely by the position it enjoys in the market structure and can be divided under two broad categories: (a) products that

PRICING PRINCIPLES

Public sector enterprises in India are operating in different market conditions and, therefore, have diverse price practices. The various practices are based on accepted pricing principles, which can be classified as cost plus pricing, marginal cost pricing, discriminating pricing, import-based pricing and externally-determined pricing.

The *cost plus pricing* system aims at earning some profit after recovering the cost fully. This principle is generally followed by those public enterprises whose major customer is the government. The important public sector units following this pricing principle are Indian Telephone Industries and Hindustan Aeronautics Ltd. This system has some serious drawbacks. It tends to breed a sense of complacency as it guarantees profits irrespective of the operational and managerial efficiency. Inefficiency can result in high cost of production, which is then recovered through higher selling price.

It is suggested that costs

should be calculated on the basis of certain agreed norms and not on the basis of actuals. Certain norms of efficiency like utilisation of capacity, consumption coefficients and other normative parameters can be worked out. On the basis of agreed norms and by taking into account the level of capital investment, normative costs for each plant should be calculated. Such an exercise was carried out by the Indian Bureau of Costs and Prices for fertiliser plants in the public sector a few years ago.

Under the *marginal cost pricing* principle, the price is determined to recover the marginal cost fully and also some portion of the fixed cost. There are several public sector units that operate under decreasing cost conditions, such as public utilities. In such undertakings a continuous subsidisation, equivalent to the difference between the average cost and the marginal cost, becomes necessary. This is usually the case with electricity boards. However, for public sector units operating under increasing cost conditions, this system may

be used to serve the interests of political leaders. Prices of some products are deliberately kept low to woo voters, particularly in the rural areas. Besides, low price at the cost of quality reduces the marketability of the product. Janata soap, manufactured in early 1970s, is an example. The price was deliberately lowered by reducing the fat content and avoiding the use of perfume. The soap, however, did not sell well.

A public sector unit should be left free to adopt a suitable pricing policy according to its position in the market.

Externally-determined pricing generally means the price is determined by the government. The products of certain public sector units are consumed entirely by another public sector unit. In such cases also, inter-enterprise prices are externally fixed by the government.

are sold under competitive conditions, and (b) products in the monopoly and oligopolistic range.

There are many public sector units that enjoy total monopoly in the production of their products, e.g., Indian Railways and Indian Telephone Industries. Many of these are public utilities or provide infrastructural facilities.

Public enterprises selling their products under monopoly conditions do not care much for the market forces. And their prices are generally administered. An appropriate pricing policy is imperative for such monopoly enterprises so that they can discharge their social responsibilities without jeopardising the commercial viability.

Some of the public enterprises like the Fertiliser Corporation of India, Hindustan Machine Tools and Hindustan Steel, which are operating in a sellers' market, are oligopolistic in nature. They face nominal competition among themselves or with private sector units. Their prices are regulated by the government as in the case of steel and

fertilisers.

A large number of public enterprises sell their products like textiles, leather goods, televisions and other electronic items, under competitive conditions. They have to face tough competition from private sector units. Public undertakings operating under these conditions usually determine the price of their products in accordance with the market prices. There is hardly any variation in the price of the same product produced in the private sector.

It is commonly felt that a public sector undertaking does not enjoy adequate freedom to develop and adopt its own pricing policy. It is externally controlled and regulated by the government. This kills the very concept of a business enterprise and virtually converts it into a government department. The argument that the government introduces a system of price control as a measure of consumer protection may not always be true. It is everyone's observation that the public sector enterprises are being

used to serve the interests of political leaders. Prices of some products are deliberately kept low to woo voters, particularly in the rural areas. Besides, low price at the cost of quality reduces the marketability of the product. Janata soap, manufactured in early 1970s, is an example. The price was deliberately lowered by reducing the fat content and avoiding the use of perfume. The soap, however, did not sell well.

A public sector unit should be left free to adopt a suitable pricing policy according to its position in the market.

AUTONOMY

To what extent should a public sector undertaking be autonomous? While public sector employees often complain that bureaucratic interference affects their productivity, the government is of the view that since these undertakings use the taxpayer's

(Continued on page 67)

PRACTICE TESTS

In preparing these tests we have tried to visualise the questions you are likely to face in your actual exam. Great care has been taken to frame questions which are of the same standard as those you'll encounter in your exam.

Rating: Evaluate your performance on the basis of the following score-card:

| | | |
|-----------------------------|---|-----------|
| 100 questions in 60 minutes | — | Excellent |
| 60 questions in 60 minutes | — | Good |
| 50 questions in 60 minutes | — | Fair |
| 35 questions in 60 minutes | — | Poor |

Tips: 1. Do not waste time over questions you are not sure about. 2. Give the problems some thought before choosing the answers. 3. Do not try to guess the answer.

NDA Exam December '82

COMPILED BY UTPAL BORA

GENERAL KNOWLEDGE PAPER II

(Geography, History, Current Events, etc)

Questions published in this section appeared in the General Knowledge Paper II of the National Defence Academy Examination held in December 1982. These are based on the candidates' memory as they are not allowed to take their question papers out of the examination hall. Though we have compiled these questions as close to the original as possible, we take no responsibility for any discrepancies.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

- | | |
|---|---|
| <p>1. --- is the disease said to have been eradicated in India.</p> <ul style="list-style-type: none">(a) Cholera(b) Smallpox(c) Typhoid(d) Measles <p>2. Who is called the 'Prince of Builders'?</p> <ul style="list-style-type: none">(a) Shah Jahan(b) Akbar(c) Jehangir(d) Babur <p>3. Mahabalipuram monuments were built by the</p> <ul style="list-style-type: none">(a) Hoysalas | <ul style="list-style-type: none">(b) Pallavas(c) Pratiharas(d) Mauryas <p>4. Who said that "Ram and Rahim are the names of one and only one God"?</p> <ul style="list-style-type: none">(a) Kabir(b) Ram Das(c) Mahatma Gandhi(d) Guru Nanak <p>5. Which of the following was a characteristic of the Vedic religion?</p> <ul style="list-style-type: none">(a) Idol worship(b) Sacrifices |
|---|---|

- (d) Nature worship
6. Who is considered the best administrator among the Delhi Sultans?
 - (a) Iltutmish
 - (b) Mohammad Tughlaq
 - (c) Ghias-ud-Din Balban
 - (d) Feroze Shah Tughlaq
 7. The Rajya Sabha can be dissolved if the
 - (a) Prime Minister desires so
 - (b) Parliament passes a bill to this effect
 - (c) Chairman desires so
 - (d) It can't be dissolved
 8. Who appoints the Comptroller and the Auditor General of India?
 - (a) The President
 - (b) The Prime Minister
 - (c) The Chief Justice of India
 - (d) Elected by Parliament
 9. The Indian Prime Minister who did not face the Parliament was
 - (a) Lal Bahadur Shastri
 - (b) Charan Singh
 - (c) Jawaharlal Nehru
 - (d) None of the above
 10. Which part of the Constitution states that India is a Socialist Secular Democratic Republic?
 - (a) The Fundamental Rights
 - (b) The Fundamental Duties
 - (c) The Preamble
 - (d) The Directive Principles
 11. The President is elected by
 - (a) The Parliament
 - (b) The Lok Sabha
 - (c) An electoral college consisting of the elected Members of Parliament and State Legislatures
 - (d) The State Legislatures
 12. Who is the largest producer of oil in the world?
 - (a) Mexico
 - (b) The Soviet Union
 - (c) Saudi Arabia
 - (d) Italy
- the real meaning of 'satya-graha' was
- (a) Truth-force
 - (b) Passive resistance
 - (c) Non-violence
 - (d) Violent protest
14. There is dispute about the New Moore Island between
 - (a) India and Nepal
 - (b) India and Pakistan
 - (c) India and Bangladesh
 - (d) Pakistan and Bangladesh
 15. The Sixth Five Year Plan aims at
 - (a) Self-reliance
 - (b) Industrial growth
 - (c) Providing more agricultural facilities
 - (d) Balanced export and import
 16. ——— flows in north India.
 - (a) Narmada
 - (b) Gomti
 - (c) Tapti
 - (d) None of the above
 17. The Trade Winds blow in the ——— region.
 - (a) Equatorial
 - (b) Polar
 - (c) Tropical
 - (d) Sub-polar
 18. The I.S.T. is ahead of the G.M.T. by ——— hours.
 - (a) 4
 - (b) $4\frac{1}{2}$
 - (c) 5
 - (d) $5\frac{1}{2}$
 19. Which of the following is not a permanent member of the UN Security Council?
 - (a) The US
 - (b) The Soviet Union
 - (c) West Germany
 - (d) China
 20. Which state is the largest producer of sugarcane?
 - (a) UP
 - (b) MP
 - (c) Karnataka
 - (d) Bihar

21. Which state has the largest deposits of manganese ore?

- (a) Orissa
- (b) Karnataka
- (c) Kerala
- (d) MP

22. Which state is the largest producer of rubber?

- (a) Karnataka
- (b) Orissa
- (c) Tamil Nadu
- (d) Kerala

23. Humidity is determined by

- (a) The amount of rainfall
- (b) The amount of water vapour present in the air
- (c) Both (a) and (b)
- (d) None of the above

24. The Rourkela Steel Plant has been set up in collaboration with

- (a) The US
- (b) Japan
- (c) The Soviet Union
- (d) West Germany

25. Ozone layer is present in the

- (a) Stratosphere
- (b) Ionosphere
- (c) Troposphere
- (d) Exosphere

26. Condensed water vapour in the air is known as

- (a) Fog
- (b) Hail
- (c) Rain
- (d) Sleet

27. Tides are caused by

- (a) The gravitational pull of the sun and the moon
- (b) Earthquakes
- (c) The gravitational pull of the moon only
- (d) The gravitational pull of the sun only

28. --- is the currency of West Germany.

- (a) Deutsche Mark
- (b) Dollar
- (c) Yen
- (d) Dinar

29. Where were the First Asian

Games held?

- (a) Tokyo
- (b) Rangoon
- (c) New Delhi
- (d) Kabul

30. Amin Gemayel is the President of

- (a) Iran
- (b) Iraq
- (c) Lebanon
- (d) Syria

31. Under whom did the Theosophical Society become a reformist movement in India?

- (a) Annie Besant
- (b) Mahatma Gandhi
- (c) Swami Vivekananda
- (d) Maharishi Dayanand

32. Who was the first Chairman of the Planning Commission of India?

- (a) Jawaharlal Nehru
- (b) Rajendra Prasad
- (c) Bal Gangadhar Tilak
- (d) Sardar Patel

33. Which one of the following is igneous rock?

- (a) Sandstone
- (b) Limestone
- (c) Bauxite
- (d) Basalt

34. Which one of the following is

- matched correctly?
- (a) Bombay-Dum Dum
(b) Calcutta-Palam
(c) Delhi-Santa Cruz
(d) Madras-Meenabakam
35. Shaurya Chakra is awarded for
(a) Literature
(b) Music
(c) Bravery
(d) Sports
36. The 1984 Olympics will be held in
(a) Buenos Aires
(b) Los Angeles
(c) Tokyo
(d) Ottawa
37. The first President of independent India was
(a) Sarvepalli Radhakrishnan
(b) Varaha Venkat Giri
(c) Zakir Hussain
(d) Rajendra Prasad
38. Where was the Commonwealth Heads of Government Meeting held in 1981?
(a) Melbourne
(b) New Delhi
(c) Islamabad
(d) Beijing
39. The first UN Secretary-General was
(a) Trygve Lie
(b) Dag Hammarskjold
(c) Kurt Waldheim
(d) U Thant
40. Which one of the following won the 1982 Ramon Magsaysay Award?
(a) Mira Behn
(b) Mother Teresa
(c) Arun Shourie
(d) P K. Sethi
41. Former boxing champion Muhammad Ali belongs to
(a) The Soviet Union
(b) The US
(c) Libya
(d) Iran
42. The Dada Saheb Phalke Award for 1982 was won by
(a) Shyam Benegal
(b) Aparna Sen
(c) Gautam Ghose
(d) Naushad Ali
43. The Sixth Five Year Plan will end in
(a) 1982
(b) 1983
(c) 1984
(d) 1985
44. The Vice-President is elected by the/an
(a) People
(b) MPs and MLAs of all states
(c) Electoral college consisting of all MPs
(d) Opposition
45. The approximate diameter of the earth is—km
(a) 12,300
(b) 12,400
(c) 12,700
(d) 13,400
46. The International Date Line passes through the
(a) Bering Strait
(b) Atlantic Ocean
(c) Red Sea
(d) Indian Ocean
47. The only Muslim professor to win the Nobel Prize is
(a) Abdus Salaam
(b) S.Z. Qasim
(c) Agha Shahi
(d) Mohammad Ali Raja
48. The monsoons have maximum effect on
(a) West Bengal
(b) Maharashtra
(c) Tamil Nadu
(d) Andhra Pradesh
49. Relative humidity is the
(a) Degree of heat
(b) Amount of precipitation
(c) Amount of rainfall
(d) Ratio between actual humidity of air and its total capacity to hold moisture
50. Which of the following cause weathering: (I) wind (II) water

(H) animals?

- (a) (I) and (II)
- (b) (II) and (III)
- (c) (I) and (III)
- (d) All the above

51 Which of the following does India import?

- (a) Chromite
- (b) Iron
- (c) Gypsum
- (d) Chemicals

52 Which of the following is the main constituent of air?

- (a) Hydrogen
- (b) Nitrogen
- (c) Oxygen
- (d) Carbon dioxide

53 Which of the following has the maximum number of coal mines?

- (a) Bihar
- (b) Orissa
- (c) UP
- (d) West Bengal

54 Bombay High is famous as an/for its

- (a) International seaport
- (b) International airport
- (c) Chemical deposits
- (d) Petroleum deposits

55 Buddha delivered his first sermon at

- (a) Bodhgaya
- (b) Lumbini
- (c) Kapilvastu
- (d) Patliputra

56 Rukmini Devi Arundale is a

- (a) Poetess
- (b) Painter
- (c) Litterateur
- (d) Dancer

57. Amrita Pritam won the 1981 Jnanpeth Award for

- (a) Social work
- (b) Economics
- (c) Literature
- (d) Science

58 Suppose from Nagpur you went 100 km east, then 100 km north, 100 km west and again 100 km south. At the

end, where would you be?

- (a) At the starting point
- (b) West of the starting point
- (c) East of the starting point
- (d) North of the starting point

Patra Photographers

59 The cabinet of Farooq Abdullah consists of

- (a) Most members of his father's cabinet
- (b) Half the members of his father's cabinet
- (c) Only two members of his father's cabinet
- (d) No members of his father's cabinet

60 Which of the following types of emergency can the President of India declare?

- I Constitutional emergency
- II Financial emergency
- III National emergency
- (a) I and III
- (b) II and III
- (c) I and II
- (d) All the above

61. The headquarters of the International Court of Justice are in

- (a) Vienna
(b) New York
(c) The Hague
(d) Paris
62. Mira Behn, who died in July 1982, was a disciple of
(a) Jayaprakash Narayan
(b) Mahatma Gandhi
(c) Vinoba Bhave
(d) Acharya Kripalani
63. India is not a member of the
(a) NATO
(b) UN
(c) Non-aligned movement
(d) Commonwealth
64. Lunar eclipse occurs on
(a) The 8th of every month
(b) The 22nd of every month
(c) A half-moon night
(d) A full-moon night
65. The first Chairman of the Atomic Energy Commission was
(a) Homi N. Sethna
(b) Vikram Sarabhai
(c) Homi J. Bhabha
(d) Raja Ramanna
66. APPLE was launched from
(a) Thumba
(b) Sriharikota
(c) Cape Canaveral
(d) French Guyana
67. The 1982 World Cup Football was won by
(a) Argentina
(b) Brazil
(c) Italy
(d) Great Britain
68. Artificial satellites are not used for
(a) Weather forecasting
(b) Locating ship movements
(c) Measuring population density
(d) Communications
69. Which one is a natural harbour?
(a) Visakhapatnam
(b) Bombay
(c) Madras
(d) Calcutta
70. The type of windstorm which occurs in East Asia is
(a) Hurricane
(b) Tornado
(c) Cyclone
(d) Typhoon
71. The area of India is approximately—million sq km
(a) 2
(b) 3
(c) 10
(d) 12
72. The total food production in India is—crore tonnes.
(a) 9.76
(b) 9.9
(c) 10.89
(d) 12.1
73. The Tungabhadra project is a joint venture of
(a) Andhra Pradesh and Karnataka
(b) Tamil Nadu and Karnataka
(c) Andhra Pradesh and Tamil Nadu
(d) Tamil Nadu and Maharashtra
74. The slogan of the French Revolution was
(a) 'Liberty to all'
(b) 'Political Justice to all'
(c) 'Land for all'
(d) 'Liberty, equality, fraternity'
75. —is the longest day.
(a) June 21
(b) December 22
(c) March 23
(d) September 23
76. Who won the 1982 Wimbledon Tennis Championship?
(a) John McEnroe
(b) Bjorn Borg
(c) Jimmy Connors
(d) John Alexander
77. The next Commonwealth meet will be held in
(a) Canberra
(b) New Delhi
(c) London
(d) Karachi
78. The International Development Association is affiliated

- (a) UN
(b) World Bank
(c) International Monetary Fund
(d) International Atomic Energy Agency
79. Who won the 1980 Jawaharlal Nehru Award for International Understanding?
(a) Nelson R. Mandela
(b) Barbara Ward
(c) Julius Nyerere
(d) Asiatic Society
30. Who propounded Communism?
(a) Vladimir Lenin
(b) Joseph Stalin
(c) Groucho Marx
(d) Karl Marx
31. During Akbar's rule, farmers had to pay _____ of the produce as land revenue
(a) 1/8th
(b) 1/4th
(c) 1/3rd
(d) 1/2
32. Atmospheric pressure varies
(a) Horizontally
(b) Vertically
(c) Periodically
(d) Both (a) and (b)
33. Buddha did not believe in
(a) Rebirth
(b) Meditation
(c) Salvation
(d) Idol worship
34. The Ilbert Bill was introduced to
(a) Allow Indians to appear in the ICS exams
(b) Discriminate against Indians in government service
(c) Stop Indians from going abroad
(d) Divide Hindus and Muslims
35. The office of the Governor General of India was created by the

- (b) Pitts India Act
(c) Cabinet Mission
(d) Morley-Minto Reforms Act

Dharm Vir Jayar

86. Mother Teresa was awarded the Bharat Ratna in
(a) 1978
(b) 1979
(c) 1980
(d) 1981
87. Match the following:
A Annie Besant --- (1) Bhoo-dan
B Vinoba Bhave --- (2) Non-cooperation
C Surendra Nath Banerjee --- (3) Home rule
D Mahatma Gandhi --- (4) Indian National Conference
(a) A-2, B-4, C-1, D-3
(b) A-3, B-2, C-4, D-1
(c) A-3, B-1, C-4, D-2
(d) A-2, B-3, C-1, D-4
88. Untouchability was abolished in India in
(a) 1949
(b) 1950
(c) 1952
(d) 1955
89. Who was the President of the

- Constituent Assembly ?
 (a) C. Rajagopalachari
 (b) Bhim Rao Ambedkar
 (c) Rajendra Prasad
 (d) Jawaharlal Nehru
- 90 Who is the Governor of RBI ?
 (a) I.G. Patel
 (b) Manmohan Singh
 (c) M S. Swaminathan
 (d) Satish Dhawan
- 91 Panchayati Raj consists of the
 (a) Panchayat, Zila Parishad and Nagar Parishad
 (b) Nagar Samiti, Zila Panchayat and Gram Parishad
 (c) Panchayat, Panchayat Samiti and Zila Parishad
 (d) Panchayat Parishad, Gram Parishad and Zila Samiti
- 92 The deep hole, more than 1 km in diameter, formed by a volcano is called a
 (a) Crater
 (b) Depression
 (c) Fissure
 (d) Crack
- 93 The place from where an earthquake originates is called the
 (a) Epicenter
 (b) Seismic focus
 (c) Seismograph
 (d) Earthquake centre
- 94 The place directly above the place of origin of an earthquake is called the
 (a) Epicenter
 (b) Seismic focus
 (c) Seismogram
 (d) Transverse wave
- 95 According to Jainism, the three right ways are
 (a) Right deeds, right belief, right action
 (b) Right thinking, right knowledge, right meditation
 (c) Right deeds, right knowledge, right faith
 (d) Hard penance, ahimsa, attainment of salvation
- 96 The Aryan civilisation was characterised by
 (a) Urban style of living
 (b) Rural style of living
 (c) Idol worship
 (d) Caste system
- 97 With which of the following was Akbar associated ?
 (a) Chauth
 (b) Mansabdari system
 (c) Abolition of jizya
 (d) Both (b) and (c)
- 98 The Hindu Remarriage Act advocated the
 (a) Remarriage of widows
 (b) Remarriage of Hindu widowers to Hindu women only
 (c) Intercaste marriages
 (d) Remarriage of Hindu widows to Hindu men only
- 99 Which of the following statements about a Supreme Court judge are true ?
 (a) He is appointed by the Parliament
 (b) He is appointed by the Chief Justice of India
 (c) He retires at the age of 62
 (d) He retires at the age of 65
- 100 Which of the following statements is/are true ?
 (a) MPs are elected by State Assemblies
 (b) MPs are appointed by the President
 (c) The Deputy Speaker is the Chairman of Rajya Sabha
 (d) One-third of the members of Rajya Sabha retire every third year
- 101 The earth's atmosphere cools on a
 (a) Cloudy night
 (b) Clear night
 (c) Still night
 (d) Windy night

Civil Services (Prelims) '82

GENERAL STUDIES

Questions published in this section appeared in the GENERAL STUDIES paper of the Civil Services (Prelims) Exam, June '82. These are based on the candidates' memory as they are not allowed to take their question papers out of the examination hall. We have compiled these questions as close to the original as possible. Hence, we take no responsibility for any discrepancies.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Answers are given at the end of this supplement.

- | | |
|---|--|
| 1 Plankton is a/an | Godavari |
| (a) Micro-organism | (b) Sutlej, Chambal and Krishna |
| (b) Amoeba | (c) Ganga, Mahanadi and Godavari |
| (c) Sea-fish | (d) Sutlej, Mahanadi and Krishna |
| (d) Photoelectric particle | 6 The Council of Ministers is responsible to |
| 2 What is the 'flame of the forest'? | (a) The President |
| (a) Eyes of a wild animal | (b) The Prime Minister |
| (b) A tree with very bright flowers | (c) The Lok Sabha |
| (c) A lady who serves tribals in forests | (d) Parliament |

10. Which one of the following did not participate in the uprising of 1857 ?
 (a) Tantia Tope
 (b) Bhagat Singh
 (c) Rani Lakshmibai
 (d) Nana Phadnavis
11. The purpose of 'Antyodaya' is
 (a) To provide free food to the poor
 (b) Uplift of the economically weakest sections of society
 (c) To provide free education to the poor
 (d) None of the above
12. Which river flows between the Vindhya and the Satpura ranges ?
 (a) Narmada
 (b) Tapti
 (c) Mahanadi
 (d) Godavari
13. Which committee/commission examined the policy of wages ?
 (a) Bhoothalingam Committee
 (b) Palekar Commission
 (c) Shah Commission
 (d) None of the above
14. The retina of the eye acts like the—— of a camera
 (a) Shutter
 (b) Lens
 (c) Aperture
 (d) Film
15. Vayudoot is an/the
 (a) Aircraft manufactured in India
 (b) Air-service in India
 (c) Air-mail service
 (d) Latest fighter plane of the IAF
16. Who got the Jnanpeeth Award for 1981 ?
 (a) Amrita Pritam
 (b) Birendra Kumar Bhattacharya
 (c) S.H. Vatsyayana
 (d) Ashapura Devi
17. Who won the Nobel Prize for Literature in 1981 ?
 (a) Elias Canetti
 (b) V.S. Naipaul
 (c) Kenichi Fukui
 (d) Ronald Hoffman
18. With which state is Kalhan's *Rajatarangini* associated ?
 (a) Kashmir.
 (b) UP
 (c) Rajasthan
 (d) MP
19. NABARD is a
 (a) Bureau
 (b) Board
 (c) Bank
 (d) Society
20. Who said "Back to the Vedas" ?
 (a) Swami Dayanand
 (b) Raja Ram Mohan Roy
 (c) Swami Vivekanand
 (d) Mahatma Gandhi
21. Which one of the following was not advocated by Raja Ram Mohan Roy ?
 (a) Abolition of sati
 (b) Widow remarriage
 (c) Learning Sanskrit
 (d) Learning English
22. Recently, which country has been admitted to the UN Security Council as a non-permanent member ?
 (a) Mexico
 (b) Tunisia
 (c) Jordan
 (d) Kenya
23. The Mahabalipuram temples were built by the
 (a) Pallavas
 (b) Cholas
 (c) Pandyas
 (d) Cheras
24. The Doctrine of Lapse was implemented by
 (a) Lord Dalhousie
 (b) Robert Clive
 (c) Lord Wellesley
 (d) Warren Hastings
25. What was the aim of the Cabinet Mission sent to India in 1946 ?
 (a) To demarcate the Indo-

- (b) To grant independence to India
(c) To introduce Constitutional reforms in India
(d) To enquire into the excesses of the British Government
26. ——— was a moderate leader.
(a) Gopal Krishna Gokhale
(b) Bal Gangadhar Tilak
(c) Subhas Chandra Bose
(d) Lajpat Rai
27. How many times before have the Asian Games been held in Delhi?
(a) 1
(b) 2
(c) 4
(d) 6
28. What is the name of the space shuttle launched by the US?
(a) Viking-II
(b) Columbia
(c) Cosmos-1402
(d) Soyuz
29. What kind of fertiliser is used after the crop has been sown?
(a) Potassiac
(b) Phosphoric
(c) Nitrogenous
(d) Green manure
30. An annual rainfall of 200 cm and an annual average temperature of 25°C is ideal for the cultivation of
(a) Tea
(b) Tobacco
(c) Rice
(d) Wheat
31. What is the chief constituent of poultry feed?
(a) Maize
(b) Barley
(c) Jowar
(d) Flour
32. The chief constituent of biogas is
(a) Methane
(b) Butane
(c) Carbon monoxide
33. The main purpose of using biogas is to
(a) Solve the energy problems of rural areas
(b) Provide electricity to industrial units
(c) Conduct scientific experiments
(d) Make lethal bombs
34. The most urbanised state in India is
(a) Punjab
(b) Maharashtra
(c) Gujarat
(d) West Bengal
35. Which state has the longest coastline?
(a) Andhra Pradesh
(b) Tamil Nadu
(c) Maharashtra
(d) Orissa
36. A person visiting Kandla, Tuticorin, Mangalore and Paradip does not have to go to
(a) Gujarat
(b) Orissa
(c) Kerala
(d) Tamil Nadu
37. Which country is the 157th member of the UN?
(a) Belize
(b) Antigua
(c) Zimbabwe
(d) Costa Rica
38. The dispute on the New Moore Island is between
(a) Bangladesh and Indonesia
(b) Bangladesh and India
(c) India and Sri Lanka
(d) India and Pakistan
39. Chambal river flows through
(a) Rajasthan, MP and UP
(b) UP, MP and Gujarat
(c) Rajasthan, Gujarat and UP
(d) UP, MP and Bihar
40. From which source is the maximum power derived in our country?
(a) Thermal
(b) Hydel

- (d) Solar
41. A mixed economy is the coexistence of
- Heavy and small-scale industries
 - Public and private sector
 - Handicrafts and agriculture
 - Agriculture and industry
42. I.Q. can be calculated from the formula
- $\frac{\text{Mental age} \times 100}{\text{Actual age}}$
 - $\frac{\text{Actual age} \times 100}{\text{Mental age}}$
 - $\frac{\text{Mental age} \times 1,000}{\text{Actual age}}$
 - $\frac{\text{Actual age} \times 1,000}{\text{Mental age}}$
43. Which part of the blood fights foreign bodies?
- Red blood corpuscles
 - White blood corpuscles
 - Plasma
 - Vitamins
44. Which of the following is not a function of vitamins?
- Protection from diseases
 - Promoting growth
 - Metabolism
 - Digestion
45. Who is the President of France?
- Francois Mitterrand
 - Valerie D'Estaing
 - Raymond Barre
 - Claude Cheysson
46. Which blood group is the universal donor?
- A
 - B
 - AB
 - O
47. Which of the following has the maximum iron content?
- Green vegetables
 - Cauliflower
 - Eggs
 - Orange
48. What is hydroponics?
- Treatment of diseases by the scientific application
 - Science that deals with the occurrence and properties of water on the earth's surface
 - Cultivation of plants by placing the roots in liquid nutrient solutions
 - Instrument used to detect sources of sound under water
49. Mahatma Gandhi discontinued the Non-cooperation Movement
- Due to the outbreak of violence in Chauri Chaura
 - Due to the conclusion of the Gandhi-Irwin pact
 - Because of the reforms introduced by the British in 1919
 - Because of the repressive policy of the British Government
50. Why did Mahatma Gandhi undertake the Dandi March?
- To protest against the salt-tax
 - To protest at the death of Lala Lajpat Rai in a lathi-charge
 - To protest against the Communal Award which gave separate electorates to Harijans
 - None of the above
51. Which one of the following was assassinated recently?
- Zulfikar Ali Bhutto
 - Ziaur Rahman
 - Ronald Reagan
 - Pope John Paul II
52. Where are warships manufactured in India?
- Mazagon Docks
 - Cochin Shipyard
 - Garden Reach Workshop
 - Hindustan Shipyard
53. Who won the 1981 Wimbledon Tennis Championship?
- John McEnroe

- (c) Bjorn Borg
(d) Vitas Gerulaitis
- 54 Which Asian sports event was won by India in 1981?
(a) Women's hockey
(b) Badminton
(c) Table tennis
(d) Women's basketball
- 55 William Jones is associated with
(a) Billiards
(b) Golf
(c) Boxing
(d) Chess
- 56 If a no-confidence motion is passed against a minister in a parliamentary form of government, then
(a) The entire Cabinet resigns
(b) The minister resigns
(c) The Prime Minister resigns
(d) None of the above
- 57 Who presides over the joint sitting of both Houses of Parliament?
(a) The President
(b) The Prime Minister
(c) The Speaker of the Lok Sabha
(d) None of the above
- 58 The three types of rocks are
(a) Igneous, sedimentary and limestone
(b) Igneous, sedimentary and metamorphic
(c) Sedimentary, shale and clay
(d) Metamorphic, volcanic and sedimentary
- 59 Who is the Secretary-General of the UN?
(a) Kurt Waldheim
(b) Javier Perez de Cuellar
(c) Dag Hammarskjöld
(d) Nelson Mandela
- 60 The boundary line dividing India and Pakistan is the—line.
(a) Radcliffe
(b) McMahon
(c) Durand
- 61 What are the common elements in a diamond and an emerald?
(a) Carbon and silica
(b) Carbon and beryllium
(c) Carbon and plutonium
(d) Carbon and sulphur
- 62 Which country is the chief exporter of tea?
(a) Sri Lanka
(b) Burma
(c) India
(d) Indonesia
- 63 The US sold AWACS to
(a) Egypt
(b) Saudi Arabia
(c) Israel
(d) Morocco
- 64 India took a \$5.7-billion loan from the IMF
(a) To hold the Asian Games
(b) For rural development programmes
(c) To strengthen the defence forces
(d) To clear balance-of-payments deficit
- 65 The emphasis of the First Five Year Plan was on
(a) Heavy industries
(b) Exports
(c) Employment
(d) Food production
- 66 The Duncan Passage lies between
(a) India and Sri Lanka
(b) North and South Andaman Islands
(c) Andaman and Nicobar Islands
(d) None of the above
- 67 The North-South dialogue is concerned with the— countries.
(a) Developed and under-developed
(b) North and South American
(c) North and South European
(d) Developed
- 68 Place the following in the correct chronological order:

- (III) Fatehpur Sikri (IV) Taj Mahal
 (a) I, II, III, IV
 (b) I, II, IV, III
 (c) III, II, I, IV
 (d) IV, I, III, II
- 69 Which is the least inflammable cloth?
 (a) Silk
 (b) Cotton
 (c) Nylon
 (d) Rayon
- 70 Gasohol is a mixture of gasoline and
 (a) Ethyl alcohol
 (b) Methane
 (c) Ethane
 (d) Carbon dioxide
- 71 To an astronaut travelling in space, the colour of the sky would appear
 (a) Black
 (b) Blue
 (c) White
 (d) Grey
- 72 The maximum expansion of the Mughal empire took place during the reign of
 (a) Akbar
 (b) Aurangzeb
 (c) Babur
 (d) Humayun
- 73 The 1981 Jawaharlal Nehru Award for International Understanding went to
 (a) Julius Nyerere
 (b) Alva and Gunnar Myrdal
 (c) Nelson Mandela
 (d) Nichidatsu Fuji
- 74 Which worm enters through the skin?
 (a) Hookworm
 (b) Tapeworm
 (c) Pinworm
 (d) Both (b) and (c)
- 75 In India, the Panchayati Raj has helped in
 (a) Increasing employment in rural areas
 (b) Increasing agricultural
- (c) Raising the standard of living in rural areas
 (d) Encouraging local self-government
- 76 A dispute regarding the election of the President is referred to the
 (a) Prime Minister
 (b) Supreme Court
 (c) Election Commission
 (d) Lok Sabha Speaker
- 77 The 42nd Amendment is related to the
 (a) Fundamental Rights
 (b) Directive Principles of State Policy
 (c) Fundamental Duties
 (d) All the above
- 78 Which of the following is not a Fundamental Right?
 (a) Right to Religion
 (b) Right to Speech
 (c) Right to Strike
 (d) Right to Equality
- 79 Coal burns in air because the latter contains
 (a) Oxygen
 (b) Hydrogen
 (c) Carbon dioxide
 (d) Nitrogen
- 80 When a ship enters the sea from a river, its level
 (a) Remains the same
 (b) Goes down
 (c) Rises
 (d) Goes down and then rises
- 81 Pearls are found in
 (a) An oyster
 (b) The seabed
 (c) An oyster-shell
 (d) Rivers
- 82 Ready energy for an athlete comes from
 (a) Proteins
 (b) Carbohydrates
 (c) Vitamins
 (d) Fats
- 83 The ozone layer of the atmosphere helps in
 (a) Protecting life on earth

- from ultraviolet rays
- (b) Reducing the tremendous glare of the sun
- (c) Causing rains
- (d) Keeping the atmosphere clean
- 84 A room fan makes us feel cool because it
- (a) Causes evaporation of perspiration
- (b) Gives cool air
- (c) Blows out hot air from the room
- (d) None of the above
- 85 After the floods have receded, a flood-hit area is likely to be affected by
- (a) Cholera
- (b) Plague
- (c) Smallpox
- (d) Tuberculosis
- 86 What step should be taken immediately in the event of a cardiac arrest?
- (a) Adrenalin injection should be given
- (b) Chest should be massaged
- (c) Artificial respiration should be administered
- (d) The patient should be given cold water
- 87 Kilowatt is the unit of
- (a) Heat
- (b) Energy
- (c) Power
- (d) Motion
- 88 --- is used to manufacture match-sticks.
- (a) Sulphur
- (b) Potassium
- (c) Red Phosphorous
- (d) Sulphuric acid
- 89 ---dynasty is the oldest in India
- (a) Gupta
- (b) Maurya
- (c) Kushan
- (d) Chola
- 90 Galvanised iron is coated with
- (a) Silver
- (b) Phosphorous
- (c) Zinc
- (d) Copper
- 91 Saka Era was started by
- (a) Kanishka
- (b) Saka
- (c) Harsha Vardhana
- (d) Vikramaditya
- 92 --- is associated with the film *Gandhi*.
- (a) Ingmar Bergman
- (b) Richard Attenborough
- (c) Satyajit Ray
- (d) Mrinal Sen
- 93 Star constellations appear in different positions in the sky at different times due to
- (a) Rotation of the earth
- (b) An optical illusion
- (c) Movement of the stars
- (d) None of the above
- 94 --- has the least population density
- (a) Assam
- (b) Nagaland
- (c) Sikkim
- (d) Mizoram
- 95 Battery terminals are made up of
- (a) Carbon and nickel
- (b) Copper and nickel
- (c) Copper and zinc
- (d) Nickel and zinc
- 96 Silver--- is used in photography.
- (a) Chloride
- (b) Nitrate
- (c) Bromide
- (d) Nitrite
- 97 The Indus script
- (a) Is in Sanskrit
- (b) Is in Devnagari
- (c) Is in Pali
- (d) Has not been deciphered yet
- 98 Ramanuja laid emphasis on
- (a) Ahimsa
- (b) Fasts
- (c) Bhakti
- (d) Sacrifices
99. --- makes laws for Union

- territories which do not have their own legislatures.
- (a) Parliament
(b) The President
(c) The Council of Ministers
(d) The Lieutenant-Governor
100. The Buddhist religious texts are known as
(a) Tripitakas
(b) Samhitas
(c) Hinyana
(d) None of the above
101. Lothal in Gujarat is famous for
(a) Temple architecture
(b) Being the site of the earliest-known urban civilisation in Asia
(c) Its dairy industry
(d) Its handloom industry
102. Match the following with the choices below: Khetri, Jharia, Kudremukh, Kolar.
(a) Coal, gold, bauxite, iron
(b) Copper, coal, iron, gold
(c) Iron, gold, copper, zinc
(d) Copper, coal, gold, manganese
103. Irrigation is essential for India because
(a) The rainfall is uncertain
(b) The crops grown require more water than is provided by rains
(c) Stored water is better than rain-water
(d) None of the above
104. ———'s statue was recently anointed in Karnataka.
(a) Krishna
(b) Buddha
(c) Bahubali
(d) Chaitanya Mahaprabhu
105. Bees are called social creatures because they
(a) Live together in colonies like human beings
(b) Mix with other insects
(c) Go from flower to flower to collect pollen
(d) Are reared by human beings for their honey
106. White Paper is a
(a) Bill passed by Parliament
(b) Document carrying the President's orders
(c) Document carrying top-secret information
(d) Document relating to some issues of discussion before Parliament
107. UNCTAD is an
(a) International lending agency
(b) UN agency for Third World development
(c) UN agency for trade and development
(d) UN agency for promotion of human rights.

THE COUNTERFEIT COINS

(Solution to the puzzle published in our December 82 issue)

The counterfeit stack can be identified by a single weighing of coins. Take one coin from the first stack, two from the second, three from the third, and so on to the entire ten coins of the tenth stack. Then weigh the whole sample collection on the scale. The excess weight of this collection, in number of grams, corresponds to the number of the counterfeit stack. For example, if the group of coins weighs seven grams more than it should, then the counterfeit stack must be No. 7, from which you took seven coins, each weighing one gram more than a genuine half-dollar.

How To Take The GK Paper

BY VINOD GUPTA

The Staff Selection Commission (SSC) conducts an exam every year—this time it will be held on July 3, 1983—for all-India recruitment of clerks to various offices of the government. It is probably the largest recruitment exam for a single category and type of post, which has approximately 7,000 vacancies. The exam features varied forms of objective-type multiple-choice questions which require an altogether separate approach for preparation and answering.

Syllabus: Preparation is a trifle difficult as no detailed syllabus has been prescribed. According to the SSC, 'the paper on General Knowledge will include questions on the Constitution of India, Indian History and Culture, General and Economic Geography of India, Current Events, Everyday Science and such matters of everyday observation as may be expected of an educated person.' The last phrase is all-embracing as it tends to include almost all types of knowledge. Old test papers, which could help in the preparation, are not available as the question booklet cannot be taken out of the exam hall. However, a broad indication may be had from the 150 sample questions framed by the author and published in this issue. These are as close to the original as possible in terms of the balance and type of questions normally asked in the G.K. paper.

What books to read? The SSC does not prescribe any set of books for G.K. The guides commonly available in the market will not

suffice. It is recommended that Government of India publications like *India 1982*, etc., and those brought out by the National Book Trust may be widely referred to. Standard reference books such as *Manorama Year Book* and *The Times of India Directory And Yearbook* should also be consulted. For out-of-the-way facts, read the *Guinness Book Of World Records*. Durga Das Basu's *Introduction To The Constitution Of India* should be ample for the Constitution section of the G.K. paper. Books on G.K. by Rajendra Pal and S.R.S. Francis are also quite comprehensive.

The G.K. paper carries 150 marks and normally contains 150 objective-type questions to be answered in 1½ hours. It has been seen sometimes that a candidate unfamiliar with this type of test is unable to answer the paper completely. Therefore, time yourself and attempt the sample questions in the stipulated 1½ hours.

How to answer: Mark your answers *NOT* in the question booklet but on the separate answer sheet provided. Mark nothing in the question booklet as otherwise you will be severely penalised. Instructions regarding this are usually given in the question booklet as also in the admission certificate/admit card. Read them carefully, as the paper is checked by a computer which follows programmed instructions. For example, in some tests candidates are required to blacken the space; in others to put a tick mark; in still others to put a

cross mark. Generally, in the Clerks' Grade Exam, candidates are required to mark a cross in the answer sheet. Besides, the instrument with which the answers are to be marked have also to be carefully noted. In some exams an HB pencil is required, in others a ball-point pen. Use the correct writing instrument or the computer may not check your paper.

Example: Q.No. 1. The capital of India is

- (a) Agra
- (b) Bombay
- (c) Calcutta
- (d) New Delhi

New Delhi [choice (d)] is the right answer. So, in the answer sheet against Q. No. 1, put a cross mark in the appropriate circle as shown below.

| Answer Sheet | | | | |
|--------------|-----------------------|-----------------------|-----------------------|----------------------------------|
| Questions | Answers | | | |
| | (a) | (b) | (c) | (d) |
| 1. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> |
| 2. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

Precautions: Exam tension leads some candidates to mark the answer in the right column but in a wrong row. While marking the answers, exercise strict care not to miss the correct row or all the following answers may go wrong. In fact, the last 10 minutes should be reserved to check that the marking of the answers has been done correctly in the right row and column. Such a revision is very useful.

Usually there is *NEGATIVE* marking in this exam. In rare cases there may be no negative marking. Such instructions are invariably given on the first page of the question booklet and need to be noted very carefully.

If there is negative marking, you should not hazard a guess as you will only lose marks. In such

circumstances it is better not to attempt the question and leave a blank in the answer sheet. However, if you feel two of the four alternatives appear to be the correct answer, then you may hazard a guess. With such an approach, mathematically speaking, you are likely to score better. But where you do not even have a vague hint of the answer, do not guess at all.

If there is no negative marking, attempt all the questions. Even if you do not know the correct answer, *do* put the mark in the answer sheet. With such an approach you may make a few correct guesses and thus gain a few marks. But please read the instructions and satisfy yourself that the instructions clearly state there is *no* negative marking.

Of the two papers, G.K. and English Language, candidates, by and large, finish the first well before time. But do not submit your paper before time. There is no extra credit for this. Keep the paper with you till the time is called. Revise the questions, re-read them and, if this has also been done, sit quietly with the paper. If you sit patiently, you may recall the right answer to

some of the questions you have not attempted. Thus, you will gain a few more marks. Remember, this is a competitive and not a qualifying exam. No minimum pass marks are prescribed: candidates are ranked in the order of the marks obtained in the G.K. and English papers, and those at the top will be offered the job. Even a few more marks may help you get the job.

Lastly, time yourself well. Take a watch for this purpose. Hundred-and-fifty questions are to be answered in $1\frac{1}{2}$ hours, that is, 90 minutes. The first five minutes

the instructions at the beginning, writing your name, listening to the last-minute instructions announced in the examination hall, etc. Ten minutes should be reserved for revision. Thus, you have 75 minutes to answer 150 questions. Check if after 40 minutes of the start of the examination, you have answered 75 questions. If you haven't, hasten. A good idea is to leave out the lengthy questions and those which require you to think. Remember, all questions carry equal marks. So it is advantageous to attempt short and easy questions first.

Type of questions: A wide variety of questions are asked. The underlying purpose is to test a candidate's ability relating to his factual knowledge as also the ability to use this knowledge. Questions are, therefore, designed to measure the understanding, application of knowledge and analysis as well as evaluation of facts, data, events and situations. The mental abilities tested are not of a high order.

Some questions are of the factual type, as already given above. Others are where there is one **BEST** answer. In this type, all the answers may be correct to some extent but only one is the best or most appropriate. You are required to choose the one best or most appropriate answer.

Example: Q. No. 2. Akbar is considered great mainly because of

- (a) The peace and tranquility during his reign
- (b) His vast empire
- (c) His patronisation of art and literature
- (d) His religious tolerance

Note: Here all the four answers are correct to a certain extent. But which is the best?

was more peaceful and tranquil during the reign of Jehangir and Shahjahan, yet they are not considered 'great'.

Choice (b) is not the best. Emperors like Ala-ud-Din Khilji and Aurangzeb had greater empires but are still not considered 'great'.

Choice (c) is also not the best. Shahjahan was a greater patron of art and literature, yet he is still not considered 'great'.

Choice (d) appears to be the unique achievement of Akbar among the Moghul emperors. Therefore, alternative (d) contains a more important factor than does (a), (b) or (c).

A few questions are asked on the 'Matching-type format'. You may be required to select the correct or the incorrect match and mark accordingly in the answer sheet.

Examples.

Directions: Pick out the match which is *not* correct.

Q. No. 3.

- (a) Haemoglobin — skin
- (b) Vitamin C — scurvy
- (c) Carbohydrate — potato
- (d) Fats — butter

The answer is (a).

Directions: Select the correct pair among the following

Q. No. 4.

- (a) 1919 — Civil Disobedience Movement
- (b) 1920 — Non-cooperation Movement
- (c) 1930 — Jallianwala Bagh massacre
- (d) 1942 — Quit India Movement

The answer is (d).

Q. No. 5.

- (a) Kalinga — Rana Pratap
- (b) Haldighati — Ashoka
- (c) Din-i-Ilahi — Akbar
- (d) Panipat — Shahjahan

The correct answer is (c).

GENERAL KNOWLEDGE

BY V.G.

FOR SSC CLERKS' GRADE, NDA, CDS...

This section has been specially prepared for those appearing in the Staff Selection Commission's Clerks' Grade Exam which is to be held in July. It will also help those preparing for the forthcoming NDA, CDS, Civil Services and Indian Economic/Statistical Service exams.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

- | | |

 (a) Chandigarh
 (b) Nagaland
 (c) Andaman & Nicobar Islands
 (d) Arunachal Pradesh
- 37 In all, India has—states.
 (a) 20
 (b) 21
 (c) 22
 (d) 23
- 38 Kampala is the capital of
 (a) Uganda
 (b) Kenya
 (c) Tanzania
 (d) Zambia
- 39 Black soil is best suited for — cultivation.
 (a) Jute
 (b) Rice
 (c) Wheat
 (d) Cotton
- 40 Monsoon is caused by
 (a) Temperature changes
 (b) Seasonal reversal of winds
 (c) Humidity difference
 (d) Pressure difference
- 41 At—the temperature at any place in India is generally the maximum.
 (a) 11 a.m.
 (b) 12 noon
 (c) 3 p.m.
 (d) 5 p.m.
- 42 — is the largest producer of mica.
 (a) Bihar
 (b) Tamil Nadu
 (c) Madhya Pradesh
 (d) Rajasthan
- 43 The National Metallurgical Laboratory is in
 (a) Ranchi
 (b) Jamshedpur
 (c) Dhanbad
 (d) Asansol

44. _____ is not situated on the banks of the Ganges.
 (a) Varanasi
 (b) Kanpur
 (c) Allahabad
 (d) Agra
45. The Cardamom Hills are in
 (a) Karnataka
 (b) Kerala
 (c) Andhra Pradesh
 (d) Assam
46. _____ has the largest area under tea cultivation.
 (a) Sri Lanka
 (b) Burma
 (c) India
 (d) China
47. The approximate height of Mount Everest is _____ m
 (a) 8,200
 (b) 8,500
 (c) 8,850
 (d) 9,150
48. _____ is a sedimentary rock.
 (a) Limestone
 (b) Marble
 (c) Granite
 (d) Slate
49. The most abundant metal in the earth's crust is
 (a) Zinc
 (b) Aluminium
 (c) Copper
 (d) Iron
50. Niagara Falls are situated in
 (a) Africa
 (b) Australia
 (c) Asia
 (d) North America
51. Marble is a _____ rock
 (a) Plutonic
 (b) Volcanic
 (c) Sedimentary
 (d) Metamorphic
52. Indian agriculture is mostly dependent on
 (a) Rainfall
 (b) Humidity
 (c) High temperature
 (d) Low temperature
53. _____ is associated with _____ rocks.
 (a) Volcanic
 (b) Sedimentary
 (c) Igneous
 (d) Metamorphic
54. Rubber plantations are found in the
 (a) Equatorial forest regions
 (b) Pampas
 (c) Steppes
 (d) Temperate forests
55. The world's leading tea-exporting country is
 (a) Burma
 (b) India
 (c) China
 (d) Sri Lanka
56. Jute, a tropical plant, requires _____ for its growth.
 (a) Moderate rainfall and low temperature
 (b) Moderate rainfall and moderate temperature
 (c) Dry conditions and high temperature
 (d) Heavy rainfall and high temperature
57. _____ causes sea winds to blow.
 (a) Conduction
 (b) Convection
 (c) Radiation
 (d) Radiation and conduction
58. The _____ does not flow into the Bay of Bengal.
 (a) Krishna
 (b) Ganges
 (c) Brahmaputra
 (d) Narmada
59. Which one of the following statements is incorrect?
 (a) Jog falls are in Karnataka
 (b) Chickmagalur is in Andhra Pradesh
 (c) Dilwara Jain Temple is in Rajasthan
 (d) Nepa newsprint factory is in Madhya Pradesh
60. _____ is not on the west coast

- of India.
 (a) Marmagao
 (b) Mangalore
 (c) Tuticorin
 (d) Kandla
- 61 Choose the incorrect statement:

(c) Iqbal
(d) Munshi Prem Chand
150. 'Hey Ram!' These were the last words of
(a) Bipinchandra Pal
(b) Rabindranath Tagore
(c) Lal Bahadur Shastri
(d) Mahatma Gandhi

BREAK THE CODE

The letters, O, T, T, F, F, — form the beginning of an intelligible series. The problem is to add two more letters in the series. Once the problem is solved, an infinite number of letters can be added.

Answer

The solution is deceptively simple. The next two letters in the series are S S. They stand for Six and Seven. And the first five letters stand for One, Two, Three, Four and Five.

TAX YOUR BRAIN

What is the missing number?

Answer

1 (Relationship of opposite sectors is that of equality, thus, $2x = 12$, $x = 6$, $x + y = 7$, $y = 1$.)

From IMPROVE YOUR I.Q. by Glenn Wilson

money, they should be accountable to someone representing the people. The government's aim is to maintain a balance between autonomy and control.

What does autonomy mean? It is the freedom given to the management to take its own decisions in connection with hiring personnel, buying inputs, selling goods, determining prices and developing work organisation. Autonomy cannot go without restraints. The government has to lay down a general policy to exercise control. This can be done by making the public sector undertaking accountable to the Parliament for its various activities. The major objective of accountability is to ensure that a public enterprise spends public money in the best possible way and organises work efficiently and economically. The Parliament also ensures that consumer interests are safeguarded and labour-management relations are harmonious. It can direct the undertaking to change its policies and working system.

The Parliament can exercise control in several ways. A widely-practised method is through raising questions or putting forward a motion in Parliament regarding the activities of an undertaking. A discussion can follow, which may lead to a detailed study of the matter. The members can also discuss the working of a public sector undertaking whenever a relevant ministry presents a proposal to the Parliament for funds. A parliamentary committee on public enterprises also critically examines the working of an enterprise to judge whether it is being run on sound business principles.

The government also controls certain administrative aspects. The concerned ministry controls all top-level appointments, constitution of the board of directors, appointments of auditors, approval of all foreign visits of chief executives and raising of share capital and loans in the national and international capital markets. Public enterprises are also subject to a statutory audit by the Comptroller and Auditor-General.

However, public enterprises have been given full autonomy in respect

undertaking is now authorised to recruit its own personnel, public sector undertakings cannot make appointments where the pay scale is higher than Rs 2,500-3,000. They also have no control over the appointment of the head of the undertaking and the members of the board of directors. They can, however, create posts and fix pay scales. They also enjoy financial autonomy in the sense that once their budgets are approved by the board of directors, they can make purchases without prior approval of the government.

While the debate on autonomy vs control continues, it is definite that public sector undertakings cannot enjoy the same degree of autonomy as those in the private sector. At the same time, principles and procedures followed in government departments cannot be applied to public sector undertakings. A balance has to be maintained between the two. To achieve this balance it is necessary that there be a clear-cut definition of the areas of parliamentary control and public sector's autonomy. The Members of Parliament should develop healthy definitions and should use their right in such a way that the control does not hamper the efficient and smooth working of the enterprise. The public sector, in its turn, should ensure that it does not misuse the autonomy and strictly follows the policies laid down by the Parliament or the ministry. Such an understanding would help in eliminating avoidable conflicts between the government and the management of the public enterprises.

EXPORTS

Public sector undertakings have acquired a significant place in India's export industry. In 1965-66 these undertakings earned a small sum of Rs 35 crores in foreign exchange. In 1980-81 the export earnings rose to Rs 2,600 crores. This accounted for 30 per cent of the country's total export earnings. Major export earners in the public sector have been: Hindustan Steel, Bharat Heavy Electricals Ltd, Hindustan

Tractor Corporation.

Bharat Heavy Electricals Limited (BHEL) has acquired several prestigious contracts. In Malaysia it bagged five successive contracts for boiler supplies with a total generating capacity of 1,110 Mw. This constitutes 80 per cent of Malaysia's power-generating capacity. It has acquired similar contracts in Libya, Saudi Arabia, New Zealand, Nepal, Kuwait, Thailand, Turkey, Kenya and even in the industrialised countries like the US, West Germany, France, Switzerland and the UK. BHEL is getting not only first contracts but repeat orders also.

Electronics Trade and Technology Development Corporation Limited (ETTDC) exports more than 27 items (including telephone cables and computer software) to about 30 countries. Important countries importing from the ETTDC are the USSR, the US, Poland and Nigeria.

Engineers Projects India Limited (EPI) has acquired 14 projects valued at Rs 5,630 million. **Engineers India Limited (EIL)** has overseas assignments worth \$20 million and earns about \$4 million from overseas operations.

Hindustan Machine Tools (HMT) is exporting its products to the US, the USSR, the UK, Canada, West Germany, France, Australia and Poland. **Indian Railway Construction Company Limited (IRCON)** has recently secured a Rs 2,240-million contract in Iraq. IRCON is already working in several African and Middle East countries. The **Indian Road Construction Corporation Limited (IRCC)** has 12 contracts in Libya worth \$404 million for constructing 1,246 km of roads.

PUBLIC SECTOR ABROAD

Public sector has assumed importance in Western democracies, contrary to the common belief that the private sector is inherently superior to it. A recent survey on the resources and profits of public enterprises in the European Economic Community (EEC) stated that public

welcome dynamism, especially in the latter half of the 1970s.

Major sectors where public enterprises are operating in France, Britain, West Germany and Italy are transport and communications, gas, electricity supplies, coal, nuclear energy, air services, steel units and ship-building. The number of employees in public sector units, which represented 9.3 per cent of the work force in the non-agricultural sector in France in 1973, rose to 10.3 per cent in 1979. In Britain, 8.1 per cent of the total work force was engaged in this sector in 1979. Its share in value added by all undertakings in 1978 was 13 per cent in France and 12 per cent in West Germany. Public enterprises contributed nearly 11 per cent of the gross domestic product (GDP) in Britain in 1979.

Public sector undertakings have a significant share in the gross fixed capital formation. In 1976, their share was 26.3 per cent in Britain and 17 in West Germany.

Important changes have taken place in the institutional, financial and economic framework of nationalised industries in the UK since the publication of a government White Paper in 1978. The principal changes relate to improving the control procedures over the use of resources. Each nationalised industry is to have a set financial target, which takes into account the social or sectoral objectives specified for that industry. The nationalised industries must seek a 5 per cent real rate of return on all new investment. In France, the new socialist schemes adopted by the Mitterrand administration in 1981 assuredly brightened the prospects for this sector.

Among the developing countries, public sector assumed importance in Sri Lanka, Bangladesh, Turkey and a few African countries.

In Sri Lanka the number of public enterprises grew from one in 1941 to 25 in 1975. Investment rose from Rs 92 million in 1956 to Rs 3,462 million in 1978. Nearly 40 per cent of industrial value added by all units came from public enterprises in 1977. In 1978, 16 undertakings operated at a commercial profit. The combined rate of return on capital was 12.6 per cent on the average for 1973-77.

The Government of Bangladesh

SOME HARD FACTS

INFRASTRUCTURE

- The 200 Central Government and 600 state public enterprises form even less than 2 per cent of the corporate strength of 50,000 joint-stock companies.

- Originwise, the break-up of public enterprises reveals that 65 per cent of these units were established by the State and 30 per cent were taken over from the private sector (nationalised). The remaining 5 per cent accounts for managerial substitution, i.e., those units which are sick and have been taken over by the State.

- The public sector constitutes 80 per cent of the paid-up capital of the corporate sector in the country. Of the top 101 corporate giants, 51 public enterprises account for 80 per cent of the total assets and 70 per cent of the total net sales.

- Public enterprises with investment worth Rs 21,126 crores as at the end of March '81, earned just Rs 39 crores as against the Rs 231 crores earned by Tata-Birla groups taken together with an investment of Rs 3,000 crores.

- Of the 200 public enterprises, the top 10 have 55.5 per cent of the total capital invested in public enterprises. SAIL alone has 19 per cent or approximately 1/5th of the total, whereas Food Corporation of India has 2.5 per cent or 1/40th of the total investment. The position as regards others is: CIL (10 per cent), ONGC (4.4 per cent), FCI (4.3 per cent), RECL (4 per cent), SCI (3.4 per cent), KIOC (3.2 per cent), NFI (2.6 per cent) and HFCL (2.5 per cent).

- Of the total industrial investment in India, the public sector now has 59 per cent, joint sector 6 per cent and private sector 35 per cent, though the share of public sector investment vis-a-vis the total corporate sector comes to 35 per cent only.

- The Sixth Plan provides for a total investment of Rs 1,587.1 billion of which

the public sector accounts for Rs 840 billion or 59.9 per cent.

OPERATIONS

- During 1980-81 the value of goods produced or services rendered by public enterprises amounted to Rs 26,570 crores as against an operational cost of Rs 27,149 crores, which caused an operational loss of Rs 579 crores. Adjusting this against the non-operational income of Rs 618 crores, the net profit before tax comes to Rs 39 crores.

- The public sector just employs 1 per cent of the total working force of 20 crores, though it accounts for 25 per cent of production in the manufacturing sector.

- During 1981-82, 75 per cent of the public enterprises recorded an increase of about 10 per cent in their output as compared to the previous year. Electricity generation increased by 10.1 per cent, coal production by 9.5 per cent, saleable steel by 15 per cent and crude petroleum by 54.5 per cent. In the first half of '82-83, coal production has improved by 5 per cent, lignite by 14 per cent, crude petroleum by 40 per cent and cement by 43 per cent.

- HMT and HMT (International) Ltd have 8 overseas offices and 28 representatives. They have gained markets in the US, the USSR, the UK, Canada, West Germany, France, Australia and Poland.

- The public enterprises belong to the privileged sector as the MRTP Act is not applicable to them. They have a 100 per cent monopoly in the production of copper, lead, coal, petroleum, hydro and steam turbines, telephones, telephonic cables, teleprinters, electrical typewriters, ship-building, locomotives, railway coaches, photo films, etc. Its degree of monopoly in selected items can be seen thus: crawler tractors—95 per cent, wrist watches—91 per cent, professional electronics—82

per cent, zinc—79 per cent, mining machinery—67 per cent, bread—65 per cent, machine tools—56 per cent and antibiotics—51 to 77 per cent

PROFITS

- Of the top 10 (investment-wise) public enterprises, ONGC is the only one which also ranks among the top 10 profit-making enterprises. Its figures: Rs 46.57 crores. Incidentally, FCI shows the highest losses (Rs 99.69 crores).

- While 94 public enterprises earned Rs 792 crores in 1980-81, 74 lost Rs 753 crores. In 1981-82, 169 earned Rs 400 crores as against the best period of 1976-77, when 149 units earned Rs 184 crores.

- The top profit-making enterprises account for 62 per cent of the total pre-tax profits of all the 94 profit-making units. Their respective shares: IOC (13.7 per cent), Central Coalfields Ltd (9.9 per cent), MMTC (7.7 per cent), STC (7.2 per cent), ONGC (5.9 per cent), Indian Petro-chemicals Ltd (4.3 per cent), Hindustan Petroleum Corporation Ltd (4.3 per cent), Bharat Heavy Electricals Ltd (3.4 per cent), Bharat Petroleum Corporation Ltd (2.9 per cent), Western Coalfields Ltd (2.8 per cent).

LOSSES

- Public enterprises have a long history of losses. Sixty-six per cent of the total loss is accounted for by only 10 enterprises running into heavy losses: FCI (13.2 per cent), Eastern Coalfields Ltd (10.9 per cent), Hindustan Fertiliser Corporation Ltd (7.2 per cent), Delhi Transport Corporation (5.9 per cent), Heavy Engineering Corporation (6.8 per cent), Bharat Coking Coal Ltd (5.8 per cent), National Fertilisers Ltd (5.6 per cent), Hindustan Steel Works Construction Ltd (4.5 per cent), Bharat Aluminium Co Ltd (3.1 per cent), Air India (2.8 per cent).

(For latest figures, see page 21)

nationalised all major industries after the liberation. The number of public enterprises swelled from 52 in 1971 to 450 in mid-1975. The First Five Year Plan allocated 85 per cent of planned investment in the manufacturing sector to public industrial corporations. However, the role of the public sector was toned down in subsequent years in the name of pragmatism. The restrictive role of the private sector has been gradually relaxed.

In Thailand, 72 units in sugar,

tobacco, gunny bags and paper industries were operating under the public sector in 1978. Four sugar mills, accounting for 6 per cent of the country's raw sugar output, were owned by the government and three gunny-bag public sector factories competed with seven private factories. Public enterprises in Thailand are administered like government departments. Of the 510 persons at the top management level of public enterprises, 53 per cent came from the civil service and 29 per cent were

military officers. Politicians accounted for another 12 per cent while professionals like managers, business experts and engineers formed less than 5 per cent. However, recently the government seems to have become aware of the need to improve efficiency in public enterprises. The Fourth National Economic and Social Development Plan (1977-81) directs the government to revise laws and regulations so that public enterprises may have more autonomy. □

FOR-IIT-JEE, NDA, CDS...

This section will be of help to those appearing for the Joint Entrance Exam of the IITs to be held next month. It will also help those preparing for the forthcoming National Talent Search Exam, CDS and NDA exams.

COMPREHENSION - A

I Read the following passage carefully and answer the questions that follow by choosing the best alternative

There is something to be said for the man who would prefer to be a savage rather than a member of a 'civilised' race. What exactly has civilisation done for us? For one thing, it has deprived us of the ability to be self-sufficing 'men of our hands'. The labourer, nowadays, understands one thing only—perhaps how to punch out biscuits from a slab of pulp without making the circles intersect. It has made us mentally lazy. Actual reading in early times, even in the seventeenth century, demanded real mental exercise on the part of the reader. Modern prose, even the most ephemeral, is generally clear, both in expression and in print. In consequence, reading is now purely receptive—it is not work at all—a mild anodyne, or a stimulus to day-dreaming. Newspaper-reading seems to be largely the result of interest in vicarious athletics and betting, topics which make no demand on the intellect whatever. There is a wide desire for general knowledge, it is true, but only the results are of interest, not the method by which they are arrived at. Science must be presented in easily assimilated snippets, tabloid form—this in a 'scientific' age. People even prefer that photographs or cartoons should replace reading matter altogether. They require less mental effort to absorb. Even education is mainly spoon-feeding. Fifty years ago the student had to puzzle out difficulties by himself, but today he sits luxuriously before a crib, two commentaries and a book of lecture notes. He need not use his brains at all.

- 1 The author's feeling towards "the man who would prefer to be a savage" is one of
(a) deep sympathy
(b) understanding

- (c) admiration
(d) approval
- 2 "What exactly has civilisation done for us?" The above question
(a) shows the author's ignorance
(b) proves the author's prejudice
(c) betrays the author's insincerity
(d) creates a kind of rhetorical effect
- 3 The phrase "self-sufficing 'men of our hands'" means
(a) men whose hands are full
(b) men who can sufficiently depend on their hands
(c) men who can work with hands unaided by machines
(d) men who work with hands and are rich
- 4 "It has made us mentally lazy" 'It' in this sentence refers to
(a) slab
(b) pulp
(c) making the circles intersect
(d) civilisation
- 5 The word 'ephemeral' means
(a) short-lived
(b) profound
(c) badly written
(d) quickly produced
- 6 "topics which make no demand on the intellect whatever" are
(a) difficult
(b) obscure
(c) easy
(d) well-known
- 7 "...this in a 'scientific' age" is a statement full of
(a) humour
(b) satire
(c) unhappiness
(d) irony
- 8 The overall tone of the passage is
(a) sad
(b) light
(c) enthusiastic
(d) humorous

COMPREHENSION—B

II Read the following passage carefully and answer the questions that follow in *one* sentence each. Base your answers on the information given in the passage.

Can courage be judged apart from danger? Can we say, while there is yet peace, of those about us that if war came they would acquit themselves as men?

I may as well admit at the outset that there are some who have little faith in any such sifting process. They will say that men must be put to the crucial test of war before labels are attached to them. War, they affirm, has a way of discovering the true nature of a man; it pays scant attention to the standards of peace, which they assume are different from those of war.

It is altogether a most comfortable doctrine. They would have the best of both worlds. They believe that while there is yet peace a man must do the best for himself; it is the only rational thing to do. He must live for himself; his standards are naturally self and Mammon. Suddenly there is war and as suddenly human nature is transfigured. The stir and fervour and exhilaration of the social atmosphere in times of excitement bring out qualities which in peace are dormant. They would imply, those sleek citizens, that beneath a coat of selfishness in peace lay all the qualities we have learnt to prize in war. As practical men, too, they find little profit in these vague speculations about the springs of human conduct. They have not thought of courage as self-discipline, a moral quality.

1. What precisely is the author asking in the first sentence?
2. What does the phrase "such sifting process" exactly refer to?
3. In what sense is war a "crucial test"?
4. Which "standards" are being referred to at the end of the second paragraph?
5. "It is altogether a most comfortable doctrine." According to whom?
6. What, according to the author, is the best way to view courage?

III In the following passage, there are three sentences which are not relevant to its main theme. Pick them out and rewrite them.

Today agriculturists know that crops must have sufficient mineral salts if they are to grow well. The WHO is doing very good work for raising new crops. Experiments are carried out by soil scientists all the time to find out what amount of mineral salts is absorbed by a particular plant. Water too is vital for successful agriculture. They report that different plants require different amount of salts for growth. As a result of these experiments, commercial firms are manufacturing fertilisers which really are mineral salts in some convenient form. Fertiliser industry is responsible for the general prosperity of advanced countries in the world. Farmers are advised to use the right type of fertiliser for their crops. This will then ensure a good crop.

ARTICLES OF SPEECH

IV Insert articles of speech wherever necessary:

(1) ...good system of communication ensures (2) ... rapid development of (3) ...country. Once (4) ...network of (5) ...roads and (6) ...railways has been established between (7) ...hinterland and (8) ...sea-port (9) ...raw materials can be easily carried to (10) ...sea-port for export to (11) ...other parts of (12) ...world. Similarly, imports from (13) ...foreign countries can reach (14) ...people in (15) ...country by (16) ...same routes. But before (17) ...country can embark on (18) ...construction of (19) ...good communication system it requires (20) ...large sums of money. (21) ...money for such projects is usually drawn from (22) ...reserve funds of (23) ...country. Where current revenues are insufficient (24) ...country may apply for (25) ...funds from richer countries provided (26) ...country can assure (27) ...lending countries that (28) ...revenue from (29) ...project will eventually exceed (30) ...capital expended. More often than not (31) ...countries with (32) ...capital to spare grant (33) ...application, but only when they have been convinced and they are confident that (34) ...project will not fail.

positions have been omitted. Write correct prepositions in the spaces provided.

A good vocabulary is a great asset (1) ...every part (2) ...the examination. (3) ...the essay, a good vocabulary enables you to express yourself exactly (4) ...being lost (5) ...words, and (6) ...having to repeat weak words and expressions (7) ...the summary, a good vocabulary is essential; it enables you to sum up a whole concept (8) ...one or two apt words. Accurate comprehension is impossible (9) ...a good vocabulary, and the passages set usually demand that you know several thousand words (10) ...what you use (11) ...normal everyday conversation.

USAGE

VI Rewrite the following without changing the meaning, according to the directions given against each:

(a) *The ant and the grasshopper*

I will tell you the story of the ant and the grasshopper. It is a cold winter's day and an ant is bringing out some grains of corn that he gathered in the summer as he wants to dry them. A grasshopper, who is very hungry, sees him and says, "Give me a few grains of corn; I am dying of hunger."

"But," says the ant, "what did you do in the summer? Didn't you store up any corn?"

"No," replies the grasshopper, "I was too busy."

"What did you do?" says the ant.

"I sang all day," answers the grasshopper.

"If you sang all summer," says the ant, "you can dance all winter."

Rewrite the above story in indirect speech. Begin: The writer said that... (call the ant 'he' and the grasshopper 'she').

(b) a very agitated woman rang up her doctor and a servant answered the phone can i speak to dr russell she said its urgent im sorry madam the doctor is out will you leave a message oh dear oh dear my ten year old little boy has swallowed a fountain pen when will the doctor be in im afraid madam he wont be in for two hours perhaps three hours three hours cried the woman what shall i do in the meantime im afraid madam youll have to use a pencil

(c) The guide took us round the temples. He gave us a lot of information. We didn't have the time to see everything.

Combine the above sentences into a compound sentence using one or more conjunctions.

(d) He will have completed it by the end of next month.

Rewrite the above sentence in the passive voice.

(e) He not only cheated me but also my friend.

Correct the above sentence.

PRECIS

VII Make a precis of the following passage:

The political ideas which are based upon plenty instead of shortage must be different from those we traditionally call capitalist or communist. When we are able to increase wealth on such a vast scale, problems arise which cannot be solved easily by either of these two rather old-fashioned systems. From a battle for possession of wealth, limited by our present capacity to produce, we are moving into an era where we shall be much more concerned with the means of exploiting our technical resources, with increasing productivity still further, and then of necessity with the problem of the organisation of society for the greatest good.

It is probable that there will eventually emerge a new type of political attitude, healthier and less selfish, which will seek a form in which it can best serve the whole of society, rather than a section of it. Politics, as we have understood them, are in the process of change, and party politics based on old clichés are becoming increasingly irrelevant and distasteful to many of the scientists and technologists who now make up such an important and influential section of every advanced society.

ESSAY

VIII Write an essay on any one of the following topics (about 300 words):

1. Handsome is he who handsome does.
2. The tyranny of Indian social customs.
3. Violence and politics in India.

(Answers on page 72)

(Continued from page 27)

- I 1. (b) 2. (d) 3. (c) 4. (d) 5. (a) 6. (c) 7. (d) 8. (a)
- II 1. Is it possible to be courageous in ordinary times, times of peace? 2. It refers to close examination and analysis of the problem posed in the first paragraph 3. It is crucial in so far as it alone will decide whether a man has courage. 4. Reference is being made to the standards of judging courage during times of peace. 5. According to "some" people referred to in the first sentence of the second paragraph. 6. The best way is to view it as self-discipline, as a moral quality.
- III 1. The WHO is doing very good work for raising crops. 2. Water too is vital for successful agriculture. 3. Fertiliser industry is responsible for the general prosperity of advanced countries in the world.
- IV 1. a 2. zero 3. the 4. a 5. zero 6. zero 7. the 8. a 9. zero 10. the 11. zero 12. the 13. zero 14. the 15. the 16. the 17. a 18. the 19. a 20. zero 21. the 22. the 23. the 24. the 25. zero 26. the 27. the 28. the 29. the 30. the 31. the 32. zero 33. the 34. the
- V 1. in 2. of 3. in 4. without 5. for 6. without 7. in 8. in 9. without 10. beyond 11. in
- VI (a) The writer said that he would tell us the story of the ant and the grasshopper. It was a cold winter's day and an ant was bringing out some grains of corn that he had gathered in the summer as he wanted to dry them. A grasshopper, who was very hungry, saw him and asked him to give her a few grains of corn as she was dying of hunger. Not satisfied, the ant asked her what she had done in the summer, and if she hadn't stored up any corn. The grasshopper replied in the negative and said that she had been too busy. The ant again asked her what she had done. The grasshopper answered that she had sung the whole day. The ant then said that if she had sung all summer, she could dance all winter.
- (b) A very agitated woman rang up her doctor and a servant answered the phone. "Can I speak to Dr. Russel," she said, "it's urgent." "I'm sorry madam, the doctor is out. Will you leave a message?" "Oh dear! Oh dear! My ten-year-old little boy has swallowed a fountain pen. When will the doctor be in?" "I'm afraid, madam, he won't be in for two hours—perhaps three hours." "Three hours," cried the woman. "What shall I do in the meantime?" "I'm afraid, madam, you'll have to use a pencil."
- (c) The guide took us around the temples and gave us a lot of information but we didn't have the time to see everything.
- (d) It will have been completed by him by next month.
- (e) He cheated not only me but also my friend.
- VII The problems of plenty being very different they cannot be tackled within the traditional dichotomy of capitalism versus communism. Creation of plenty would involve maximising the use of science and technology and a corresponding desire for the maximal good. With this inevitable change in our attitudes politics are bound to change too, bringing about the largest good for the largest number.
- VIII 1. **Handsome is he who handsome does**
- Are goodness and virtue mere thoughts, are they mere form, or, are they active principles manifested in human action? Different people answer these questions differently. "How does it matter what you do, so long as your intentions are good?" ask one set of people. According to them what motivates action is more important than the action itself. To counter the above argument its opponents cite the proverb: "Even the way to Hell is paved with good intentions." The world is shaped in the last analysis by what one does and not by what one thinks. Such a formulation, however, creates an artificial dichotomy between thought and action. Good thoughts ensuing into rectitude of conduct is what one would ideally like to have. The springs of all actions lie in the human mind. To that extent noble ideas are pre-requisite to praiseworthy conduct. However, there is a distinct possibility of there being a bottleneck between the two, aborting the translation of the conceptual into the actual. This makes it imperative to stress the practical importance of action. The ideally good is not merely a matter of looks. What matters is the substance—that which lies beneath the veil of surface appearances. It is in this sense that handsome is he who handsome does.

Constitution all property and assets which were vested in His Majesty for the purposes of the Government of the Dominion of India and the Governor's Province came to be vested in the Union and the States respectively. Similarly, all rights, liabilities and obligations were continued as the rights, liabilities and obligations of the Government of India and the Government of the State respectively (Art. 294-295).

All lands, minerals, etc underlying the ocean within the territorial waters or the continental shelf or the exclusive economic zone of India vest in the Union and are held for the purposes of the Union (Art. 297).

All contracts, made in the exercise of the executive power of the Union or a State, are made in the name of the President or a Governor respectively, though no personal liability attaches in respect thereof on the President or the Governor (Art. 299).

The Government of India may sue or be sued by the name of the Union of India or the Government of the State may sue or be sued by the name of the State (Art. 300). By the provisions of the 44th Amendment, the status of the right to property has been reduced from that of a Fundamental Right to only a legal right. Accordingly, Art. 300A provides that no person shall be deprived of his property save by authority of law.

TRADE, COMMERCE AND INTERCOURSE (Art. 301-307): Trade, commerce and intercourse throughout the territory of India is free and this applies to both inter-state and intra-state trade, commerce and intercourse. Parliament and the Legislatures of the States are empowered, however, to impose restrictions as may be required in the public interest (In the case of the States the restrictions must also be reasonable and no Bill making such restrictions can be introduced in the Legislature without the previous sanction of the President.)

(To be continued)

Serialized from THE TIMES OF INDIA DIRECTORY AND YEAR BOOK 1982

WHY STUDENT VIOLENCE?

"Five killed in student violence", "Buses burnt as students go on rampage", "Students gherao vice-chancellor"—common headlines in our newspapers, and getting more and more common every day. Why? Is ours a lawless society? Are the students a privileged class in India? Can they dictate their own terms and get away with it? Just the other day, 15 students walked into the office of the vice-chancellor of a university in South India, complained that the evaluation of certain papers had been too strict and demanded that the marks should be increased. When the vice-chancellor refused to concede their demands, they stomped out threatening direct action—which in student parlance very often means violence. To cite another example, academic work in a prestigious university in the northern sector of the country has recently come to a standstill because some members of the student community want the vice-chancellor to expel a teacher (a sacrilegious thought in those golden days, not so long ago, when teachers were considered to be 'gurus'). And the teacher's crime? He allegedly said something objectionable to one member of the student community. Are the students to decide who will teach them? Can they resort to lawlessness when their feelings are hurt or their demands, which are sometimes unreasonable, go unheeded?

The problem is that students in India do resort to violence—and often. These students are the infrastructure on which the nation will be based in the years to come. The culture of violence which has permeated student life is passed on to adulthood. It will not be surprising if India becomes a lawless society in the not so distant future. One reason given for student violence is that the students fear a bleak future. Another

And yet another is that the students are frustrated. If these are the causes, can they not be remedied?

To take up the first point, is the fear of unemployment really the cause of student violence? Alternatively, would violence stop if there was a brighter future to look forward to? Furthermore students know that it is a competitive world that they are entering. The societies of the more industrialised nations are also highly competitive. There is hardly any student violence in Japan, West Germany or the US—and when students do revolt, it is usually against a genuine issue like the Vietnam war or arms race. In fact, the students are more interested in their studies because they know that they have to do well in order to be a success in life. In India although students know that they have to fight for a place in the limited job market, they are less interested. Why is this so? Are they, in fact, less aware of the future? Do they plan their future at all at the undergraduate level? Or is it that they are dissatisfied with the courses which are obsolete? Would they be less prone to violence if there were job-oriented courses?

Violence is also the outcome of political interference. Students know that they can get away with anything because they have the support and backing of politicians and political parties. Sometimes as has happened in Assam and Gujarat, the politicians instigate the students to riot. It is common knowledge that political parties contribute large amounts to student parties during the time of student elections, and these assume the preparation of mini national frays. Does this not have a bad effect on student culture? Recently Madhuri Shah, the Chairman of the University Grants Commission (UGC) said that she preferred nominated student bodies. This may put an end to election expenses and pre-poll 'goondaism' in colleges. But will it not also have an adverse effect on the student body? Will the authorities listen to the genuine grievances of the students, if there was no politicking among students?

This brings us to the question of genuine students' problems. Why is there no proper mechanism

portation for students, library facilities, etc. not be improved without the students having to fight for it? If these were to be improved, the 'goonda' element among the students who create trouble for trouble's sake, could perhaps be separated. And once they are separated, it should be made possible for the authorities to take due action against them, without having the entire student body at their heels.

It has also been pointed out by some that students in India are frustrated. This is a rather general statement. Why are Indian students frustrated? Is it that they are dissatisfied with the teaching in various colleges? Or is it that they are just irresponsible? In that case, would a hike in the fees make them more responsible? At present the fees are very low—ranging from Rs 15 to 25. In the West, where college education is expensive, academics is taken more seriously.

Whatever the cause of student frustration the basic question is whether it is right that students should resort to violence? But it is equally true that there are gaps in our education system, which provide them with some genuine excuses. This raises another question—have not our political leaders miserably failed to chalk out a creative policy for education and culture? If violence is not stemmed at the student level, the culture of India will be affected. But if the education system is not remedied, education will lose its relevance.

V NIRANJAN & S.B.

REACTIONS

'Points To Ponder' covers topics that raise relevant questions to help you think and reach your own conclusions. To judge how reasonable and logical you have been in your conclusions, we have introduced 'Reactions' to this feature. All your reactions should be written in an essay form of not more than 300 words, repeat 300 words. This exercise should also help you in writing essays in competitive exams. The three best responses will get cash prizes of Rs 150, Rs 100 and Rs 50 respectively. Last date for receiving entries is April 25.

February 3 Nine killed in police firing and clashes in Assam areas; army deployed.

Assam agitation leaders announce 18-day total non-cooperation programme beginning February 5.

February 4 India, Nepal reach accord on three major multi-purpose river-valley projects.

Indo-Bangla meet on river waters adjourned; discussions to be resumed on February 22.

One killed in firing in Assam town. Union Cabinet rules out postponement of Assam elections.

February 5 Delhi goes to polls to elect Metropolitan Council and Municipal Corporation representatives.

Four killed in Assam firing; curfew imposed in Tangla and Mangaldoi.

India, Nepal agree to set up ministerial-level joint commission.

US raises military aid to Pakistan by \$ 50 million.

February 6 Congress (I) wins Delhi elections annexing 29 Metropolitan Council and 51 Corporation seats.

Violence in Assam spreads; firing at many places

February 7 Firing again in Assam as crowd attacks police party, agitators kill policeman in ambush.

33 Maharashtra ministers sworn in. A.B. Vajpayee resigns from BJP Presidency in reaction to party's defeat in Delhi polls.

High-level economic advisory council set up to suggest policy changes.

February 8 Continuing anti-poll violence leaves 11 dead in Assam.

Akali talks resumed, no progress towards settlement.

February 9 Assam violence claims five more lives, toll rises to 36.

February 10 14 more killed in Assam violence, PM Indira Gandhi arrives in Assam.

Tripartite talks on Akali demands get bogged down on sharing of Ravi-Beas waters.

February 11 Continuing violence in Assam takes toll to 62, army troops move in to run Assam oil facilities.

IMF decides in favour of 47-per cent increase in quota resources.

February 12 Five killed in Assam communal clashes; 200 houses set ablaze; PM

rules out talks amidst violence.

Vajpayee withdraws resignation. **February 13** 17 killed in Assam poll-eve violence.

February 14 22 more lives lost as first phase of Assam polling ends; no polling in 100 booths in Assam, toll reaches 115.

Communal violence in Assam's Darrang district leaves an estimated 100 dead.

Curfew imposed in Dhaka after student violence; one student killed.

February 15 Clashes, arson spread in Assam, eight villages burnt down.

Bihar CM Jagannath Mishra drops 11 ministers through 'voluntary' resignations.

Tripartite talks on Punjab tangle adjourned; to be resumed on February 18.

Three persons killed in police firing in Dhaka; troops move in to restore order, political leaders detained.

February 16 24 more killed in Assam, violence spreads to new areas.

Karnataka cabinet expanded.

February 17 29 killed in fresh Assam violence, second phase of polling ends.

Peaceful polling held in Meghalaya.

Riots in Bellary and Bijapur in Karnataka leave seven dead.

Dhaka regains normalcy.

February 18 Repoll held in 73 booths as Assam violence continues, 28 people killed and 30 villages burnt.

Budget session begins.

Akali talks remain inconclusive at the end of three-hour meeting.

Violence continues in Bellary.

February 19 250 massacred in Assam town; toll rises to 321 on eve of third phase of polling.

No progress in Akali tripartite talks.

February 20 Third and final phase of polling in Assam as state's toll figure mounts to 1,000; 600 killed in Nellie alone in week-long anti-election violence in the state.

Tripartite talks on Akali issue end without accord; appeal by Centre and Opposition to postpone resignation of Akali MPs and MLAs rejected by Akali Dal President Sant Harchand Singh Longowal.

February 21 PM orders speedy relief to violence victims in Assam.

February 22 Pre-budget economic survey presented in Parliament; fall in industrial, farm output admitted.

Army deployed in three districts in Assam as continuing violence takes 25 more lives.

Congress (I) wins absolute majority in Assam; no political party secures majority in Meghalaya; Congress (I) emerges single largest block with 25 seats out of 60.

February 23 Four killed and 250 houses burnt in fresh incidents in Nowgong district in Assam, troops rushed to quell flare-up.

Congress (I) gets two-thirds majority in Assam.

Indo-Bangla Rivers Panel resumes talks in New Delhi.

February 24 Trouble in Nowgong again; police fire twice to disperse mobs.

Railway budget presented

February 25 10 more die in Assam; troops control five Assam areas.

February 26 Three parties present memorandum to President Zail Singh demanding annulment of Assam poll.

February 27 13-member Congress (I) Ministry sworn in in Assam.

Some religious demands of Akalis accepted; acceptance a fraud, stir to continue, says Longowal.

February 28 Finance Minister Pranab Mukherjee presents budget in Lok Sabha.

Telugu Desam wins three seats in Andhra Assembly by-elections; loses Himayatnagar seat to BJP.

Government starts implementing accepted Akali demands.

March 1 Senior officials of Non-aligned Movement (NAM) hold two preparatory sessions in New Delhi.

March 2 28 people killed in Assam clashes and firing; army moves into seven districts to maintain law and order.

Akali leaders present memorandum to Zail Singh requesting his resignation as a gesture of solidarity with Punjab people; President 'turns down Akali plea.

21 foreign ministers arrive in New Delhi for two-day meeting on Non-aligned Conference; senior officials conclude deliberations, leave knottier issues for NAM ministers.

Two-member United Parliamentary Party coalition government assumes office in Meghalaya.

A.P.

CABINET RESHUFFLE COSMETIC CHANGES

Following the defeat of the Congress(I) in the south the impression was created that a major cabinet reshuffle was in the offing. The minor ministerial changes of January 29 and February 14 have, however, turned out to be "cosmetic changes", which will not have any impact. In the latest reshuffle, two Cabinet Ministers, A.P. Sharma and Bhushma Naram Singh, holding the portfolios of Communications and Civil Supplies and Supply respectively, have resigned. Sharma is the new Governor of Punjab. Apart from this, as in the previous reshuffle, Prime Minister Indira Gandhi has not changed the portfolios of any of her senior ministers.

The rest of the exercise merely involved the reshuffling of portfolios of six ministers of state and a deputy minister. Among those rewarded: H.K.L. Bhagat, former Minister of State for Works and Housing, who was responsible for the successful election campaign in Delhi, is the new Minister of State for Information and Broadcasting; Bhagwat Jha Azad, hitherto Minister of State for Civil Aviation, takes over the Ministry of Food and Civil Supplies, probably in recognition of the good work he has put in as the AICC(I) observer in the Delhi elections. Among those punished: N.K.P. Salve, who has been shifted to the Ministry of Steel and Mines, thus, presumably, indicating the inadequacies Mrs Gandhi has noticed in the important Information Ministry. With these changes the strength of the Cabinet comes down to 18 from 20, including the Prime Minister. The overall number of the council of ministers comes down from 60 to 58.

Mrs Gandhi has supplemented these political changes with efforts to improve the administrative apparatus. She followed up her recent directives to improve administrative efficiency, with measures to curb government expenditure (announced on February 7) and her letters to chief ministers to tone up

the administration (announced on February 19).

Among the measures to cut down government expenditure and give a boost to the national economy: the decision to set up a high-level council of senior economists to recommend policy changes; a review of the working of Indian missions abroad; and advice to the cabinet ministers to avoid ostentatious expenditures and cut down on foreign travel. The Prime Minister has also asked the state governments to avoid frequent transfer of officials, particularly at the district level, review the working of state corporations, and discontinue the practice of providing escort cars for visiting Central ministers.

In her letters to the chief ministers of all states, Mrs Gandhi has stressed the need for streamlining their administration to make it more efficient and to root out corruption. She asked them to continue their fight against regionalism, communalism and casteism, to ensure that the administration was more responsive to the people, and to ensure promptness in dealing with office-work and non-official queries.

AKALI TALKS STALEMATE OVER SPECIFICS

During the tripartite talks held in New Delhi over several days, no agreement could be reached on the Akali demands. Thus, the MLAs and MPs of the Akali Dal refused to withdraw their post-dated resignations, which became effective from February 21.

The two major issues discussed were the Akali demands to reopen the Ravi-Beas river-waters accord of December 1981 and refer it to a tribunal, and to transfer Chandigarh to Punjab and refer to a tribunal the readjustment of territorial boundaries of the states of Punjab and Haryana.

The Chief Ministers of Haryana and Rajasthan, and Opposition leaders from the two states, were also present in the capital for consultation during this period, at the invitation of the Centre. They unitedly opposed the Akali demands.

Since the river-waters accord

involves all the three states, Rajasthan was naturally opposed to the reopening of the entire issue. It was, however, agreeable to the reopening of the issue provided its existing share in the river waters was left undisturbed. To this, the Akalis did not agree.

Haryana, which was also unwilling to reopen the river-waters issue, was also opposed to the transfer of Chandigarh to Punjab without implementing the entire Prime Minister's award of 1970, which envisaged the simultaneous transfer of Fazilka and Abohar areas from Punjab to Haryana in exchange. The Akalis did not agree to this, either.

Following the deadlock in the talks, the Akali Dal gave a call to all MPs and MLAs from Punjab to resign by March 15. The call, quite predictably, was ignored by the other parties. The Dal also decided to press for the resignation of President Zail Singh.

The Akali's logic was that they had voted for Zail Singh in the Presidential contest, in the hope that he would help implement the Akali demands. Since their hopes had been belied, he should resign. Zail Singh, however, told a delegation of Akalis, who called on him on March 2, that he now represented the people of India and not any particular community, and thus the question of his resignation did not arise.

On February 27, Mrs Gandhi made the surprise announcement, that some of the religious demands of the Akalis had been accepted. The government's decisions were to remove meat, wine and cigarette shops from near the Golden Temple as well as the Durgiana Temple in Amritsar; relay Gurbani from Akashwani's Jullundur station, and permit Sikhs to carry nine-inch kirpans with a six-inch blade during their travel by Indian Airlines.

Quick to respond, the Akali Dal President, Sant Harchand Singh Longowal, described the "unilateral acceptance" as "fraud", while the extremist leader, Sant Jarnail Singh Bhindranwale, called it an "eyewash". The Prime Minister

resilience, and observed that since the government was able to accept the religious demands as they did not involve other states, it was necessary to consult other states while solving the political demands as they directly affected them.

That there is a tussle between the moderates and the extremists in the Akali Dal is borne out by the fact that, after a Nirankari was injured in a shooting incident in Amritsar on March 2, Longowal in a statement condemned the recent acts of violence in certain parts of Punjab and said that violence could never "take us to our goal." It not only harmed the interests of the country, but would also give a setback to the Akali Dal morcha, he said.

BIHAR PRESS BILL VICTORY FOR THE FOURTH ESTATE

Chief Minister Jagannath Mishra said in Patna on February 22 that the widely-opposed Bihar Press Bill was dead. The Bill had sought to amend the Indian Penal Code and the Criminal Procedure Code in order to make "scurrilous writing" a cognisable and non-bailable offence. The term "scurrilous writing" was left undefined, and the offence could be tried by an executive magistrate, that is, an officer appointed by the government, and not by a judicial magistrate. This had led to widespread fears about its possible misuse.

Addressing his first press conference after the introduction of the Bill in the State Assembly last July, Mishra said the Bill would not be reintroduced in the Assembly. After the Bill had been sent to the Centre for the President's approval, the then Union Minister of State for Information and Broadcasting, N.K.P. Salve, had initiated a dialogue with journalists' organisations to review the more obnoxious parts of the Bill. The journalists had, however, demanded the total withdrawal of the Bill.

The Chief Minister had held his last press conference on July 30 last year on the eve of the introduction of the Bill, which had triggered off a nation-wide agitation by journalists. Mishra said his intention behind the Bill was to call a national debate on yellow journalism—and the purpose was

Refurnishing his image: Bihar CM Jagannath Mishra addressing his first press conference after the introduction of the controversial Bihar Press Bill

achieved. However, his explanation did not convince anyone and it was generally felt that after suddenly dropping several ministers without the consent of the party high command, and the growing dissidence within the party, Mishra's position was in jeopardy and this was an attempt to salvage his reputation.

Mishra greeted the journalists saying he was extending to them a hand of friendship. "We want to create an atmosphere of goodwill and friendship between the government and the press, which had been very cordial in the past," he said. While welcoming the withdrawal of the Bill, journalists generally felt that it showed what the press could achieve if it spoke with one voice on issues of principle.

TAMIL NADU THIRSTING FOR WATER

Tamil Nadu is literally thirsting for water—and it is still two months to summer. Monsoons have failed for two successive years and the state is in the grip of a severe drought. In Madras, residents are getting 1½ buckets of water on alternate days. This is because the storage level is only 10 per cent of the capacity in three reservoirs that supply the bulk of water to the metropolis: Pondy, Cholavaram and Red Hills reservoirs.

In the state's interior, the situation is still worse. At Elmachahalli village near Palacode, wells have dried up and residents complain that they have to travel two km to fetch drinking water, for washing clothes and so on, they have to walk five km more to Kaveripattanam. As much of their time is taken in these tasks, womenfolk here can

no longer work in the fields—and, consequently, contribute that much less in the family income.

Anyway, there is no work as water shortage has also affected the crops in the fields—and the result is overpricing: rice costs Rs 7 a kg, up from less than half that price three months back. Ration rice costs Rs 1.75 a kg. But a family of 10 gets only a kg for a week.

An atmosphere bordering on panic reigns in the state. Already there are fears of evacuating Madras, and schools and colleges have postponed their summer vacations by a month. Though the state government denies it, the problems of the metropolis have been compounded by the reported mass migration of people from the rural heartland of Tamil Nadu. Agricultural failure and drastic power-cuts have apparently accentuated the worsening situation of rural unemployment, leading to this exodus. This poses a grave administrative problem.

The problem has turned a full circle with Tamil Nadu figuring among the states with the highest power cuts and a consequent fall in industrial production. Its high-tension industries face a 60 per cent power-cut, its low-tension consumers a 45 per cent power-cut. Tamil Nadu's generation has been 1/5th of its normal level and there is a daily shortfall of eight million units. The cause: setback in hydro-power generation due to failure of monsoons and problems in thermal power plants. Another reason for the first time, drought-hit Kerala has

waters used to divide its surplus of five million units between Tamil Nadu and Karnataka.

Monsoon failures and droughts are not uncommon in Tamil Nadu. Yet, not till acute scarcity resulted did the Centre or the state appreciate the magnitude of the problem. The result once the rains came, both parties became complacent; and any long-term solution to the problem was allowed to gather dust. In fact, there already exists one such scheme—the north-south river grid scheme (or the national water grid), which envisages “the transfer of surplus water from more generously-endowed river basins to regions of water scarcity”.

The grid scheme is, of course, a long-term project. Till such time as it takes shape, an alternative course could be to set up giant desalination plants. And finally, a dialogue could be reinitiated on the long-running and stalemated Cauvery river-water-sharing issue. In this connection, Janata Party President Chandra Shekhar's six-month-long 'Bharat Yatra' from Kanya Kumari (beginning January 6) is welcome. Enroute Tamil Nadu, he himself saw the plight of the drought-hit people—who yet offered him and his followers precious water—and persuaded a reluctant Ramakrishna Hegde, the Janata Chief Minister of Karnataka, to release water from the Cauvery. This water will, perhaps, save 30,000 acres of standing crops in Thanjavur district, the rice bowl of Tamil Nadu.

Officials in Madras, however, have described the Karnataka Government's decision as a “belated gesture”. They contend that “no release of Cauvery water could now help save the crops which had virtually withered”. Whatever the veracity of this claim, one thing is clear: while it is technically feasible to solve the Tamil Nadu water problem, the political will which must accompany it is missing. The war of disinformation between the Centre and Tamil Nadu is the root cause.

Tamil Nadu Chief Minister M.G. Ramachandran (MGR) has vacillated in his relations with the Centre, much to the chagrin of Prime Minister Indira Gandhi. The latest instance is his campaigning for former Chief Minister Gundu Rao in the Karnataka Assembly

convinced, subsequently, of the growing wave of regionalism in the south, MGR decided to go it alone to the March 1 Thiruchendur Assembly by-election, opposing the Congress (I) and its now estranged partner, the DMK. MGR's party won.

His anti-Centre stance also helps him to “cover up his responsibility” for the present state of things in Tamil Nadu. Two more examples: first, MGR's seven-hour fast on February 9 to protest against the Centre's norms of allotting rice to the state; second, the vituperative attack against the Centre by the Tamil Nadu Finance Minister, V.R. Neduchesian, while placing the 1983-84 budget before the State Assembly. (For the record, the state government has authorised an expenditure of Rs 45.63 crores on drought relief.)

The Centre cannot escape blame, though. With a bias—if concealed—towards Congress (I)-ruled Karnataka in its dispute with Tamil Nadu on the sharing of the Cauvery waters, the Centre was also indiscreet in its desire to pit the DMK against the AIADMK (MGR's party) and weaken both to its advantage.

The problem of rural water supply is not restricted to Tamil Nadu alone—it affects many states. To check this problem, the Centre allotted Rs 2,007.11 crores in the Sixth Plan outlay, up from Rs 429.27 crores laid out in the Fifth Plan; rural water-supply programme was made a part of the 20-point programme; and from time to time the Centre released several crore rupees under its accelerated rural water supply programme.

But the progress on this front has been uniformly dismal because of uncooperative states. Wisely or not, the Centre has turned to big industry to accelerate the tardy pace of rural water supply development. Tax incentives will be given to companies undertaking this programme under section 35 CC and 35 CCA of the Income-tax Act. A final decision will be taken sometime in mid-March when 12 top industrialists and government representatives meet and work out the details. Among the industrialists invited are: A.K. Jain, M.V. Arunachalam, Anand Lal Bahai, Ramakrishna Bajaj, K.K. Birla, Bharat Ram and Chet Ram.

INDIAN FUEL AT LAST

India and France have finalised an agreed draft of the commercial contract for the supply of French nuclear fuel for the Tarapur Atomic Power Station (TAPS). This draft now awaits the formal approval by the two governments.

This was stated by Prime Minister Indira Gandhi in the Rajya Sabha on February 24. She said that pending the conclusion of the commercial contract with France and the commencement of fuel supplies, TAPS was being operated at lower generation level because of the shortage of fuel.

The commercial contract with France has been drawn up following an agreement concluded between India and France on November 26, 1982, in which France agreed to supply enriched uranium in place of the US. This agreement was reached within the framework of the Indo-US cooperation agreement of 1963.

POST-REPORT

UTTERLY IRRESPONSIBLE

The *Washington Post* on February 19 carried a report which said that the plutonium India had been separating from spent fuel since November is “being kept in a storage room where it will be held until Indian officials decide its use”. The *Post* quoted a US official as saying that “there is simply no reason connected to their civilian nuclear programmes why any of those countries—India, Pakistan, Argentina and Brazil—need to begin stockpiling separated plutonium in this decade. It makes no sense in any atomic power context.”

Reacting to the report, an official spokesman in New Delhi described it as “utterly irresponsible and possibly mischievous” to say that India was readying itself to build about 20 atomic bombs a year. There was nothing secret about the work being undertaken at the Tarapur reprocessing plant, and it was clearly dealt with in the annual reports of the atomic energy department.

Reprocessing entailed the production of plutonium, but this was neither an end in itself nor was India producing plutonium with military purposes in mind.

is that our understanding of the science and technology of reprocessing spent fuel goes hand in hand with the understanding of the science and technology of nuclear-power generation."

An expert wrote in *The Times Of India*: "Even the US, with all its sophistication, is not in a position to use its vast quantities of reactor-grade plutonium for weapons purposes, even though it claims to have used reactor-grade plutonium for an explosion."

The International Fuel Cycle Evaluation Conference had remarked that no country in the world had so far launched a weapons programme with reactor-grade plutonium. As Congressman Mike McCormack remarked—in an

World Report of August 18, 1980—what the US experiment proved was that reactor-grade plutonium was totally unsatisfactory for weapons.

PHOOLAN DEVI

FAREWELL TO ARMS

Phoolan Devi, nicknamed 'dacoit queen', and another notorious dacoit, Ghanshyam, surrendered along with their gang members before Madhya Pradesh Chief Minister Arjun Singh on February 12, in Bhind, in a public ceremony reminiscent of the surrender of Malkhan Singh in June last year. Phoolan is alleged to have perpetrated the massacre of 20 innocent Thakur men, women and children at Behmai, UP, in February 1981.

her surrender was conditional. The chief minister had earlier announced that the surrender was "unconditional". Some of the conditions reportedly agreed to by the Madhya Pradesh police are: she should not be handed over to the UP police, all cases registered against her in Uttar Pradesh, Madhya Pradesh and Rajasthan should be tried in a special court to be set up in Madhya Pradesh and she should be kept in an open jail and given all facilities provided to dacoits who had surrendered earlier.

Though the surrender was the result of the anti-dacoity operation of the UP and Madhya Pradesh police, it was marred by an

(Continued on page 83)

SEVENTH NON-ALIGNED SUMMIT

THE SEVENTH NON-ALIGNED SUMMIT held in New Delhi from March 7-11, attended by 101 countries, displayed unity, vigour, wisdom and a remarkable sense of purpose, belying the prophecies in certain quarters that the conference would end in failure. This was mainly so because of the trust reposed in Prime Minister Indira Gandhi, who becomes Chairman of the Non-aligned Movement (NAM) for three years, taking over from Cuban President Fidel Castro.

Among its major successes:

- ▶ correction of NAM's tilt towards the 'natural ally', the USSR, after the Havana Summit three years back;
- ▶ the first-ever summit message to the great powers to halt the arms race; immediate prohibition of threat or use of nuclear weapons by all nuclear-weapons states; and the ratification of a comprehensive nuclear weapons-test-ban treaty;
- ▶ the decision to keep the Kamouchan seat vacant;
- ▶ readoption of the New Delhi declaration of February 1981 calling for a political settlement of the Afghan crisis, and the addition of a paragraph underscoring the significance of the initiative undertaken by the UN Secretary-General, Javier Perez de Cuellar, to find a political settlement of the problem;
- ▶ a call for bilateral negotiations between the US and the USSR for red-

uction and eventual elimination of their military presence in the Indian Ocean and thus help in the implementation of the resolution declaring the region a 'zone of peace';

▶ tidying over the controversy over selecting the venue for the next summit in 1986. NAM will take a final decision on the subject in a ministerial meeting to be held in Angola in 1985;

▶ focussing on the Third World's economic woes such as the back-breaking debt burden, stagnation and the widening trade deficits. NAM called for "a thorough-going restructuring" of the existing economic order "through a process of global negotiations". It also proposed "the immediate convening of an international conference on money and finance for development, with universal participation, and a comprehensive restructuring of the international monetary and financial system".

Most heartening of all was the realisation by NAM members that their endeavour for world stability, in both economic and political spheres, does not end with the New Delhi Summit. Mrs Gandhi aptly summed it up in her concluding conference address. Said she: "...we have established the base camp and have a long climb to the attainment of our goals and ideals."

N.V.S.

ISRAEL

BEGIN(NING) OF THE END?

Now that Ariel Sharon has gone, can Menachem Begin be far behind? For the time being, the Israeli Prime Minister has weathered the storm, surviving three no-confidence motions in the Knesset which were aimed at expressing the Opposition's displeasure at the way in which the government had dealt with the recommendations of the independent Kahan Commission, charged with investigating the Beirut massacre of last September. The chief offender, Defence Minister Sharon, took the rap and was pressurised into resigning on February 11.

The Commission came down heavily on Sharon for his failure to call a serious discussion on the pros and cons of using Phalangist Christian militiamen to mop up suspected PLO guerrillas hiding in West Beirut's refugee camps of Sabra and Shatila, after the assassination of Lebanon's President-elect Bashir Gemayel, and also for his failure to protect the unarmed Palestinian civilians there. Begin himself was let off lightly on the grounds that he was uninformed about the happenings until 36 hours after the Phalangist forces had gone into the camps.

The Opposition Labour Party leader, Shimon Peres, felt that the Begin Government should resign. He cited a precedent in which Begin himself had demanded that the Golda Meir administration should resign after an independent commission had criticised the Israeli military establishment for being unprepared for the 1973 war. Begin replied that the situation was entirely different in his case because in 1973 the existence of the state of Israel had been at stake. The no-confidence motions of the Opposition were, therefore, rejected by a vote of 64 to 56.

Sharon, however, is still very much in the picture as a minister without portfolio. Shortly after his resignation, in fact, he was returned to the inter-ministerial defence committee. The Defence Portfolio was given to Moshe

Arens, Israel's Ambassador to the US. Arens is a hardliner who opposed the Camp David peace accord and the peace treaty with Egypt. However, his appointment was hailed by the Israelis, even by the supporters of the Labour Party, because it is thought that he is "more skilled in security matters than Begin and less dangerous than Sharon".

Meanwhile, an international commission set up to investigate Israel's invasion of Lebanon held them guilty of numerous violations of international law and expressed the view that Israel's leadership should be tried for war crimes. The commission, headed by Sean Macbride, former Foreign Minister of Ireland, a Nobel laureate and Lenin Peace Prize winner, also recommended that all member nations of the UN should suspend all financial and military aid to Israel.

PLO

UNITY IN DIVERSITY

For centuries, the Jews, banished from the Promised Land, roamed the diaspora but clung to their identity through their religious laws and customs. And now it is the turn of another group which has its roots in the same land—the Palestinians. They, too, have been seeking to retain their identity and unity despite the fact that four million Palestinians are now dispersed among some 90 countries. The latest attempt at unity occurred in mid-February. The 16th session of the Palestinian National Council (PNC), the Parliament-in-exile, opened on February 14 at a seaside resort outside Algiers. Despite the presence of hardliners like George Habash, the leader of the Marxist Popular Front for the Liberation of Palestine, an apparent show of unity was maintained. The binding factor was PLO leader Yasser Arafat and all that he had gone through in Beirut. Although Habash denounced the American peace plan (the Ronald Reagan plan) of September 1, he declared that "Arafat is our symbol".

Arafat's own stand on the Reagan peace plan is ambiguous. The plan calls for self-government,

though not statehood, for the Israeli-occupied territories of West Bank and Gaza Strip, in association with Jordan. Although it rejects PLO participation in peace negotiations, it calls for the mediation of Jordan's King Hussein. At the PNC meeting, Arafat and his associates did not reject the Reagan plan outright, but declared it "insufficient to meet the whole aspirations of the Palestinian people". Arafat also refused to give King Hussein a specific mandate to negotiate with the PLO. He, however, won approval at the meeting of the Fez Summit plan which calls for peaceful coexistence between Israel and all Arab states, thus giving tacit recognition to Israel's right to exist.

Although *Al Quds*, an Arabic language daily published in Jerusalem, hailed the outcome as "a real opportunity that should not be missed", it is not certain how much the PLO is actually prepared to concede in order to help the US pursue its peace plans. Israel, too, has rejected Reagan's proposals. Peace in the Middle East is thus still a mirage.

US-CHINA

FRANK FRIENDSHIP

The Chinese told US Secretary of State George Shultz that candour was an aspect of friendship. During his recent visit to China (February 2-6), Shultz "received a great deal of friendship". The Chinese lectured him on the US stand on Taiwan, arms sales to Taipei and American restrictions on import of textiles from China.

Despite so much 'candour' on the part of the Chinese, Sino-American relations improved markedly as a result of his visit. He had talks with China's strongman Deng Xiaoping, Premier Zhao Ziyang, Foreign Minister Wu Xueqian and Defence Minister Zhang Aiping. One significant breakthrough was that both sides agreed to revive high-level military contacts which had been suspended when Reagan became President. Zhang is expected to visit the US later for further talks.

Secretary Casper Weinberger would then pay a return visit to China. US sources also claim that Zhao has accepted in principle a US invitation for a state visit to Washington. They further claim that Shultz also discussed the current state of Sino-Soviet relations with the Chinese leaders. It has now become apparent that China does not want to hasten the renewal of its own negotiations with the Soviet Union until it gauges which way the new Soviet leadership under Yuri Andropov is moving.

Of symbolic importance to China was Shultz's visit to Seoul (February 6-8), which followed his trip to Beijing. The US feels that it is time the Chinese recognised South Korea and the US recognised North Korea. Former US Secretary of State Henry Kissinger had put forward this cross-recognition idea in a speech to the UN General Assembly in 1975. The proposal was revived in January, when President Chun Doo Hwan of South Korea asked Japanese Prime Minister Yasuhiro Nakasone to sound out Beijing's reaction to the idea. China and North Korea, however, have not reacted favourably to the proposal. Shultz's Beijing-to-Seoul voyage was merely symbolic, however, because he told Chun that he had not discussed the cross-recognition proposal with the Chinese leaders.

Shultz's visit to Seoul was aimed mainly at reaffirming the US security commitment to South Korea. He said the 39,000 US ground troops in South Korea will not be reduced or withdrawn as long as North Korea remained intransigent in its attitude against reducing tensions in the region and negotiating with Seoul.

EUROMISSILES

ASIAN DILEMMA

A senior official of Japan's Ministry of International Trade and Industry described the US Secretary of State George Shultz as one of Reagan's few appointees "who is interested in practical solutions to specific problems". The specific problem facing Shultz during his short trip (January 31-February 2) to Japan was the question of the Euromissiles. The problem that has been plaguing the Japanese of late is whether the US would consider a

Moscow proposal to shift some of its SS-20 missiles from the European sector to parts of its Asian territory. Shultz's practical solution to the problem was to assure Prime Minister Yasuhiro Nakasone that the zero option calls on the Soviets to dismantle all 243 of its SS-20s in Europe as well as the 99 already in Asia. He vowed the US negotiators would never "do anything that is good for Europe but not good for Asia".

The issue of the Soviet missiles is of great importance to the slightly shaky US-Japan relations. Lately, the US has been pressing Japan to play a larger role in the Far East. If Japan begins to doubt US intentions on the nuclear arms issue, it could stiffen its already strong resistance to expanding its military power and thus tax American friendship. Alternatively, they could offset their vulnerability vis-a-vis the Soviet Union by a defence build-up much greater than the one now planned and thus promote an arms race in the Eastern sector. However, the US feels that if Japan is given too strong a voice in the Euromissiles debate, it could restrict US flexibility at the Geneva talks.

Shultz also discussed bilateral trade problems with the Japanese leaders. He expressed the Reagan administration's appreciation for the recent Japanese measures

Fort Monthus prison in Lyon housing the 'Butcher of Lyons', Barbie (inset)

aimed at liberalising market access for imports. Special Trade Representative William Brock visited Japan later in the month to discuss the economic aspects of US-Japan relations.

KLAUS BARBIE

STILL UNREPENTANT

The horrors of World War II, which had appeared distant, separated by a forgiving post-war generation, suddenly came to the fore again as Klaus Barbie, the wartime Gestapo Chief in Lyons, landed on French soil. The French Government succeeded in getting him expelled from Bolivia after 11 years of perseverance. Barbie had lost his cover in 1971, when the Nazi-hunting team of Serge and Beate Klarsfeld circulated his picture to newspapers around the world. The right-wing Bolivian Government of the time, however, had not listened to extradition requests. It was only when a new democratic government came to power under the civilian President, Hernan Siles Zuazo, last October, that the French and West German governments made some headway.

Barbie, the 'Butcher of Lyons', was one of the most notorious sadists of Nazi Germany. French

courts had sentenced him to death in absentia twice, in 1949 and 1954, for 4,342 killings, the deportation of 7,591 Jews to concentration camps and the arrest of 14,311 people during his two years as Gestapo Commander in Lyons. He disappeared in 1945 and is said to have supplied the Americans with information about the Russians in return for money and protection. He became a citizen of Bolivia in 1957 and thrived under the successive military regimes in that country. He supported Gen Luis Garcia Meza's successful coup against an elected government in 1980, and was probably involved in the illegal cocaine trade of Latin America. The new reformist government in Bolivia is, however, intent on ridding the country of Nazis and other European right-wing extremists. The Bolivians got the legal excuse to expel Barbie when they realised that he had used false papers to get his Bolivian nationality, using the false name of "Altmann". And Barbie found himself back in Lyons—in a different capacity—on February 5.

The death sentences expired after 20 years, and the new trial will take at least a year in preparations. The major difficulty will be tracking down witnesses after 40 years. However, a number of people have come forward already. His trial will open old wounds and expose the names of many Frenchmen who had collaborated with the Germans. In Washington too, the government has begun to investigate any US connection in Barbie's post-war escape. Barbie was one of the four most senior Nazi war criminals who escaped in 1945.

BANGLADESH

ISLAMICISATION?

The Bangladesh military ruler, Lt Gen Hussein Mohammad Ershad, had more than his share of problems in February. But he came down with a heavy hand and the situation is under control, at least for the time being. It is surprising that Ershad, who has been praised for his pragmatism in recent months, chose a most unfortunate occasion for publicising his proposal to Islamicise Bangladesh. At an Islamic conference held in mid January, he made some remarks on how Ekushey February—February 21—should be celebrated. On this day 31 years ago,

martyrs were made of students demonstrating in defence of the Bengali language against the imposition of Urdu by the Pakistan Government. February 21 has been celebrated as Martyr's Day since then, and has been the occasion for asserting a distinct cultural identity. By raising 'Islamic' doubts on the manner of celebration, Ershad unnecessarily sought to convert an essentially cultural matter into one fraught with religious contention.

To this was added his proposals to Islamicise education. The fundamentalist bogey led to a number of clashes resulting in killings and curfew. Major political parties had already been demanding the withdrawal of martial law which had been imposed on March 24, 1982, and the restoration of fundamental rights. Students joined in the fray, and 300 persons were injured at Dhaka University on February 6, when students belonging to the 14-party democratic 'Chhatra Sangram Parishad' and the fundamentalist 'Islamic Chhatra Shibir' clashed. Violence broke out again on February 14, when students demanding the repeal of the 'anti-people' education policy and the restoration of democratic rights clashed with the police at Chittagong and Dhaka. The military regime took stern action and the army and para-military forces were called out. A large number of students and important political leaders were arrested, including the Awami League President, Hasina Wajed, Rashed Khan Menon of the Worker's Party and Mohammad Farhad, General Secretary of the Communist Party of Bangladesh. All the six universities of the country were later closed for an indefinite period and an uneasy peace was restored.

The forces favouring fundamentalism in Bangladesh have gained ground in recent years. Furthermore, Ershad is economically dependent on rich Islamic countries, and aid from these nations is often tied to a process of reviving rigid fundamentalist values. Ershad may also be looking to fundamentalists for political backing because he is not certain about the support of the established political parties. For all these reasons, he may be attempting to Islamicise Bangladesh. It is significant to note, however, that he has not given up his ideas of restoring democracy. In the past month, he emphasised several times

the need for a dialogue at the national level to evolve a dependable political system. He also said "no final decision will be taken in the matter of education policy without the verdict of the people". Questionnaires have been distributed and a committee has been formed to evaluate the response from the people.

FRANCE-IRAQ

COMRADES-IN-ARMS

A friend in need is a friend indeed—and Iraq apparently has a true friend in France. In the past 18 months, France has slowly become Iraq's biggest Western arms supplier. The items sent from France include tanks, artillery, missiles and aircraft. In early February, President Francois Mitterrand sanctioned delivery of 29 Mirage F-1 fighter-bombers to Iraq. The French are also studying a request made by Iraq's Deputy Prime Minister, Tarik Aziz, in January, for five Super Etendard aircraft equipped to fire the Exocet missile which proved so effective during the Falklands war. The Super Etendards are no longer being produced, and the French would have to supply them out of their own stocks, if they agree.

The French are also trying to use diplomacy to improve bilateral relations between Iraq and her neighbours. On February 13, French Foreign Minister Claude Cheysson held talks with Iraqi President Saddam Hussein at Baghdad, and then flew to Damascus to persuade the Syrians to reopen the Iraqi pipeline across Syria to the Mediterranean so that Iraq could sell more of its oil.

The French are, however, not acting merely out of friendship. Their own self-interest is also involved. Iraq is a big market for French companies and now the former has run out of money as a result of the Iraq-Iran war. Baghdad owed France \$ 7.15 billion before the latest Mirage deal, and France has begun to fear that it will not see its money as long as the war continues and Iraqi oil export is hampered. It, therefore, wants Iraq to win—and soon.

Meanwhile, Iran launched what it claimed to be its biggest and 'decisive' offensive against Iraq on February 7. This was the fourth big Iranian attempt to break

months. However, both sides appear to be demoralised. Desertions are frequent among both Iranian and Iraqi soldiers, although the fighting spirit of the Iraqi forces has improved, since they are now defending their own territory.

NIGERIA

THE NEW OUTCASTS

Early February saw a massive increase in the number of the refugees of the world. The latest to join the ranks of the homeless were about two million foreign workers in Nigeria. The new outcasts were the victims of the economic theories of Nigeria's President Shehu Shagari. He accused illegal immigrant workers of ruining Nigeria's economy by taking needed jobs and draining the nation's wealth. Earlier, foreigners had been welcomed as nurses, farmers, labourers, etc—but those had been the golden days of Nigeria's oil boom. Oil production, not long ago, had been two million barrels a day. Now it is below 5,00,000. Oil revenue fell to \$14.4 billion in 1982, down from \$24.50 billion in 1980. Unemployment has been growing in Nigeria. Shagari, with presidential elections due in August, has resorted to the seemingly popular measure of throwing out foreign workers.

Thousands of people have therefore returned to Togo, Benin, Upper Volta, Cameroon, Mali and Ghana, adding to the problems of these already impoverished countries. Ghana was the hardest hit—about one million exiles returned to the country. At first Ghana's revolutionary leader, Flight Lt Jerry Rawlings, refused to open Ghana's border, but was later compelled to do so on humanitarian grounds. Hundreds of people died of suffocation, starvation and accidents during the 'exodus'. The European Economic Community, the US and the UN had to rush in with millions of dollars of emergency aid to avoid a complete disaster.

Nigeria's massive expulsion greatly surpassed Ghana's deportation of 20,000 Nigerians in 1969 and Uganda's forced exile of 45,000 Rwandans last year. This has set an unhealthy precedent. It may instigate Nigeria's neighbours to return the insult and expel Nigerian residents in their countries.

very little in within the country, apart from a mild statement by former President Nnamdi Azikiwe, who is now a leader of one of the opposition parties. Other African states too did not criticise the move. Only the Economic Community of West African States asked its leading member to reconsider its action and the Organisation of African Unity expressed humanitarian concern and sent an observer to Lagos.

IMF

A COMPROMISE MOVE

The top-ranking policy-making interim committee of the International Monetary Fund (IMF) announced its decision to increase the Fund's quota resources by 47 per cent on February 11. This was a compromise move: while the Third World countries had pressed for a 100 per cent increase, the US had wanted a 40 per cent rise, Japan and Canada had suggested 65 per cent and the West Europeans had sought at least 50 per cent.

The interim committee did not endorse the call for a world recovery programme made by the finance ministers of the developing world. Instead, it suggested that the industrialised nations, which had managed to keep inflation down, should continue their anti-inflationary policies. That means the IMF advised the industrialised world not to launch any reflationary programme which would have, in the view of developing countries, generated demand and thus reactivated world trade and thus increased the export earnings of the poorer countries. The richer countries also ignored the demand of the developing countries for a revision of quota and a fairer distribution of voting rights, which would have given them a more effective say in the decision-making process of the IMF. A marginal revision of the voting rights was made to give increased rights to countries like Japan, West Germany and France, and marginal cuts were made in the rights of the US and the UK. Yet, the US still continues to retain sufficient voting rights to block any decision of the IMF. Most developing countries were disappointed with decisions arrived at during the course of the meeting.

SANJUKTA BANERJI

(Continued from page 73)

unseemly controversy between the police of the two states, with the UP police doing all they could to thwart the surrender.

The Secretary of the Chambal Valley peace campaign and the Gandhi Peace Foundation, K.C. Sahai, said that had the three dacoit-infested states of UP, Rajasthan and MP chalked out a plan for the surrender of dacoits, the remaining bandit gangs too would have laid down their arms.

JOINT RIVERS COMMISSION

NO AGREEMENT

The 24th meeting of the Indo-Bangladesh Joint Rivers Commission (JRC), held in Dhaka and subsequently in New Delhi in February, was adjourned for the second time and will be resumed in Dhaka shortly. No concrete agreement could be reached on any of the subjects under discussion. The Bangladesh delegation was led by Agriculture Minister A.Z.M. Obaidullah Khan and the Indian team by Irrigation Minister Ram Niwas Mirdha.

The issues discussed included drawing up the terms of reference for pre-feasibility studies of the two countries' proposals for long-term augmentation of the dry-season flow of the Ganga, ad hoc arrangement for sharing of the Teesta waters, and the manner in which Nepal would be approached for providing data for the Bangladesh proposal to build reservoirs in the Himalayas.

The JRC was given an 18-month mandate to study both the Indian and Bangladesh proposals, following the summit meeting of Mrs Gandhi and the Chief Martial Law Administrator of Bangladesh, Lt Gen H.M. Ershad in New Delhi in October last year.

After the New Delhi talks, Mirdha said that both the schemes were being considered "seriously on the basis of equality". With regard to the sharing of the Teesta waters, Khan said the discussions had taken them "very near a solution". Both sides expressed satisfaction that considerable progress was made in solving the problems concerning the other common rivers, namely the Mani, Muhuri, Khowai and Gumti.

SCIENCE

Nuclear fission. Soviet scientists have unravelled the process of nuclear fission and established the quantum of energy required to break the nuclei of various elements, particularly thorium and uranium. The scientists, led by Prof Sergei Kapitsa, devised a strong source of radiation called the microtron and a detector of fission fragments. They have discovered the amount of energy required to break an atomic nucleus to release the fantastic energy locked up in matter.

Gaseous cloud may be missing mass: US astronomers have discovered a huge gaseous cloud rotating among the galaxies that may confirm the existence of the much-theorised missing mass of the universe. The cloud has the mass and size of a large galaxy and may be the original material of a potential star system that never really took shape. The gas cloud, according to the scientists, is a billion times more massive than the sun and is 5,00,000 light-years long.

ECONOMY

UNDP aid to India: The United Nations Development Programme (UNDP) will give an aid of \$3,51,750 to India for the exploration and development of mineral resources in Kerala. This assistance marks the second phase of the project for locating mineable primary gold deposits, by detailed mapping and diamond drilling. During the first phase, UNDP gave an assistance of \$21,75,779.

Britain's unemployment rate touched a record 13.8 per cent in January. Almost 1,28,000 Britons joined the job queues in January, taking the total number of jobless to 32,24,715 or one

Unemployment in West Germany: In West Germany, the number of unemployed rose to a post-war record of 2.49 million in January, i.e., 10.2 per cent of the work force, an increase of 2,70,000 on the December total of 2.2 million.

IMF report on inflation: The IMF on February 6 reported that inflation rate in non-oil developing countries reached 39.2 per cent in October last year in contrast to that of industrial nations, which was 6.6 per cent.

Sugar production in the country was a record 24.94 lakh tonnes during the first three-and-a-half months of the sugar-year ending January 15. The stocks of sugar with factories rose to 36.43 lakh tonnes as on January 15 against 18.89 lakh tonnes on the same date last year.

India-Netherlands agreement: India and Netherlands signed an agreement on February 8 to promote economic and technical collaboration between the two countries. The collaboration will be in the fields of industry, energy, mining, land and water development, commerce, agriculture, communications and engineering. The two countries agreed to set up a joint committee for economic and technical cooperation to identify further areas of collaboration.

India's national income increased by five per cent during 1981-82 but the population growth did not allow this to be reflected in the per capita income, which rose during the year only by 2.8 per cent. At constant prices (1970-71) the total income during the year was estimated at Rs 49,887 crores (at current prices it was Rs 1,21,243 crores). The per capita income in real terms was estimated at Rs 720 in 1981-82 compared to Rs 700 in the previous year. At current prices, the per capita income was Rs 1,760 against Rs 1,571 in 1980-81. The net domestic saving during the year 1981-82 amounted to Rs 24,075 crores (Rs 20,024 crores in 1980-81) and constituted 17.5 per cent of the net domestic product at market prices as against 16.7 per cent in the previous year.

The Planning Commission has decided to increase by 11 per cent, the 1983-84 annual plan outlay of all the states and Union territories. The total outlay of their plans is Rs 11,217.15 crores. The approved outlay for 1982-83 was Rs 10,081.65 crores. In addition, Rs 95 crores has been approved for the North Eastern Council, Rs 110 crores for the tribal areas and Rs 135 crores for the hill areas. Central assistance to the states has been raised to Rs 3,841.21 crores against the Rs 3,040 crores for the current year.

The approved outlays for the states are: Andhra Pradesh Rs 826 crores; Assam

Bihar Rs 800 crores; Gujarat Rs 407 crores; Himachal Pradesh Rs 140 crores; Jammu and Kashmir Rs 185 crores; Karnataka Rs 575 crores; Kerala Rs 320 crores; Madhya Pradesh Rs 855 crores; Maharashtra Rs 1,500 crores; Manipur Rs 52.80 crores; Meghalaya Rs 56.32 crores; Nagaland Rs 51 crores; Orissa Rs 345 crores; Punjab Rs 440 crores; Rajasthan Rs 401 crores; Sikkim Rs 30.50 crores; Tamil Nadu Rs 845 crores; Tripura Rs 58 crores; Uttar Pradesh Rs 1,290 crores; West Bengal Rs 540 crores.

Economic Advisory Council set up: On February 16, a five-member Economic Advisory Council, headed by Prof Sukhamoy Chakravarti, former member of the Planning Commission, and including Dr K.N. Raj, who heads a research institute, Dr Manmohan Singh, Governor of the Reserve Bank, Dr A.M. Khusro and Dr C.H. Hanumantha Rao, both members of the Planning Commission, was set up. It will report directly to the Prime Minister. While the Planning Commission and the Economic Administration Reforms Commission deal mainly with implementation of economic policy, the Council will deal exclusively with economic policy and development strategy.

The need for individual and collective self-reliance of developing countries in technology and agriculture has been stressed. Developing countries having 70 per cent of the world's population account for only 40 per cent of the world foodgrain production. A three-day conference of farm experts from 27 developing countries held in New Delhi in mid-February pointed out that over 20 developing countries are at present facing food shortages or poor growing conditions.

Agricultural growth rate: In India, the overall growth rate in agricultural production in 1981-82 was 5.5 per cent as against the Plan target of 4 per cent. However, in the current financial year there is likely to be a shortfall in grain output because of drought in several states.

Syndicated loan from Euro market: India on February 18, signed an agreement for a \$ 25-million syndicated loan in London, the first borrowing by the Export-Import Bank of India in the Euro-currency market. The loan has been given at a margin of 3.8 over the London inter-bank's offered rate, with repayment in full after seven years.

IMF instalment: The IMF has approved another instalment of SDR 600 million to India (over Rs 640 crores). The approval was given after a review of the performance criteria of the Indian economy.

Proposed US aid for India: The

Congress is a \$ 402-million aid package for India in 1984. Of this, \$ 2,00,000 will be for military training of Indian officers, \$ 123 million under the food-for-relief programme and \$ 86 million under development assistance.

Proposed US aid for Pakistan: The administration is also seeking Congressional approval for a \$ 658-million aid plan for Pakistan, including \$ 75 million in foreign military sales credit guarantees. Of this, \$ 300 million will be in foreign military sales, \$ 225 million in economic support funds, \$ 57.4 million under the food-for-relief programme and \$ 8,00,000 for military training of Pakistani officers.

India 101st in the world: With a per capita gross national product of \$ 240, India occupied the 101st position in the world in 1982. Within the country Bihar has the lowest per capita income and Delhi the highest, followed by Pondicherry, Punjab, Goa, Daman and Diu and Haryana.

World Bank loan: The World Bank on March 1, approved a \$ 222.3-million loan to assist the first major gas development project in India. The project, which has a total cost of \$ 701.4 million, will bring production capacity in the South Bassin field in the Arabian Sea to five million cubic m of gas a day by June 1985.

India-Algeria protocol: India and Algeria on February 15, signed a protocol on economic and industrial cooperation which will provide for identification and concretisation of some cooperative projects between the two countries. These projects include machine tools, electronics, commercial vehicles, tractors, etc.

Japan's unemployment rose to 2.4 per cent in 1982, the highest in 28 years. 1.36 million people out of a total work force of 56.38 million were listed among the jobless during 1982.

EVENTS

Lech Walesa, leader of Poland's outlawed Free Trade Union Solidarity, has been nominated for the Nobel Peace Prize for the second consecutive year.

US military aid for Egypt and Israel: Egypt and Israel were awarded 51 per cent of the US's \$ 9,200-million foreign military aid budget for 1984. The draft budget, which does not include economic aid, called for a \$ 400-million increase over fiscal 1983 which ends on September 30.

Japan launches communication satellite: On February 4, Japan launched its first communication satellite from its launch site on the southern Japanese island of Tanegashima. The satellite will be used mainly for communication in times

the country's main and remote islands.

Constitution suspended in Ghana: Ghana's ruling Provisional National Defence Council suspended the nation's 1979 Constitution, adopted when a civilian government returned to power after a decade of martial rule. The government proclamation abolished a number of institutions, including the Press Commission, and also set up new bodies such as an energy board and land valuation board.

Floods in Ecuador: Floods caused by torrential monsoon rains in Ecuador have resulted in 50 deaths, with more than one million people, an eighth of the country's population, in danger of being affected by epidemics. 4,00,000 people have lost their homes. Ecuador has been lashed by rains since last November. Estimates place damages at \$ 300 million.

The US test-fired a new-generation missile without a nuclear warhead, designed to intercept and destroy an incoming missile more than 96 km high. The interceptor was launched from 6,759 km away at the US army's Kwajalein Atoll test range in the Pacific Ocean.

Japan signs Law of the Sea Convention: On February 7 Japan became the 119th country to sign the Law of the Sea Convention in Jamaica. It was one of the 24 countries that did not sign the convention which was ratified on December 10.

India-Ethiopia cultural agreement: India and Ethiopia signed the first ever cultural agreement between the two countries on February 9 in Addis Ababa. The agreement is expected to boost cultural exchanges between the two countries.

Ismat Sadat detained: A court of ethics on February 12 sentenced Ismat Sadat, brother of the late Egyptian President Anwar Sadat, to be detained for one year on corruption and fraud charges. Sadat's three sons received the same sentence. Their property, valued at about \$ 148 million, is to be put under requisition for one year.

Kyprianou back in power in Cyprus: Cypriot President Spyros Kyprianou went back to power in Cyprus on a wave of nationalist votes on February 14, fighting off two challengers—conservative Glafos Clerides and socialist Vassos Ioannides. Kyprianou won 57 per cent of the Greek Cypriot vote, in the hardest re-election in 23 years of independence.

New Constitution in Netherlands: A new Constitution came into force in the Netherlands on February 17 giving voting rights to foreign residents in local elections. It also allows foreign residents to stand for local elections, but they are not

allowed to stand in European seat Second Chamber of Parliament. The new Constitution lays down that the First Chamber (Upper House) of Parliament will in future be elected every four years instead of six years, with half the members retiring every three years.

Tanzanian PM replaced: President Julius Nyerere of Tanzania, on February 25, appointed Edward Moringe Sokoine as Prime Minister, replacing Cleopa Msyua. Msyua was appointed Finance Minister replacing Amir Jamal, who became minister without portfolio in the President's office.

Nkomo detained: Zimbabwean Opposition leader, Joshua Nkomo, was detained on February 19, while attempting to board a flight to South Africa. Nkomo was accused by the Prime Minister, Robert Mugabe's government of fomenting unrest in Matabeleland.

Jinaying to be succeeded by Zhe: Marshal Ye Jinaying, China's virtual head of state who long resisted retirement, has resigned. He will be succeeded by top legislator Peng Zhe.

Marcos names successor: Philippine President Ferdinand Marcos on February 21 named Prime Minister Cesar Virata as his successor.

The world's biggest solar power plant was unveiled in the Mojave desert of California in the US. The solar power-plant works unmanned and when the Sun is at its peak, produces a million watts of electricity enough to supply the electricity needs of 400 households in the state.

Kerala Essential Services Ordinance: An ordinance empowering the government to prohibit strikes in essential services in Kerala has been promulgated by the Governor.

Indo-Soviet accord on space research: India and the USSR on February 25, signed a memorandum of understanding on areas of cooperation in space research for the next 10 years. The protocol covers different aspects of cooperation in space research such as remote sensing, astronomy, astrophysics etc. The signing came at the end of a five day Indo-Soviet symposium and workshop on space research held in the Indian Institute of Science in Bangalore.

Bangladesh universities closed indefinitely: Bangladesh martial law authorities on February 25, announced closure of all the six universities of the country for an indefinite period.

Sri Lanka Parliament approves by-election: The Sri Lanka Parliament has approved the fifth amendment to the Constitution, providing for by-election in 20 of the island's 168 constituencies in which the ruling United National Party polled less votes at the recent Presidential

elections.

SAM-5 installed in Syria: The Soviet Union has installed in Syria four batteries of SAM-5 missiles. For the first time, these anti-aircraft weapons have been deployed outside Europe.

Bihar Corrupt Practices Ordinance: The Bihar Governor has promulgated an ordinance making actionable a number of corrupt practices. The Bihar Eradication of Specified Corrupt Practices Act, covering civil servants, government doctors, contractors and essential commodity dealers, is part of the Bihar Government's drive to root out corruption. 'Corrupt practices' would include manipulation of transfers and postings by government servants and employees of state undertakings, which would be punishable with jail terms extending upto six months or fine or both.

Korba thermal project: The first 200 Mw unit of the Korba super-thermal power project went into operation on March 1. Second in the chain of super-thermal power projects of the National Thermal Power Corporation, Korba will have a capacity of 400 Mw and will meet the requirements of the western region.

VISITS

Surya Bahadur Thapa, the Nepalese Prime Minister, arrived in New Delhi on February 3, on a three day visit.

Aneerood Jugnauth, Prime Minister of Mauritius, arrived on February 8 on a six-day visit.

DIED

Eubie Blake, 100, one of the giants of American popular music and composer of more than 1,000 songs, whose *I Am Just Wild About Harry* was adopted by US President Harry S. Truman as his signature tune for his 1948 election campaign, on February 12.

ANIL PENNA

TENNIS

Following were the major international tournaments held in February:

The \$300,000 US Professional Indoor Championship, which ended at Philadelphia on February 6, was retained by John McEnroe (USA), when he beat Ivan Lendl (Czechoslovakia) 4-6, 7-6, 6-4, 6-3.

The \$2,50,000 Molson Challenge Round-Robin Tournament, held at Toronto, was won by Jimmy Connors (USA) on February 13. In the final he beat Jose Higuera (Spain) 6-2, 6-0, 5-7, 6-0.

ICE SKATING

The European Figure and Dancing Championships ended at Dortmund, West Germany, on February 6, with the following results:

Figure skating: *men*—Norbert Schraum (FRG), *women*—Katarina Witt (GDR); *pairs*—Tossilo Thierbach and Sabina Bass (GDR).

Ice dancing: *pairs*—Andrei Bukhin and Natalya Bestemyanova (USSR).

GOLF

The Australian Masters Tournament, which ended at Melbourne on February 20, was won for the second time in three years by Greg Norman (Australia). He defeated West German Bernhard Langer by four strokes.

24-year-old American Gary Hallberg, who turned professional in 1980, scored his first tournament win on the US-PGA tour when he won the \$300,000 tournament at San Diego, California, on February 20. One stroke behind at 72 was Tom Kite (USA).

SOFTBALL

Chinese women, ranked third in the world, easily beat India by 14 homes to 3 in the fifth and final Test, held at New Delhi on February 17. They had already won the series by winning the first three Tests at Hyderabad, Banswara and Jaipur. The other match at Jaipur was washed out by rains.

SHOOTING

The 26th National Championships ended at Palghat on February 20, with a thumping victory for the Army contingent. They bagged 38 medals (13 gold, 13 silver and 12 bronze)—thirteen more than the second-placed Navy (7-7-11).

Some Dutta (NCRC) with 11 golds and

Bhagirath Samai (Army) with 5 golds were the top shooters. Samai also created a new national record of 1,105 points in the small-bore free-rifle (three positions) individual event.

SWIMMING

Vladimir Salnikov (USSR) smashed his own 400 m freestyle world record when he clocked 3:48.32 at the USSR Winter Championships, held in Moscow on February 19. His previous record of 3:49.57 was set in March '82.

BADMINTON

Prakash Padukone (India) lost the men's singles final of the Dutch Open Championships to Denmark's Morten Frost Hansen 11-15, 4-15 at Nieuwegein on February 13. Sally Podger (England) won the women's title, beating Nettie Neilson (Denmark) 11-7, 11-3.

Syed Modi (Railways) won the men's singles title for the third time in a row with a 2-15, 15-4, 15-2 victory over Partho Ganguly (Gujarat) in the National Badminton Championships which concluded in Gandhinagar on February 10. Radhika Bose (Maharashtra) beat teammate Hufish Nariman 11-7, 11-9 to clinch the women's singles title, partnering Anu Ghia, she beat Punjab's Kanwal Thakur Singh and Sunita 15-3, 15-0, to complete a double. In the men's doubles final, Uday Pawar and Pradeep Gandhe (Maharashtra)

Modi: A touch of class.

Phal S. Girela

beat Leroy D'Sa and Sanat Mishra (Railways) 12-15, 18-17, 15-7. In the mixed doubles, Gandhe and Ami defeated D'Sa and Madhumita Goswami 13-15, 15-8, 15-13.

ATHLETICS

The top Japanese runners, who did not participate in the New Delhi Asiad, dominated the Tokyo Marathon on February 13, in which 80 runners from 11 countries participated. The 27-year-old winner of the 1981 Boston marathon, Toshihiko Seko won in 2:08:38.0 sec, ahead of compatriot Takeshi Soh (2:08:55.0 sec). Rodolfo Gomez (Mexico), winner of the 1982 Golden Marathon in Greece, was third (2:09:12.0 sec).

East German Joerg Kunze set a world record in the men's indoor 5,000m, finishing in 13:13.3 sec at the GDR Indoor Championships held at Senftenberg. The earlier record at 13:20.4 was set by Suleiman Nyambili (Tanzania) two years ago.

BOXING

Rafael Orono (Venezuela) successfully defended his WBC light bantamweight title for the first time when he knocked out Pedro Romero (Panama) in the 4th round at Caracas (Venezuela), on January 31.

WBC featherweight champion Juan Laporte (Puerto Rico), making the first defence of his title, defeated Ruben Castillo (USA) on a unanimous points decision after the scheduled 12 rounds—the WBC has reduced its fight duration from 15 to 12 rounds—at San Juan, Puerto Rico, on February 20.

Jiro Watanabe (Japan) successfully defended his WBA light bantamweight title for the third time with a 8th-round knock-out of Luis Ibanez (Peru) at Tsu in western Japan on February 24.

BILLIARDS

The reigning world champion, Michael Ferreira of India, won the Indian National Championship held in Patna on February 1. S.B. Agarwal was declared runner-up, while defending-champion Geet Sethi finished third.

CHESS

Jaishree Khadilkar (Maharashtra) retained the National Women's Championship, edging out her younger sister Rohini

...points at the end of the ninth round which ended in Bikaner on February 3

The youngest international master, 17 year old West Bengal prodigy, Dibyendu Barua, annexed the Milan Klibe gold medal when he won the 20th National 'A' Chess Championships which ended in Agartala on February 27. Barua scored nine wins, eight draws and one loss, aggregating 13 points

FOOTBALL

East Bengal and Mohun Bagan, both Calcutta clubs, share the Durand Cup like they did 23 years ago. The finals, held at the Ambedkar Stadium in New Delhi on February 10, ended in a goalless draw after 90 minutes of play. There was no extra time. Amalraj won the toss for East Bengal to keep the trophy for the first six months.

TABLE TENNIS

The European Top-12 Championships, which ended in Cleveland, England, on

Blot. The men's singles title was won by Milan Orlovski (Czechoslovakia)—he had earlier won in 1977—and a 14-year-old Rumanian girl, Olga Nemes, created a major upset by taking the women's singles. Both defending champions, Michael Appelgren (Sweden) and Bettine Vrieskoop (Holland), finished third.

The National Championships ended in Indore on February 20; the following were the winners:

Men: team (Barna Bellack Cup): Delhi b Tamil Nadu 5-2, singles (Maharaja Pithapuram Cup): Kamlesh Mehta (Mah) b V. Chandrasekhar (TN) 22-20, 22-20, 21-19, doubles: Chandrasekhar and Manmeet Singh (Del) b Sujay Ghorpade and Mehta 14-21, 21-13, 23-21.

Women: team (Jayalakshmi Cup): Maharashtra 'B' b Railways 3-2; singles (Travancore Cup): Indu Puri (WB) b Snigdha Mehta (MP) 21-13, 21-11, 21-17, doubles: Indu and Vyoma Shah (Mah) b Kashmira Patel and Shailaja Salokhe (Mah) 16-21, 21-18, 21-15.

Mixed doubles: S. Sriram (Rlys) and

(Rlys) 21-18, 22-20.

The Table Tennis Federation of India (TTFI) announced the national rankings for the year 1982, on February 24 in New Delhi. Among the top rankers:

Men: 1. V. Chandrasekhar 2. Manjit Dua 3. Kamlesh Mehta.

Women: 1. Indu Puri 2. Snigdha Mehta 3. Vyoma Shah.

MOTOR RACING

The veteran American driver, A.J. Foyt, with co-drivers R. Wollek and C. Bellot-Lena (both French) won the gruelling endurance race, the Daytona 24-hours, on February 6. They lapped 618 times, covering 2,373.12 miles at 98.88 mph to give the Porsche car its seventh win in a row.

CYCLE POLO

Rajasthan retained their title at the 10th National Championships, defeating Punjab 7-4 in the final in Nagpur on February 25.

SANJEEV KUMAR

Answers to

TEST YOUR WORD POWER

- addict** B: one who is enslaved by some habit. Television addicts in the US and Japan will soon be able to buy a pocket television set no bigger than a thin memo pad.
- addle** A: to confuse, muddle. Contamination of water has addled the brains of new-borns, children and adults.
- aggregate** C: sum total, total obtained by addition. One third of the world's top dozen pictures have been directed by Steven Spielberg, producing aggregate rentals of more than \$517 million.
- agrarian** C: pertaining to land and agriculture. In agrarian societies, children are expected to take a place beside their parents in the fields from the time they can walk.
- bankruptcy** C: financial ruin. A state in which a person is declared unable to pay his debts. National bankruptcy is the dramatic term used increasingly often in Japan to describe the state of the public finances.
- escalate** A: to intensify, enlarge. The micro-elements are fast escalating their micronic warfare against the living beings in the biosphere.
- herald** A: to usher in, to proclaim the approach of. Way back in 1877, Alfred Shaw, an English bowler, delivered the inaugural ball to herald the commencement of Test cricket at the Melbourne Cricket Ground.
- invade** A: to enter (a country) with hostile intent, attack; assail. It was on April 2, 1982 that the Argentine troops invaded the Falkland Islands, a remote British colony 400 miles off the Argentine coast.
- manure** D: animal waste. Seaweed is cultivated in Japan for use as manure and also for food.
- notorious** D: known for something bad. Phoolan Devi, the most notorious woman dacoit of Chambal Valley after Puthi Bai, laid down arms on February 12, 1983 before the Madhya Pradesh Chief Minister Arjun Singh.
- noxious** C: harmful, causing harm to health. Children

today often labour under extremely hazardous conditions, handling poisonous chemicals, inhaling noxious fumes, hauling excessive weights.

- persecution** D: cruel treatment, oppression. The Israeli PM, Menachem Begin, who is a product of Nazi persecution, Soviet imprisonment as well as the Zionist struggle for an independent homeland, demonstrated in 1982 that he is both a man of peace and a man of war.
- prohibited** B: forbidden (specially by rules or regulations). Photography is strictly prohibited inside ISRO Satellite Centre at Peenya, an industrial suburb of Bangalore where satellites are manufactured.
- pro prowess** B: unusual ability. Unlike conventional weapons, laser can fire at a target as soon as it has been detected, thanks to its instantaneous killing prowess.
- reign** B: rule, dominance, (period of) sovereignty. *E.T. The Extra-Terrestrial* has ended the five-year reign of *Star Wars* as the world's most successful movie.
- unleash** A: to let loose. Unless the superpowers act soon, fear and new technology may unleash an uncontrollable weapons race.
- unprecedented** B: unheard of; never done or known before. Though still in its infancy, Nuclear Magnetic Resonance promises to provide unprecedented insights into the human anatomy.
- veritable** C: actual, real. There seems to be today a veritable flood of Indian students either going abroad or wanting to go.
- wane** A: to decline. The power of the red light to control traffic seems to be waning everywhere.
- weave** A: to spin. Most spiders weave new webs everyday as the old ones get damaged by rain, wind or the struggles of their prey.

14-12 correct good

WHY INTERNATIONAL TERRORISM?

Since time immemorial terrorist acts have included assassinations, seizing hostages and a variety of atrocities that only fiendish minds could devise. Terrorists give innumerable explanations for their violence. Their rationalisation process can be related to three basic concepts, first, society is sick and cannot be cured by half measures of reform; second, the state itself is violent and can be overcome only by violence, and, last the truth of the terrorist cause justifies any action that supports it.

Contemporary terrorism embraces a wide variety of political phenomena. It involves a group of individuals who are products of the affluent industrialised society. They seek to destroy this society in the name of some revolutionary concept. Examples of such groups would include the Italian Red Brigade, German Baader-Meinhof gang, Japanese Red Army and the US Weather Underground. A second group of terrorists would be those espousing more traditional political causes—unification of Ireland, a homeland for the Palestinians, majority rule for Rhodesia and independence for Puerto Rico. Acts of 'international terrorism' are committed to terrorise nations and governments into compliance or complacency. It is to this concept that attention is now directed.

The most widely used definition of 'international terrorism' is "The threat or use of violence for political purposes when such action is intended to influence the attitude and behaviour of a target group other than its immediate victims and its ramifications transcend national boundaries."

The Director of the US State Department's Office for Combating Terrorism, Ambassador Quainton, has reported that there were "293 acts of international terrorism" during 1977-1979 directed against the US. From January through April 1980, 10 embassies worldwide were seized—eight of them in six different Latin

Washington Post's William Branigin is frisked and ordered out of the US Embassy in Teheran by pro-Khomeini guerillas who held American hostages for 444 days. Terrorism, openly abetted by countries, will increase to further foreign policy objectives.

American countries. None, however, were American embassies. Ambassador Quainton also stated: "You can be absolutely certain that there are going to be higher levels of violence in some parts of the world" as nations move into the 1980s.

International terrorism is distinguished by three characteristics. First, it embodies a criminal act. It may take the form of an assortment of acts which are generally regarded by nations as criminal, such as assassination, bombing, kidnapping and hijacking. Second, international terrorism is politically motivated. An extremist political group, convinced of the rightness of its 'cause', resorts to violent means to advance that cause. Normally, this violence is directed against innocent persons who have no personal connections with the grievance motivating the terrorist act. Finally, international terrorism transcends national boundaries through: (a) the choice of a foreign victim or target, (b) the commission of the terrorist act in a foreign country, or (c) an

effort to influence the policies of a foreign government.

Any analysis of international terrorism in the contemporary world must take into account a series of new developments in the post-World War II period, which have given impetus to the current form of violence.

In fact, these developments—modernisation and decolonisation—may be considered as the causes of terrorism. 'The Myth of the Guerilla'—that any movement that employs the strategies of guerilla warfare and/or terrorism is assured of success—has also contributed to the growth of terrorism. Mao's communism in China, the National Liberation Front in Algeria, the Viet Minh in Indochina, and the Zionist underground in Palestine have given credence to this myth. Finally, the impact of new technologies has allowed terrorist groups to skillfully exploit advances in the areas of transportation and communication—such as world airways and television—to their advantage.

International terrorism has been rising

security forces and criminal processes, and it is occurring in part because of support from foreign governments. Examples include the hijacking of three transatlantic airliners by the PLO, the attacks on Lod Airport and the Munich Olympics; kidnappings and murders of US and other diplomats in Brazil, Argentina and Guatemala; terrorist abductions and hostage cases in Khartoum, Cordoba and Beirut; seizure of the German embassy in Stockholm by the Baader Meinhof gang.

It is being predicted that by virtue of the Tehran captivity of Americans, terrorist violence affecting the US will increase for the simple reason that the country gives the appearance of impotence in dealing with it.

To combat terrorism the US has established a four-fold set of principles. They are (1) condemnation of all terrorist acts as criminal, (2) no concessions to terrorist blackmail—no ransom or release of prisoners, (3) recognition of host government sovereignty to exercise its responsibilities under international law when Americans are abducted abroad, every effort should be made to find a peaceful solution, and (4) assistance to families and employers in the case of private Americans who are abducted.

Four additional elements comprise the basic US counter-terrorist strategy. First, good intelligence on terrorists and their plans. Intelligence is considered to be the most effective weapon against terrorism but must be kept secret to be effective. Second, an 'in-place' command and control structure that can coordinate the work of all the agencies involved.

Third, the development of the appropriate tools for handling any terrorist situation with which the US may be faced. This includes not only communications but also special units for hostage rescue or other missions, and clear legislative authority. The final element of this 'five dimensional' strategy is an international one. The fight against terrorism is an integral part of US relations with all governments. The Bonn Declaration of July 1978, for example, is the first multi-lateral enforcement mechanism against countries which condone acts of terrorism.

Terrorism is a military weapon when it meets the following criteria. (a) is utilised as a substitute for 'conventional' warfare such as the case of the Palestinians against the Israelis, (b) is used as the chosen weapon of conflict by a population segment against another segment and/or a foreign power, such as the case of Northern Ireland. Even though he wears no uniform, may have received little training, is exposed to

ephemeral organisation, the terrorist is a soldier. He engages in armed conflict in pursuit of a 'cause'.

In sum terrorism used as a military weapon is warfare conducted in the enemy's rear. Its tactics are aimed at destroying the enemy's installations, killing his officials, and battering a country's morale. The deaths of civilians—unacknowledged as a goal, but nevertheless often deliberately sought—are an additional result of terrorism as an instrument of war. Terrorism is a tactic that must be studied, doctrines developed and defenses constructed.

What does the future hold for terrorism? Indications are that it is almost certain to increase for a variety of reasons: (a) it seems to pay—political blackmail gets results, (b) punishments for convicted terrorists are light, (c) publicity is acquired free on a massive scale, (d) industrial society will become more vulnerable, (e) the accessibility of terrorists to air travel, and (f) as terrorist groups become better informed and organised, they will receive increasing support from foreign governments.

Terrorism has entered the mainstream of world politics and could become a new form of warfare. With the availability of relatively small and inexpensive means of destruction, a handful of men could have an enormous impact upon states and societies worldwide. It is not unrealistic to envision some countries preferring to arm and use terrorism to pursue their foreign policy objectives, rather than accept the stigma of direct and visible involvement in a conflict with another state.

There is evidence that a worldwide terrorist underground presently exists. Its goal, in the words of Italy's Red Brigade Chief, Renato Curcio, is "Europe's ultimate war for communism". The March 1980 arrest in France of 22 suspected terrorists has disclosed for the first time, the effectiveness of a coordinated European effort to combat terrorism. The decision to organise new anti-terrorism measures is an outgrowth of the perception of European leaders that terrorism is developing into an international network, aided by a great simplification of border-crossing formalities.

Terrorism will continue in the years ahead; governments worldwide must be prepared to deal with it in all its dimensions. It is not out of question that at some future time terrorists may try to use mass-destruction weapons—chemical, biological or nuclear—for extortion purposes.

Above: Spring time's paper time! At least that's what Dusseldorf, one of Europe's major fashion centres, seems to think. Their latest in lady's fashion may well be based on paper! Wanna be in with the times? Just dig up your reliable old newspaper and turn it into a swinging new skirt. And while you're doing it, just stop to think of the role that paper plays in your everyday life. Without it where would your morning newspaper be, how would you write love letters, fill out tax forms, paper your walls, collect stamps, buy bus tickets or fly kites? West Germans paper over these problems by producing some 8 million tonnes of it annually. Even though paper clothing is not a new idea, the lady in the pix is proof of the broad range of uses paper is good for. Top centre: Double nomination: Jessica Lange, who received the best actress Oscar nomination for Frances, became the first actress since 1942 to be nominated for two categories, when she also received a nomination for best supporting actress for her role in Tootsie.

FLEXICON . For building a more evocable vocabulary

Flex your vocabulary and define each word given below by yourself. The word and its meaning will then be within your grasp.

This month's set of words describes 'types' of persons.

Take each word, study the definition blanks and trace the appropriate definition words to fit the blanks from the Word List alongside. The number of letters in the word (its length) and the context of the blank will combine to help you make the correct choice. Cross out each word from the Word List after you have filled it into a blank. If a certain definition proves elusive, move to the next one. You can get back to it with some certainty after you have succeeded in placing the other words in the list.

You are now certain to have this set of words always at your instant command. Correct definitions are given alongside.

1. QUISLING — (6) who becomes a — (4) of the — (9) or invader of his country (From Vidkun Quisling of Norway who became the Nazis' — (6) ruler)
2. PHILANTHROPIST On — whose — (8) generosity serves — (7)
3. CLAIRVOYANT One who has the — (7) to — (8) things that can not be — (4), or can — (7) the unknown
4. PARAGON Person for sometimes an object that is a — (5) of — (10) or perfection
5. HYPOCHONDRIAC Person who — (8) that he — (7) from — (9) 'thus, anyone who worries — (10) about his — (8)
6. COQUETTE A — (6) who exercises her — (7) to — (7) male attention — (9)
7. MALINGERER One who may often — (7) to be — (3) or — (11) just to — (5) duties
8. PLUTOCRAT Person whose — (6) gives him enormous — (5) or — (9)
9. MUCKRAKER Person who keeps — (7) into details of — (10) or scandal and — (8) them
10. NOVICE Person without any — (10). A beginner who is still — (3) to his — (4) or function

 plutocrat Person whose wealth
 gives him enormous power or influ-
 ence
 philanthropist Person whose wealth
 is just to avoid duties
 malingering One who may often
 pretend to be ill or handicapped
 quissling One who may often
 pretend to be ill or handicapped
 coquette A flirt who exercises
 her charms to attract male atten-
 tion
 hypocochondriac Person who ima-
 gines that he suffers from illnesses
 paragon Person (or sometimes
 an object) that is a model of excel-
 lence or perfection
 clairvoyant One who has the
 ability to perceive things that cannot
 be seen, or can predict the unknown
 philanthropist One whose
 material generosity serves mankind
 puppet ruler
 quisling (From Vidkun Quisling
 of Norway who became the Nazis'
 tool of the conqueror or invader of
 his country)

THE DECIPHERING GAME

Answer as many of the clues as you can, and place your letters above the dashes opposite each clue. Then, transfer the identified letters down to the QUOTATION blanks below according to the matching numbers below the dashes. You can thus work back and forth between CLUE and QUOTATION words till you decipher the complete quotation.

To assist without going we have enu-
 merated that no consonant repeats itself in the
 CLUE WORDS section. All the repeat let-
 ters there are vowels. The 'hint' letters
 do not occur in the QUOTATION at all.

CLUE WORDS

Errant, but
 trusty like
 Gawain
 3 2 4 18 13 12 14 Y
 Exempts with
 flourish? 6 10 4 V 11 9
 Renown 16 10 M 11
 Racked
 receptacle 15 1 P 17 7 10 8 5
 QUOTATION

1 2 3 4 2 5 6 7 8 5 9
 10 8 11 12 13 11
 12 7 7 14 9 6 13 4 15 13
 16 10 9 13 4 7 2 1 9
 16 7 8 17 11 12 12 11 8
 12 13 4 2 18 9

CROSS-SUM

Simple arithmetic? Certainly. But
 those cross-number puzzles (whose
 digits 'cross' instead of letters)
 can help you become nimble with
 numbers. (If you need a clue to get
 started, take a peek at the hints given on
 the next page.)

(a) ENCODED

| | | 1 | 2 | 3 | 4 | 5 |
|------|---|---|---|---|---|---|
| ROWS | 1 | A | B | E | H | D |
| | 2 | E | D | | C | G |
| | 3 | G | C | H | E | A |
| | 4 | D | I | | B | F |
| | 5 | F | A | D | G | E |

In the ENCODED diagram above, each
 letter stands for a specific digit between
 1 and 9. Now study the data and use
 them to decode the letters into numbers
 in the blank square on the next page.

DATA

- 1 NO digit repeats in ANY column,
 row or diagonal, nor does the same
 digit occur in adjacent squares (see
 diagram). Also, the four outer sides
 as well as the two diagonals and
 centre row (Row 3) each total the
 same. The common total is 26.

3. I is either 7 or 8

4. $D > H > B$

(b) Fill in the blanks:

| | COLUMNS | | | | |
|------|---------|---|---|---|---|
| ROWS | 1 | 2 | 3 | 4 | 5 |
| 1 | | | | | |
| 2 | | | | | |
| 3 | | | | | |
| 4 | | | | | |
| 5 | | | | | |

Hint:

By comparing Col. 1 with Row 3 you can prove $C + H = D + F$. These sets occur in diagonal FHCD (=26) and you can pin down I's value. A's and G's values naturally follow. Col. 1 will next give you the value of E. Requirements 1 and 4 of given data should give you the combination DHB in diagonal ADHBE.

MEDICAL TERROR

Man has made a heart, offering its recipient, Barney Clark, new hope in the battle against cardiac diseases. But there still remains cancer to combat—and man is just as much at sea as he was when first confronted with the disease. The search for an 'antidote' against cancer has become near-desperate. Cancer makes news—be it an upstart doctor or a tantric laying claims to curing it. And now a novelist has discovered enough drama in it to pack a 365-page paperback.

The novel: *Fever*. The novelist, Robin Cook. A practising surgeon, Cook has such techno-horror bestsellers behind him as *Coma* and *Brain*. His latest novel *Fever* has enough of that medical terror, that suddenness, that chill as when a doctor reveals that you have cancer. The novel's very first line, "The poisonous molecules

*FEVER by Robin Cook; published by Rupa & Co., New Delhi; price: Rs 15, pages: 365.

the bone marrow in a crescendo."

Fever is about one man, Charles Martel, who turns researcher to save his two-year-old cancer-afflicted daughter's life—and risks being called a renegade physician. "...the strongest man in the world is he who stands most alone," quotes Cook from Henrik Ibsen's *An Enemy Of The People*. And it's this Ayn Rand-like quality that makes *Fever* a spellbinding thriller—"as gripping and plausible as tomorrow's headlines".

As himself, Martel can pass off in a crowd: he isn't newsy enough to make headlines. Things change, though. Martel's first wife dies of leukemia. He marries again, but cannot get over his first wife's death. He then takes up cancer research. Existing at that time are two lines of thought for treating cancer: the majority of doctors believe in chemotherapy; Martel, among the few, subscribes to the immunological barrier line. Martel's belief stems from the subconscious, that chemotherapy had failed for his first wife Elizabeth. Further, the side effects seem too horrendous to him.

Martel is with an institute which is trying to manufacture a drug 'Canceran' as a cure for cancer. But this drug does not come out after a young researcher falsifies data in his eagerness to prove its worth. The errant man is dismissed and Charles Martel is asked to take over the research. Yet, Martel is unhappy: not only does he not believe in Canceran but also the research has been motivated by vested interests of the drug firm and the institute, both of which form parts of the same parent company. While he is faced with the dilemma of taking up something in which he does not believe in he gets the news that his 12-year-old daughter, Michelle, too is afflicted by cancer.

Martel's interpersonal conflict has been portrayed skillfully. It shows him as a physician who knows what's going to happen to his daughter, and at the same time as a father, already overburdened with his professional problems, now having to face the agony of his daughter's death. Martel feels his line of thought on cancer might be able to help his daughter. The existing medical opinion, however, does not concur with his view.

To add to his misery, Martel stumbles onto something else. He discovers a drug firm's dumping of benzene waste in a river flowing close to his house. He feels his daughter's disease as that of another kid in the neighbourhood could have been caused by this. Martel tries to get this company closed but his attempts are stalled by the company's vested interests.

In such a situation Martel appears to break down, but actually he conceives of

has been compounded by all the events that take place in quick succession. At the same time, his second wife is torn between the love for her husband and her desperate belief that the existing treatment might help save her stepdaughter Michelle.

Martel takes to criminal desperation. He abducts his daughter and, along with his wife and two sons, fights society. He keeps everyone at bay with a gun. Meanwhile, he experiments on himself and then uses the results on his daughter, who responds to the treatment. The leukemic cells disappear and Michelle is on her way to recovery. Everything else too falls in place after a series of bizarre incidents—like when Martel himself is shot at, recovers, and goes on to research at Berkley.

Fever makes good reading, except that all too suddenly it terminates in a fairy-tale-like happy ending. But then who cares for Camus endings?

V Krishnaswamy, New Delhi

WHO WAS HE

?

Think you know a lot about the lives and deaths of famous men and women? If so, the details given below should be enough to enable you to make an accurate guess of the name of the person.

He once said, "What a romance my life has been." The sun of his glory had set a few years ago. He was now almost alone, away from his country and his family. The place where he was first made to live was a little hovel of a few square feet and when there was cleaning to be done he had to go out of doors. Finally, he was shifted to a larger dwelling where he spent his last days. The climate, the bad food and the mental anguish assisted the tendency towards cancer, which his father had also been afflicted with. Just before his death, he said: "I am dying before my time [he died at the age of 52], murdered by the English oligarchy and its hired assassin." When he died his body was dressed in his favourite robe and buried in a lonely spot near a spring shaded by two weeping willows. He had often walked there. Inscribed on the tomb were the words "Here lies". There was no name. Yet, he had made an indelible impression on history.

Who was he?

A.B. Gupta, New Delhi

April issue

- 1 Comparing Col. 1 with Row 5 tells us $D + F = C + H$ as AGE is common to both. In diagonal FHCN $(D + F) + (C + H) + 1 = 26$. Since $D + F$ and $C + H$ are equal then total must be even. And so must 1 be an even num-

ber to get 26. So 1 is 8. $(D + F)$ and $(C + H)$ are each 9 and 9. If 1 is 8, A must only be 9 and G is 1 (Clue 2)

- 2 This makes Col. 1 read $9 + E + 1$ $(D + F)$. Since $(D + F)$ is also 9, E becomes 7. Filling in 1, 7, 8 and 9 wherever they occur, we are left with the last clue that D, H and B are digits of descending value.
- 3 In diagonal ADHBE we have A and E filled as 9 and 7 totalling 16. Hence, $D + H + B$ must be 10. The only combinations possible are 127, 136, 145 and 235. The position of the 1's on the square rule out any combination including the digit 1 in it. This leaves 235. Place it as 5, 3 and 2

on the diagonal and the other digits automatically resolve themselves.

February issue.

- 1 EF must be a multiple of three. From the three-times table only 27 answers our requirement.
- 2 Since each digit in FDB-down is progressively higher this number must be 789.
- 3 FILLING in 8s and 9s wherever they occur as Ds and Bs, we get the four-digit numbers to be 8898 and 98C9.
4. 98C9 becomes 9819 from the digit-total requirement of 27, as the other four-figure digits total 33. Fill in AA as 33 and the decoding is complete.

Happenings

BEST STREET Rock Tidings

● FANS OF Chick Corea's eclectic keyboard work will get a chance to hear two sides of the artist's psyche on his latest offering *Again And Again*, comprising six tracks from a live performance in Johannesburg in March '82. The musicians appearing with him are Steve Kujala (saxes), Carlos Benavent (bass), Don Alias (percussion) and Tony Braxton (drums).

● Indian keyboard whiz Louis Banks and the members of the erstwhile Jazz Yatra Sextet (now called Sangam) who toured Europe in late 1980, have released an album *City Life* of material recorded during that tour. The release is courtesy CBS, to which Louis was recently contracted.

● Thin Lizzy, the British

Banks: Keyboard whiz.

power rock quintet led by monster bassist Phil Lynott, will disband after a coming tour of the UK and a final album *Thunder & Lightning*.

● Remember Journey, the progressive rock band featuring ex-Santana keyboard player Greg Rolie? Just after the onset of the '80s, they had completed the release of a trilogy of albums *Infinity, Evolution and Departure*. Their commercial potential still remains unabated and they have now spawned a home video game too. They're now looking forward to new *Frontiers* and this album should make waves in the charts for weeks to come.

Melody, Bombay

DANCE

Maharaj Kalka-Bindadin Kathak Mahotsav

THE CAPITAL'S cultural scene came alive in February with the four-day-long festival of Kathak. Maharaj Kalka-Bindadin Kathak Mahotsav, organised by the Kathak Kendra of Delhi, was held from February 16 to 19 at the Kamani Auditorium. This festival is held annually to celebrate the memory of Maharaj Bindadin and Kalka Maharaj—two great exponents of Kathak dance, who flourished in the court of Nawab Wajid Ali Shah of Lucknow. Of the

four major systems of classical dance in our country, Kathak is the most popular in northern India, the other three being Bharat Natyam, Kathakali and Manipuri.

About 50 dancers from all over the country participated in the Mahotsav. Among the established names of the Kathak world who figured in it were Guru Birju Maharaj, one of the chief exponents of Kathak in the present times; Kumudini Lakhia, an accomplished danseuse, choreographer and director of

Kadamb Academy of Dance in Ahmedabad; Rohini Bhate, director of Nritya Bharati, Pune; Durga Lal and Shovana Narayan, both belonging to the Jaipur Gharana. Fresh talent comprised Alka Nupur, Veronique Azan, Mekhala Devi, Kumkum Dhar, Saswati Sen, Ram Mohan, Krishna Mohan and Birju Maharaj's son, Jai Kishan.

The importance of this festival was manifold: it served as a common platform for the

Birju Maharaj (far left) and 'shishyas'.

old and the new, the traditional and the experimental and for the 'guru' and the 'shishyas' in that the masters and their disciples performed together. Another important feature was that it presented an ideal blending of a variety of musical compositions with different dance patterns.

Sarojini Bartwal, New Delhi

HINDUSTANI MUSIC

Shankar Lal Festival Of Music

A LANDMARK in the capital's cultural history, the Shankar Lal Festival of Music was held from February 17 to 20. This festival, started in 1963, is dedicated to the late Sir Shankar Lal, a leading industrialist of Delhi and a patron of fine arts. Every year, topmost musicians of international repute perform at this function—and this year was no exception.

This year's festival was memorable for the outstanding performance by the sarod virtuoso, Ustad Ali Akbar Khan, and his son Ashish Khan, who are respectively the son and grandson of the great sarod maestro, Ustad Allaaddin Khan of Maihar, an institution unto himself. The father-son team delighted the audience with their masterly

Ali Akbar Khan (centre) with son Ashish (right).

rendering of the ragas *Bagesh-wari Kanada* and *Bhairavi*.

The renowned 72-year-old vocalist of Karnataka, Mallikharjun Mansoor, was impressive for the skill and dexterity with which he presented rare and complicated *Mishra* ragas. He is the disciple of the late Alladiya Khan. Pandit Bhimsen Joshi was another stalwart performer who established a rapport with the audience with his compositions of *Mian Ki Todi*. Other star performers of the festival were Kishori Amonkar (vocalist), Buddhaditya Mukherjee (sitar) and Ustad Amjad Ali Khan (sarod).

BANK RECRUITMENT

PROBATIONARY OFFICERS/CLERKS

"Specialised Training in NSB Regular/Correspondence Courses has proved to be the guaranteed way to secure jobs in Banks as Probationary Officers & Clerks."

-says Editor, Citylight, Bombay.

If you have applied to State Bank of India or any Nationalised Bank Boards, for PO or Clerical Post, join our Course now.

Banking: A Rewarding Career:

Nearly 2500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. Any graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And, after nationalisation, Bank jobs have acquired a new status, because now the Banks have taken upon themselves the responsibility of building a better India. Today, in our Banks, our social ideals find a dynamic expression. Bank jobs, therefore, offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects—(1) Reasoning (verbal, logical, non verbal) (2) Quantitative Aptitude (3) General Awareness and Current Affairs (4) English Comprehension (5) Essays, letters, precis-writing—are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old, but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, ECGC as Officers. The subjects, syllabus, pattern of tests and examining body (NIBM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success oriented students join the Course well in advance of the test and benefit by our step-by-step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers/Clerks are declared at intervals of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants, 2300 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A properly competent, specialised and thorough coaching becomes a MUST.

NSB's Faith in Specialisation:

National School of Banking, head quartered at Bombay, was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams—of POs and Clerks. It has grown rapidly and is now the largest pre-recruitment training institute in the country. Our continuous research and on-going study of objective and descriptive exam question papers have contributed to our present pre-eminence as the central institute for BANK RECRUITMENT training.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

JOIN NOW AND PREPARE FOR A RICH AND REWARDING CAREER. For details of vacancies, application forms and our special courses, write today with Rs. 2/- P.O. or M.O. to:

LETTERS

Gun Culture

'Congress culture transcended even the colonial culture (*Current Events: Assam*, March '83) when elections were held at gun-point in Assam.

Tirumal Mundargi, Shorapur

Best Letter: Rs 40

Blame The Youth

Instead of putting all the blame for unemployment on the government and economic infrastructure, the Indian youth should realise that they too are guilty (*Economy: A Progress Report*, March '83). First, they are not clear about their aims and thus end up being unsuitable for all attractive jobs. Secondly, almost every graduate looks for a white-collared job without any alternative in mind. Very few are enterprising enough to opt for self-employment. Thirdly, hardly anyone is prepared to climb the success ladder from the lowest rung. They all want to reach the top quickly.

Manoj Pandey, Lucknow

Prize-winning Letter: Rs 25

Our Economy

Apropos *Indian Economy: A Progress Report* (March '83) I think that for eliminating poverty and creating employment opportunities, we must have substantial economic growth (which averaged only 3.5 per cent). For this, India should develop high technology industries. We, however, should not neglect the agriculture. Further, taking Japan's example, we should promote cottage industry side by side.

Sanjay Sachdeva, Sonapat

Though about 50 per cent of the national income is contributed by the agricultural sector, the people who made it all possible—the farmers—have constantly lived in miserable conditions. Inadequacy of input supplies such as seeds, fertilisers, pesticides and agricultural implements, small size of operational holdings (6.57 acres), defective system of providing loan, unavailability of marketing facilities are crucial problems being faced by farmers and the government must do something about it.

Parmeshwar Singh, Ferozepur

Apropos *Industrial Relations*, I think the correct amelioration lies in our getting rid of the professional agitators from the trade union movement. The organised

labour should seriously think of leadership by the working class. The workers should be given basic training in trade union methods and philosophy. For this purpose, the very infrastructure of the present law relating to industrial relations should be changed.

Pradeep Gupta, Bhawanimandi

The Human Factor

Non-alignment: Credibility At Stake (*Focus*, March '83) was informative and timely. In today's world nuclear war has threatened not only the well-being of the present but the future generations as well. As such, the NAM should strengthen itself and adopt practical measures for its prevention.

Ravinder Singh, Janmu

Are the NAM members truly neutral? Can anyone say that Cuba, Ethiopia and Angola (pro-USSR) and the ASEAN, Saudi Arabia and Egypt (pro USA) are non-aligned? The members are not bound by any ideology or code of conduct except the preservation of world peace. OPEC, ASEAN and OAU are all members in the movement, though their objectives are different from those of the non-aligned. At present its achievements are few. It has utterly failed in stopping the prolonged war between Iraq and Iran (members of NAM) and the question of Kampuchean representation still continues to be a bone of contention. Some member-nations have given military bases to either of the two superpowers violating one of the most important principles of the movement. Apart from this, what part have the NAM countries played against the Soviet military intervention in Afghanistan? When their own house is divided and in disorder, how can they set the world in order?

M. Britto Kuthalane, Nellai (TN)

Perhaps the only and the best outcome of this Summit has been that so many days after the Asiad the specially built five-star hotels have finally got house-full guests!

Sanjay S. Shanbhag, North Kanara

Fashion Fallacy

I want to express my disagreement with a few points discussed in the article *Interviews: How To Give Them* (*CCTimes*, March '83).

The view about the interviewee's dress being "well-tailored and not out-dated" is all right as far as the former is concerned, but I strongly object to the latter.

I think the writer has completely ignored the lower and the middle classes. The unemployed coming from these classes have to live on very little money and have just one or two pairs of formal dresses. How can they afford to keep in tune with the changing fashion.

The fact that the IAS toppers Pradeep Shukla and Prafulla Mishra both appeared before the interview board in cotton shirts and not in suits is a great moral boost for the poor.

Ravi Pratap, Dumka (Bihar)

The Only Answer

Yours is the first career magazine to have introduced techniques of rapid reading (*Reading The Rapid Way*, March '83). Speed-reading is the only answer to today's pressing problem of doing more work in less time. It is also useful for those who are seeking entrance into prestigious institutes of management and engineering.

G. Sivaprasad, Venkatapuram (AP)

The article was good, especially for those appearing in competitive exams where they have to answer comprehension questions in a very limited time. Till now this had been very difficult for me. Now, thanks to your article, I can read, and grasp the meaning too, without reading the paragraph twice.

M.R. Dhandekar, Nagpur

You Spell Success

I must thank you for your advice regarding my career problem (*Career Counselling*, March '83). I did pass the C.A. entrance exam in the first attempt with 71 per cent marks. I hope to be appointed as an articled clerk in one of the best firms of Delhi.

Rima Takkar, New Delhi

Just One Point

With reference to *Career Counselling* (Nov '82), I want to point out that no correspondence course is conducted for M.B.A. by the L.N. College of Business Management, Muzaffarpur. However, it conducts a two-year full-time M.B.A. course only through the regular classes.

Ganesh N.L. Das, Muzaffarpur

With reference to *Tarbits* (Feb '83), under *Did You Know That...* it has been mentioned that "From the bottom of a deep well it is possible to see the stars during the day". I wish to state that this is an old superstition with no basis.

K.A.V. Kulkarni, Hubli City

The 32nd district of Bihar is Madhepura, not Madimpura as mentioned (*Letters*, March '83).

Pramod Kumar Jha, Ranchi

Hello folks...

At 10 in the morning, a group of final year students is sitting in a small Placement Room in the IIT. They are being considered for a coveted position in a big industrial house and have been asked to come for a group discussion. The testing officer arrives and announces the topic for discussion. He withdraws to a back seat. The discussion starts and it's a free for all with several students speaking at the same time. Feeble voices are drowned in the din created by more vocal ones. One boy is dominating the discussion cutting all others to pieces. Another aggressive fellow is trying to dominate the discussion. Everyone feels that either of these two would be selected. However, when the result is announced, both are nowhere.

Group discussion, of late, has become an important tool for selecting persons, particularly for well-paid jobs. Good companies in the private and the public sector are widely using this technique for selecting management trainees and business executives. The services selection boards, which seem to have started and developed this method of eliminating candidates, continue to use it. Its importance is being realised by university departments and management institutes too.

Why have group discussions become an important tool for selection? The reason: group discussion is a complete personality test. After a 20-minute discussion of this kind, a person's personality is completely exposed. The testing

officer can judge whether the person has self-confidence, tact, a cool temperament and an alert mind; can he convince others about what he thinks is right? In a way it is a superior technique than the personal interview where the testing officer has no means of knowing how the interviewee would really behave in a group.

Most of the candidates who participate in a group discussion do not understand the real purpose behind this test. They think only their debating quality is being tested, that they have to prove they are effective speakers and show that they have the capacity to dominate others. All these notions are erroneous. The result is that many good candidates, who are intelligent otherwise, do not get selected because they make some common mistakes. The most common one is the desire to dominate the discussion. Effective speaking does not mean not allowing others to speak. You must listen to others, understand their points of view. Only then can you argue convincingly.

The participants often do not argue their points logically. They make a point but cannot substantiate it properly. Or they contradict a certain point without explaining why. A few can be seen raising their voices during the discussion, using their vocal chords rather than their minds. Many keep changing sides frequently. A good number of participants keep interrupting while others are speaking, thus not allowing other participants to complete their point.

How then should one participate in a group discussion? Group discussion is a kind of battle in which you fire arguments in place of bullets. Therefore, you must enter into the group discussion as a soldier would enter the battlefield. This implies that you should have a strategy and should know how to implement it. Immediately after the topic is announced, decide your strategy: whether you plan to agree or disagree. You have to think fast and decide within a minute. You should also think of arguments, examples and views

which can help you substantiate your strategy.

You must have a basic stand on the issue which should never be changed drastically. However, this does not mean that your approach should be rigid. During the course of the discussion, if you find that the other person has a good point accept it and modify your stand.

During the discussion, your behaviour and language should be sophisticated and serious. You should not be frivolous. However, this does not mean that you should be poker-faced throughout the discussion. Your behaviour should be normal, you should use niceties and must have a positive approach. For example, there is no need to say, "You are wrong." Instead you can say, "Yes, you may be right."

You must know when to contradict and when to support. It is not good to keep supporting or contradicting others. If you are criticising an argument extended by another participant, do not make fun of him. Do not try to prove that what he was saying was rubbish. Be courteous and say a few good words about his views. Then give your arguments to prove that his views are wrong. Similarly, when supporting an argument, the support should not be total. You must mention why you are supporting a point and your arguments should not be similar to those which have already been extended.

You cannot prepare for a group discussion in a short period. Over a period of time, develop certain traits, mannerisms and a pleasant way of speaking. There are no easy lessons and you only learn by experience. The best way to learn is to participate in discussions whenever you get the opportunity. Organise small discussion groups and meet frequently. Invite knowledgeable and experienced persons often to give an assessment of your performance.

The Management Page

is now a special feature in **THE ECONOMIC TIMES**
Every Wednesday & Saturday covering eight Management areas.

| Wednesday | | Saturday |
|-----------|---|---|
| First | Finance Management | General Management |
| Second | Marketing Management
(including sales & advertising) | Information Management
(including system & communications) |
| Third | Legal Management | Taxation Management |
| Fourth | Production Management
(including materials management) | Personnel Management
(including manpower development) |

The Management Page raises issues presents techniques and approaches, studies the actual experience of decision makers at all levels and deals with specific problem oriented situations in all management areas. Mainly written by managers, the articles are brief, practical and frank. Principles emerge, wherever possible from the way specific problems are handled.

Plus three extra pages on these two days, focussing on many a sector of the economy - industries, commodities etc.

THE ECONOMIC TIMES

A paper for decision-makers.
Published simultaneously from New Delhi, Bombay & Calcutta.

TEST YOUR WORD POWER

BY AYCEE

Tick the word or phrase you believe is nearest in meaning to the key word.

1. **affluent** (ă'flooənt): A: wealthy B: forceful C: smart D: suave
2. **ailment** (ă'lmənt): A: madness B: indignation C: illness D: aversion
3. **arable** (ă'ragəbəl): A: suitable for ploughing B: windy C: healthy D: easy to please
4. **carnivore** (kăr'nivôr): A: a ravenous person B: flesh-eating animal C: gypsy D: plant-eating animal
5. **circumvent** (sêrkəmvēnt): A: to get round B: write down officially C: confine within bounds D: say something in a roundabout way
6. **concomitant** (kənkō'mitant): A: a contestant B: something that accompanies C: a collaborator D: something that brings misfortune
7. **deficiency** (difī'shənsi): A: lack of communication B: misappropriation of money C: getting out of touch with others D: state of being short of what is needed
8. **dissident** (di'sidənt): A: traitor B: one who hates mankind C: one who disagrees D: wasteful
9. **dogma** (dō'gmə): A: evidence against somebody B: questioning the truth of a belief C: beginnings of uncertainty D: belief to be accepted as true without question
10. **embark**: (imbăr'k): A: to start B: hitch-hike C: go climbing D: draw out
11. **execution** (ēksikū'shən): A: planning something out of the ordinary B: excluding from a religious body C: finishing off

- a person without warning D: infliction of punishment by death
12. **gene** (jēn): A: descent of a species B: spirit with strange powers C: one of the factors controlling heredity D: grammatical grouping of words into classes
13. **glut** (glūt): A: supply in excess of demand B: sticky substance C: one who eats too much D: small horned animal
14. **hazard** (hă'zərd): A: problem B: risk C: thin mist D: trick
15. **palate** (pă'lat): A: a tablet B: a sweet dish C: sense of taste D: a large tray

19. **vulnerable** (vū'lnərəbəl): A: unsure B: open to attack C: crafty D: secretive
20. **wretched** (rē'chid): A: poor B: frail C: miserable D: humble

(Answers on page 70)

P.S.: For pronunciation symbols look up our March issue.

FOREIGN WORDS

BY THE AARBEEES

1. **passee or passee** (pă'sə) Fr: past the prime, especially (of woman) past the period of greatest beauty, behind the times, out of date. The Chief had a fine brain in a somewhat *passee* body.
2. **passim** (pă'sim) L: throughout, here and there—used especially with the name of a book or author to indicate that something (as a word, phrase or idea) is to be found at many places in the same book or writer's work. This idea occurs in Shakespeare *passim*.
3. **per annum** (pêr ă'nəm) L: in or for each year; annually.
4. **per capita** (pêr kă'patē) L: by or for each person. In the last two decades *per capita* consumption of sugar has gone up.
5. **per diem** (pêr di'əm) L: based on use or service by the day; daily. The fee is charged on a *per diem* basis.

6. **per mensem** (pêr me'nsəm) L: by the month; monthly. The number of workers discharged *per mensem* is fast increasing.
7. **per se** (pêrsē) L: by or in itself, intrinsically. Greed is evil *per se* and must be avoided at all costs.
8. **persona non grata** (pərsō'nə nōn grā'ta) L: an unacceptable person, especially a diplomatic official who is personally not acceptable to the government of the country to which he is accredited.
9. **petit bourgeois** (pätē'boor'zhwah) Fr: a member of the lower middle classes.
10. **petite bourgeoisie** (pätē't boorzhwahzē) Fr: the lower middle classes.
11. **petitio principii** (pitishīō prinsi'piē) L: begging the question; a logical fallacy in which a premise is assumed to be true without warrant, or in which what is to be proved is implicitly taken for granted.

Note: Fr—French; L—Latin.

FOCUS

SEVENTH NON-ALIGNED SUMMIT

A TURNING POINT

BY MAHENDRA AGRAWAL

Every country which participated in the recently concluded 7th New Delhi Non-aligned Summit, felt satisfied with the final outcome and regarded it as successful for one reason or another. To begin with, none of the previous six summits were so representative as this one: nearly 70 heads of state or government and a large number of dignitaries, delegates, observers and guests attended the New Delhi conference, against the tally of 25 nations in the first summit at Belgrade, 100 nations assembled in the New Delhi meet. Apart from the UN General Assembly sessions, it was the largest international gathering, but in a sense more important. General Assembly sessions are not normally addressed by heads of state or government and neither do they seek to confront — and contain, within limits — all the global problems in one sitting.

If that be so, the New Delhi Summit derives its importance as much from the ominous background of the world situation in which it met — amply collaborated by its very vast and diverse agenda — as from the remarkable degree of success with which it was able to maintain the unity of the non-aligned movement (NAM).

The recent summit conference was held under the shadow of an unprecedented global crisis, both economic and political. This situation has arisen because of a considerable erosion of detente and the emergence of what is called the "new cold war". Military budgets of the leading countries are mounting on an awesome scale. The increasing presence of the two superpowers in and around the Indian Ocean puts to question whether the non-aligned nations have the necessary leverage to extricate themselves from the vortex of the cold war. No less a serious challenge came to the Non-aligned Summit from the intra-

regional conflicts like the Iran-Iraq war, the presence of Soviet troops in Afghanistan, the issue of Kampuchea, political instability in Lebanon and the continuing Israeli aggression, sharp political and economic differences among the ASEAN countries and Vietnam, and a long historical animosity between India and Pakistan.

The agenda of the Summit emerged mainly from two sets of factors. One was the pursuit of the oft-repeated, "continuing" objectives of non-alignment, namely "independence, development, disarmament, and peace"; and the other was the need to adhere to the "five principles" or *Panch-sheel*, namely sovereignty and territorial integrity, non-aggression, non-interference, equality, and peaceful coexistence. These issues and subjects were considered within the framework of two broad headings: first, *political questions*, including the problems of international peace and security, cold war and detente, disarmament, the problems arising from the increasing militarisation of the Indian Ocean, aggression, intervention, colonialism and racism and related questions; and, second, *economic questions*, including the so-called North-South dialogue between the affluent, industrialised countries and the developing. Third World nations on the restructuring of international financial institutions, aid, trade, debt burdens, transfer of technology and the like, and South-South cooperation in the fields of trade, finance, agriculture, industry, science, education and technology.

After several days of hard deliberations, the conference adopted two major documents — a Political and an Economic Declaration. A novelty was a combined, capsuled formulation the Summit issued on the major points of the two Declarations — called the New Delhi Message.

The main focus of the Political Declaration is on such questions like disarmament (especially nuclear disarmament), racism in South and South-West Africa, Zionist aggression against Palestinians and Arabs, Namibia's independence, aggressive great-power designs in Latin America, and the dangerous growth in the stockpiling of weapons of mass destruction in Europe.

India — and Indira — takes charge
Mrs Gandhi, Castro and other leaders at
the inauguration of the New Delhi
Summit.

Dominating the Declaration was the section on disarmament. NAM has called for an "effective programme leading to general and complete disarmament". This, in fact, is a reiteration of the idea of general and complete disarmament adopted as the final goal by the UN General Assembly more than twenty years ago. But the non-aligned nations were realistic enough to emphasise that while general and complete disarmament should be pursued as the ultimate aim, it is the question of nuclear disarmament which should receive immediate attention. Thus, they urged the nuclear powers "to adopt urgent and practical measures for the prevention of nuclear weapons" and to "agree on an international convention prohibiting the use or threat of use of nuclear weapons in any circumstances and stop further production and deployment of nuclear weapons".

Both the Political Declaration and the New Delhi Message point to the dangers inherent in the ever-escalating arms race and the great-power involvement in regional conflicts, particularly in the continents of Latin America

the same. This may well give the impression that although theoretically the New Delhi Summit steered clear from the hangover of the "natural ally" theory propounded by Cuba at the 1979 Summit in Havana, it has tended to be more favourable to the Soviet Union on substantive issues.

Even so, the Summit demand for a ban on nuclear weapons and for eventual general and comprehensive disarmament, is welcome. It is indeed heartening that neither the Soviet Union nor the US has commented on it. But there is undoubtedly a touch of delusion about the non-aligned position on this question. The superpowers and nuclear powers are known for their recalcitrant attitude and for their unabating indulgence in the acquisition of nuclear weapons and other armaments. But surely the smaller countries and the non-aligned nations are offenders too, in that the expenditure on accumulation of armaments in the Third World has gone up considerably in recent years. Some Third World countries have also started trading in armaments. Therefore, the impression can hardly be avoided that whereas the non-aligned group of nations may place the major responsibility for nuclear disarmament on the nuclear powers, its own espousal of the cause of disarmament smacks of caution against any serious attack on its own programmes of arms build-up.

Duplicity of this sort undermines NAM's credibility, though member countries are loath to accept it. They, however, recognise the factors which bode ill for the very unity of NAM. They all admit that NAM suffers from its inability to have a set of precise rules for membership as also from the existence of several mutual conflicts between member nations. The second is, in fact, the unavoidable consequence of the first. In 1973, Malta was admitted to NAM while it still had a NATO base on its soil. Countries like Cuba, Vietnam and Pakistan with very close relations with one superpower or another, are its members. Romania and France have also been making serious efforts to join NAM. Except perhaps at Belgrade, the rules governing membership have never been settled, not even at the New Delhi Summit. There is a feeling

and Africa. The Declaration also calls for "cessation of all acts of aggression and threats against Cuba", "condemns covert and overt acts of political pressures by imperialist forces against Grenada", "considers the massive naval presence of Britain in Malvinas (Falklands)", expresses grave "concern over the repressive and expansionist policies of Guatemala", notes "with concern [the] continuing tensions in Central America, the Caribbean and South Atlantic", "opposes the establishment of military bases in the region" and "denounces new and increasing threats and acts of intimidation and aggression against Nicaragua". It draws pointed attention to apartheid, racial discrimination and colonial tyranny in South Africa and expresses deep concern over the continued illegal occupation of Namibia by the racist South African regime in flagrant violation of UN resolutions. The New Delhi Summit urged for an immediate release of African leaders like Nelson Mandela, Hermon Ya Tolvo and others and condemned the racist regime of Pretoria for its systematic acts of oppression and discrimination. As a measure of effective international pressure, it demanded that agencies like the International Monetary Fund should stop all assistance to South Africa, and also

that Western countries and Israel should stop their collaboration with the racist regime of that country.

Israel itself was strongly condemned for its continued aggression in Palestine and Lebanon and its policy of "genocide" against the Palestinian people in Lebanese areas under its occupation and it was hoped that the Palestinian people would soon get back their homeland. In this connection, the US was condemned for its policy of military and political support to Israel. The Summit Declaration also asked for the withdrawal of all foreign troops everywhere and de-escalation of tensions and early political settlement of the political issues that may be responsible for continued presence of foreign troops in any country.

However, the non-aligned countries tended to dispose of these problems in all too simplistic a manner. Thus, while the references to the problems in Latin America, Africa and West Asia—where the US or Western powers are believed to be involved directly or otherwise—and their denunciation are quite direct and sharp, the references to the Afghan and Kampuchean questions, involving Soviet or Soviet-backed intervention, are much too weak. It may have been necessary in the interest of the unity of NAM, but it is clearly against the non-aligned ethos all

have developed in keeping the membership criteria deliberately vague so as to be able to expand NAM's membership. This unchecked increase in membership is certainly the reason for growing conflicts among the non-aligned countries themselves. It is not surprising that most of the armed conflicts that have occurred since World War II have been between countries which now belong to NAM. The Korean war, Indo-Pak wars, the war between Kampuchea and Vietnam, the Sino-Vietnamese conflict, the Tanzania-Uganda conflict, the Ethiopia-Somalia conflict, the conflict over Western Sahara, and the Iran-Iraq war are classic examples of this. Much to the relief of all, the New Delhi Summit somehow succeeded in adopting compromise formulations on most of these issues. But the Iran-Iraq war proved to be the most intractable problem which loomed large over the Summit until the very last moment and required Mrs Gandhi's personal persuasion to make both the countries agree to the insertion of an innocuous sentence in the form of an appeal to them to end the war. Even then the question of the venue of the Eighth Non-aligned Summit could not be settled—since Baghdad would have been the automatic choice as it was to have hosted the present Summit but could not do so because of its ongoing war with Iran—and it had to be deferred until 1985.

Economic questions, too, loomed large both in the deliberations and in the proclamations of the New Delhi Summit. NAM's new chairperson, Indira Gandhi, setting the tone in her inaugural address, lamented that "in spite of Ottawa, Cancun and Versailles, the dialogue between the developed and the developing (the so-called North-South dialogue) has not even begun". She added that very few in the North realise that the sustained social and economic development of the South is in the interest of the North itself. Asserts the New Delhi Message: "They (the countries of the North) still refuse to recognise that the economic revival of the North is simply not possible without the economic survival of the South." These arguments were also ad-

tion and issued at the end of what was called the South-South consultations in February 1982. Still earlier, in 1981, the same arguments were also expressed by Third World leaders at Cancun.

This approach seems to presume that the developed nations are incapable of seeing for themselves as to where their long-term interests lie and that the South must constantly educate them this. Apparently, the countries of the North can hardly accept such a poor view of themselves. In fact, the North believes that the proposed New International Economic Order (NIEO) is heavily tilted in favour of the South; and that pushed to the wall, they can even think of using their own resources of raw materials and minerals rather than submit to the demands of the South. Additionally, wherever necessary and possible, the countries of the North can also derive advantages from bilateral arrangements with some of the developing countries which keep on seeking assistance all the time from the North-dominated international financial institutions, even while chorusing their demand for a restructuring of these institutions. In view of the apparent economic vulnerability and inner disunity—despite all the show of harmony and unity at the summit—it is hardly possible for the non-aligned to pressurise the developed countries to make the concessions they demand.

The immediate need, therefore, is to overcome this vulnerability and disunity—and this is possible only through increasing South-South cooperation. But the New Delhi Message does not even make a mention of South-South cooperation, although it figured quite a bit in the Summit deliberations. The prospects of such a cooperation are limited in any case. For, many countries of the South are trying to modernise their economies and hence have to lean continuously on the ever-new technology of the industrialised countries. Their large-scale, capital-intensive development plans also depend on Western financial assistance. That being so, it is doubtful how far the countries of the South would be able to forge bonds of cooperation among themselves and use this as a basis of

with the North. Nevertheless, the non-aligned countries have shown a real concern for some of the most immediate economic problems like mounting debts, and hence have rightly called for an immediate convening of a global conference on money and finance.

What then, in the final analysis, is the achievement of the New Delhi Summit? While it is true that the non-aligned declaration succeeded only in concealing the intra-non-aligned differences without achieving anything concrete, it is also a fact that the preservation of at least the apparent unity among the non-aligned ranks and the continued adherence to the principle of consensus was perhaps the maximum that could be achieved in a world full of conflict and discord. Those who tend to exaggerate NAM's internal dissensions should remind themselves that non-alignment is a movement not merely for achieving greater international distributive justice vis-a-vis the developed countries but also for a greater internal cohesion among the developing, non-aligned countries themselves. The road to both the objectives lies in the strengthening of the movement itself.

It is precisely in this sense that Mrs Gandhi's remark—that the non-aligned movement is a continuous process—assumes real significance. The New Delhi Summit is again important on another count: Mrs Gandhi will be NAM's chairperson for the next three years, and this would provide an opportunity for a resuscitation of the original concept of non-alignment as propounded by Jawaharlal Nehru, who always regarded peace as the most important objective of non-alignment.

But the concept of peace itself needs a great deal of reformulation in tune with the demands not only of political independence and economic development but also with the protection of individual freedom. No durable peace is possible if people in about three-fourths of the non-aligned countries suffer under authoritarian regimes and are denied even the minimum distributive justice and personal freedom. Unfortunately, the question of human rights received no attention at the Summit conference simply because it is too sensitive an issue. ■

READING THE RAPID WAY-2

Can you now read 30 type units at one glance after following the instructions given in the first instalment of rapid reading in our March issue? To step it up further, read through our second instalment.

What is the second exercise?

It is the Rapid Rhythmic Reading Exercise.

What is that?

Read the following several times. Each time try to read it a little faster, but without losing its meaning. You will need a watch for this exercise. Try to do it smoothly, grasping a whole phrase with each glance or fixation of the eye, and only three fixations per line. Alright, check the time and begin.

Remember: Go a little faster than what is comfortable.

RAPID

The secret of thinking with questions. The writer's thought must dance. Do I agree? Such questions as we read.

RHYTHMIC

of reading. To read We try but also in our heads. What follows? must be

READING

lies in is to think to follow many questions Is this true? Where next? in our heads

With regular practice we can increase our eye-span. Our eyes move by stops and starts across the page. These fixations or glances are important in reading. You should try to grasp as many words as you can in one fixation. Grasping many words in one fixation is very helpful to both the mind and the eye. The mind gets more meaning and the eye has less work. When you read word-by-word the mind gets less meaning and also the muscles of the eye become tired. Three stops or fixations to a line is sufficient. So remember the less stops for the eyes the better for the mind.

Do this exercise every day for five minutes each time trying to increase your speed as you read. You will need a watch to keep time but push yourself faster and faster along the lines but of course without any loss of meaning. There should be a rhythm in the movement of your eyes. Find the rhythm and increase it as you move down the page absorbing the thought asking questions.

You can become a thinking reader, if you will a faster reader, a skilled reader, It all depends on your determination to practise. Theory without practice is sterile. Practice without theory is blind.

is blind. in the art for five minutes your regular reading. from this exercise

Average time: _____

That's a good exercise. I can see how it would develop a rhythm in my reading if I practised it.

Yes, it is a good exercise, for it forces you to concentrate on meaning. Reading is like batting in cricket. You can't think of anything else but the ball while batting; similarly, you cannot half-read, with half your attention on the book, and half elsewhere. When you read, **READ**. Otherwise, you will be back in the pavilion without scoring.

You had also said you would tell me how to make my own reading machine.

Home-made reading machine

Here is how you can make it. It's practically as good as the foreign machines which are large and expensive.

...comes from the top, cut out a 2 cm window. The window should be wide enough to extend 1 cm beyond the side of the columns of the print on the page of the book with which you will practise. In an ordinary book such a window will frame five or six lines of print. Place the line which you will first read in the middle of the frame. Now start reading. As you read, pull the piece of paper towards you, moving the frame down the page. The lines which you have read will disappear above and new lines will appear at the bottom. Try to keep reading in the middle section of the window. Pull the sheet down at a steady rate so that you are made to read hurriedly in order to keep ahead of it.

I find it a little difficult to concentrate while pulling the sheet down.

Yes, this happens in the beginning. It takes time, practice and effort to give up bad reading habits and learn good ones.

Here's a story with which you can practise.
The Day I Became Lighter Than Air

"Mohinder! Are you still eating? How many times do I have to tell you not to overeat? You'll burst one of these days, then don't blame me. Moreover, you'll miss the bus and be late for school again. Now hurry along or I'll have to come there and throw you out."

"But mother, I've had only six slices of toast. Please let me have more."

"NO! Pick up your satchel and leave, you glutton."

Disgusted with my mother's strictness, I walked to the street on an empty stomach only to see the 8:45 bus whip past me and stop a hundred yards ahead at the bus-stop. Remembering the principal's warning that I'd get the caning of my life if I were late again that week, I broke into a run, but too late. I was about 10 yards from the bus when it pulled away.

Frustrated and annoyed, I uttered the fatal words that brought me the most bizarre adventure of my life. While walking down the street I made the mistake of saying, "Why did God have to make

I could have caught the bus. And now I had to have to walk to school and get a caning for my pains. Instantly, as if in answer to a wish, I began to feel lighter and lighter, until I could practically walk on air. Perplexed and afraid of what was happening to me, I tried to run. I seemed only to float higher up in the air. Suddenly realising my precarious position, I lunged at the railing on the side-walk and thus managed to anchor myself. I found myself upside down, my feet hovering in the air above my head. I clutched frantically at the railing to prevent myself from floating into space and perhaps to another planet. I was now on the horns of a dilemma. If I let go, I would wander into space, but otherwise I could not move an inch. Holding on with my hands, I managed to crawl to a doctor's house a quarter mile down the road. Reaching there, I found the doctor was not in, so I was directed to his office in the middle of the main street.

As I went down the road, pedestrians stared at me every time I let go of the support of walls and pillars and let buoyancy take over the controls. Small boys mocked and jeered at me while grown-ups stood aghast when I flew over their heads and crashed into a brick wall. Battered and breathless, I finally reached the doctor's clinic. The doctor asked an attendant to hold me down while he examined me and asked me questions about what I'd eaten since the day before. I told him the menus mother had prepared and then added that I had eaten a whole loaf of white, home-made bread with several cups of coffee, sugar cubes and cream.

Suddenly the doctor burst into peals of laughter. "You poor greedy boy," he said to me. "You know what you've done? You've made a gas factory inside your stomach by eating too many of those white cubes which look like sugar but are actually yeast tablets. Now for that I have a cure that will bring you down to earth again."

He handed me a medicine glass full of a red mixture that tasted insipid but worked quickly. After about 10 minutes I found that I could once again stand on my feet without floating into space. As parting advice the doctor warned me against overeating. Making my way to school, I presented myself to the principal with my excuse for being late. The answer he gave is a story that I will save for another time.

Mohinder Shah Singh,
Jamshedpur

I think I've now grasped the idea of training the eyes for better reading. I try to have wider eye-spans, fewer re-readings and more speed and rhythm. You said, though, that besides eye training, mind training was another way to rapid reading.

That's right. While all reading experts do not agree on the value of eye training, all of them do agree on mind training. Many feel, too, that if you learn to use your mind better while reading, the eyes will take care of themselves.

(To be continued)

Serialised from WORK EFFICIENCY 1: READING by Work-Oriented General Education Project, Xavier Labour Relations Institute, Jamshedpur

**Make your gums strong.
And give your teeth a long life.**

**Only Forhan's
has an exclusive astringent to
strengthen gums.**

The tingling sensation tells you it's actually working:

Even healthy teeth need the support of strong gums — if gums become weak and spongy, your teeth no longer have a firm foundation. That's why Forhan's is formulated with an exclusive astringent that helps to tighten and

contract the gum tissue. The tingling sensation you feel when you brush your teeth with Forhan's is the astringent at work — making your gums stronger, firmer. So that your teeth stay healthy longer.

So give your teeth a firm foundation — Use Forhan's the toothpaste with an exclusive astringent.

If your gums are weak, even healthy teeth become loose.

Forhan's exclusive astringent tightens gum tissue

making your gums stronger, giving your teeth a long life.

Trust Forhan's It's the toothpaste created by a dentist.

NEWS IN PIX

Stop The Nuclear Arms Race:
The members of the nuclear weapons freeze supporters group from around the US held a peace rally in front of Capitol Hill in early March (above right) to call for a nuclear freeze between the US and USSR. Across the Atlantic (above), anti-nuclear women demonstrators resited a camp outside the US Airbase at Greenham Common, England—where the first NATO cruise missiles are to be deployed—after being evicted from an earlier site around here following a court order. In early April, Greenham Common was one end of a novel 22-km-long human chain, made of tens of thousands of anti-nuclear protestors, linking three nuclear arms centres in the UK. The other two: Aldermaston atomic research centre and Burghfield nuclear arms factory.

Above: Poisoning The Palestinians: Hit by small-arms fire from Israeli troops, a Palestinian woman lies wounded in Sidon, Lebanon. She and other women were protesting outside the Israeli Army H.Q. against the detention of their husbands and sons by the Israeli Army. Back south, in West Bank, it was near-death by poisoning for this nationless people. About 480 Palestinian schoolgirls fell victim to a poison gas reportedly sprayed by Israelis in Jenin district of West Bank, according to the Palestinian news agency, WAFA. Baffled Israeli authorities denied this, though they banned distribution of all Palestinian Arabic newspapers in West Bank and clamped curfew in Jenin. Even as irate Palestinians threw stones at Israeli vehicles, nylon bags containing a yellow powder were discovered in a secondary school in the region which is thought to have caused nausea, headache and fainting, the symptoms shown by the poison victims.

Above: Famine In Ethiopia: Victims of Ethiopia's worst-ever famine anxiously await a relief officer distributing water at a relief camp in Ibenat, Wollo province. The Ethiopian Red Cross in its SOS to the world has appealed for urgent assistance to 1.3 million Ethiopians in the drought-hit provinces of Wollo and Gondar. Meanwhile, an angry row has broken out between the Euro Parliament (EP) and the EEC over EP's recommendation to suspend food and other aids to Ethiopia because of its continued human-rights violation and corruption. EP wants an assurance that food aid will reach the famine-struck, while the EEC Aid Commissioner has rejected the demand. Right: Bombay's First Sikh Mayor: Manmohansingh Harnamsingh Bedi (58) of the Janata Party being cheered by bhangra dancers after becoming Bombay's first Sikh Mayor on April 4. Bedi polled 102 votes, the first time that a mayoral candidate crossed the 100-vote mark, against the 32 secured by his lone Congress (I) opponent, R.M. Dube.

Left: Mirage's Maiden Flight: The French-built Mirage 2000 N—of which India will acquire 40 in fly-away condition at a cost of over Rs 2,500 crores—during its maiden flight in early February. Among its features: maximum take-off weight in air-to-air configuration, with no extra fuel drop tanks, is 19,840 lb; it is fitted with one turbofan engine which develops 19,840 lb thrust with afterburning; its maximum speed is Mach 2.3 and its rate of climb 65,000 feet per minute; its combat radius of action is 400 nautical miles with extra fuel; it has nine points for four air-to-air missiles plus bombs and rockets, the airborne radar it carries has an operating range of 100 km and is capable of detecting targets at all altitudes. This two-seater, all-weather, low-altitude, high-speed-penetration, nuclear attack aircraft also carries inertial platform, head-up display, passive radar warning, ECM and ECCM.

MERCHANT NAVY

BY H. JESSE KOCHAR

Are you one of those who wishes to blaze a new trail? Then find your sea legs and set sail on a merchant vessel to a life where cash is plenty, work hard but satisfying, promotions quick and perks come wrapped in foreign packages.

"Joo-Joo will be two next month," said Rohini Dalpat.

"His father hasn't seen him for over a year now. He keeps on saying Pa-Pa, Pa-Pa all the time." Joo-Joo is her little son.

"Where is Captain Dalpat?"

"His ship is sailing on the Japan-US run, it will be another couple of months before he returns," Rohini lamented.

But I noticed the toy Joo-Joo was playing with was Taiwanese, the coffee-mug I was offered a beverage in was British, the hi-fi set in the sitting room was 'Sanyo', the refrigerator 'Electrolux' and, I suspected, all the clocks—Rohini and

little Joo-Joo wore were also imported.

Thanks to the merchant navy the Dalpats are not only affluent at a very young age (Captain Vishnu Dalpat is 29), they are probably already in India's top five per cent income bracket. Before Joo-Joo was born Rohini used to sail with her husband and saw most of the world during the six voyages she was with her husband on board. But since the birth of the child she is ashore, separated from her husband by the circumstances—a price one has to pay occasionally for the luxury of the navy.

"Does Captain Dalpat like the navy?"

"Oh, he loves it," she replied, and Joo-Joo gave me a 70-mm smile.

The Two Navies

Before we proceed further, it would be proper to clear the difference between the two navies—the Indian Navy (I.N.) and the merchant navy. These are often confused with each other. The I.N. is a part of the defence forces; its training structure, discipline, pay, and career prospects are at par with the IAF and the army. The I.N. ships are basically warships meant primarily to destroy the

enemy. These carry the prefix INS (Indian Naval Ship), viz, INS Vikrant, INS Rajput. By tradition, the land-based units of the I.N. are designated the same way as its ships, for instance, INS India in New Delhi.

Although the uniforms of the merchant naval officers may resemble those of the I.N., the career in the merchant navy is purely commercial. The vessels are designed for carrying either cargo (in bulk carriers) or oil (in tankers) or passengers (in liners), and their names carry the prefix MV (motorised vessel), and in rare cases SS (steam-ship), as MV Vishwabharati and SS Rose Garden. Unlike the I.N. ships, which are almost always grey, the merchant vessels are painted in different hues and they usually display on their funnels the emblem and colours of the company that owns them.

A merchant navy officer has a choice to serve on board a foreign or an Indian ship, and even in that he has a further choice to join a private (viz, Scindia's Jala Gruja, Great Eastern's Jag Jawan and Jag Shakti or Garware's Rishi Agasthi) or a state-owned vessel (viz, Shipping Corporation of India's Jawahar Lal Nehru, Kanchanjunga and Rani Padmini or Mugul Line's Akbar and Noor Jehan). If one were to compare the two navies with aviation as a profession, an I.N. officer would be like an IAF pilot and a merchant naval officer would be close to an Air India pilot. This parallel holds good not only so far as their careers and the way of life are concerned but also in the wages they earn.

The career

The merchant navy offers basically two careers to young men—nautical and engineering, and both fetch approximately the same emoluments and perks. (Sorry ladies! The Indians, unlike the Soviets and the Cubans, haven't opened this profession to women yet.) Both the branches ensure a quick run to the top—a cadet joining either the nautical training on board Training Ship 'Rajendra' or the engineering institute at the DMET (Directorate of Marine Engineering Training) can expect to reach the rank of Captain or Chief Engineer respectively within seven to nine years. This depends on how quickly he clears his

promotion exams and whether he possesses the required sea-service.

It is a matter of pride that Indian officers and crew (sailors) are not only highly competent in their professions, they are also the youngest lot in the world. Their high professional reputation—their Indian qualifications (Second Mate/Third Engineer upwards) are recognised and respected internationally—and discipline has constantly brought them a fair share of jobs on ships flying the flags of almost every maritime country. (The wages given by Indian and foreign companies are given in the *Fact-Sheet*.)

All shipping companies whose ships touch Indian ports have agents in the major ports. When requested, these agents also hire qualified Indian officers and crew for their vessels, give instructions and hand over air-passage to the hired persons.

Some well-known foreign shipping lines operating in India are Hapag-Lloyd and Hansa of West Germany, UK's British-India Lines, USA's President Lines, Holland's Hoogh. Singapore's Neptune Orient and Hong Kong's Bank Line. Many Indian agents represent more than one company.

The current situation

While it is difficult to say exactly how many nautical and engineering cadets will be inducted in the merchant navy in the coming years, both Rajendra and DMET intend to maintain their present annual intake of 250 and 100 cadets respectively. However, this profession depends a great deal on the market forces—on the demand and supply position. When there was a general shortage of officers in India, even holders of Second Mate ticket were being taken as Chief Mate. Same holds good for the engineers. At present there is a bad recession in the shipping industry and jobs (especially in foreign ships) are hard to come by. Officers are known to have accepted posts one rank below in foreign-owned ships. However, the situation in Indian companies is quite satisfactory as far as the vacancies are concerned if one keeps in view the general slump in the trade.

Risk

Contrary to a common notion, life at sea is as safe as in any other job. In fact, more seamen

have died of alcohol and accidents ashore than by the wrath of the elements

Two Sides Of The Coin

Before we hop on to the hard facts of the working life in the merchant navy, the quality of life it offers deserves mention.

Very few professions in this country can boast of a very high salary, allowances, foreign travel and superb duty-free perks at an early age as this career. Not only are the wages higher than, say, the I.N. or the IAS, a large chunk of it is paid in foreign exchange. A job on board a foreign-owned vessel is a bonus in itself because of the higher wages. The career at sea is not only lucrative but also adventurous, provides variety and, above all, gives one a choice of employers and freedom to quit after a two-to-three-year contract. If one gets fed up of the life at sea, there are always the land-lubbers' jobs as harbour pilots, surveyors, shipping executives, port officials and so on. Last but not the least, this is the only job where an officer, after a certain seniority, can carry his family on board.

But all is not rosy and pink in this profession. It has its negative points too. Nearly everyone feels the boredom of long sea voyages which are made worse by waiting at anchorage outside a harbour. Sometimes a ship has to wait for a berth for weeks. Separation from family and long wait for letters is very bugging too. So is the predicament of seeing the same 40-odd faces, eating the same food and tolerating the same smells day in and day out.

But the most dangerous of the 'sea-ailments', perhaps, is the 'too-much-too-soon' phenomenon in the merchant navy. Many an immature officer and sailor have hit the bottle and blown their money on wine, women and song—actually very little on song. This happens with getting too much money suddenly; after all, most of the cadets who only get Rs 500 p.m. as stipend suddenly jump to Rs 2,000 (plus) salary as soon as they qualify as Second Mates. It requires a good upbringing and maturity to hold one's horses.

And yet, with little self-control, hard work and application, this career is a fascinating one—it takes you places, literally and figuratively.

FACT-SHEET

“Yes, the bloke wasn't any good on earth, so he went to the sea.”

You may have often heard many such snide remarks against the lads who make it to the merchant navy. But let's assure you they come from the envious. The 'man in white', as a naval officer is often called, has aplenty in his bag to generate envy: his job takes him around the world, his pockets carry enough cash to be comfortable anywhere, he uses imported goods and he has job satisfaction.

He may serve in any of the two branches of the navy—the nautical or the engineering, depending on his qualifications and aptitude. But a ship's crew is incomplete without the radio and electrical officers, pursers and the sailors.

Nautical or Deck Officers

Nautical officers are responsible for the ship's navigation, loading and unloading of cargo, safety of passengers and crew and the routine maintenance of a vessel. At the top of the shipborne hierarchy is the Captain. The entire crew and the vessel are under his command. Also known as the Master of the vessel, he is a nautical officer and holds the Certificate of Master. Below him, in the nautical hierarchy, are the Chief Officer or Chief Mate, the Second Mate and the Third Mate. The Chief Officer is the right-hand man

The golden rendezvous: Explaining the gyro compass to 'sea urchins' (above); a mariner on the wheel in the wheel-house.

of the Master. On his behalf he looks after almost all the aspects of the ship's operation, navigation and training. The Second and the Third Mates assist the Chief Mate in his day-to-day work.

Engineering

This department is headed by the Chief Engineer who is at par with the Master in rank (he wears four golden stripes on his uniform) but in practice is responsible to the latter on all engineering matters. All shipborne machinery and systems, except the wireless and radar, are his responsibility. Under him he has the Second Engineer, the Third Engineer and the Fourth Engineer. The Electrical Officer also reports directly to the Chief Engineer on matters relating to all electrical systems on board.

Sailors

Sailors, or the crew of a ship, are divided into three professional categories—(a) Deck: They are further subdivided into seamen and quartermasters. The latter steer the ship as ordered. (b) Engineering: Are also subdivided into two categories, firemen and greasers. (c) Saloon: Headed by

the Chief Steward, the cooks and pantrymen form part of the saloon crew. The crew has separate accommodation and kitchen on board.

Other Professions

Besides these, the merchant navy offers jobs as Radio Officers, Electrical Officers, Pursers and Medical Officers. They are hired directly and their maximum qualifications and suitability are determined by the shipping companies. However, the Radio Officers should possess a minimum second class Certificate of Proficiency as Wireless Operator (Radio Telegraphy) issued by the Ministry of Transport and Communications. A majority of Radio and Electrical Officers are ex-I.N. Petty Officers. The Pursers (they keep accounts on board) are usually B.Com./B.A., and they need no professional training. Though their pay-scale rises steadily upto a point, they have no scope for further promotions. The same predicament is faced by the radio and electrical officers. They are all directly responsible to the Master for their respective departments.

Where to apply

Training Ship 'Rajendra' (it used to be 'Dufferin' in the good old days which was scrapped in 1972) in Bombay harbour trains nautical officers in navigation,

loading and discharging of cargo, maintenance of ship, safety of passengers and crew. The engineering officers are trained at DMET in Calcutta and Bombay.

Requirements

(a) Intermediate Science (10+2) with Maths, Physics and Chemistry (those appearing in the final exam may also apply) or (b) First Year exam of a three-year degree course (with the same three subjects as above) or (c) First Year of a five-year integrated Tech./Engineering degree course conducted by a university/IIT or (d) any other equivalent.

Age should not exceed 20 years. (Good news for the Scheduled Caste/Tribe candidates: their age limit is 25 years.) All candidates should be unmarried.

Physical fitness: Particular attention is paid to eyesight, specially for colour blindness.

How to apply

Candidates wishing to join either of these institutes *must* first sit for the IIT-JEE to be eligible for admission. This means they should fulfil the JEE requirements too, which are the same as those given above. They may fill in any course in the JEE application form, choosing out of the courses mentioned in the JEE brochure. The courses offered by Rajendra/DMET will not be mentioned in the JEE brochure—but in the Rajendra/DMET prospectus available from the Directorate General of Shipping, Jahaz Bhawan, Walchand Hirachand Marg, Bombay-400 038. Requests for the prospectus must be accompanied by a four-rupee crossed I.P.O. drawn in favour of Director General of Shipping, payable at G.P.O., Bombay. The prospectus gives many useful details. The admission notice is normally announced in the leading newspapers in January every year.

WHAT THEY ASK

(Some Sample Questions)

1. *English* (100 marks) —Write an essay on 'Aping the Americans' or on 'A day in the life of a pickpocket'.

Make a precis of 425 words.

Fill in the changes as directed: "When I reflect... my misspent youth I feel sorry... my parents (fill in the blanks with appropriate prepositions).

2. *General Knowledge* (50 marks)—What does AITUC stand for?

What is the significance of April 5 or May 1?

Who is the Prime Minister of Spain?

3. *Maths* (100 marks)—The sum of four integers in an AP is 30; their product is 384. Find out the four integers.

Prove that in any triangle ABC $\sin \frac{(A-B)}{2} = \frac{(a-b)}{c} \cos (c/2)$

4. *Physics* (100 marks)—A clock keeps correct time when the length of the pendulum is 1 m. If its length is increased by 1 cm, by how much will the clock gain or lose in a day?

5. *Chemistry* (50 marks)—Calculate the number of neutrons in 7 milligrams of C^{14} .

Admission to Rajendra/DMET is to be sought *after* the candidates have received their registration number for the JEE (for more details see *Career News* in our April issue).

Selection

Candidates for both institutes are selected through a combined written exam (for sample questions see box above) followed by an interview.

Training

RAJENDRA: During the 12-month course starting every year

on September 1, a neat nautical package is offered to the candidate. Moored in Bombay harbour, Rajendra has a first class experienced training staff which works for an all-round development of the cadet. The subjects covered are seamanship, navigation, cargo work, maintenance of ship, ship construction, rowing, sailing, etc. The course costs the cadet a tidy sum of Rs 6,000 approximately.

On passing out from Rajendra, the head of the institute allocates the cadets to various Indian vessels for a two-year 'on job' sea training as deck apprentices. During this period they draw a monthly stipend of Rs 500 approximately.

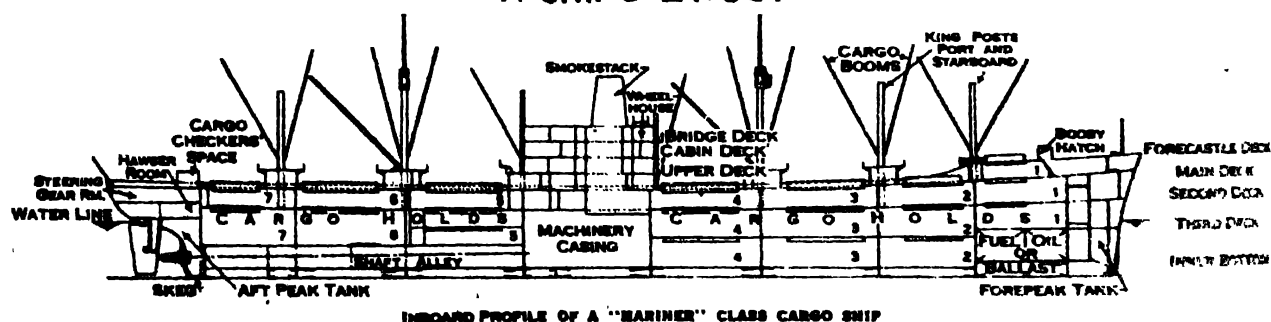

Having completed two years at sea as deck apprentices, he goes ashore to appear in the Second Mate's (foreign going) Certificate of Competency exam conducted by the government. This exam has three parts, viz. written, oral and radar.

Placement and prospects

On clearing this exam—which is the minimum certified deck qualification for an officer in the Indian and Commonwealth merchant navies—he can offer his services as a Third Mate to any Indian or foreign company. A Third Mate, therefore, is actually a Second Mate learning his exact job or, in some cases, a Third Mate is one who has appeared in the Second Mate's exam and is awaiting results or one who may have a portion of the exam left to be cleared.

All further promotions are also strictly by examinations and a good record at sea which is recorded by the Master on an officer's 'Continuous Discharge Certificate' (CDC). A Third Mate does one to two years in this rank before occupying the vacancy of a

A SHIP'S LAYOUT

Second Mate. The Second Mate thereafter can become a Chief Mate only when he passes the Chief Mate's exam.

The last exam is the Masters exam to be cleared by the Chief Mate. Nautical officers thus have three exams to clear during their entire career at sea - Second Mate, Chief Mate and Master (in that order). It normally takes five to seven years' service for a Third Mate/Fourth Engineer to become Master/Chief Engineer.

DMET. The technical training lasts four years - the cadet may be trained in either the Bombay branch or the main institute at Calcutta. The subjects include hand/machine tools, workshop technology, etc. During the first year the cadet gets practical training in DMET's power house, besides other training routines.

During the second and third years he is attached to marine workshops and learns repairs, overhauling and maintenance. The fees for the course is the same as in Rajendra - about Rs 6,000 per year.

On completion of this course, the ex-DMET cadet is sent for further training to an Indian vessel as Watch-keeping Engineer. He now pockets a monthly stipend of Rs 500 p.m. approximately. After completing 365 actual sailing days (ship in harbour is not counted) as Watch-keeping Engineer, he appears for a Ministry of Transport and Shipping (MOT) exam.

Placement and prospects

Having passed MOT, he goes back to sea as Fourth Engineer - at this stage he can choose his own vessel, Indian or foreign. He must serve as Fourth Engineer for one

to two years before he gets his next rank - Third Engineer. Therefore, a MOT certificate eventually qualifies a person for Third Engineer. He now has to clear the Chief Engineer's exam as Third Engineer. But this does not make him a Chief Engineer straightaway. He has to do one to two years as Second Engineer before becoming one. An engineering officer ultimately has to clear only two exams as compared to his nautical counterpart who clears three. Besides, he too has to keep in mind the CDC.

Promotions are not time bound - a person can take one's own time in clearing the exams. Same holds good for the nautical officer too. (Pay-scales on page 23)

Direct entry

From time to time, when a shortage of officers is envisaged, various shipping companies induct cadets directly on board their ships both in the nautical and engineering branches. These vacancies are rarely advertised - in any case each company does it separately.

The nautical cadets have to undergo three years 'on job' training at sea before the government allows them to take the Second Mate's exam. This is done to compensate for the lack of basic theoretical training. However, at present there is no direct intake because of the glut in the market.

In the case of engineering officers, candidates with B.E. who do eight months attachment with naval dockyards in Bombay, Calcutta, Visakhapatnam or Cochin, are taken direct on board the Indian vessels as Watch-keeping Engineers. But unlike ex-DMET officers they have to pass an extra MOT exam. Persons with B.E. degrees may write to Personnel Officers of the Mazagaon Docks in Bombay, Garden Reach Workshop in Calcutta, Cochin Shipyard in Cochin and Vizag Shipyard in Visakhapatnam for further details.

Pay and allowances

From time to time the pay and allowances of the merchant navy are revised under an agreement between the Maritime Union of India (MUI) and the Indian National Shipowners Association (INSA). The agreement stipulates the minimum guaranteed wages for employment on board the vessels

A DAY IN HARBOUR

Nothing much happens at sea except an occasional sighting of a merchant vessel, a warship or a boat in the shallow waters. The monotony is sometimes broken by a storm or rough seas. Life at sea is spent in 'watches' - the nautical officers keep their watches on the ship's bridge while the engineers do the same in the engine room.

It is in the harbour that a ship comes to life. We shall describe here the actual events on board a vessel that has berthed in the port of Bremen, West Germany. Incidentally, in every port the entry and exit of a ship is not handled by the Captain, it is done by the Harbour Pilot of that particular port. The following activity takes place on board when the ship has settled alongside a wharf in the port of Bremen:

- Customs officials board the vessel. They inspect the ship's documents, look for suspicious cargo and also go through what the personnel have to declare on their possession.
- The port health authority inspects the ship; it ensures that the personnel have been properly vaccinated and inoculated.
- Cargo supervisor of the port and the ship's local agent pay a visit. They inspect the cargo in

the ship's holds and then plan the loading and unloading schedule with the Captain and the Chief Mate.

- Surveyors are called in if, on inspection, any cargo is found to have suffered damage during the voyage or has become defective because it was stored improperly.
- Unloading and loading work starts with the Chief Officer as in-charge of this task. He is assisted by the junior nautical officers. Cadets use this time to learn practical cargo work.
- The Engineering Officer utilises this time for any machinery repairs, for cooling the engines and for fuelling the vessel for onward voyage.
- The Purser, in the meanwhile, goes ashore and collects German Marks for disbursement to the personnel and for any local purchase authorised by the Captain.
- The Chief Steward goes ashore and shops for fresh provisions required for the ship in harbour and for stocking up for sea.
- The nautical officers, the engineers and the crew take turns to visit the town. This normally includes a sumptuous meal in a restaurant, a visit to pubs, sightseeing and a binge at an exciting night-club.

flying the Indian flag.

The pay and allowances for both nautical and engineering officers are the same, but in order to make the Chief Engineer slightly lower in stature than the Master the basic pay of all engineer officers is Rs 100 less than their nautical counterparts. The wage figures given alongside have been obtained from the office of a Bombay-based private shipping company. These show the current pay and allowances of officers.

| Rank | Basic Pay
(Rs p m.) | Allowances | Current Net
Wages On
Foreign
Vessels (in
US dollars) |
|----------------------------|------------------------|-------------------------|--|
| Master/Chief Engineer | 3,510-
6,040 | Nearly same
as basic | 3,000-
4,500 |
| Chief Mate/Second Engineer | 2,660-
3,100 | —do— | 2,000-
2,500 |
| Second Mate/Third Engineer | 2,025-
2,205 | —do— | 1,300-
1,500 |
| Third Mate/Fourth Engineer | 1,690-
1,855 | —do— | 1,000-
1,200 |

Note. Deduct Rs 100 for all engineering ranks

MARINERS IN THE MAKING

The alarm has been sounded on the bridge of the SS Susan, a modern container freighter. Her rudder is out of action and the engine can no longer be brought to a halt. Her 32,000 tons, travelling at 15.7 knots, crash into the red sandstone of Heligoland, an island in the German Bight.

The bridge lurches alarmingly. Captain and officers are sent spinning. But no one is injured or as much as gets wet. It all takes place on dry land in Hamburg, Federal Republic of Germany, where the Susan (SS stands for ship's simulator) is attached to the nautical college. Introduced last winter, trainee nautical officers are put through their paces right there in the lecture theatre.

It is all simulation, of course.

The makings of a Poseidon Adventure—on land. At the controls of SS Susan in Hamburg port

The ship's bridge is mounted on a hydraulic system that simulates a ship's movements. The bridge is equipped with the most up-to-date equipment: mechanical telegraphy to run the engine, an automatic pilot to keep an eye on the course, radar for navigational control and to prevent collisions, radio navigation for positioning, radio telephones and a fog horn.

Two hundred students are trained each semester on board the SS Susan. Captains, nautical officers and pilots undergo in-service training using the latest in computer facilities.

Foreign exchange and other privileges

Every officer and crew of the merchant navy working on board a vessel which is carrying foreign cargo is entitled to draw 75 per cent of his net earnings in foreign exchange. This is a major privilege and a vital perk of this profession. Besides the foreign currency, imported liquor, cigarettes, canned foods, cosmetics, etc are available on board duty-free. This facility adds, though artificially, to the actual wages.

In addition to the hefty pay and allowances, both officers and the crew receive free meals on board. They are also entitled to a four-month leave every year. And lastly, a few officers on board are also entitled to take their wives on board during the voyages.

Employment in foreign companies

Emoluments are much higher in foreign companies, specially in the vessels belonging to the West European, US and Gulf countries and those flying the flag of convenience. A word about the flag of convenience: these are the ships conveniently registered in Liberia, Panama or Hong Kong where shipping laws are absolutely loose and no one cares a tuppence if the ship is seaworthy. This saves the ship-owners a great deal of money. Their old rickety ships earn handsomely, and they in turn pay well to the officers and the crew for risking their lives.

However, three major factors confront and bother the persons who opt for highly-paid jobs on board such vessels: (a) the ship can be involved in a hanky-panky business—drugs, gun-running, etc; (b) the company or its agent may sometimes cheat on wages.

ing coffin. Many such ships split into two in severely rough seas. However, the genuine foreign shipping companies too pay a good salary, which may be lower than what is given by the ones just discussed but is much higher than what is offered by their Indian counterparts.

At present there is no bar on the Indian officers and sailors to seek jobs on board foreign vessels, but there exists a provision in the law

which, at any time when the Indian ships are short of personnel, can clamp a ban on this privilege. Fortunately for Indian shipping, the Taiwanese, Bangladeshi and Thai seamen have flooded the international market and thus reduced the chances of the Indian seamen on foreign vessels.

So, if you think you have the sea legs to sail the high seas and the necessary requirements, there's a whole new world waiting for you out there.

THE ACHIEVERS

Chief Mate Baveja: Sea-lord at 25.

He has just crossed 25 and is already a Chief Mate in the navy; U.P.S. Baveja from New Delhi will soon be a Master.

Eight years ago, having passed the Higher Secondary exam with Physics, Chemistry and Maths, Baveja had just switched to B.Com. in college, when a relative told him that A.P.J. Shipping Line was looking for direct entry cadets.

Baveja grabbed the opportunity and applied for the job. With a combination of confidence, good academic record, luck and right connections he passed the tests. It changed his life completely—soon he was a cadet on board a ship.

But his life on board was no cake-walk—Baveja had to compete with cadets from Rajendra,

he had no maritime background, he was a 'raw hand' at sea. But he pressed on and devoted 16 to 18 hours every day to catch up on his nautical knowledge. Baveja was also lucky to hop from one A.P.J. vessel to another. This gave him tremendous experience in a variety of ships plying in different parts of the world.

Having completed his mandatory three years sea-training (ex-Rajendra did only two years), Baveja came ashore and checked in at the Royal Seamen's Club, Bombay. Once again he plunged himself into studies—this time to pass the Second Mate's certificate (the basic certificate of competency for a nautical officer). This was in 1977 when the examination results were as low as 20 per cent. Baveja faced tough competition but he cleared both the written and the orals in his first attempt.

He spent a few months as Second Mate with the A.P.J. Line and then decided to sign in with a foreign shipping company. London-based Sea Containers accepted him on board their vessel on the UK-US run. His salary was \$1,200 p.m. (Rs 12,000). Did they treat him well? "I had a British Captain; he was one of those 'sea-dogs' who only care for hard work and results, not the colour of the skin. I gave him my best and gained his respect," Baveja recalled.

The Captain wrote an excellent report on Baveja's CDC, which is a valuable document for all seamen; it records their employment and assessment of work.

For 18 months Baveja was with the Sea Containers, the minimum

sea-time a second mate requires to appear for the Chief Mate's ticket. Once again he was back in Bombay. It was early '81. Now he passed the Chief Mate's examination, once again in the first attempt. Sea Containers called him back for another stint, this time at a higher salary of \$1,520 p.m. and Baveja sailed on for another one-year contract.

We met him recently in Bombay. He now wants to complete his 18-month sea-time as Chief Officer so that he can appear for the Master's ticket. His 12-month contract with Sea Containers is over and he will now have to choose another vessel for the remaining six months.

Does he think he'll clear the Master's in one attempt?

"Yes, why not?" Baveja replied. If he does that, he will be a Master at the young age of 26 which, though not a record, would make him one of the youngest competent Masters in the world.

What about his future plans? Surprisingly, Baveja wants to 'retire' in five to seven years time. He wants to get married and 'settle down' in business. "Of course, whenever I get fed up of land I would always come back to the sea," he said.

Baveja is well aware that a Master's ticket in his pocket is his passport to a well-paid job.

GRANNY IN SHIP-SHAPE

"What's a granny doing in the boss' chair?" a stranger may ask on entering the spick and span office of the Chairman, Scindia Steam Navigation Co, Bombay. The person who occupies that chair is in fact a Chairwoman—Sumati Morarjee who celebrated her 74th birthday two months back. Surrounded by a galaxy of deities, ubiquitous *dhoop*, two enormous statues of *apsaras* and photographs of the three Gandhis—the Mahatma, the Prime Minister and the MP, she was busy going through a sheaf of international press clippings when I was ushered into her office.

I had been politely warned that the grand old lady may not be in the best of moods. After all, the recession in the shipping trade has been causing innumerable problems to the company. But I was in for a pleasant surprise. Not only was Sumati Morarjee utterly charming, she talked enthusiastically throughout without paying attention to the clock.

"Madam, your company employs hundreds of naval officers and cadets. What is your idea of an ideal sea-going officer?"

"I may sound a bit old-fashioned but let me tell you I sometimes miss the sailors of the good old days. Mind you, our boys are still one of the best sailing anywhere in the world but too much money and quick promotions have taken away the magic from the profession..."

"But what are you looking for in a naval officer?"

"I'll say I am looking for first-rate professionals—but merely knowing the latest in engines or satellite navigation can't produce an ideal naval officer. Experience, a nose for the mystery of the seas, a nose that predicts storms and winds—that counts. Just by putting on four gold stripes on the uniform at the young age of 30 or 32, one doesn't become a seasoned officer. I feel experience at sea is a must, there is no substitute for it whether you are in the engine room or on the bridge," she said.

"Would you say Rajendra and DMET are delivering the goods?" I switched gears.

"I think," she answered, "both Rajendra and DMET have produced better boys before. They are capable of doing so in the future. I guess due to some constraints both these institutions have hurried the cadets through their training. However, the Scindia has done its best to solidify this training when selected cadets report to us for two years sea-time on board our vessels. I am sure Rajendra and DMET get the feedback from various shipping companies and they act upon the deficiencies in the training."

"What about the direct entry cadets?"

"Oh yes, we used to take 20 direct entry cadets every year in the Scindia (in addition to the Rajendra boys) but we stopped

Scindia Chairwoman Mrs Morarjee: Shipping success.

that two years ago. Recession, you know, we aren't expanding."

"Do you provide jobs ashore for the naval officers?"

"Yes, we do. We have placed them in various management jobs, not only in India but overseas too—we have several offices abroad. Our experience shows that our sea-going officers (those who have stuck to Scindia through thick and thin) have made good managers because of their long association with our operations as compared to the 'outsiders'," she explained.

The lady has a point there—the old sea-dogs who wanted a stint ashore as managers and marine superintendents have not done badly in the Scindia. Sumati Morarjee, as her reputation goes, has an uncanny sense of picking the right naval officers for the right slots in her company: she has after all sailed the oceans on various Scindia ships. Just recently she was in London for some work; instead of flying back to India she decided to dash across to Genoa, and there she surprised the Captain of one of her vessels berthed in the port. From Genoa she sailed on board through the Straits of Messina to Suez. Trips such as this one give her a first hand knowledge of the capabilities of her officers and sailors (total number of officers at sea including reserves is 1,000), the life they lead on board, the

state of the ships' equipment, the conditions and trends in various ports and the feel of the trade itself—a lesson for many a later-day businessmen-turned-shipping magnates (and also IAS boys) who head shipping companies and believe in paying only ceremonial visits to the men at sea.

Being the daughter-in-law of India's great captain of the shipping industry, the late Narottam Morarjee, she has sailed all the seas, passed through all the major canals and straits and has experienced the magic of navigation through the fjords of Norway and the locks of Canada, where ships are sailed 'uphill' from sea-level to mountain heights.

"What are the basic problems of the officers and sailors at sea?"

"Boredom is one," she replied, "and the separation from their families, specially their long wait for letters, is another." Like a loving granny Sumati Morarjee does her best to bring cheer to the ships' crew: she has tied rakhi on officers and sailors in Karachi; on another occasion she performed Diwali Puja on board her vessel at Rotterdam. She also makes it a point to check that Scindia's offices/agents abroad give the best to the visiting seamen.

"What's the future of officers in the merchant navy?"

"For the moment my fingers are crossed..."

"Why?" I cut in.

"The shipping trade is going through a bad patch these days. Too many ships are chasing a limited international cargo, and moreover there is a shift towards the 'container' ships, traditional cargo liners are not much in demand. Therefore, companies like the Scindia which has over 40 ships (each has 20 officers) of various sizes and did not opt for 'containerisation', are bound to be adversely affected. Let us hope it will change. Navy men will be in demand again when the trade picks up. In Scindia we are trying to absorb officers ashore instead of sending them away," she assured.

There was confidence in her statement. For Sumati Morarjee this is not the first occasion she has faced rough trade winds. After all it is her love for challenge that brought her a Padma Vibhushan in 1971. □

OSCARS FOR GANDHI

"MY LIFE IS MY MESSAGE," said the Mahatma. And this is what Sir Richard Attenborough has sought to depict in his film on Gandhi - and succeeded, one can say, going by the standing ovation peoples all over the world have given this film. To all this were added on April 12 the most coveted awards in the cine world - eight Oscars.

Apart from Attenborough who received two Oscars for BEST PICTURE and BEST DIRECTOR, the others who brought glory to 'Gandhi' are: Ben Kingsley (his first film) for BEST ACTOR; Bhanu Athaiya (first Indian to win the award) and John Mollo for BEST COSTUME DESIGN; Stuart Craig, Bob Laing and Michael Scirton (set design) for BEST ART DIRECTION; Billy Williams and Ronnie Taylor for BEST CINEMATOGRAPHY; John Bloom for BEST EDITING and John Briley for BEST ORIGINAL SCREENPLAY.

The \$ 22-million 3 hr-18 min 'Gandhi' won the eight Oscars against stiff international competition. Among the other Oscar winners - BEST ACTRESS: Meryl Streep for 'Sophie's Choice'; BEST SUPPORTING ACTOR: Louis Gossett Jr for 'An Officer And A Gentleman'; BEST SUPPORTING ACTRESS: Jessica Lange for 'Tootsie'; BEST MAKE-UP: Michele Burke for 'Quest For Fire'; BEST FOREIGN FILM: Spain's 'Volver A Empezar' (To Begin Again); BEST ANIMATED SHORT: Z. Rybczynski's 'Tango'; BEST LIVE-ACTION SHORT: C. Oestreicher's 'A Shocking Accident'; SOUND EFFECTS EDITING: Charles Campell and Ben Burtt for 'E.T.: The Extra Terrestrial'; ORIGINAL SCORE: John Williams for 'E.T.'; ADAPTED SCORE: Henry Mancini, Leslie Bricusse for 'Victor/Victoria'; DOCUMENTARY FEATURE: John Zaritsky's 'Just Another Missing Kid'; DOCUMENTARY SHORT: Edward Le Lorrain and Terry Nash's 'If You Love This Planet'; SOUND: Robert Knudson, Robert Glass, Don Digirolamo and Gene Cantamessa for 'E.T.'; VISUAL EFFECTS: Carlo Rambaldi, Dennis Murrean and Kenneth F. Smith for 'E.T.'; ORIGINAL SONG: 'Up Where We Belong' from 'An Officer And A

Gentleman' by Jack Nitzsche, Buffy Sainte-Marie and Will Jennings; BEST SCREENPLAY ADAPTED FROM ANOTHER MEDIUM: Costa-Gavras and Donald Steward for 'Missing'.

To an estimated 400 million people in a record 74 countries watching the Oscar presentations, the eight awards to 'Gandhi' seemed a marvellous mandate for the message of a marvellous man. And it apparently threw to the winds the misgivings of a select few that Gandhi in the movie could never capture the inner and outer odyssey of Gandhi (the man)".

Misgivings in certain quarters had taken the form of opposition - some vocal, some literary. A few so-called Indian intellectuals complained that 'Gandhi' was replete with historical inaccuracies - like the toning down of the role of Jinnah. There were others who labelled the film: "Gandhi, holy humbug." There was some praise too, though guarded. Jan Myrdal, son of Nobel Peace Prize-winner Alva Myrdal, exhorted his readers: "See the film consciously, do not swallow it, do not condemn it, think."

Beyond the pale of intellectual interjections, Gandhi, to the man on the street, was Christ resurrected; to a world hovering on the brink of a nuclear war, Gandhi symbolised all that was good and non-violent - and peaceful. Not surprisingly, Dickie's 20-year-old dream-come-true, Gandhi was a runaway success wherever it was screened - and changed the lives of many who saw it.

Yet, there is no change in life, no respite from apartheid, for blacks and coloureds in South Africa, whose government plans to screen 'Gandhi' in segregated theatres. It was from here, 90 years ago, that the young barrister Gandhi - muttering "but I have a ticket, a first class ticket" to white South Africans objecting to his travelling in a first class railway compartment - started a crusade against racism. Yes, Gandhi is a "holy humbug" for South Africa. ■

KNOW YOUR CONSTITUTION

Elections, Official Language, Emergency...

SERVICES UNDER THE UNION AND THE STATES:

(Art 308-323): Persons who are members of the civil service of the Union or the civil service of a State or are holders of civil posts cannot be removed or dismissed by an authority subordinate to that by which they were appointed. Further no person can be dismissed or removed or reduced in rank except after an inquiry in which the person is informed of the charges and given a reasonable opportunity of being heard in respect of the charges (Art 311). The Parliament, on a resolution passed by a two-thirds majority of the members present and voting, may create a new All-India Service (Art 312).

Administrative Tribunals (Art. 323A) may be set up for adjudication of disputes and complaints relating to the recruitment and conditions of service of persons in service of the Union or a State (see *CCTimes*, March '83: Administration of Justice).

Public Service: There is a Public Service Commission for the Union and for each of the States. The Commission must be consulted on all matters relating to methods of recruitment, on the principles in making appointments, promotions and transfers, on all disciplinary matters and on any claims or awards. These functions can be extended by law. The Commissions are required to present annually to the President or the Governor of the State a report of the work done by the Commission (Art. 315-323).

ELECTIONS: All elections are directed and controlled by an Election Commission whose head is the Chief Election Commissioner appointed by the President. All elections to the Lok Sabha and to the Legislative Assemblies of the States are on the basis of adult suffrage (Art. 324-329). Seats are reserved in the Lok Sabha and the Legislative Assemblies of the States for the Scheduled

Castes and Tribes and provision may be made for seats to be reserved for the Anglo-Indian community. These special provisions are to have effect for 40 years from the commencement of the Constitution (Art. 330-334).

OFFICIAL LANGUAGE: (Art 343-351). The official language of India is Hindi in the Devnagri script and the form of numerals for official purposes shall be the international form of Roman numerals. English, which was originally to continue as the official language till January 26, 1965, shall, under the Official Languages Act, 1963, continue in addition to Hindi.

The language to be used in the Supreme Court and in the High Courts and for Acts, Bills, etc., is English.

EMERGENCY: (Art. 352-360). If the President is satisfied after having received the decision of the Union Cabinet in writing, that a grave emergency exists whereby the security of India or any part of the territory thereof is threatened by war, or external aggression, or armed rebellion or that there is an imminent danger thereof, he may by proclamation make a declaration to that effect. By the 42nd Constitutional Amendment the President is now enabled to make a proclamation of Emergency not only in respect of the whole of India but also in respect of a part of the country or, as the case may be, to restrict the proclamation of Emergency made in respect of the whole of India to a part of the country. A proclamation may be revoked or varied by a subsequent proclamation. The declaration shall operate only for a period of one month unless before that it has been approved by resolution of both Houses of Parliament. The resolution of both Houses of Parliament can extend the period of Emergency for six months at one time, provided such a resolution has been passed by two-third majority of the members present

and voting in each House. One-tenth of the total number of members of the Lok Sabha have the right to convene the Lok Sabha sitting for purposes of disapproving or discontinuing Emergency. The President is empowered to make more than one Declarations of Emergency on separate grounds and the declarations can operate simultaneously (Art. 352).

Effect of Proclamation of Emergency: While a proclamation of Emergency is in operation, (1) the executive power of the Union is extended to giving directions to a State or where the proclamation of Emergency is in force only in a part of the country, to any other State other than the State in which Emergency is in force, if the security of the country or any part thereof is threatened by activities in or in relation to the part of the country in which the Emergency is in force; as to the manner in which its executive power is to be exercised and also to make laws with respect to any matter including conferring powers and imposing duties upon the Union or officers and authorities; (2) similarly, Parliament is empowered to legislate in respect of items contained in the State List of Schedule Seven of the Constitution, (3) the President may make modifications and exceptions as far as the distribution of revenues under the Constitution is concerned (see April '83 issue, Finance, Property, Contracts, Suits, Art. 268-279), (4) the Fundamental Rights under Art. 19 shall be suspended and it will be competent for the State to make laws and to take executive action which the State would have otherwise been incompetent to make or take because of Art. 19 (the law, to the extent of the incompetency ceasing to have effect after the Proclamation ceases to operate); (5) empower the President by order to declare that the right to move a Court for the enforcement of such of the Funda-

HOW TO TAKE NOTES-1

BY YASMEEN LUKMANI

Taking down study-notes is an important part of any exam preparation, be it the high school, college or Civil Services exam. But to get maximum benefit from them, they have to be prepared in a highly systematic manner—making notes too is an art. From this issue, we begin a series of articles explaining in detail the various methods of making notes.

One of the crucial factors in academic success is the ability to make notes from material that has been read for different courses. It is not enough, as you are probably aware, merely to read and absorb. Reading is a more active skill than that. The reading process involves an analysis of the material, breaking it down into its component points, in order to see its structure and understand the author's viewpoint. To perform this analysis adequately, the reader must take the trouble to actually write down the relevant ideas. It is only then that he will clearly observe the interrelationships between ideas, the overall focus, and be able to view the piece of writing in perspective. Moreover, the act of isolating the important points makes the structure of the piece clearer and easier to remember.

It is necessary to distinguish between three related forms of summarisation: (i) summary, (ii) precis, (iii) notes. A summary sums up the main ideas of a passage in connected prose. There is no rigid restriction on length. A precis is a more rigorous form of the summary in that it reduces the passage to about 1/3rd its length and uses correspondingly condensed forms of language. Notes are the skeletons on which the summary and precis are written. There are different types of notes, depending on the

The author, who is English Studies Officer at The British Council, organises English Language teaching programmes for university and school teachers.

purpose of the notes, the type of information sought and the mode of recording this information (verbal and non-verbal: diagrammatic, tabular means). They are not necessarily written in complete sentences; abbreviations and contractions are liberally used.

The writing of notes is seen as the first step towards writing a connected summary or a precis. Notes are best written in point form, for this forces one to isolate the idea that is being expressed from among other subsidiary information. When all the points emerge clearly, the structure of the piece lies bared, and can be grasped readily. The points now have to be graded in terms of their importance, so that the major ideas stand out as distinct from the minor ones. Examples which can form a part of the notes, have to be clearly signalled as examples, and not be confused with ideas. The connection between the ideas must also be clearly indicated,

whether by the use of headings or transitional words such as *however, therefore, because*, etc. Thus, the writing of notes requires the use of both linguistic and non-linguistic faculties.

The non-linguistic faculty involves the identification of ideas and their relative importance, while the linguistic ability enables the ideas and their interrelationships to be expressed. Part of the lure of guide-books is that major ideas are underlined and many headings and sub-headings are provided. Note-making draws on these features and helps to pinpoint ideas. It also provides an outline which becomes both an aid to the memory and a means of establishing contacts with other material that may have been read.

The aim of this series of 12 articles will be to develop the skill to isolate relevant ideas in passages, to measure their relative importance and to express this in appropriate language. Guided

practice will be given in the art of writing suitable notes. The guidance will gradually taper off in succeeding issues, till the reader is expected to perform the task adequately on his own. Each instalment will, in addition, carry a discussion of some of the features important in note-making.

Exercise 1: Now read the following passage and look at the two stages of notes provided.

Clues to Nature of Emotions: New Brain Chemicals

The discovery of a surprising similarity between substances produced by the human brain and by the opium poppy has opened up a new realm of body chemistry, offering clues to the nature of pain, pleasure, the emotions, and perhaps, such matters as epilepsy, drug addiction and mental illness. The brain and the body's master glands, the pituitary, are now seen to make their own natural substances that appear to act like morphine.

During the last two years a whole new family of such substances has been identified. They are called endorphins, a coined word meaning 'the morphine within'. The discovered chemicals have even led to a theory that could explain the observed effectiveness of acupuncture. Supported by some experiments at the University of Virginia in Charlottesville, the theory is that stimulation by acupuncture needles prompts nerve cells to produce extra amounts of the natural opiate-like chemicals, and thus has the same effect as an injection of pain-killer.

Similar reasoning has led to several hypotheses that lie on the borderline between philosophy and science. Perhaps, for example, the stoic who withstands torture is simply a person endowed genetically with unusually copious production of natural pain-killers. Perhaps the person susceptible to drug addiction is one born with a natural deficit of the chemicals.

Seldom has an incipient field of biological research stirred such widespread excitement so swiftly. The newly-discovered chemicals are at once clues and tools through which scientists hope to bring whole new vistas of brain function into focus.

I At first reading, we may make the following notes on the basis of the text:

1. New discovery of great potential in biology. This offers clues to the nature of pain, pleasure, the emotions, physical and mental illness.
 2. Brain plus body's master glands, the pituitary, make own natural substance that appears to act like morphine, e.g., like the poppy.
 3. Entirely new family of such substances identified and called endorphins.
 4. This chemical offers explanation for effectiveness of acupuncture.
 5. Borderline between philosophy and science: stoic who withstands torture perhaps genetically endowed with natural pain-killers.
 6. Scientists hope to bring new vistas of brain function into focus through endorphin.
- II After the first stage is complete it becomes possible to structure the notes in order to get a clear idea of the passage. This is one way of doing it:
1. The event. A new discovery: opiate-like chemicals being produced by the brain.
 2. Nature of the chemicals:
 - (i) an entirely new family of chemicals
 - (ii) produced by the brain, and (the body's master gland),* the pituitary,
 - (iii) called endorphin
 - (iv) similar to the substances produced by the opium poppy and also those produced under acupuncture.
 3. Use: offers clues to the nature of pleasure, pain, the emotions, physical and mental illness.
 4. Effects of the discovery:
 - (i) on world view: If human emotions are controlled by the extent of the endorphins produced in the system, then notions of traditional morality have to change, e.g., a stoic may not necessarily be a 'good' person nor a drug-addict a bad person.
 - (ii) on science: Scientists hope to bring new vistas of brain function into focus through the study of the endorphin.

*Can be omitted by someone who knows what the pituitary gland is.

Comments

Notice the difference between the first set of notes and the second. In Notes I, ideas are taken directly from the passage with practically no reordering. Notes II are broken into seven points and Notes II into only four. This reduction is due to a recombination of ideas into a more logical structure. The logic of connected writing and that of notes is not always identical. Notes are concerned with the logic of the argument or information, whereas writing may wish to arouse the emotions or change our attitudes, etc. There may also be some amount of repetition in connected prose; the notion of a beginning and end has no place in notes.

Secondly, observe that in Notes II, a considerable amount of generalisation is introduced. The headings of Notes II do not occur in the text, nor does the first part of 4 (i). The headings are actually abstractions which are based on the ideas contained in the passage. The first part of 4 (i) is, on the other hand, a generalisation based on an example. If note-making involves isolation of ideas, general statements are necessary and we have to learn to draw them.

Thirdly, notice that by looking at just the headings of the 4 points in Notes II, you get a clear picture of the structure of the passage. Then by reading the notes themselves, you get the content.

Fourthly, observe that it has been necessary to introduce an initial heading *The event*, which doesn't occur anywhere in the text. No situation has been mentioned in which an event can take place, but there is a situation—the world in the present time, and this discovery is taken to be an event which occurs within it. If 'A new discovery' had been made the heading instead, it would have been at a different level of generality from *Nature, Use, Effects*.

Practice in doing this exercise on short passages will develop your flexibility in looking at larger pieces of text, isolating and tabulating information. This will enable you to approach your assigned reading with the confidence that you can understand and remember it, provided you take the trouble to learn how to make notes adequately, and continue to develop the habit as you go along.

(To be continued)

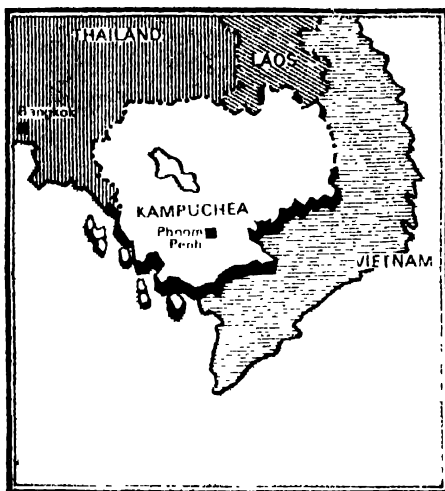

BACKGROUND KAMPUCHEA

BY N V SUBRAMANIAN

Once in a while, Kampuchea figures prominently in the world press: either when the UN is holding sessions over the crisis gripping that country or when in a movement like NAM (Non-aligned Movement) it becomes an issue of serious contention. This inconsistency of the press has naturally led to a viewing of the Kampuchean problem on the basis of events of the immediate past; which is not the right approach.

Kampuchea's present woes stem from the year 1970, when Prince Norodom Sihanouk was overthrown by one of his very loyal lieutenants, Marshal Lon Nol, with the US backing. Sihanouk had kept Kampuchea stable and neutral for 25 years by doing an amazing tightrope act between the two super-powers. Still, being locked geographically with Vietnam on the east, it was drawn, albeit reluctantly, into the Vietnam war. The results were disastrous. Sihanouk was overthrown, the US was sucked into Kampuchea, a five-year civil war began; and there occurred a sea change in Kampuchea's political sphere. US imperialism and Lon Nol proved to be the rallying points for the hitherto dispersed Kampuchean dissidents of all hues. The Khmer Rouge, a left-wing group much persecuted by Sihanouk before 1970, joined hands with the Prince—now in exile in China and operating as Head of State of the Royal Government of National Union (RGNU)—and an assortment of anti-Nol factions. Communist North Vietnam played an active part in opposing the US in Kampuchea till the mid-'73s, and helped build the Khmer Rouge into a 60,000-80,000-strong battle-hardened force.

After '73, China took North Vietnam's place, started cultivating the Khmer Rouge, and almost dropped Sihanouk, to whom it had earlier given unstinted support. And in 1975, a virulently anti-Hanoi Khmer Rouge assumed power in Phnom Penh and presided over a ravaged and bomb-strewn wasteland which was once a prosperous Kampuchea. Between 1970-75, the US undertook the big-

gest aerial bombing of Kampuchea in history and the civil war left over 1,00,000 people dead and the largest number of refugees in Indochina.

To war-scarred Kampucheans the change from the Lon Nol regime to that of the Khmer Rouge seemed welcome at first; within days, all that was proved wrong. In a systematic extermination campaign between 1975-78, the Khmer Rouge, under its most radical leader Pol Pot, killed 3,00,000 Kampuchean men and women in an attempt to force on them radical ideological changes they deemed necessary, and which its members had learnt as misguided Marxists in Paris in the 1950s; under Pol Pot's theoretician Khieu Samphan, all of Kampuchea's cities and towns were depopulated and the people sent back to clear the jungles, forests and scrubs which covered half the country. Enforced hardships of this kind were the order of the day. Kampucheans, fleeing from the massacre, flocked into Vietnam and Thailand. China tacitly approved of Khmer Rouge's doings and continued to arm it.

While Khmer Rouge's Kampuchea maintained international isolation, sensational changes were taking place beyond its borders. The US was routed in Vietnam and the Soviet Union filled the vacuum left by the American withdrawal from Indochina. Vietnam's relations with China soured, leading to a cut-off of Beijing's economic aid and strengthening of Moscow-Hanoi ties, and ASEAN, originally formed as an economic grouping of five

nations, emerged as a very strong political force in South-East Asian affairs.

Back in Kampuchea, the Khmer Rouge, egged on by China, needlessly entered into border conflicts with Vietnam. This blew up, leading to a lightning Vietnamese invasion of Kampuchea in 1978, the expulsion of the Pol Pot regime and the installation of Heng Samrin as President on January 7, 1979. China retaliated by attacking four Vietnamese border provinces in February 1979, instigating heavy fighting.

Vietnam repulsed the attack, and has carried on, till today, a ding-dong battle with Khmer Rouge guerillas operating from their hideouts in Kampuchea's western border with Thailand. But Hanoi cannot, and will not, push its battle to final victory. Vietnam is not constrained militarily if it wants to achieve this objective. 3,50,000 Vietnamese troops in Kampuchea and \$ 26 million a day in Soviet aid is an effective counterpoise for 30,000 Chinese-armed Khmer Rouge guerillas and other 11,000 guerillas of two other anti-Hanoi factions—Moulinaka movement of Sihanouk and People's National Liberation Front of Son Sann. It is the fear of a second Chinese attack on Vietnam that has deterred the Vietnamese from crushing the Khmer Rouge, knowing fully well that the Soviet Union would not come to their help as they did not during the first Chinese attack in February '79. Yet, the Soviet Union is as much averse to a return to the pre-'79 status quo in Kampuchea as is Vietnam. The result on the Kampuchean issue, South-East Asia has been split broadly into two camps, with China, ASEAN and, in extension, the US allied against what they see as Vietnam's "hegimonic" aims, aided and abetted by the Soviet Union.

In a broader perspective, the Chinese side has been more successful. China sought, and succeeded in, internationalising the Kampuchean issue. It has roped in the ASEAN, for now, to an anti-Hanoi stance. It derived the greatest propaganda mileage when it succeeded, after three years' hard work, to bring all anti-Hanoi elements under one group. On June 22, 1982, in Kuala Lumpur, the tripartite "Democratic Kampuchea" coalition was created. Among its members: Sihanouk as head of the coalition with Khieu Samphan replacing Pol Pot as leader of the Khmer Rouge and Son Sann. Sihanouk headed the coalition and Samphan replaced Pol Pot to make the package more "acceptable" to the international community. The UN backing, the coalition subsequently got, and the four UN resolutions calling for unconditional

WISE MONKEYS?

withdrawal of foreign troops from Kampuchea is China's and ASEAN's diplomatic coup of sorts. Three ASEAN members of NAM—Indonesia, Singapore and Malaysia—were thus clamouring that the tripartite coalition be allotted the vacant Kampuchean seat in the recently-concluded Seventh NAM Heads of State Summit in New Delhi. The heads of state, however, left it to the next summit, three years from now, to take up the issue and decided for the present to continue the 1979 Havana Summit's decision to leave the seat vacant.

For the Soviet Union and Vietnam, the going has been rough, both within Kampuchea and outside. Their desire to regionalise the Kampuchean issue and embed it in the larger context of a threat to South-East Asian security, from China first and from the US not far behind, has had no takers. A part of the blame lies on Vietnam, though. After meeting his Thai counterpart, General Kriangsak, in Bangkok on October 19, 1979, Vietnamese Foreign Minister Nguyen Co Thach repeated his country's earlier assurance that Hanoi's forces would "not intrude into Thailand" from Kampuchea while chasing Khmer Rouge guerrillas. Yet, on June 24, 1980, Vietnam reneged on its pledge and attacked Thailand. A mid-June Thai scheme to voluntarily repatriate Kampuchean refugees apparently provoked the Vietnamese to undertake the incursion. While Thailand initiated the proposal claiming the increasing number of refugees was proving a burden for it—caused because of the famine in Kampuchea and the intensification of Vietnam's operations against Khmer Rouge guerrillas—Hanoi and Phnom Penh feared that the scheme would provide an opportunity for Khmer Rouge guerrillas to infiltrate into Kampuchea in the guise of

refugees. This lack of trust has stalled any fresh initiative to bring a solution to the stalemated Kampuchea question.

Of the various initiatives a mention may be made of two, one each from ASEAN and Vietnam. The ASEAN initiative was enshrined in the 'Kuantan Principle', formulated in March 1980 by Malaysian and Indonesian leaders. Among its aims: to persuade Vietnam to distance itself from the Soviet Union, and China to stop supporting the Khmer Rouge guerrillas. In effect, it meant excluding great-power rivalry in the region and thus pave way for implementation of ASEAN's concept of a "zone of peace, freedom and neutrality". While Vietnam was never keen on an ASEAN-style, "zone of peace", its June '80 incursion into Thailand effectively sabotaged the "Kuantan Principle". Given Vietnam's long-standing opposition to the "zone of peace" idea, why did ASEAN put forward the "Kuantan Principle" at all? Answer: The "China syndrome". While ASEAN's short-term objective was to contain Vietnam, its long-term fear—or at least of some of its members—was that China considered all of South-East Asia as its pie. Having a long border with Laos and Kampuchea, Thailand wooed China as a counter-weight. In contrast, Malaysia and Indonesia feared that China would use the large overseas Chinese in their midst to advance its (Beijing's) destabilising foreign-policy objectives. They were thus willing for a time to "seek a dialogue with Hanoi". Indonesia, in addition, prided itself in enjoying a special relationship with Vietnam since both fought for independence from an external power. The differences in perception of ASEAN and China were also evident in the UN. Considering the fact that China had cooped Khmer Rouge's Khieu Samphan in

1974, while he was on a foreign tour, one may assume that ASEAN would not like the "Democratic Kampuchea" coalition in its present form to accede to power in Phnom Penh, if it can, that is. It would give a distinct strategic advantage to China since Khieu Samphan leads the Khmer Rouge now and the group far outweighs the other two coalition members in numerical strength and political clout.

Against this backdrop it is very surprising that ASEAN remained cool to Vietnam's recent offer for a partial annual withdrawal of its troops from Kampuchea if there was an end to the "Chinese threat". Not so surprising was China's rejection (on March 1) of the offer. Beijing wants the unconditional withdrawal of Vietnamese troops from Kampuchea for ending the "Chinese threat". Said a Chinese foreign ministry statement: the offer is "a hoax to cover up their criminal acts of aggression, to deceive world opinion and to extricate themselves from the internal and external difficulties which engulf [Vietnam] as [its] war of aggression against Kampuchea has gone on for four years". While the statement highlights China's intransigence, it also spells out a painful truth for Vietnam: things have not gone on the way they or their Soviet masters would want it to.

Though the Heng Samrin regime is visibly more humane than the earlier one, has reconstructed parts of the ravaged country, and breathed fresh life into the economy, it cannot survive for a day without Vietnamese support. And Kampuchean, who have traditionally hated the Vietnamese, cannot bear their nationalism being outraged for 4½ years by the presence of Vietnamese forces in massive numbers and in control of 90 per cent of their country. To the Vietnamese, the task is no less painful. Stationing a large chunk of its forces in Kampuchea seriously undermines its defence capabilities—especially on its troublesome border with China, they are playing into the hands of the Khmer Rouge by incurring the wrath of a considerable section of Kampucheans; and to the rigorously-disciplined Vietnamese soldier stationed for years on end away from home, it is no pleasing sight to see his Kampuchean counterpart taking life easy while he gives his own away for a cause he is not directly connected with.

To the Kampuchean, there persists a cruel dilemma: have the Vietnamese or die an unmourned death under the Khmer Rouge. At least for some time to come, there will not be any third—and safe—solution.

MANAGEMENT DEVELOPMENT PROGRAMMES

1983

THROUGH CORRESPONDENCE

COURSES

1. POST-GRADUATE DIPLOMA IN BUSINESS MANAGEMENT & INDUSTRIAL ADMINISTRATION
2. DIPLOMA IN MARKETING MANAGEMENT
3. DIPLOMA IN SALES MANAGEMENT
4. DIPLOMA IN OFFICE MANAGEMENT
5. DIPLOMA IN COMPANY SECRETARIAL PRACTICE

DURATION - 18 MONTHS/4 MONTHS

ELIGIBILITY : Bachelor's degree in any discipline for Post Graduate courses and Passed school leaving certificate exam / appeared for diploma courses. Youngsters from business families, entrepreneurs, Sales Representatives will also be considered on the basis of their knowledge of English, which is the medium of instruction of the courses.

20% CONCESSION WILL BE ALLOWED ON FEES TO THOSE WHO ARE SC/ST, DEFENCE PERSONNEL AND PHYSICALLY HANDICAPPED

PLACEMENT : The Institute's Placement Service assists students in securing suitable jobs.

Prospectus and Application Forms are available by sending a Crossed Indian Postal Order/Bank Draft payable at Calcutta for Rs 20/- in favour of International Institute of Management Sciences, Calcutta. Candidates sending Money Order are requested to mention clearly on the M.O. Coupon the Mailing Address and Name of the Programme for which the prospectus and Application Forms are wanted. Cheque or Cash Payment not accepted.

For prospectus and application form

THE FREEDOM MOVEMENT

BY RAJU MANSUKHANI

"The Cause of Freedom is the cause of God!" said W.L. Bowles. Leaders of independent India recognised this, and deified those responsible for this. Yet, the coming generations seem to have taken our independence for granted, the sacrifices as the need of a bygone era. Only a stirring film like "Gandhi" revives memories of the freedom struggle, of its non-violent character with its all-pervasive effect on our present-day social, political and cultural fabric, of the unity it brought to India as was emphasised in the epics and the Puranas.

If you're to administer a nation, defend it, or even take an active part in formulating its foreign policy, success will depend on the knowledge you have of your country's history. And the Indian freedom movement forms an integral part of it—as also of every important competitive exam, be it the written test or the interview. With this in mind, we are beginning a serial on the nature and course of political activity in India from 1857 to 1947, years in which our freedom struggle dominated the scene. To do justice to this very important period of Indian history, we shall recommend authoritative books for further reference at the end of this serial.

1857-1928

1857: This year occupies an important place in Indian history not only because it saw the first major uprising challenging the colonial rulers—the Indian Revolt of 1857-59—but because of its dimension and magnitude.

This great historical event has been interpreted in various ways. Benjamin Disraeli delivered a long speech in the House of Commons on July 27, 1857, in which he

attacked the policies of the Palmerston Government. He made it clear that the British were unpopular in India and the revolt was a result of that deep discontent. Karl Marx, writing for the *New York Daily Tribune*, saw in the violence of 1857 an extension of the social revolution that the British were bringing about in India. Thomas Rice Holmes provided a detailed narrative history in 1883. He found no indication of a conspiracy or of a national uprising but only groups of natives who feared the beneficent changes being introduced by the new administration. It was in 1909 that V.D. Savarkar wrote his account and called it the *Indian War of Independence*. He saw in the revolt the great principles of *Swadharma* (one's duty) and *Swaraj* (self-government). P.C. Joshi, a Marxist activist and historian, has interpreted 1857 as a broad, popular rebellion against the all-destructive British policy.

It was on May 10, 1857, that the sepoys of the Third Native Cavalry mutinied against their British officers. They then marched onto Delhi and proclaimed the ageing Bahadur Shah Zafar as the Emperor of India. The revolt spread to Oudh, Rohilkhand, Central India, parts of Bihar and Punjab, and the princely states like Gwalior, Indore and Jhansi.

The hostility of the sepoys had been generated by the policies of the British in the army. Be it the messing system or the enlistment order of 1856, all this offended the feelings of the sepoys, most of whom were from the upper castes—Brahmins, Rajputs and Bhumihars. They were convinced that the 'firangis' wanted them to take to Christianity. On occasions of going abroad, like to Burma in 1824 or to Afghanistan in 1840-41, there was much resistance from these ranks. Thus, the cartridge question caused great disaffection. The trouble started with the introduction of the Enfield rifle, whose cartridges were greased with animal fat—either of the cow or of the pig. The sepoys revolted because they sincerely believed that their religion had thus been wantonly insulted.

These upper-caste sepoys enjoyed a special place in the socio-economic setting of India's village community, which was affected

by the great changes being initiated by the British. Of concern to the established landed class were the settlement operations for adjustment of revenues and rent which went against their interests. Most of them sold off portions of their estates or suffered financial losses to meet the high revenue demand, thus making way for a new class of merchant proprietors.

The various classes that made up the peasantry were also hard-hit by heavier rent demands. This dissatisfied peasantry often joined hands with dispossessed zamindars in raising the banner of revolt. Kunwar Singh of Arrah in Bihar is a case in point.

The context of these charges is the general economic ruin of the countryside, as wrought by the British. The traditional handloom and handicraft industries were ruined. 'Deindustrialisation' as studied in Gangetic Bihar did occur, revealing the shrinkage of the total working population in relation to the total population.

Thus, there presented the pressures on the zamindars, the peasants and the sepoys—all of them resenting the policies of the British as they affected each one.

The annexation of Oudh by Lord Dalhousie, in 1856, crystallised this conflict. Nana Sahib, the Peshwa, who was a prisoner of the British, felt his privilege would now be swept away. Rani Lakshmbai of Jhansi wanted her adopted son on the throne. Otherwise, Dalhousie's 'Doctrine of Lapse' made sure that the British would annex her state. Bahadur Shah Zafar had been notified to move out of Red Fort and was to lose his title.

All these rebels rose against the British, determined to fight or to die. But their struggle was not a united one. The British used men, money and arms in an organised manner against the disorganised but courageous rebels. The failure to evolve a unity of action led to their defeat.

The whole struggle did not have a forward-looking programme to be implemented after the capture of power. They could look no further than restoring feudal monarchies. It was the non-participation of the urban educated classes that made for this ideological retrogression.

Nonetheless, the struggle of the traditional leaders and the sepoys lasted for nearly two years, the

British having to virtually reconquer India by 1859.

India Act of 1858

In 1858, an Act of Parliament transferred the power to govern India from the East India Company to the British Crown. Within Parliament the rise of the industrial interests had been powerful enough to oust the trading mercantilist powers. The passing of the Charter of 1833 and 1853 were symptomatic of that rise.

Now the authority to govern India rested with the Secretary of State, aided by a council. He was directly responsible to Parliament. In India, a Viceroy or Governor-General carried on the task of administration according to the wishes of the authorities in London.

The British economy

By the 1840s, the British economy was based on the capital goods industries on coal, iron and steel. The growing industrialisation of the rest of the world provided a rapidly-expanding market for the kind of capital goods which could be exported from only the 'workshop of the world'. The boom of railway construction was part of this industrialisation process. Outside Britain it was a major stimulus to the export of capital goods for the construction of the railways. These were built with British capital, British materials and equipment and often by British contractors. This export of capital was the essence of the imperialist policies pursued by Britain all over the world.

In the period after 1858, there was a gradual widening of differences between the urban-educated Indians and the British-Indian administration. This discontent found expression in the formation of political associations in the three Presidencies.

In 1866, Dadabhai Naoroji formed the East India Association in London to discuss the Indian question and influence British public figures. In 1867, Justice M.G. Ranade organised the Poona Sarvjanik Sabha. He was aided by V. Chiplunkar and G.V. Joshi.

In 1876, the Indian Association was founded in Calcutta by Anandamohan Bose and Surendranath Bannerjee. By 1884, the Madras Mahajan Sabha was founded by Ananda Charlu, G. Subramaniam Iyer and others. In 1885, brilliant advocates like

Pherozesan Menta, K.T. Telang and Badruddin Tyabji founded the Bombay Presidency Association.

Amidst all these pre-Congress regional associations, it is the rise of Syed Ahmed Khan that assumes importance. His main concern was the general Muslim backwardness. Though he considered Islam to be greatly relevant for modern times, he felt the spread of English education and Western thought would make the average Muslim progressive. Towards that aim, in 1875, the Muhammadan Anglo-Oriental College was founded in Aligarh to spread Western sciences and culture. In 1877, Syed Amir Ali founded the National Mohammedan Association in Calcutta. This was expressing the need of the urban Muslims to be on the right side of the government.

It was during the Viceroyalty of Lytton (1876-80) that certain issues became rallying points for these regional associations.

The second war against Afghanistan, the Arms Act and the Vernacular Press Act of 1878 were widely condemned. The new regulations regarding civil service examinations were strongly resented by the likes of S.N. Bannerjee.

The policies of Lord Ripon were no less controversial. The Ilbert Bill of 1883, which made for Indian magistrates trying Europeans in criminal cases, was successfully opposed by the European community. The regional associations organised all-India campaigns.

Ripon's policies regarding local self-government made for the establishment of District Boards, Municipal Boards and Corporations. Various scholars have studied these as the local roots of Indian politics. For this was the political structure within which political developments took place.

On December 28, 1885, the first session of the Indian National Congress was held in Bombay. A.O. Hume, a retired British civil servant, was associated with its establishment. W.C. Bannerjee described the Congress as "the National Assembly of India", as the "germ of a Native Parliament". Its delegates were selected representatives of the major provincial associations—mostly lawyers, journalists, teachers, landlords, etc. In spite of regional and class differences, the Congress was to be an organised

body to participate in representative bodies. It pledged to pursue this objective by constitutional methods.

These nationalists demanded the expansion and reform of the legislative councils. The British passed the Indian Councils Act of 1892. It made for increased number of Indians in the legislative councils, but the decision-making power vested with the officials. Soon, men like G.K. Gokhale and Dadabhai Naoroji were clamouring for *Swaraj* or self-government, as in Australia and Canada.

The analysis of the British rule made by Dadabhai Naoroji, G.V. Joshi and R.C. Dutt among others was profound. They understood the cause of India's backwardness and poverty. The 'drain of wealth' from India from the 1760s was exposed. From mere loot and plunder to systematic exports and high taxation onto 'Home Charges' and 'Public Debts'—all these forms of economic exploitation, which is the essence of imperialism, were condemned.

But the form of political protest was constitutional agitation, pledges and petitions to the government. Even for this, men like S.N. Bannerjee and G.K. Gokhale were regarded as 'disloyal babus' and 'seditious Brahmins'.

The developments in religion and literature were profound. In Bengal, Keshab Chandra Sen revived the 'Brahmo Samaj'. The ideas of Ram Mohan Roy got a new lease. In 1875, Dayanand Saraswati found the 'Arya Samaj', pleading for the purification and simplification of Hinduism. His call for "back to the Vedas" has been likened to a Hindu reformation. Swami Vivekananda was yet another immortal of this age. To a confused and materialistic world he showed the path of Vedanta—the fully rational system.

In the literary world, the works of Michael Madhusudan Datta, Dinabandhu Mitra, Bankim Chandra Chattopadhyay and Mohammad Iqbal were created. The early works of Rabindranath Tagore also date from this period. The link between nationalism and literature was strong. It was the real-life experiences of an author which captured the turbulent political context into his literary text.

(To be continued)

PRACTICE TESTS

In preparing these tests we have tried to visualise the questions you are likely to face in your actual exam. Great care has been taken to frame questions which are of the same standard as those you'll encounter in your exam. Not easier, not harder, but just what you may expect. It is, therefore, a practical yardstick for charting your progress and planning your course.

Rating: Evaluate your performance on the basis of the following score-card:

| | | |
|-----------------------------|---|-----------|
| 100 questions in 60 minutes | — | Excellent |
| 60 questions in 60 minutes | — | Good |
| 50 questions in 60 minutes | — | Fair |
| 35 questions in 60 minutes | — | Poor |

Tips: 1. Do not waste time over questions you are not sure about. 2. Give the problems some thought before choosing the answers. 3. Read the directions carefully before answering the questions. 4. Do not try to guess the answer.

CLERICAL APTITUDE TEST

BY VINAY NANGIA

FOR CLERKS AND ALLIED CATEGORIES

This test forms a part of the written exam for Clerks, Cashiers, Clerks-cum-Cashiers, Typists, Stenographers, Agricultural Assistants and Telephone Operators to be conducted in May by the Banking Service Recruitment Boards, Lucknow and Delhi. Time limit (Parts A & B) : 20 minutes.

Part A

This test involves comparing names and numbers. Under the question column at the left, there will be names and/or numbers. Against this, there will be four answers given under columns A, B, C, and D. Find out which of the four is EXACTLY the same as the one given in the question column. If none is exactly the same, your answer should be E. You have to answer as many questions as possible.

Examples

| Question | A | B | C | D | E |
|---------------------|-------------|------------------|------------------|------------------|------|
| 1. KALA- | KALA- | KALA- | KALKA- | KALA | NONE |
| 2. KALKAL | KALAL | KALKAL | LAKAL | KALAL | |
| 302 | 302 | 302 | 302 | 302 | |
| 3. 323×232 | $323 + 232$ | 323×323 | 323×232 | 232×323 | NONE |
| 121 | 121 | 121 | 212 | 121 | |

In Q. No. 1, the answer is B since the combination of name and number matches exactly with the one given in the question column. In Q. No. 2, the answer is E since the combination of numbers in A, B, C or D does not tally with the one given in the question column //

Part B

This test also involves comparing names and numbers. In each question there will be a set of four names and/or numbers under columns A, B, C and D. You are to identify from the choices available, the combinations that are EXACTLY the same and make two cross marks under the appropriate letters. If all four are different, make a cross mark under E. The other conditions are the same as above.

Examples.

| A | B | C | D | E |
|-------------------------|----------------------|----------------------|---------------------|---------------|
| 1. Afro-Asian
202 | Afro-Asian
202 | Afro-American
202 | Afro-Asian
202 | All Different |
| 2. CONGRAT-
ULATIONS | CONGRAT-
ALATIONS | CONGRAT-
ULETIONS | CONGRAT-
ULATION | All Different |

In Q. No. 1 the answer is A and D, since the combination of name and number under these two columns is exactly the same. In Q. No. 2, the answer is E because no two names in A, B, C and D tally with each other. Please note that in this exercise two cross marks will be marked to indicate the identical items, except in cases where the answer is E.

BRAIN TEASER

Underline which of the four numbered figures fits into the empty space.

4

Answer

3. (In going from the first figure to the second the four drawings in the corners of the square are rotated one position clockwise, and the square is put inside the diamond, the drawings in the corners of the diamond are rotated one position counter-clockwise, and the diamond is now outside the square. The position of diamond and square is reversed again for the third figure, and the clockwise and counter-clockwise reversal of the drawings in the corners of each are continued.)

From *KNOW YOUR OWN I.Q.* by H.J. Eysenck

| | A | B | C | D | E |
|--------------------|----------------|----------------|-----------------|----------------|------|
| 26. Deployment-Div | Deployment-Div | Deployment-Div | Deployment-Div. | Deployment-Div | None |
| 27. Participant | Participants | Participant | Participant | Participant | None |
| 28. 22—11 + 33 | 22 11 + 33 | 22—11 + 33 | 22 + 33—11 | 22 + 11—33 | None |
| 29. Nail-Cutter | Nail-Cutter | Nail-Cutter | Nail-Cutter | Nail-Cutter | None |
| 30. Neither/Nor | Neither/Nor | Neither/Nor | Neither/Nor | Neither/Nor | None |

TEST OF REASONING

BY LT COL I. R. MANCHANDA, former Dy President, S. S. B.

VERBAL AND NON-VERBAL

This section forms an important part of the GENERAL STUDIES paper of the Civil Services (Prelims) exam, to be held in June; the TEST OF REASONING paper of the PO exam (Central Recruitment Board, State Bank Group), to be held in June again; and the TEST OF REASONING paper of the Clerical Cadre exam (BSRB, Central Group [Lucknow] and Delhi), to be held this month.

VERBAL REASONING

Time: 15 minutes.

Scores: 1. Give yourself one mark for each correct answer. 2. Deduct one mark for each wrong answer. 3. Then rate your score as under:

Excellent...23-25 Very Good.. 20-22 Good...18-19 Fair...16-17 Poor...Below 16

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. Rahim can type m pages in $\frac{1}{3}$ min. At this rate, he will be able to type— pages in $\frac{1}{3}$ of an hour.
(a) $\frac{m}{60}$
(b) $60m$
(c) $\frac{60}{m}$
(d) $m + 60$
2. One fluid ounce is equal to 28.41 ml. Approximately how many ml are there in two paltoos, if one paltoo is equal to three jaltoos, each of which is equal to $\frac{1}{4}$ of a maltoo = $\frac{5}{8}$ fluid ounce?
(a) 35.6 ml
(b) 71.2 ml
(c) 106.5 ml
(d) Can't be worked out
3. Three officers are able to solve problems in the ratio of 1.5: 2.5: 3.5. If the officer with the least capability can solve 6 problems in 2 hours, how many problems will the officer with the higher ability solve in 3 hours, assuming that they all solve problems at a uniform rate?
(a) 9
(b) 10
(c) 15
(d) 21
4. $7x = 2k$ and $4y = 3k$. If k is negative, which of the following statements is true?
(a) x is greater than y
(b) y is greater than x
(c) x is equal to y
(d) No definite relationship can be established between x and y
5. A scooter which consumes 1 litre of petrol for every 36 km uses half as much petrol again with a new engine. How much distance will the scooter be able to cover on one litre of petrol with a new engine?
(a) 24 km

- (b) 48 km
(c) 72 km
(d) None of the above

6. If the length of a rectangle is increased by 20 per cent, its width should be increased by _____ per cent so that its area increases by 80 per cent.

- (a) 30
(b) 40
(c) 50
(d) 60

7. X bought a colour TV set after getting a discount on its list price from the dealer. If X got the TV set for an amount which was thrice the difference between its list price and the amount he paid for it, what per cent of the list price did X pay?

- (a) 55 per cent
(b) 65 per cent
(c) 75 per cent
(d) Can't be worked out

8. A consultant's earnings over a five-year period amounted to Rs 2 lakhs. If he did earn some amount every year and his earnings during the fourth year were 4 times his average earnings for the other four years, in which of the five years did he earn the maximum?

- (a) Second year
(b) Third year
(c) Fourth year
(d) Can't be worked out

9. In triangle ABC, what is the value of n if BC is equal to AC and $\angle A = 70^\circ$.

- (a) 30
(b) 40
(c) 50
(d) 60

10. If $\sqrt{7}$ is approximately 2.645, $\sqrt{8575}$ will be nearly _____ times 2.645.

- (a) 24.5

- (b) 25
(c) 34.5
(d) 35

11. A 175-cm-tall man casts a 125-cm-long shadow; at the same time a flagpole casts a 50-m-long shadow. What is the height of the flagpole?

- (a) 65 m
(b) 70 m
(c) 75 m
(d) 80 m

12. _____ cc of water must be added to 100 cc of a 60-per cent solution of sulphuric acid to reduce it to a 40-per cent solution?

- (a) 20
(b) 30
(c) 40
(d) 50

13. A mule grazes in a pasture which is bordered by two fences at 40 degrees to each other. If the mule is tethered by a 2-m-long rope to the post at the junction of the two fences, each of which is more than 3 m long, it can graze in an area which is

- (a) π sq m
(b) $\frac{4\pi}{9}$ sq m
(c) $\frac{2\pi}{3}$ sq m
(d) $\frac{16\pi}{3}$ sq m

Directions: Questions 14 to 18 are based on the following:

Densities of different substances

| | |
|--------------|------|
| 1. Aluminium | 2.7 |
| 2. Brass | 8.6 |
| 3. Copper | 8.9 |
| 4. Lead | 11.3 |
| 5. Zinc | 7.1 |
| 6. Sugar | 1.59 |
| 7. Magnesium | 1.74 |
| 8. Water | 1 |

14. Zinc is—times heavier than sugar.
 (a) 3.5
 (b) 4.5
 (c) 5
 (d) 5.5
15. Approximately— per cent increase in density is obtained by substituting equal volumes of brass for aluminium.
 (a) 18
 (b) 118
 (c) 218
 (d) 228
16. Approximately— cc of copper must be mixed with 1 cc of zinc to make an alloy that will be 100 times as heavy as a mixture of 2 cc of water and 3 cc of sugar
 (a) 60
 (b) 65
 (c) 70
 (d) 75
17. The ratio of copper to magnesium in a mixture which is as heavy as zinc is nearly
 (a) 1:3
 (b) 3:1
 (c) 2:5
 (d) 5:2
18. A mixture of magnesium, lead and copper is approximately— times heavier than aluminium
 (a) 2.7
 (b) 3.7
 (c) 8
 (d) 10
19. If tomorrow is a working day, we will send a gift to our daughter tomorrow. Without challenging the authenticity of the preceding statement, state which of the following conclusions is (are) not warranted by it?
 (a) If it is not a working day tomorrow, we will not send a gift to our daughter tomorrow
 (b) If we do not send a gift to our daughter tomorrow, it will not be a working day tomorrow
 (c) If we send a gift to our daughter tomorrow, tomorrow will be a working day
20. Supply the missing number in the series:
 24, 8, 11, 33, 30, 15, ?, 34, 32.
- Directions. Questions 21 and 22 are based on the following:*
All good officers want quick promotions; and all officers who want quick promotions do well on training courses. Therefore, all officers who do not do well on training courses are bad officers.
21. If the argument above is valid, which of the following must be true?
 (a) No bad officer wants quick promotion
 (b) No officer who does not do well on training courses is a good officer
 (c) Every officer who does well on training courses is a good officer
 (d) All officers who want quick promotions are good officers
22. Which of the following, if true, would weaken the opening argument?
 (a) X wants quick promotion, but he is not a good officer
 (b) Y does well on training courses, but he is not a good officer
 (c) No officer who does not do well on training courses wants quick promotion
 (d) Z does not do well on training courses, but he is a good officer
23. If a substance is a definite variety of matter, all speci-

mens of which have the same properties, then——is not a substance.

- (a) Aluminium
- (b) Rust
- (c) Salt
- (d) Granite

24. What will be the distance covered by a racing car in 6 sec, if its speedometer reads the following values of velocity (in m per sec) at different intervals of time (in sec) starting from rest?

| | | | | | | | | | |
|----------|---|----|----|----|----|----|----|----|----|
| Time | 0 | 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 |
| (in sec) | | | | | | | | | |
| Velocity | 0 | 12 | 24 | 36 | 36 | 27 | 18 | 9 | 0 |
| (in m/s) | | | | | | | | | |

- (a) 324 m
- (b) 360 m
- (c) 420 m
- (d) None of the above

25. Momentum is the product of mass and velocity, i.e., mass \times velocity. further, it is a vector quantity, i.e., it has direction also. If a 2-kg ball rebounds with a velocity of 5 m/s after striking a wall with the same velocity, what will be the change in momentum?

- (a) Zero
- (b) 10 kg m/sec
- (c) 20 kg m/sec
- (d) Can't be determined

NON-VERBAL REASONING

(for Clerks)

Time: 8 minutes

Score: 1 mark for each question. No Penalty.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

Directions: In questions 1 to 5, spot the odd figure out.

Directions: In questions 6 to 14, find out the lettered figure which replaces the question mark to complete the series.

Directions: In questions 15 to 25, select the one-lettered figure on the right that goes with those at the left.

18.

19.

20.

25.

FOR NDA AND CDS EXAMS

This section contains questions on General Science, which are an important part of the CDS and G.K. Paper I in NDA exams.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. Who founded the theory of organic evolution?
(a) Jagadish Chandra Bose
(b) Charles Darwin
(c) Norman Borlaug
(d) Jean B. Lamarck
2. The disease cataract refers to
(a) Cloudiness in the eye lens
(b) Inflammation in nose
(c) Inflammation of joints
(d) Dislocation of backbone
3. The disease powdery mildew affects the leaves of
(a) Wheat
(b) Maize
(c) Pea
(d) All the above
4. The amount of calories required by a normal adult is nearly
(a) 500
(b) 1,500
(c) 3,000
(d) 4,000
5. Which of the following instruments is used to measure blood pressure?
(a) Lactometer
(b) Hydrometer
(c) Sphygmomanometer
(d) Hygometer
6. Sea covers nearly — per cent of the globe's area?
(a) 17
(b) 30
(c) 40
(d) 70
7. Tenderness and bleeding of gums and loosening of teeth could be caused by a deficiency of
(a) Vitamin B and Vitamin B₁₂
(b) Vitamin C
(c) Carbohydrates
(d) None of the above
8. Compounds which act as sedatives or sleep inducers are called
(a) Antibiotics
(b) Barbiturates
(c) Enzymes
(d) None of the above
9. A blue baby is one born with a malformation of the
(a) Liver
(b) Kidneys
(c) Heart
(d) Proper body pigments
10. In which of the following does development take place without pollination having occurred at all?
(a) Parthenocarpic fruits
(b) Simple fruits
(c) Multiple fruits
(d) Indehiscent fruits
11. Which of the following take part in the reproductive process in flowers?
(a) Sepals and stamens
(b) Sepals and petals
(c) Petals and pistils
(d) Stamens and pistils
12. Which of the following diseases is not prevalent in India?
(a) Malaria

- (c) Jaundice
(d) None of the above
- 13 Which of the following is not an infectious disease?
(a) Influenza
(b) Malaria
(c) Jaundice
(d) Dengue fever
- 14 _____ is essential for the normal clotting of blood
(a) Vitamin A
(b) Vitamin C
(c) Vitamin B and D
(d) Vitamin K
- 15 Persons with blood group O can receive blood from persons with blood group
(a) O only
(b) A, B or AB
(c) AB or O
(d) AB only
- 16 The disease associated with malfunctioning of the liver is
(a) Tuberculosis
(b) Diabetes
(c) Jaundice
(d) Malaria
- 17 Louis Pasteur is not associated with
(a) Treatment of rabies
(b) Cause of fermentation in alcohol and milk
(c) Discovery of penicillin
(d) Any of the above
- 18 The scientist famous for the anthrax vaccination is
(a) William Harvey
(b) Robert Koch
(c) Charles Darwin
(d) Edward Jenner
- 19 Blood is collected in the
(a) Liver
(b) Kidneys
(c) Heart
(d) None of the above
- 20 A hormone of the endocrine system in the human body causes
(a) Blindness
(b) Stomach
- (d) Goitre
- 21 The energy supplying agents in our food are
(a) Proteins
(b) Vitamins
(c) Enzymes
(d) Carbohydrates
- 22 Which of the following is the principal constituent of air?
(a) Carbon dioxide
(b) Oxygen
(c) Nitrogen
(d) Ozone
- 23 Plants manufacture carbohydrates in the presence of sunlight and chlorophyll using
(a) Carbon dioxide from air
(b) Oxygen from air
(c) Minerals from the soil
(d) Nitrogen
- 24 Allotropic forms of an element have the
(a) Same number of protons
(b) Same chemical properties
(c) Same chemical and physical properties
(d) Same physical properties
- 25 Which of the following does not contain carbon?
(a) Diamond
(b) Steel
(c) Petroleum
(d) All the above contain carbon
- 26 _____ is the major constituent of cement
(a) Silica
(b) Lime
(c) Magnesia
(d) Iron oxide
- 27 Which acid is used in standard black ink?
(a) Tannic acid
(b) Acetic acid
(c) Dilute nitric acid
(d) Dilute sulphuric acid
28. The scientist whose name is associated with the structure of

- (a) Niels Bohr
(b) James Chadwick
(c) Otto Hahn
(d) Albert Einstein
29. Marie Curie is famous for her work relating to
(a) Antibiotics
(b) Radioactivity
(c) X rays
(d) Chemotherapy
30. In man the rate of respiration is nearly
(a) 18 per minute
(b) 24 per minute
(c) 44 per minute
(d) 72 per minute
31. Alchemy is the branch of Chemistry dealing with the
(a) Study of alcohols
(b) Treatment of cancer using chemicals
(c) Transmutation of baser metals into gold
(d) None of the above
32. The chemical properties of an atom are determined by
(a) The number of protons it contains
(b) Its atomic weight
(c) The number of neutrons it contains
(d) All the above
33. The size of the nucleus of an atom is of the order of
(a) 10^{-11} cm
(b) 10^{-10} cm
(c) 10^{-8} cm
(d) 10^{-5} cm
34. Iron is galvanised by coating its surface with
(a) Nickel
(b) Aluminium
(c) Zinc
(d) Mercury
35. Exothermic reactions are those in which
(a) Heat is either evolved or absorbed
(b) Heat is evolved
(c) Heat is absorbed
- (d) None of the above
36. Which of the following varieties of phosphorous is used in the match industry?
(a) Black
(b) Yellow
(c) Red
(d) Green
37. The inert gases have
(a) Two electrons in their outermost orbit
(b) Eight electrons in their outermost orbit
(c) Four electrons in their outermost orbit
(d) None of the above
38. If the mass of an electron is completely converted to energy, the energy obtained would be nearly
(a) 0.1 Mev
(b) 0.5 Mev
(c) 200 Mev
(d) 900 Mev
39. The boiling point of water at sea level is 100 C. In the mountains, the boiling point is
(a) 100 C
(b) More than 100 C
(c) Less than 100 C
(d) Can be any of the above
40. All acids contain
(a) OH^- ions
(b) H^+ ions
(c) Either H^+ or OH^- ions
(d) None of the above
41. The maximum number of electrons in the second orbit is
(a) 2
(b) 4
(c) 6
(d) 8
42. As compared to its weight at the equator, the weight of a body at the poles is
(a) Less
(b) Greater
(c) Equal
(d) Dependent on the density of the body with respect to air

43. The pH value of alkaline solutions is
 (a) Negative
 (b) 7
 (c) Less than 7 but positive
 (d) More than 7

44. The mass of 22.4 litres of oxygen at 273°K and 1 atmospheric pressure is nearly
 (a) 8 g
 (b) 16 g
 (c) 32 g
 (d) 48 g

45. Short-sightedness can be corrected by using a --- lens.
 (a) Convex
 (b) Planoconvex
 (c) Concave
 (d) None of the above

46. Spot the odd-one out.
 (a) Calorie
 (b) Joule
 (c) Erg
 (d) Watt

47. A particle of mass m , moving with a velocity v at right angles to a wall, rebounds back, moving with the same speed in time t . The force exerted on the wall is
 (a) mv/t
 (b) $mv/2t$
 (c) $2mv/t$
 (d) $mvt/2$

48. The velocity of sound waves is maximum in
 (a) Brass
 (b) Water
 (c) Air
 (d) Carbon dioxide

49.

If the heat produced in the 4ohm resistance is Q calories, the heat produced in the 8ohm

resistance will be

- (a) $2Q$
 (b) Q
 (c) $Q/2$
 (d) $Q/4$

50. An electroencephalograph is an instrument for recording
 (a) Heart waves
 (b) Picture of the vertebra
 (c) Brain waves
 (d) Blood pressure

51. --- acid is secreted in the stomach to aid digestion
 (a) Citric
 (b) Hydrochloric
 (c) Sulphuric
 (d) None of the above

52. The ratio of the velocity of sound in moist air to that in dry air is
 (a) 1
 (b) More than 1
 (c) Less than 1
 (d) Can be more or less than 1, depending on the temperature

53. If 50 resistances having values 1 ohm, 2 ohm, 3 ohm, ... 50 ohm are connected in series, their equivalent resistance will be nearly --- ohm
 (a) 263
 (b) 333
 (c) 1275
 (d) 2550

54. The headquarters of the International Atomic Energy Agency is situated in
 (a) Bern, Switzerland
 (b) Paris, France
 (c) New York, USA
 (d) Vienna, Austria

55. The focal length of a camera lens is 10 cm and its linear aperture is 2.5 cm. The f value of the lens is
 (a) 0.25
 (b) 4
 (c) 10
 (d) 25

How To Take The English Paper

BY VINOD GUPTA

The English Language paper for the Staff Selection Commission (SSC) Clerks' Grade Exam (to be held in July) is quite tough not because individual questions are difficult but because the paper is lengthy. It contains 150 multiple choice objective type questions which have to be answered in 1½ hours (90 minutes). As a result there is not much time to think. The pull-out in this issue gives a model practice test paper on English Language for this exam. As the number of questions in the practice test has been reduced the time given has also been cut short accordingly.

The syllabus for the English Language paper as in the case of General Knowledge has not been given in detail by the SSC. The syllabus at best is indicative and not exhaustive. It includes all aspects of English grammar. Even the weightage of marks for various items spelt out in the official syllabus varies from year to year. It is also quite possible that at times no question may be set on an item mentioned in the syllabus.

Taking the official syllabus as a starting milestone it is strongly advised that you take a good grammar book and study it well. All that you have studied at the school level must be thoroughly revised. The standard expected is that of a high school student. But remember the questions will not

be of a similar type. The paper will be objective type (multiple-choice) and the answers will have to be marked on a separate answer-sheet as explained in the previous article (CCTimes April 1983, pages 51-53).

Type of questions

A Detecting Errors

Directions: In the following questions, the sentences may contain errors of grammar, usage, diction, idioms, spellings, etc. Some sentences may be correct. No sentence has more than one error. If there is an error in any one of the parts of the sentence, the candidate has to put a cross mark (X) in the corresponding circle in the answer sheet against the question. If there is no error, the candidate has to put a cross mark (X) in the relevant circle against the question.

1. He speaks bluntly and angrily to the spectators. No Error
A B C D
2. How do you like the new book? No Error
A B C D
3. He spoke bluntly and angrily we spectators. No Error
A B C D
4. A stadium and a swimming pool are going to be built on the new campus. No Error
A B C D

Another type of questions which can be asked under 'detecting errors' are the ones where you have to spot the number of errors in each sentence. Two examples are given below.

Directions: In questions 5 and 6 the given sentence may have one, two or three errors. If there is one error, mark under A; if two, under B; if three, under C; and if there is no error, under D in the answer-sheet.

5. I have never travelled somewhere by airoplane or by boat yet.

6 He explained to us why was it necessary to take such great care.

Explanation:

1. Here there is a mistake in part 'A'. Therefore, you should put a cross mark (X) in the circle under A in the answer-sheet.

2 In this sentence there is no error. Therefore, D is the correct answer. Accordingly, a cross mark (X) should be put in the circle below D against question no. 2 in the answer sheet

3 In this question, the word 'we' is wrong. So 'C' is the correct answer.

4 In question no 4, the sentence is correct Therefore, 'D' is the correct response.

5 Here, there are two mistakes. One, instead of 'somewhere' the correct word should be 'anywhere' Two, the spelling of the word 'airoplane' is in correct Therefore, the cross mark will be put under 'B' against question no. 5.

6. In this question the expression 'was it' has to be changed to 'it was'. There is only one mistake and so, the answer is 'A'

The manner in which the answers

are to be indicated in the answer-sheet is explained below:

Answer Sheet

| Question | A | B | C | D |
|----------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|
| 1. | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 2 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> |
| 3 | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> |
| 4 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> |
| 5 | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 6 | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

B. Sentence Improvement, Correcting Errors

Directions: Below each sentence are given three possible substitutes for the italicised word or phrase. If one of the three possible substitutes, (A, B or C) is better than the italicised part, indicate your response as such on the answer-sheet. If there is no error mark D.

7 He became a member of the library soon after his wife became *so*

- (A) one
- (B) it
- (C) like that
- (D) No Improvement

Answer 'A'

8 He pointed *on* the tree

- (A) for
- (B) with
- (C) to
- (D) No Improvement

Answer 'C'

9 A candle flame *glares* at the slightest breath of air

- (A) sparkles
- (B) flickers
- (C) shines
- (D) No Improvement

Answer 'B'

10. The fruits which he took from the bazar *has made* him

- very sick
 (A) could made
 (B) caused
 (C) could have made
 (D) No Improvement

Answer 'C'

C. Vocabulary

Here you may get questions on spellings, synonyms, antonyms, meanings, one-word substitutes, etc.

Synonyms:

Directions: Each item consists of a sentence or a word with an italicised word / phrase and is followed by four words/phrases listed as A,B,C, and D. Select the one which is nearest in meaning to the italicised word/phrase in the sentence and indicate your response (choice) in the answer-sheet.

11. There was a *record* turnout of voters at the municipal elections.
 (A) exactly known
 (B) only those registered
 (C) very large
 (D) largest so far

Answer 'D'

12. The true nature of human intelligence is a matter of *controversy* among psychologists.
 (A) complexity
 (B) interest
 (C) rivalry
 (D) disagreement

Answer 'D'

13. *Boycott*
 (A) to accuse of wrongdoing
 (B) withdraw from
 (C) refuse to deal with
 (D) keep silence

Answer 'B'

14. *Integrity*
 (A) good judgment
 (B) benevolence
 (C) honesty
 (D) fearlessness

Answer 'C'

Antonyms

Directions: In the following questions the italicised word is followed by four words or phrases (listed as A, B, C, D). Select the word or phrase which is nearly opposite in meaning to the original word, and indicate your choice in the answer-sheet

15. *Allergic*
 (A) genuine
 (B) honest
 (C) brave
 (D) immune

Answer 'D'

16. *Deride*
 (A) accept
 (B) appreciate
 (C) agree
 (D) acknowledge

Answer 'B'

17. *Day*
 (A) year
 (B) month
 (C) hour
 (D) night

Answer 'D'

D. Selecting Words

Directions: In the following sentence there are blanks at certain places. Choose the best alternative and indicate your choice in the answer-sheet.

18. & 19 There is no place ---
 clear social authority is
 so urgently ---

- 18 (A) which
 (B) where
 (C) without
 (D) when

Answer 'B'

19. (A) needed
 (B) provided
 (C) lacking
 (D) fulfilled

Answer 'A'

From the above examples, it should be quite clear how various questions on English grammar are framed and are required to be answered.

ENGLISH

BY V.G.

FOR SSC CLERKS' GRADE, NDA & CDSE

This section has been specially prepared for those appearing in the Staff Selection Commission's Clerks' Grade Exam which is to be held in July. It will also help those preparing for the NDA and CDS exams.

Time: 48 minutes.

Scores: 1. Give yourself one mark for each correct answer.
2. Deduct one mark for each wrong answer. 3. Then rate your score as under:

Excellent... 75-80

Very Good... 69-74

Good... 63-68

Fair... 57-62

Poor... Below 57

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Answers are given at the end of this supplement.

Directions: In questions 1 to 10, four words have been given in each set and just one out of them is wrongly spelt. Tick the misspelt word in each set.

1. (a) allot
(b) allotting
(c) allotment
(d) allotted
2. (a) persue
(b) peruse
(c) persuade
(d) persuasion
3. (a) accrue
(b) accumulate
(c) accord
(d) accomodate
4. (a) annals
(b) annual
(c) annul
(d) aluminum
5. (a) assess
(b) exccass
(c) access
(d) acede
6. (a) dye
(b) dyeing
(c) lie
(d) lyeing
7. (a) immediately

- (b) grammer
(c) irritation
(d) funny
8. (a) prominent
(b) dominant
(c) lament
(d) vehement
9. (a) fill
(b) fulfil
(c) full
(d) fulfillment
10. (a) commited
(b) commit
(c) commitment
(d) committing

Directions: In each of the questions from 11 to 14 there are four pairs of singular and plural forms of nouns. In each question, in one of the pairs the plural form is wrong. Indicate the error.

11. (a) life--lives
(b) crisis--crisis
(c) series--series
(d) patty--patties
12. (a) slavery--slavery
(b) poetry--poetry
(c) scenery--sceneries
(d) hoof--hoofs

13. (a) hoof--hooves
(b) grief--grieves
(c) son-in-law--sons-in-law
(d) maid-servant--maid-servants
14. (a) beau beaux
(b) bureau bureaux
(c) genius geniuses
(d) fungus funguses

Directions: In questions 15 to 20 fill in the blanks with the right set of prepositions out of the four given alternatives

15. When all the tests were carried it was found that the patient suffered -- typhoid
(a) out, from
(b) out as
(c) against, from
(d) from about
16. I have been trying to contact him-- the phone but no purpose
(a) as, against
(b) on, to
(c) on, against
(d) from, to
17. The miscreants scattered glass pieces all the place, causing damage the passing vehicles
(a) with, to
(b) over, out
(c) on, to
(d) over, to
18. The entire party almost turned -- him and decided -- his ouster,
(a) with, to
(b) with, over
(c) out, on
(d) against, on
19. The orders to hang him were carried --- the last syllable and there was protest was apprehended
(a) to, as
(b) as, to
(c) as, against
(d) against, as

20. ---all accounts it appears that a conspiracy has been hatched---him.
(a) from; against
(b) to; with
(c) to; against
(d) from; with

Directions: In sentences 21 to 25 there are errors in the use or omission of articles (a, an, the) Alternative sentences (marked (a), (b), (c)) with corrections are suggested Choose the right alternative. If there is no error, mark (d).

21. Rose is beautiful flower.
(a) The rose is a beautiful flower
(b) Rose is the beautiful flower
(c) A rose is a beautiful flower
(d) No error
22. The darkest cloud has a silver lining
(a) Darkest cloud has silver lining
(b) Darkest cloud has a silver lining
(c) Darkest cloud has the silver lining
(d) No error
23. The bird in hand is worth two in a bush
(a) A bird in the hand is worth two in the bush
(b) A bird in hand is worth two in a bush
(c) The bird in hand is worth two in the bush
(d) No error
24. What kind of man is he?
(a) What kind of a man is he?
(b) What a kind of man is he?
(c) What kind of man he is?
(d) No error
25. Like true sportsmen they would give the enemy a fair play
(a) Like true sportsmen they would give the enemy fair play
(b) Like the true sportsmen they would give enemy a

- fair play
(c) Like the true sportsmen
they would give the enemy
the fair play
✓ (d) No error

Directions: In questions 26 to 30 some of the sentences have an error, others have none. Each is divided into three parts marked A, B and C. Tick the part which has the error. If there is no error, mark D.

- 26 No less than forty thousand
A B
people lost their lives in the
C
cyclone. No error.
D
27. The player was profusely
A
garlanded by the people
B
because he had made many
C
goals. No error.
D
28. I live in the boarding which is
A B
situated just near the women's
C
wing of our college. No error.
D
- 29 It has been our custom from
A B
times immemorial to be hospi-
C
table to those who come to
our doors. No error.
D
- 30 Krishna is taller by twelve
A B
centimetres than I.
C
No error.
D

Directions: In questions 31 to 35 one word can be substituted for the given phrase or clause. Out of the four alternatives given,

choose the right one.

31. From father to son
(a) Connoisseur
(b) Hereditary
(c) Ancestral
(d) Adolescent
- 32 Science of changing baser metal into gold
(a) Alchemy
(b) Chemistry
(c) Physics
(d) Magic
- 33 Intentional destruction of racial groups
(a) Genocide
(b) Pesticide
(c) Fratricide
(d) Suicide
- 34 One who hates mankind
(a) Social worker
(b) Misanthropist
(c) Philanthropist
(d) Neurotic
35. One who collects stamps
(a) Postman
(b) Ticket-collector
(c) Philatelist
(d) Numismatist

Directions: In each of the questions from 36 to 40 three sentences marked (a), (b) and (c) have been given. Find out if the verb and the subject agree in number (singular or plural) in each sentence. If there is no mistake in any of the sentences, mark (d).

- 36 (a) When you were here last, you were very fond of reading.
(b) The pleasure of life vanishes when we become old and infirm.
(c) The boys are playing cricket.
(d) No error.
- 37 (a) I am still as fond of books as when you were here before.
(b) The movement of most animals are very swift.

- (c) The following plans have been settled.
- (d) No error.
- 38 (a) The origin of Hindu manners and customs are unknown
- (b) Either James or I am at the top of the class
- (c) Either you or James has done it
- (d) No error
- 39 (a) Neither Manohar nor you were present.
- (b) My comrades as well as I are caught
- (c) You as well as I am going to Simla.
- (d) No error.
- 40 (a) He as well as I is innocent.
- (b) The scholar and the poet are dead.
- (c) The scholar and poet is dead.
- (d) No error

Directions: Questions 41 to 45 begin with direct speech. Three alternative ways (marked (a), (b), (c)) of converting the direct into indirect speech are suggested. Choose the correct one. If all are correct mark (d).

- 41. "Oh, what a lovely day!" she exclaimed.
- (a) She exclaimed that what a lovely day it was
- (b) She exclaimed with pleasure that it was a lovely day.
- (c) She exclaimed with pleasure that it is a lovely day.
- (d) All correct
- 42 "That sounds great," she said, and added, "but will you promise to leave me home before dark?"
- (a) She said that sounded great but that he would promise leave her home before dark

- (b) She said that sounded great but asked if he would promise to leave her home before dark
- (c) She said that sounded great; however, she asked him whether he would promise to leave her home before dark.
- (d) No error.
- 43. "Then let us pack some food and leave," he said.
- (a) He said that in that case they packed some food and left.
- (b) He said that in that case they should pack some food and leave
- (c) He then said that they should pack some food and go
- (d) All correct
- 44. "So it is," he agreed, and asked, "What shall we do to make the most of it?"
- (a) He agreed that it was so and asked what they should do to make the most of it.
- (b) He agreed that it was so and enquired that what they should do to make most of it
- (c) He agreed that so it was and asked what should they do to make most of it.
- (d) All correct.
- 45. "We could go to the beach this morning," she suggested.
- (a) She suggested that they should go to the beach that morning.
- (b) She suggested their going to the beach that morning.
- (c) She suggested that they went to beach that morning
- (d) All correct

Directions: In each of the questions from 46 to 50 fill in the blanks with the best alternative, to complete the sentence.

46. Nowadays, due to the rapid advance of science, medicine and—have reached the peak of perfection.
 (a) science
 (b) operation
 (c) surgery
 (d) technology
47. Capitalism has brought about nothing but misery and—among the teeming millions
 (a) famine
 (b) distress
 (c) danger
 (d) dullness
48. During the Second World War the column played an important part by organising espionage and sabotage.
 (a) first
 (b) second
 (c) third
 (d) fifth
49. Epidemic and - diseases like cholera, typhoid, malaria etc, can be brought under control by arousing healthy consciousness among the people
 (a) dangerous
 (b) endemic
 (c) infectious
 (d) contagious
50. War has proved itself a great - to world prosperity and civilisation
 (a) danger
 (b) help
 (c) calamity
 (d) menace

Directions: In each of the questions from 51 to 55 there is a sentence followed by four alternative interrogative forms. Choose the best form in each case.

51. Of these pictures I like num-

ber one and two best.

- (a) Which of the pictures do you like best?
 (b) What picture do you like best?
 (c) Which picture do you like?
 (d) Which picture do you like best?
52. I will take this
 (a) Who will you take?
 (b) Which will you take?
 (c) Whom will you take?
 (d) How will you take this?
53. I am a doctor
 (a) Who are you?
 (b) Who you are?
 (c) What you are?
 (d) What are you?
54. He is an engineer
 (a) Who is he?
 (b) How is he?
 (c) What is he?
 (d) What he is?
55. He is Mr P K. Roy
 (a) Who is he?
 (b) Who he is?
 (c) What is he?
 (d) What he is?

Directions. In questions 56 to 59 there is a sentence at the beginning of each question, the italicised part of which is an answer to a question. Four such alternative questions (a), (b), (c) and (d) are suggested. Choose the best of these alternatives

56. He is coming *at the beginning of the month.*
 (a) When he is coming?
 (b) When is he coming?
 (c) When he comes?
 (d) When he is to come?
57. Sanjay Gandhi died *in a plane crash.*
 (a) How Sanjay Gandhi died?
 (b) How has Sanjay Gandhi died?
 (c) How did Sanjay Gandhi died?

- (d) How did Sanjay Gandhi die?
58. I would like to speak to Mrs Singh, please.
 (a) Who would you like to speak, please?
 (b) To whom would you like to speak?
 (c) To whom you would like to speak?
 (d) Who would you like to speak to?
59. The students will go to the temple on Tuesday.
 (a) Where will the students go on Tuesday?
 (b) Where will the students go?
 (c) Where the students will go on Tuesday?
 (d) Where the students will be going on Tuesday?

Directions: In questions 60 to 64 select the word which is nearest in meaning to the capitalised word

60. INVARIABLY
 (a) intensely
 (b) freely
 (c) always
 (d) differently
61. VIRTUALLY
 (a) with virtue
 (b) practically
 (c) completely
 (d) falsely
62. IGNOBLE
 (a) useless
 (b) pure
 (c) valuable
 (d) bad
63. MOMENTOUS
 (a) every moment
 (b) very important
 (c) insignificant
 (d) last moment
64. PERSONNEL
 (a) visitor
 (b) staff
 (c) owner
 (d) relating to self

Directions: In questions 65 to 69 the given sentences have the infinitive forms of the verbs in brackets. For each sentence four alternative sets of tenses are suggested. Tick the correct one.

65. If I (meet) him, I (inform) him.
 (a) had met; should have informed
 (b) meet; should have informed
 (c) met; should have informed
 (d) meeting; inform
66. Morris (is) an idle boy before he (come) to this school
 (a) was; come
 (b) is, came
 (c) was; came
 (d) was being; is coming
67. I (see) a strange bird that I (see) before
 (a) see, saw
 (b) saw; will see
 (c) saw; had seen
 (d) will see, see
68. She (pray) that her son (arrive) safely.
 (a) prays; arrives
 (b) is praying, is arriving
 (c) prayed; arrived
 (d) prayed; may arrive
69. After he (take) breakfast, he (go) to school.
 (a) takes, goes
 (b) had taken, went
 (c) is taking, is going
 (d) will take; will go

Directions. Read the following passages very carefully and answer the questions that follow.

There is some statistical evidence to suggest that the link between women's education and late marriages (and, ultimately, effective family planning) is close. In Kerala, for example, where the female literacy rate is 53 per cent in rural and 61 per cent in urban

regions, the average age at which young women marry is nowhere less than 15 years. In three districts the minimum is higher still; just under twenty years. Yet, in Bihar, Orissa, MP, Rajasthan and UP where female literacy rates are very much lower than in Kerala, the average age at which young women marry is well below 15 years. It appears that early and child marriages can be effectively combated only by removing the root causes underlying them. If the socio-economic reality which gives rise to such marriages begins to change, then marriages will be delayed, more or less automatically. This change rather than legislation is our best hope of raising the age at marriage and thereby reducing the number of children born in a family. However, legislation does create a favourable climate for social change, and might even precipitate it.

70. The statistical data presented in the passage emphasises the contrast between
- (a) male literacy and female literacy
 - (b) rural and urban areas in Kerala
 - (c) child marriage and the marriage of young women.
 - (d) the marriage age in Kerala and in North India
71. The main argument of the author is
- (a) more education for women leads to late marriages
 - (b) social progress is greater in urban than in rural areas
 - (c) literacy and social development are high in Kerala
 - (d) legislation will not make family planning succeed
- In this world of human affairs there is no worse nuisance than

a boy at the age of fourteen. He is neither ornamental nor useful. It is impossible to shower affection on him as on a little boy; and he is always getting in the way. If he talks in a childish way he is called a baby, and if he answers in a grownup way he is called impertinent. In fact, any talk at all from him is resented. Then he is at the unattractive, growing age. He grows out of his clothes with indecent haste; his voice grows hoarse and breaks and quavers; his face grows suddenly angular and unsightly. It is easy to excuse the shortcomings of early childhood, but it is hard to tolerate even unavoidable lapses in a boy of fourteen. The lad himself becomes painfully self-conscious. When he talks with elderly people he is either unduly forward or else so unduly shy that he appears ashamed of his very existence.

Yet it is at this very age when in his heart of hearts a young lad most craves for recognition and love, and he becomes the devoted slave of anyone who shows him consideration. But none dare openly love him, for that would be regarded as undue indulgence and, therefore, bad for the boy. So, what with scolding and chiding, he becomes very much like a stray dog that has lost his master.

For a boy of fourteen his own home is the only paradise. To live in a strange house with strange people is little short of torture, while the height of bliss is to receive the kind looks of women, and never to be slighted by them.

72. Why is any talk from an adolescent resented?

- (a) because his talk is unreliable
- (b) because his talk is that of a child
- (c) because his talk is stupid

- (d) because his talk is that of an adolescent, who is at a growing age.

73 What paradox is noticeable in the behaviour of an adolescent at the age of fourteen?

- (a) that he cannot be loved like a child because he is not so, whereas he wants to be loved as he was loved before
(b) that he is either too forward in his talks with the elderly people or too shy with them as if ashamed of his own existence
(c) that his shortcomings are excused when he was a child, whereas they are not excused when he becomes an adolescent
(d) that sometimes he is unconscious of himself and sometimes he becomes very much self-conscious

74 Why is, according to the author, a boy of fourteen a nuisance?

- (a) because he thinks he is quite grownup and behaves like an adult
(b) because he disobeys his parents, elders and teachers and does what he likes
(c) because he is neither ornamental nor useful
(d) because he is a reactionary and rebels against society

75 What may be the most suitable title of this passage?

- (a) An Adolescent

- (b) A Lord of Fourteen
(c) An Adolescent's Behaviour
(d) Psychology of Adolescence

Directions: Fill in the blanks with the alternative which contains the right set of words in the sentences that follow:

76. He will-----no bribe. I have no-----to your officer

- (a) accept; access
(b) except; excess
(c) accept; excess
(d) except; access

77 I have booked my-----in the Flying Mail. The lion is a beast of-----.

- (a) birth; pray
(b) birth; prey
(c) berth; prey
(d) berth; pray

78. He had-----a son. His remarks were quite-----to the occasion.

- (a) adapted; opposite
(b) adapted; apposite
(c) adopted; opposite
(d) adopted; apposite

79. The Bill was passed with-----majority in the Lok Sabha. Blotting paper is used to-----the extra ink dropped by the pen

- (a) absolute; observe
(b) absolute; absorb
(c) obsolete; observe
(d) obsolete; absorb

80 Ram is-----to me than Sham. We should-----ourselves well to avoid cold

- (a) closure; clothe
(b) closer; clothe
(c) closure; cloth
(d) closer; cloth

EDITOR'S NOTE

All possible care is taken to check the information given in this supplement. But we do not take responsibility for stance errors or omissions. Authoritative corrections will be gratefully received.

VERBAL REASONING

- (b), i.e., 60 m. Did you convert $\frac{1}{4}$ of an hour into minutes before working out this problem? If you did, your approach is faulty. $\frac{1}{4}$ of an hour has to be 60 times $\frac{1}{4}$ of a min. Therefore, Rahim will be able to type 60 times the number of pages he types in $\frac{1}{4}$ min.
- (c), i.e., 106.5 ml. 2 paltoos = 6 jaltoos = $6 \times \frac{1}{4}$ fluid ounces. Since one fluid ounce equals 28.41 ml, there will be $6 \times \frac{1}{4} \times 28.4$ ml in 2 paltoos.
- (c), i.e., 15. The given ratios are the same as 3:5:7. The officer with the higher ability will be able to solve 10 problems in 2 hours and therefore, 15 problems in 3 hours. Note the difference between "the higher" and "the highest".
- (a), i.e., x is greater than y. For example, if k = minus 1, x becomes minus $\frac{1}{4}$ and y equals minus $\frac{3}{4}$. Minus $\frac{1}{4}$ is greater than minus $\frac{3}{4}$. You can use any negative value for k, and you shall find the same result, i.e., x is greater than y.
- (a), i.e., 24 km. Half as much petrol again means $1 + \frac{1}{2}$, i.e., $1\frac{1}{2}$ litres. With the new engine, the scooter will cover $36 \div \frac{3}{2} = 24$ km on one litre of petrol.
- (c), i.e., 50 per cent. Let the length and the width of the rectangle be 10 units each. Its area will be 100 sq units. The new area of the rectangle, therefore, has to be 180 sq units. Increased length will be 12 units. To get the required area, the width must, therefore, be 15 units—which is possible only if the width is increased by 50 per cent.
- (c), i.e., 75 per cent. Assume the list price to be 100 and the price at which X bought the set Rs A. Rs A must, therefore, be equal to $3(100 - A)$. This gives us A equal to Rs 75. X, therefore, paid 75 per cent of the list price.
- (c), i.e., fourth year. Self explanatory.
- (b), i.e., 40. Since $BC \sim AC$, 1 must be equal to m. The value of n must, therefore, be 40 since the sum of the angles of a triangle is 180 degrees.
- (d), i.e., 35 times. $\sqrt{8575} = \sqrt{5 \times 5 \times 7 \times 7 \times 7} = 35\sqrt{7}$. Since 2.645

- is the same as $\sqrt{7}$, the square root of 8575 would be 35 times 2.645
11. (b), i.e., 70 m $\frac{175}{125} = \frac{\text{Height of the flagpole}}{\text{Length of the shadow of flagpole}}$

Height of the flagpole would, therefore, be equal to $\frac{175}{125} \times 50 = 70$ m.

12. (d), i.e., 50 The solution has 60 cc of acid and this quantity shall not change even after water has been added. In the new solution, 60 cc of acid must, therefore, equal 40 per cent of the solution, i.e., $60 = \frac{40}{100} \times \text{new solution}$. Therefore, the new solution must equal 150 cc, which is possible only if 50 cc of water is added to the original solution.
13. (b), i.e., $\frac{4\pi}{9}$ A rough diagram as shown below will help. The question amounts to finding out the area contained in 40° of a circle whose radius is 2m. Area of the circle being $\pi \cdot 4$ sq m, the area contained in 40 degrees would be $\frac{4\pi \times 40}{360}$ sq m, i.e., $\frac{4\pi}{9}$ sq m.

14. (b), i.e., 4.5 Since 1 cc of sugar weighs 1.59 g and 1 cc of zinc weighs 7.1, zinc is $\frac{7.1}{1.59}$ times heavier than sugar, which is about 4.5
15. (c), i.e., approximately 218 per cent. Substituting 1 cc of brass for 1 cc of aluminium, the increase in density is 5.9. The percentage increase would, therefore, equal $\frac{5.9}{2.7} \times 100$ i.e., about 218 per cent.
16. (d), i.e., 75 cc approximately. Assume that x cc of copper is required to be mixed with 1 cc of zinc to make the required alloy. In other words $1 \cdot 71 + x \cdot 8.9$ must equal 100 ($2 \cdot 1 + 3 \cdot 1.59$). Solving this equation, we get x equal to approximately 75 cc.
17. (b), i.e., 3:1 Assume that x cc of copper and y cc of magnesium give us a mixture as heavy as zinc. In other words $x \cdot 8.9 + y \cdot 1.74$ must equal $(x+y) \cdot 7.1$. This gives us $1.8x$ equal to $5.36y$, $\frac{x}{y} = \frac{5.36}{1.8}$ which is nearly 3:1
18. (a), i.e., 2.7 approximately. 1 cc each of magnesium, lead and copper in a mixture of these three minerals gives us a mass of $(1.74 + 11.3 + 8.9)$ g, i.e., 21.94g. 3 cc of aluminium weighs $3 \cdot 2.7 = 8.1$ g. Therefore, the mixture of the three minerals is $\frac{21.94}{8.1}$ times heavier than aluminium, i.e., approximately 2.7 times.
19. (a) and (c). (a) is not warranted because we cannot negate the consequent by negating the antecedent. (c) is not warranted since we cannot affirm the antecedent by affirming the consequent. Choice

(b) gives a valid conclusion since it is quite logical to negate the antecedent by negating the consequent.

20. The missing number is 17. The series follows the pattern. $24 \div 3 = 8$, and $8 + 3 = 11$, $11 \times 3 = 33$, and $33 - 3 = 30$, $30 \div 2 = 15$, and $15 + 2 = 17$; $17 \times 2 = 34$, and $34 - 2 = 32$.

21. (b), i.e., no officer who does not do well on training courses is a good officer. The logic of the opening argument is valid, and choice (b) is simply a rephrasing of the conclusion. Therefore, it must be true since the argument is valid. It is possible for some bad officers to want quick promotions since the opening argument does not state that only good officers want quick promotions. In view of this, choices (a) and (d) are wrong. Since it is quite possible for a bad officer also to do well on training courses, we cannot say that (c) is correct.

22. (d), i.e., Z does not do well on training courses, but he is a good officer. The argument clearly implies that all good officers do well on training courses. Choice (d) shows that this is not true; there is at least one good officer who does not do well on training courses. Choices (a) and (b) are both possibly true, but do not weaken the argument. Choice (c) can be deduced from the argument.

23. (d), i.e., Granite. Granite is a mixture and is, therefore, not homogeneous. Since it is not homogeneous, all specimens of granite will not have the same properties.

24. (a), i.e., 324 m. In the first six sec, its velocity is increasing at the rate of 6 m/sec. Its average velocity, therefore, would be $\frac{0 + 36}{2} = 18$ m/s for the first six sec and it shall cover $18 \times 6 = 108$ m.

In the next two sec, its velocity remains uniform, i.e., 36 m/s. It shall, therefore, cover 72 m. In the next 8 sec, its velocity keeps decreasing at the rate of 4.5 m/s till it becomes 0. Its average velocity during these eight sec will, therefore, be equal to $\frac{36 + 0}{2}$

18 m/s. It shall, therefore, cover $18 \times 8 = 144$ m in these 8 sec. Total distance covered by the racing car would be $108 + 72 + 144 = 324$ m.

25. (c), i.e., 20 kg m/s. If we take the momentum of the ball to be 2 kg \times 5 m/s, i.e., 10 kg m/s as positive when it strikes the wall, we shall have to take its momentum as minus 10 kg m/s after it rebounds. The change in momentum, therefore, works out to 20 kg m/s.

NON-VERBAL REASONING

NIMBLE WITH NUMBERS

What is the missing number?

Answer

3. (Count the number of points on each figure.)
From *IMPROVE YOUR OWN I.Q.* by Glenn Wilson

ENGLISH

WRITING A PRECIS

BY RAGHU BHATNAGAR & RAJUL BHARGAVA

In our October '82 issue we discussed the essentials involved in the writing of a precis. We said that it involves "the picking out of essentials through selection based on understanding", and substantiated the statement through a couple of examples. Here are a few more model precis to help you in your exams.

Passage 1

The political ideas which are based upon 'plenty' instead of 'shortage' must be different from those we traditionally call capitalist or communist. When we are able to increase wealth on such a vast scale, problems arise which cannot be solved easily by either of these two rather old-fashioned systems. From a battle for possession of wealth, limited by our present capacity to produce, we are moving into an era where we shall be much more concerned with the means of exploiting our technical resources, with increasing productivity still further, and then of necessity with the problem of the organisation of society for the greatest good.

It is probable that there will eventually emerge a new type of political attitude, healthier and less selfish, which will seek a form in which it can best serve the whole of society, rather than a section of it. Politics, as we have understood them, are in the process of change, and party politics based on old clichés are becoming increasingly irrelevant and distasteful to many of the scientists and technologists who now make up such an important and influential section of every advanced society.

—*The Listener*, Dec 10, 1964

Precis

Changing Trends In Politics

The problems of plenty being very different, they cannot be tackled within the traditional dichotomy of capitalism versus communism. Creation of plenty would involve maximising the use of science and technology and a corresponding desire for the maximal good. With this inevitable

change in our attitudes, politics are bound to change too, bringing about the largest good for the largest number.

Passage 2

This pretence, put forward as the plea that science should be encouraged for its own sake, is a survival of Platonism and of the City-State tradition of slave-ownership. It carries with it the nemesis of its origin. Science thrives by its applications. To justify it as an end in itself is a policy of defeat. The fullest use of science cannot be made by a society in which the pursuit of discovery is the toy of a privileged class, or by a society which restricts the benefits of its application to a relatively small group of individuals. Science advances most rapidly when its benefits are keenly recognised, become widely shared, especially when it brings new prosperity to a previously underprivileged class. It will attain its highest dignity in a classless society which demands the means of an advancing standard of leisure and well-being for all its members. In a classless society ostentatious emphasis on the pursuit of useless activities will no longer be the hallmark of prosperity or good breeding. Discussing whether useless studies are worthwhile for their own sake will be like discussing whether chewing gum is worthwhile for its own sake.

—Lancelot Hogben, *Science For The Citizen* (George Allen & Unwin)

Precis

Science For All

The fallacious arguments advanced in favour of pure sciences as ends in themselves are both outdated and self-defeating. Because what good is a discovery if its beneficial applications are not shared widely, especially by the deprived sections of society? Ultimately what needs to be attained through scientific inventions is a classless society where there is no scope for worthless activities by a privileged few and where the benefits of science are enjoyed by all.

Passage 3

People who take poppy capsules say that the drug makes them feel happy. It also alleviates minor pains. After taking poppy capsules they find they are more relaxed than usual, and can talk more easily to other people. These benefits are open to criticism, however. Instead of changing their surroundings in order to be happier in the real world, such drug-users look for happiness in their dreams. Consequently, their desire to work is weakened, and their lives in the real world do not improve. There are several other objections to the use of poppy capsules.

An addictive drug, as this is, has the disadvantage that the addict suffers when the effect of the drug wears off or when supplies cannot be obtained. The people who supply such drugs sometimes adulterate them with a more addictive drug like heroin. This has very damaging results, and may cause death.

The few points in favour clearly do not compensate for the disadvantages of poppy capsules, and they should be forbidden. (They already are in most countries.) Those who sell the drug should be prosecuted, and those who have taken poppy capsules must be examined by a doctor. If the habit is already widespread, the dangers of the drug should be made clear to everyone, especially the young.

—Keith Purvis, *Read And Note* (Heinemann)

Precis

Drugs: A Temporary Escape

To a drug addict poppy capsules offer an easy escape from unhappiness and physical pains, not by changing his environment but by making him live in a world of dreams, thus affecting his capacity for work and for improving his condition. Moreover, an addict suffers considerably in case of non-availability of the drug and also when it is adulterated. A few advantages of poppy capsules notwithstanding, their sale must be restricted and people warned against their dangers.

INTERVIEWS

HOW TO GIVE THEM

BY EDGAR THORPE

It's not enough to display your knowledge acquired from books, newspapers and magazines. The interview board also assesses your personality for psychological traits and sociological qualities before it comes to the vital decision. To ensure that the decision goes in your favour, some invaluable hints in this second instalment.

In our March '83 issue, while discussing general personality traits and ways of improving them, we took up the first one—appearance—and dealt with some of its important aspects: clothes, hairstyle, facial expressions and way of walking. We now take off from where we left...

(e) Your way of sitting

When you are asked by the chairman to take your seat, sit comfortably in a relaxed way. Do not change positions frequently as it will give the interviewer an impression that you are not at ease, and probably lack self-confidence.

Your posture plays an important part in many snap personality judgments. A poor posture may give the impression that you are not confident enough and have an inferiority complex. Therefore, sit erect and occupy the complete seat of the chair. A candidate sitting just on the front edge, with a shy look and downcast eyes cannot impress interviewers, however highly qualified and smart he may be. He cannot generate a rapport with the authorities or succeed in the interview. Therefore, it is essential to sit, behave and talk confidently.

(f) Your way of leaving

When you get up and leave the interview hall, you are leaving behind something which may have an everlasting impression on the committee members. Convey

dence in your personality.

Points to be noted

- After the interview, when the chairman asks you to leave, get up and thank all the members present.

- If the chairman extends his hand, take the opportunity to shake hands with confidence. This will prove that you don't have a complex.

- Leave the chair calmly and put it back in its proper position. Turn to leave portraying an upright bearing.

- Walk confidently giving the impression of having achieved the desired goal.

- Do not forget to close the door.

- While leaving the room, do not look back.

This last leg of the interview procedure can be very paying as there are marks for this as well. Your carelessness here may negatively affect your overall performance in the interview.

Speech Mannerisms

As said earlier, the interview is an oral examination to assess your personality. Your speech mannerisms, therefore, assume much importance. They are a medium of communication and denote cultural and environmental influences on your personality. Ben Johnson's famous quotation: "Speak that I may judge thee," comes very true in interviews.

...judgments to make on the following attributes of your speech: the clarity of voice, its tone, your speed of speaking and speech mannerisms and gesticulation.

If you clip syllables, run words together or pronounce them incorrectly, you shall merit criticism of being careless or even ignorant. Modulate your voice when you speak to someone. Your effort should be to make him understand your viewpoint.

The tone of your voice should be lively and audible. Cultivate the habit of having a firm, crisp and ringing voice.

Make every effort to improve your diction and vary your voice to bring out important points. Keep smiling and speak clearly with balanced speed.

Closely related to your speech mannerism is gesticulation. It is a posture/movement of parts of the body or an action expressive of sentiment or passion intended to show your inclination or dissatisfaction towards something.

An interview is a type of psychoanalysis of the candidate through which your maturity, emotional stability, tactfulness, self-discipline, initiative, conscientiousness, integrity, consistency of thought, tough-mindedness and adaptability, and ability to do team work, are observed. Effective gesticulation will help you in convincing the interviewer about these qualities. However, gestures should be natural and matching the occasion.

Avoid rubbing your hands, or fiddling with your buttons, hair or your file, and things on the table before you. This may give the impression of your being uneasy, nervous or shy. Therefore, do not make gestures which may leave a negative influence on the interviewer.

How to improve your speech

The best way to improve your speech, its tone and clarity, is to listen to your own voice. Record a paragraph, say, of a newspaper editorial or any news item, in a tape-recorder. Then play the tape and note the defects in diction, pronunciation and tone. By repeating this every day, within a short time you will find that you have developed clarity and the correct way of speaking. Another way to improve your pronunciation and tone is to listen to radio or TV news bulletins.

Also, remember that kindness and courtesy cost nothing, yet they help buy things that are priceless. Make "please" and "thank you" the two essentials of your vocabulary.

Points to be noted

- As you desire that questions put to you during the interview should be easily understandable to you, so the interviewers expect that answers given by you are equally understandable to them. Therefore, your tone, pronunciation and emphasis on word phonetics should be such that they follow every word you speak.

- Use simple words which you can pronounce easily and use correctly. Verbose language, flaunting difficult words will not impress the interviewers.

- Be precise in your answers. Do not give unnecessarily long answers which may put you off the track. In other words, answer what is asked and avoid exposing yourself unnecessarily.

- Continue with what you started to say till the finish. Do not stop after speaking one or two sentences.

- Don't be in a hurry. It is rightly said that "Hurry spoils the curry". Weigh the words and sentences well to bring home your viewpoint.

Self-confidence

The dictionary defines the term as having full belief and trust in oneself. It also means self-reliance, self-esteem, self-respect, or self-belief. Self-confidence is one of the most desirable attributes of a good and strong personality. It generates a feeling that "you can do it too". It helps you overcome doubts, banish fears and create a healthy attitude towards everything in life. It is thus the supreme guiding force for the onward march towards betterment and a successful career.

Having emphasised the importance of this abstract psychological characteristic, the question which now arises is: How should you inculcate it? This quality cannot be developed overnight, but many psychologists have given suitable prescriptions for it which have helped several people achieve it. You too can develop confidence by following these guidelines:

1. The antonym of confidence is fear. Fear is violent and crippling. Fear robs you of courage and cripples your reasoning power. It

adds to tension and leads to a proclivity that contributes towards failure. You need courage and confidence to overcome fear.

2. Self-confidence and will are correlated. Success comes to you only through your will to succeed. Failure results when your will-power is not strong enough. Therefore cultivate the habit of a strong will and depict self-confidence -- then you are sure to win the battle.

3. A positive attitude is central to self-confidence. It can be depicted through using words like:

"I am sure sir."

"I feel confident about it."

"I have every reason to believe."

"I have confidence in myself."

4. Try to know your shortcomings and overcome them. If you are shy or suffer from complexes, you can get rid of these by practising the very opposite attitudes i.e., courage and confidence, and by trying to be social.

Mental Alertness and Consistency

Mental Alertness

Alertness means your preparedness and quick understanding. You should be able to understand the questions put to you in the minimum possible time. This includes quickness of thought and observation, grasping the other person's viewpoint, response and observation, as well as readiness with suitable replies and presence of mind.

Alertness is an important quality of an officer that enables him to control. The interview board tests the mental alertness of the candidate through various ways: asking confusing questions, interrupting when the candidate is trying to impress his point so that his chain of thought breaks, or even by asking odd questions. Alertness here does not mean answering spontaneously without the application of all mental faculties. It means quick understanding of the problem and quick responses to dispose of the same. The candidate should be mentally vigilant and possess a quick and sharp observation power. He should not betray nervousness or a confused attitude.

Points to be noted

- To develop mental alertness you need to have concentration and to give complete attention to details. To facilitate this, you can form the habit of concentrating on

radio news bulletins and comprehending the news items. As news items are relayed at a high speed, your efforts to comprehend them will help you develop concentration and mental alertness.

- To develop presence of mind, you need acute observation power. For this, you should minutely watch things around you.

- As soon as a question is asked, try to understand it quickly and reply naturally.

An example will illustrate what is meant by mental alertness:

Chairman: "Please take your seat."

Candidate: (*Looks around, and on finding the chair in a separate corner, pulls it before the chairman's table with extreme confidence and sits down, saying*)

"Thank you, sir."

Chairman: "How did you come to this place?"

Candidate: "By taxi, sir."

Chairman: "What was the number of the taxi you hired?"

Candidate: "Sir, PNY-4027."

Chairman: "Why did you note the taxi number?"

Candidate: (*Spontaneously replies*): "Because it is my habit to note minute details. Sir, I hope you will agree that sometimes this helps a lot in day-to-day work."

Chairman: "That is fine. You may go now."

Candidate: "Thank you, sir."

(*Leaves the room with confidence*)

Consistency

Another point related to mental alertness is consistency. It involves firmness of opinion, mature thinking and an attitude not guided by emotions and external impressions. Your opinion should not change and you should try to stand firmly by what you have expressed. The interview board tries to judge your consistency by putting a question in the beginning and repeating it later in a different form. Suppose that you are asked about your opinion on any recent government policy. If you had earlier replied in the favour of the government's decision, stand by your first viewpoint and do not change even if your opinion is criticised and not appreciated by the members of the board. You should be consistent not only in your opinions but also in your temper, actions and thoughts.

ental Rights as may be specified in that order as well as all pending proceedings for the enforcement of the rights shall remain suspended for the time the Proclamation operates or for such shorter time as may be specified in the Order (Art. 353, 354, 250, 358, 359). The Constitution demands from the Union to protect every State against external aggression and internal disturbance and to ensure that the government is carried on in accordance with the provisions of the Constitution (Art. 354).

Proclamations of Emergency and Presidential Orders. On October 26, 1961, the President made the first Proclamation of Emergency under Art. 352 on the ground that the security of India was threatened by the Chinese invasion. On November 3, 1962, a Presidential Order was made under art. 253 suspending the rights conferred by art. 21 and 22. On

November 11, 1962, Art 14 was added to the Presidential order. The Proclamation of Emergency was revoked on January 10, 1968.

On June 25, 1975, the President made a third Proclamation of Emergency under Art. 352 on the ground that the security of India is threatened by internal disturbances. On June 27, 1975, a Presidential Order was made under Art. 359 suspending the rights conferred by Art. 14, 21 and 22 and on January 8, 1976, Art. 19 was added to the order. This order has also been revoked.

President's Rule. The President may, on receipt of a report from the Governor of a State or otherwise, if satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the Constitution, by Proclamation assume to himself all or any of the functions of the Government of the State and all or any of the powers vested in the Governor, declare that the powers of the Legislature of the State are exercisable

by Parliament except that the President cannot assume the powers vested in the High Court. This Proclamation is popularly known as President's Rule, and all such Proclamations have to be laid before Parliament within two months and approved, obtained to continue the Proclamation. Such a proclamation approved by the Parliament ceases to be in operation after a period of six months unless revoked earlier and may be renewed for a period of six months at a time but not beyond a total period of three years. (Art. 355-357)

Financial Emergency (Art. 360). If the President is satisfied that the financial stability of the country is threatened, he may, by a Proclamation, make a declaration and in consequence the executive authority of the Union is considerably extended and it is empowered to take suitable action.

SCIENCE

THE LATEST

NEW ELECTRONIC TYPEWRITER

Smith-Corona Corporation has devised an electronic typewriter different from the standard electro-mechanical typewriters. Pulleys, lever and wires crowding the normal typewriters have been replaced by an ultrasonic rod and a 'microelectronic' brain.

The ultrasonic rod is a steel bar with teeth corresponding to positions on the keyboard. When a key is pressed, a simple mechanical sequence causes a particular tooth on the rod to be struck (diagram). Ultrasonic waves then travel towards the rod ends where they are converted into electrical impulses.

The typewriter's 'brain', a single very large-scale integrated (VLSI) chip with an equivalent of over 30,000 transistors, deciphers these signals. By noting the time-lag in the pulses, it decides which letter to print.

This new system reduces the typing errors to a minimum. It also has a memory provision for the last 10 letters typed. It can attain speeds of upto 800 wpm.

WASP: BIOLOGISTS' BOON

How would you feel if you had spent 100 years studying the forest from hovering helicopters— and suddenly were allowed to land and walk freely among the trees. Ecstatic, no?

Replace the forests with our oceans, the licence to walk freely with a yellow diving suit called

Wasp, and it "may change our ideas on how the ocean systems work".

Wasp is the first one-person, self-powered submersible system which has opened "a new generation of oceanographic research" in the Santa Barbara Channel off California Coast. It is a creation of two biologists Bruce Robison and Alice Aldredge of the University of California, Santa Barbara (UCSB). Wasp gets them a \$2,56,000-grant from the National Science Foundation for a one-year pilot study on the utility of this new technology system. The pilot study will take Robison and Alice, in turns as deep as 610 m to the ocean floor. Their goal is to investigate the behaviour of midwater animals that inhabit the oceans.

Wasp is a diving gear as radical and innovative as the space suit in which man first walked on the moon. Biological oceanographers had for all purposes reached the limits of what could be discovered with their traditional tools such as nets, traps, scuba, cameras and even submarines. "Most of these techniques," says Robison, "allowed us only a remote perspective on the animals we study because we were stuck at the surface of the ship deck. Now we can observe deep-sea animals directly and with relative ease."

With Wasp's articulated arms and manipulators, Alice will be able to collect gelatinous zoo plankton and other creatures that either slip through the nets dropped by ships or are damaged by them. Previously impossible studies on the behaviour of marine animals— such as feeding, mating, activity levels and interaction between species— may now be made.

The pressure sealed, monocoque aluminium suit is equipped with thrusters that enable the diver to move silently in any direction or to hover in one spot for a prolonged period. Wasp is a boon for biologists working in mid-water— that dark cold region between the bottom and the sunlit upper zone.

Compressed air tanks attached to

the suit allow the diver to stay underwater for eight hours, breathing freely without using a mouth-piece, in a plexiglass dome that permits 360 degrees of vision. Wearing night-vision goggles, the diver—without being seen— may flood the surrounding water with red light and observe marine animals, sensitive only to blue-green light.

New waves are being made by Wasp in oceanographic research. Never fear mariner, this Wasp won't sting. But it will help find what you never suspected.

FINGERPRINTS REVEAL SEX

A man's fingerprints are different from a woman's. This fact is being used by an anthropologist to help unravel the nuances of commerce in the ancient Teotihuacan culture of Mexico.

Warren Drake Barbour of SUNY, Buffalo, has recently been examining fingertip patterns imprinted in clay relics found in the Mexican highlands. His preliminary conclusions are that the pottery craft underwent a series of changes as the society evolved.

The oldest relics, from about 200 B.C., show women to have been the artisans, suggesting that during the formative years of Teotihuacan society, pottery was a purely domestic pursuit. About 350 A.D., print patterns were no longer female but primarily male. Barbour suggests that by this time, with the expansion of the city and the development of craft guilds, pottery had become a commercial enterprise chiefly employing men. Around 700 A.D., there was another shift—the prints were mostly women's and children's.

This implied that the society experienced a breaking apart of its economic and social structure with clay work shifting back from the marketplace and once again becoming a household craft. Around 750 A.D., a great fire destroyed the city and its culture.

Barbour was a student when he first wondered if the prints on Teotihuacan artifacts could be used to learn about the artisans. He later found out that finger prints reveal sex difference: the ridges in female prints are narrower and more uniform in width than the ridges in their male counterparts.

38th Thoroughly Revised 1983 Edition
with Multiple Choice & Objective Type Questions

I.A.S. GENERAL STUDIES

(For Civil Services Preliminary Examinations and other Competitive Examinations like NDA, CDS, P.Os, AGF & PCS, etc.)

2nd Thoroughly Revised Edition 1983

RONESH PURI & RAJIV RAIZADA

In this thoroughly revised second edition, polity has been specially enlarged in keeping with the added emphasis being paid to it. Similarly, World Geography and Indian History bear a new look in new ways than ever. Census 1981 and Sports and Games Developments have also been emphasised. Questions asked in various competitive examinations are added in relevant chapters.

Pages 366 Rs. 25.00

ARITHMETIC Subjective and Objective (For Competitive Examinations)

R. S. AGGARWAL

This book has been prepared, keeping in view the psychology and needs of the students appearing in various competitive examinations. Each chapter gives necessary definitions and formulae. Standard methods of working rules have been fully illustrated.

Pages 304 Rs. 20.00

GENERAL ENGLISH VINOD KUMAR

Written exclusively for the competition-oriented student, this book gives a solid foundation in the whole art of English writing and speaking. Apart from informative chapters on Precise, Letter, Reports, writing and debates, it has a very useful chapter on logical examination.

CAREER COUNSELLING

G.J. UNNITHAN
 Director, Students' Advisory Bureau, University of Rajasthan

I am a graduate engineer employed with PWD. I want to complete an external course as Master of Civil Engineering under the guidance of local engineering college professors. I believe that the Jawaharlal Institute of Continuation of P.G. Studies, Hyderabad, conducts such courses. Can you give its full name and address alongwith the necessary minimum qualifications?

K.H. Kamaladinni, Ponda (Goa)

The Postgraduate School of Continuing Technological Education, Jawaharlal Nehru Technological University, Hyderabad-500 488, AP, allows external candidates for M.S. and Ph.D. degrees in Civil, Mechanical, Electrical, Electronics and Telecommunication Engineering (M.S. and Ph.D.), Maths, Physics and Chemistry (Ph.D.). Candidates for these external degrees must have passed the required B. Tech/B.E. or master's degree in the concerned faculty and must have been working at least for one year in Scientific Institution/ Laboratories / Research & Development Organisations/Industrial Establishments / Government Departments, engaged in technology-based activities. Application forms and information can be obtained from the Director of the school, usually in March/April.

I passed M.Sc. (Atmospheric Physics) from the University of Roorkie, UP, in 1978 with 55 per cent marks and got a second division (55 per cent) in B.Sc. (pass course). At present I am a Senior Observer in India Meteorological Department. I appeared for the

UPDATED

With reference to *Career Counselling* (April '83) regarding the scholarships for the Patrice Lumumba University, Moscow, I'd like to mention some recent changes. These scholarships have been discontinued by the Government of India. Only Russian scholarships for PG studies are awarded to Indian candidates.

Meteorologist Grade II exam but did not get through. Now I am 28 years old. What prospects do I have in India or abroad?

A.K. Sharan, Aurangabad

It is understandable that you feel disheartened because you could not pass the Meteorologist Grade II examination and that you are thinking about other career possibilities. However, taking your age into consideration as well as the prospects in the Meteorological Department, we would strongly advise you to reappear in the examination. In case you have three years experience and wish to apply for employment abroad, you can write to the Foreign Assignment Section, Department of Administrative Reforms & Personnel, North Block, Central Secretariat, New Delhi-110 001, with a 10×22 cm, self-addressed stamped (80 p) envelope.

My friend has passed the Directorate of Marine Engineering Training (DMET) from Calcutta and is now working. He belongs to the first batch which was recognised by AMIE in 1981. Is he eligible to compete in the Civil Services Exam?

Anil Singh, Lucknow

The eligibility rules for the Civil Services Exam mention that 'candidates possessing professional and technical qualifications which are recognised by government as equivalent to professional and technical degrees would also be eligible for admission to the examination'. Marine engineers trained by the Directorate of Marine Engineering & Training pass examinations conducted by the Directorate General of Shipping of the Government of India. Contact the Secretary, Union Public Service Commission, Dholpur House, New Delhi, for further clarifications.

I am a B.Sc. pass, physically handicapped girl. Now, I want to take up either Chartered Accountancy, Cost Accountancy or Personnel Management as a career. I want to know whether my disability will prove to be a handicap in getting admission. Is there any

college of correspondence where I can study any of these courses?

Anamika Bharti, Gaya

Physically handicapped people are not debarred from careers in Chartered Accountancy, Cost Accountancy or Personnel Management. However, the extent of their handicap will have to be taken into account before a decision is taken. Preparation for Cost Accountancy can be done through correspondence from the Institute of Cost and Works Accountants of India, 12 Sudder Street, Calcutta-700 016. This is a two-year course. While preparing for the intermediate and final exams of the Institute of Chartered Accountants of India, Indraprastha Marg, New Delhi, candidates have to be employed as articled clerks in recognised chartered accountancy firms. The National Institute of Personnel Management, Apeejay House, Block B, 5th Floor, 15 Park Street, Calcutta-700 016, conducts a post-graduate diploma examination in Personnel Management for external candidates. We hope that this information can help you to take a decision. Most State employment Bureaux now have special cells for physically handicapped persons. You may contact the employment exchange in your home town. □

NOTE TO READERS

Before rushing in your career problem, check if it can be solved by looking up our sections on *Careers* or *Career Counselling* in the earlier issues. Space is limited, the mail received staggering. Letters chosen are those of general interest or in particular cases where the information is hard to find or has not been published before. Many students ask for a personal reply. Sorry, this is not possible. So please don't send postage or envelopes. Make your queries specific and brief. Send them to Career Counselling, Career & Competition Times, 10 Daryaganj, New Delhi-110 002. Your letters should be accompanied by the coupon.

BOOK DIGEST

TOURISM DEVELOPMENT PRINCIPLES AND PRACTICES

by A.K. Bhatia, published by Sterling Publishers, New Delhi, pages 354 Price Rs 110

In India there has been rapid development, expansion and establishment of hotels due to inflow of tourists, but there are very few books which give the latest data on this increase in tourism. There are, however, many certificate and diploma courses in tourism being held in Delhi. These courses are popular due to their employment potential.

In this book, the author covers different facets of this interesting and exciting career. He traces the origin, growth and development of tourism in the first two chapters and goes on to discuss the various motivating factors that promote travel.

The book also deals with the important features of a special organisation set up by the United Nations Conference on International Travel in 1963, for controlling, directing and promoting tourism in developing countries. The author gives data on tourist inflows into different countries but the figures are quite outdated, covering only up to the year 1976.

The latter part of the book, i.e., chapters 6 to 13, is more interesting and perhaps useful also. This section deals with the development of tourism, assessment of tourist demand and supply, and financial, territorial and environmental planning.

Marketing of tourism is another important facet of development. Some of the important questions this book answers are: What is tourism? What are its special features? How to identify and promote tourists? The various methods and media which should be used for publicity have also been dealt with.

The author tries to educate the reader on the economic and social significance of tourism and familiarises us with the much-heard-about international organisations like International Union of Official Travel Organisation (IUOTO), Pacific Area Travel Association (PATA), International Air Transport Association (IATA), International Civil Aviation Organisation (ICAO) and other agencies. He then describes the role of travel agencies in tourism and the method and legal formalities for opening an agency. He also discusses the tourist houses and hotels for tourist inflow but does not give a list of hotels and their day tariffs. In the end he gives a brief resume of tourism in India. The appendix gives a glossary of terms and addresses of organisations conducting tourism courses both in India and abroad.

It is a good reference book for students who have taken up a course in tourism and an interesting study for anyone who would like to know more about the subject.

AN ATLAS OF THE MUGHAL EMPIRE

by Irfan Habib, published by the Oxford University Press, pages: 105; price: Rs 400

This unusual publication comes as a boon to the student of medieval Indian history. Following the cartographic studies of the same period by Henry Elliott and John Beames, Professor Habib (one of this country's foremost historians) has turned to the neglected realm of historical geography. His *Atlas Of The Mughal Empire* is more ambitious and comprehensive than the earlier efforts mentioned above.

It is monumental in size and content. There are 32 large-size maps in colour, the first of which is a political map of the

Mughal Empire at its zenith (not necessarily in terms of extent of territory) around 1605 A.D. and the second is of the economic development and distribution of resources and manufactured goods.

For the remaining 30 maps, a novel format is introduced. Each political map of a 'subah' (or province) is followed by a map of the same region indicating its economic activities. The political maps show not only the boundaries of 'subahs' and their 'sarkars' (divisions) but also the important towns and settlements associated with administration. The economic maps provide substantial information on trade routes, canals, ports, mines, resources such as minerals and crops, manufactured goods, and a few interesting sidelights can be gauged by the penetrating student. These include incidental information on imperial hunting grounds and the distribution of rare animals, the extent of forestry and degree of economic development within each 'subah'.

Extensive notes in 66 triple-column pages provide varied information (such as revenue returns and languages spoken in the various regions) and references. The author has referred to a large range of sources which include histories, manuscripts, documents and travelogues in Persian, Arabic, the regional languages, and has also drawn from European accounts of the period.

The only discrepancy is the absence of a comprehensive and general review of the period, (which would, for example, include the rationale behind the method of revenue assessment and collection in the provinces) which could have followed the introductory chapter on how to use the maps. There is, however, no denying that this is a formidable piece of thorough scholarship.

PREETI SINGH & ARNAB ROY

March 3 Assam's People's Liberation Army chief Aban Bezbaruah arrested.

March 4 Conference of non-aligned foreign ministers fails to resolve Kampuchean issue; consensus bid continues.

March 5 Railway Minister A.B.A. Ghani Khan Chaudhuri announces marginal relief in railway freight and fares.

Troops stage flag march in several areas in Assam as tension continues.

March 5 Non-aligned foreign ministers decide to keep Kampuchean seat vacant, issue sent back to coordinating bureau for consideration.

Delayed reports reveal at least 200 people massacred in Assam in mid-February.

No more talks with Centre, says Akali Dal President Sant Harchand Singh Longowal.

Malcolm Fraser Government voted out in Australia.

March 6 Outgoing Chairman of Non-aligned Movement, Fidel Castro, and other leaders arrive in New Delhi.

Assam Government effects sweeping changes in administration, senior civil and police officials transferred, some others "granted" leave.

Chancellor Helmut Kohl's Christian-Democrat-Liberal coalition voted in in West Germany.

March 7 Non-aligned Summit opens, PM Mrs Gandhi becomes NAM Chairperson.

March 8 Accord reached on Afghanistan issue at NAM; Summit focus shifts to debt burden of developing countries.

PM holds wide-ranging discussion with several heads of government; expresses anguish over Lebanon situation.

Police arrest several scientists in Assam "for waging war against state and inciting communal violence"; 15 dead in Assam in firing and clashes in the past three days.

March 9 Pakistan President Zia-ul-Haq calls for solution to Kashmir problem at the Non-aligned Summit.

Troops seize arms and ammunition in central Assam.

March 10 Indo-Pak joint commission to be set up to improve ties; foreign ministers of the two countries sign accord.

NAM leaders reach accord on Diego Garcia draft; Iran-Iraq issue proves intractable.

March 11 NAM reaches accord on all

issues except Gulf war and venue for next summit; support for freedom struggles reiterated in draft declaration.

March 12 Seventh Non-aligned Meet ends; NAM finally reaches accord on Gulf war and next venue.

Assam quiet but for sporadic cases of arson, troops take control of part of Sibsagar town.

Longowal announces three-phase programme to intensify Akali agitation.

March 13 All heads of state depart.

Tension prevails in Assam, one killed in Dibrugarh in clash between two linguistic groups.

March 14 Union Home Minister P.C. Sethi rules out dissolution of Assam Assembly, high panel to inquire into Assam killings to be set up soon.

OPEC announces 15 per cent cut in oil price.

March 15 Gauhati and 10 other areas in Assam declared "disturbed"; army takes overall charge of law and order.

Sporadic violence in Calcutta follows West Bengal Government's enforcement of tram and bus fare hikes.

March 16 Assam CM's nephew stabbed to death in Tinsukia, upper Assam; Assam agitation leaders call for total non-cooperation on March 21, scheduled date of Assam budget session's commencement.

March 17 Troops stage flag march in disturbed areas in Assam as Army Chief K.V. Krishna Rao arrives in Gauhati on two-day visit.

March 18 200 houses set on fire and two persons stabbed to death in Assam during last two days; 1,113 persons killed, 2,000 "missing" in Assam disturbances, says Assam CM Hiteswar Saikia.

- Dual pricing of kerosene scrapped; single price restored with 10 paise hike.

March 19 Six people killed in Assam in fresh outburst of violence.

March 20 25 killed, 500 houses razed in renewed violence in Assam's Darrang district.

Chief Ministers of four southern states form council to work out strategy to solve common problems.

March 21 Assam Assembly meets; Governor Prakash Mehrotra announces high-level inquiry into Assam disturbances; curfew imposed in Darrang district; normal life disrupted in some areas due

to 24-hour non-cooperation call by Assam agitation leaders.

Unilateral government steps if Akalis do not respond, Sethi announces in Lok Sabha.

Second Antarctica expedition returns.

March 22 Police arrest several agitation leaders in Assam.

Extremists kill one and injure three in Punjab.

March 23 Death toll in sporadic incidents during last 48 hours rises to 15.

Delhi Transport Corporation employees strike work, large-scale violence and arson result in a conductor's death and injuries to 230 others.

Pakistan celebrates National Day with a parade of sophisticated fighting planes.

Nirankari Baba murdered after apparent shot dead.

March 24 Centre constitutes anti-racket commission, headed by former Justice R.S. Sarkaria, to review Centre-State relations.

March 25 Longowal wins post appointment of Sarkaria Commission.

March 26 Congress(S) merges with Congress (I) in Bengal.

March 27 Assam agitation leaders decide to suspend stir from April 1, and devote themselves to relief and rehabilitation work.

March 28 12 people killed in Assam in sudden revival of violence; nine political parties present joint appeal for restoration of peace in the state.

PM announces 10-crore drought relief for Tamil Nadu.

March 29 Assam Government orders police to shoot at sight anyone found indulging in acts of violence; death toll in last 48 hours put at 15.

March 30 Explosions kill 11 in Assam as PM begins three-day visit.

March 31 Curfew imposed in Aligarh following clashes; two dead.

Mrs Gandhi visits worst-hit areas of Assam as blast toll rises to 18.

April 1 Punjab alerted over Akalis' planned road blockade on April 4.

Aligarh calm as curfew is relaxed.

April 2 Over 600 Akali leaders held in Punjab in pre-dawn swoop to pre-empt road blockade programme of April 4.

Assam Ministry expanded with 16 more ministers sworn in.

A.P.

POLITICAL SCENE WINDS OF CHANGE

The recent political scene saw attempts to curb dissidence in the Congress (I), the merger of the two Congresses in West Bengal, the formation of Maneka Gandhi's new party and a change of government in Meghalaya. The stepping up of dissident activity in a number of states, notably Bihar, Madhya Pradesh, Gujarat, Rajasthan and Orissa, was causing concern to the Congress(I) leadership. In early March, critics and supporters of the Rajasthan chief minister traded threats and abuses at a meeting of the state legislature party, and dissidents in Madhya Pradesh attacked the chief minister and the state government in the Assembly on no less than four occasions.

The party Working President, Kamalapati Tripathi, had in February warned dissidents not to come to New Delhi with their grievances, and not to air them in public or in the press, but only in party meetings. He now followed this up with an expression of his disgust at the behaviour of dissidents in state assemblies. "The floor of the legislature is not a party forum. Inside the Assembly, Congress(I) MLAs are expected to behave like disciplined soldiers of the party," he said. This advice was repeated at the meeting of PCC(I) presidents of all states and Union territories at New Delhi by party President Mrs Indira Gandhi, who at the same time stressed the need for those wielding power in the states to listen to the genuine grievances of partymen and attend to them. The Congress(I) central leadership reportedly decided that none of its chief ministers will be disturbed in view of the fact that Assembly and parliamentary elections are due in 1985.

The West Bengal unit of the Congress (S), headed by Priya Ranjan Das Munshi, merged with the Congress(I) on March 26. The merger took place at a time when the Congress(S) Working Committee was meeting in Calcutta. For the last few years Das Munshi had been a source of strength to the Congress(S) just as A.K. Antony

was in Kerala. Now both these rallying points in the two states have joined hands with the Congress (I).

The alliance of the Congress (S) with the Marxists in the Assam election was not to the liking of the party's West Bengal unit, where Das Munshi has been fighting the Marxists in association with the Congress(I). And the cooperation of the two Congress parties in West Bengal was not to the liking of the Congress (S) leadership. These differences led to the parting of ways. However, the Youth Congress(S) and the Chhatra Parishad(S), the youth and state student wings respectively of the Congress (S), have resolved to maintain the identity of the party in the state.

Maneka Gandhi announced on March 26 the formation of a new political party, the Rashtriya Sanjay Manch, declaring it would contest the next general elections. The Sanjay Vihar Manch will continue to function as the youth wing of the party. The party will adopt a centrist approach and will cooperate with other parties—except the Congress(I). She claimed a membership of eight lakhs for the party, whose inaugural convention was held in New Delhi on April 3.

In Meghalaya, Chief Minister B.B. Lyngdoh resigned after the defeat in the Assembly of his United Parliamentary Party (UPP) coalition government on a no-confidence motion on March 31. A 14-member coalition ministry headed by W.A. Sangma, state Congress (I) leader, was sworn into office on April 2. The other partners of the coalition are the All-Party Hill Leaders Conference, Hill State Peoples Democratic Party and Public Demands Implementation Convention. These same three parties had comprised the UPP coalition, but it did not take long for cross-voting and defections to begin.

CENTRE-STATE RELATIONS CAUSE FOR CHEER

The long-standing demand of almost all opposition parties and the non-Congress(I) chief ministers for greater autonomy for the states was helped by the Prime Minister's statement that there was no threat to the unity of the country, the decision by four southern chief ministers to set up a joint council, and the setting up by the Centre of a commission to review Centre-state relations. Amidst cheers from all sides, Prime Minister Indira Gandhi said on March 1 in the Lok Sabha:

"This country is not going to break up. This Parliament, my party, and I am sure all parties here, will never allow that to happen."

The four non-Congress (I) Chief Ministers, Ramakrishna Hegde (Janata) of Karnataka, N.T. Rama Rao (Telugu Desam) of Andhra Pradesh, M.G. Ramachandran (AIADMK) of Tamil Nadu, and D. Ramachandran (DMK) of the Union territory of Pondicherry, who met at Bangalore on March 20 at Hegde's initiative, decided to form themselves into a joint council. The fifth southern Chief Minister, K. Karunakaran of the Congress (I)-led United Democratic Front in Kerala, was also invited but excused himself because the State Legislature was in session.

The purpose of the council is to seek amendment of the Constitution to re-define Centre-state relations, and transfer of more fiscal powers from the Centre to the states including the power to fix the procurement price of agricultural produce. It would meet in different state capitals to discuss various issues. The chief ministers emphasised that the council was not intended to confront the Centre, and the exercise in fact would strengthen the Centre and the country as a whole, since stronger states meant a stronger Centre.

They were hopeful that the chief ministers of other states, to whichever party they belonged, would welcome the idea of a council of all of them. The idea was that they should settle their mutual problems among themselves as far as possible, and go to the Centre only when necessary.

The formation of the council was welcomed by the opposition parties, including the BJP, Janata, CPM, CPI and DMK. However, Charan Singh, President of the Lok Dal, feared that it may weaken the Centre and said the northern states should also have been invited. Speaking for the Congress(I), AICC(I) General Secretary C.M. Stephen sharply criticised it, and Karunakaran described it as dangerous and seditious. The Jammu and Kashmir Chief Minister, Farooq Abdullah (National Conference), welcomed the suggestion for a conference of chief ministers of northern states to discuss common problems.

In the wake of this move, and obviously in response to the growing demand by the states for more equitable distribution of resources, Mrs Gandhi announced in both Houses of Parliament, on March 24,

"However, in a sudden development on April 5, Ram Lal was asked by the Congress (I) central leadership to step down from the chief ministership of Himachal Pradesh. In Lal's place, Vir Bahadur Singh, who was the Union Minister of State for Industries, has been sworn in as the new Chief Minister."

V. Srinivas Acharya

the setting up of the first-ever commission to review Centre-state relations and to recommend such changes as may be appropriate within the constitutional framework. The commission will comprise the former Supreme Court Judge, R.S. Sarkaria, and its terms of reference will be decided later.

The appointment of the Sarkaria Commission was welcomed by the opposition parties, the four chief ministers who met in Bangalore, the West Bengal Chief Minister, Jyoti Basu (CPM-led Left Front), and Akali Dal President Harchand Singh Longowal. However, they wanted that it should have more members, should submit its report within a fixed time-limit, and should be empowered to suggest constitutional changes. It may be recalled that the chief ministers of Jammu and Kashmir, West Bengal and Tripura (where the Left Front is in power), as well as the Akali Dal, have also been demanding greater powers for the states for some time.

PUNJAB STILL EXPLOSIVE

Sant Harchand Singh Longowal, Akali Dal President, declared on February 28 that his party is an organisation of patriotic people. He mentioned eight demands for which his party had started its struggle on August 4 last year and in which, he claimed, 92,000 persons have courted arrest and 114 have been killed.

All the MLAs of the Haryana Assembly were united in their stand against two Akali demands: reopening of the river-waters accord and transfer of Chandigarh to Punjab. CM Bhajan Lal said that either Chandigarh should be divided on a 50:50 basis and other disputed areas referred for adjudication to a commission; or Fazilka-Abohar areas of Punjab should be transferred to Haryana in exchange for Chandigarh. Punjab Chief Minister Darbara Singh said he was against the division of Chandigarh, which should be given to Punjab. However, it seems that most residents of Chandigarh are in favour

D. Ramachandran, M.G. Ramachandran, Ramakrishna Hegde and N.T. Rama Rao: Redefining relations.

of retaining its present status of a Union territory. The Punjab and Haryana units of the Congress(I) and the BJP are supporting the views of the respective states, while the Chandigarh units of both parties want the status quo to be maintained.

There was some confusion about the resignations of the Akali MLAs. While most MLAs responded to the Assembly Speaker's call for an explanation by confirming their resignations, some of them failed to do so. However, they later said that they would abide by the decision of the Akali Dal. The Speaker has postponed a decision on the resignations, while Longowal reiterated his call to all Punjab MLAs to resign.

The acceptance of three of the four religious demands of the Akalis was welcomed by the Istri Akali Dal, the women's wing of the party. The process of consultations on enacting an All-India Gurdwara Act is reported to have reached an advanced stage, and all the historically-important gurdwaras proposed to be covered by the Act have been asked to send their views. The setting up of the Sarkaria Commission to review Centre-state relations has been welcomed by Longowal. Darbara Singh has urged the Prime Minister to announce a unilateral decision on the river waters and territorial demands as well. The Centre has not yet invited the Akalis for further talks.

The extremists have stepped up their activities. A police official was injured in a bomb attack by extremists near Amritsar on March 16, who later took shelter in the Golden Temple. This gave rise to Darbara Singh's charge that criminals were being harboured in the gurdwara with the support of Sant Bhindranwale, and the demand by all sections in the Lok Sabha to check the misuse of gurdwaras.

On March 21, the extremists struck again, killing one person and injuring at least 15. Unidentified Sikhs gunned

his son in Kapurthala district; a group of Sikhs in Nihang dress and with covered faces, attacked shopkeepers injuring 12, some of them seriously, in Gurdaspur district; and a priest was shot at and injured outside a temple in the same district. The Punjab police were put on alert and in Amritsar, all roads leading to the Golden Temple were blocked. Akali leaders warned that the barricades must be removed and warned the police against entering the gurdwara.

Following the Akali call for a *rasta roko* (traffic block) agitation in Punjab, over 1,200 persons were arrested in the state. The day-long programme on April 4 turned violent and paralysed traffic on the state highways. At least 20 persons were killed and many injured in clashes between the police and Akalis armed with guns and swords. Warned Longowal: "We will have to rethink whether to remain peaceful or not" in the future.

ASSAM VIOLENCE UNABATED

The tragedy of Assam is not yet over. In the aftermath of the elections, described by L.K. Advani (BJP) as the "bloodiest ever in the entire democratic world", acts of violence have occurred almost daily and taken a heavy toll, including that of the Chief Minister's nephew, who was stabbed to death. A total of 72 police station areas have been brought under the Assam Disturbed Areas Act 1955 and the army has moved in. The police has been ordered to shoot at sight anybody found indulging in violence.

The non-left Opposition in both Houses of Parliament has demanded the nullification of the Assam poll and the suspension or dismissal of the Hiteswar Saikia Ministry, saying it is "illegal" and "unrepresentative". Official figures show that the overall voting percentage was 33 in the state. If Bengali-speaking Cachar, the two tribal districts, and predominantly Bengali-speaking Goalpara district are excluded, the voters turnout in the rest of the state was under 11 per cent! But Home Minister P.C. Sethi has rejected the demand, saying it would "mean submission to a reign of terror and mayhem".

The Centre has unilaterally decided to start detection of foreigners on the basis of 1971 as the cut-off year, after Saikia's talks in New Delhi. Soon after coming to power, the state government transferred top civilian and police officials. Firm steps have been taken to seal the border with Bangladesh, and security forces have been strengthened to restore law and order. At the start of the week-long Assembly session on March 21,

Governor Prakash Mehrotra said a high-level administrative inquiry has been ordered into the disturbances since early February.

Over three lakh people have been uprooted and 305 relief camps for shelter have been set up in Assam. The MPs of left parties said on March 3 that 25,000 evacuees being sheltered by West Bengal in camps should be taken back to Assam. The Centre has agreed to reimburse the expenses of West Bengal on the evacuees. The Centre made an ad hoc allocation of 5,000 tonnes of rice on March 5, and granted Rs 44 crores for relief and rehabilitation in Assam against Rs 23 lakhs recommended by a central official team. Salkia is happy with the Centre's allocation of Rs 291 crores for the state's annual plan against the state's request for Rs 319 crores.

The Centre has said that the doors for negotiations are still open, but this time not only for the AASU and the AAGSP but also for tribal representatives and members of the newly-elected Assembly. That the AASU and AAGSP still enjoy popular support is obvious from the fact that the 24-hour non-cooperation call given by them to protest against the Salkia Ministry on February 28, proved to be a resounding success, as did a similar call against the holding of the Assembly session on March 21. The Assam movement leaders have decided to suspend temporarily their main agitational programme from April 1 and devote themselves to relief and rehabilitation work in a bid to restore normalcy. They have, however, decided to continue their non-cooperation with the new government.

It is now known that the Election Commission sent to the Law Ministry on February 17, and subsequently to the Home Ministry, a detailed note making it clear that conditions were not favourable for holding the third round of polling on February 20. However, the Commission could not postpone the polling without a specific request from the Chief Electoral Officer of Assam. Sethi and Law Minister Jagannath Kaushal denied receipt of any such letter in the Lok Sabha on March 14, upon which the Commission again sent a copy of the letter to the ministries that day.

ANTARCTICA POLAR SUCCESS

The second Indian expedition to Antarctica returned to Goa aboard the Norwegian chartered vessel, the *Polar Circle*, on March 21. The 40-member expedition, which included a crew of 12, left Goa on December 1 last year. The team spent two months there conducting scientific experiments

and returned home covering a distance of 20,000 km both ways. The first team, which went to the icy continent in 1982, and the present expedition have paved the way for future research. India is the first Third World country to carry out the expedition.

The team has selected a site for setting up a permanent research station there, recovered the important cassette left behind by the first mission last year, and reactivated the station at Dakshin Gangotri. Recording instruments for collecting weather data were also recharged. The team successfully carried out the geological survey of Wohlthat mountain, 80 km south of Dakshin Gangotri. This is the first survey of its kind carried out by any country in the world. The communication link established with the headquarters in New Delhi operated through INMARSAT, a commercial satellite. The link was absolutely "flawless".

The deputy leader of the team, V.R. Sridharan of the Indian Meteorological Department, carried out studies in atmospheric temperature, pressure, wind speed, humidity, cloud visibility and radiation. Prabhu Matondkar, who was on his second visit there, carried out extensive studies on krill, a sea-animal which is the main food of the whales.

Eleven scientists, assisted by three doctors, maintenance and construction engineers and helicopter pilots, collected rock samples. A study of these samples determines the validity of the hypothesis of the Continental Drift, according to which Antarctica and India were once joined together and were part of the same land mass.

The team members, drawn from seven scientific organisations, studied bacteriology and virology. Snow algae, mosses and other primitive forms of life were also studied. The medical team, drawn from the defence services, studied the physiological and psychological pressure on the expedition members, in isolated conditions and in extremely low temperatures, with a reversal of the sequence of seasons from the Northern Hemisphere.

An Indian Air Force (IAF) crew air-dropped food supplies to the team and took pictures in Dakshin Gangotri on February 18 in an aircraft provided by the Argentine Air Force. The IAF has the ultimate aim of carrying out regular landings in future to support the scientific expeditions.

INDO-PAK RELATIONS A BIT SHAKY

India and Pakistan signed an agreement for setting up a joint commission on March 10, as a major step forward in the efforts for normalisation of

relations. The agreement was signed by the Indian External Affairs Minister, P.V. Narasimha Rao, and the Pakistan Foreign Minister, Sahibzada Yaqub Khan, in the presence of President Zia-ul-Haq and Prime Minister Indira Gandhi. The commission will meet once a year alternatively at New Delhi and Islamabad, and the delegations will be led by the foreign ministers of the two countries. The commission will promote cooperation in the economic, trade, industrial, education, health, cultural, consular, tourism, travel, information, science, technological, postal and telecommunication fields.

Zia told the press that his reference to the Kashmir issue at the Non-aligned Summit was made in the context of efforts to improve ties with India. On March 9, he had said, "We should find a just solution to the problem of Jammu and Kashmir," in violation of the Simla Accord which provides that disputes should not be raised in international forums but be resolved by bilateral talks. However, the reference was both short and mild, and came at the end of a couple of paragraphs devoted to improvement of Indo-Pak relations, in his 30-minute address.

India has conveyed to Pakistan its concern over the reported remarks of President Zia insinuating that Muslims in India feel insecure, and of the Federal Labour Minister, Ghulam Dastgir Khan, seeking to equate Kashmir with Afghanistan and Kampuchea. On March 28, Zia is reported to have said that the hundred million Muslims of India were so insecure as to be afraid of disclosing their religious identity. On March 31, Khan is quoted as saying: "This problem (Kashmir) still exists. While talking about Assam, Afghanistan or Kampuchea, one must speak of Kashmir as well."

NPC REPORT UNDULY CRITICAL?

The remaining seven (out of eight) reports of the National Police Commission (NPC) were presented to Parliament on March 30, 22 months after the Commission had submitted its last report to the government. The Commission, headed by former Governor Dharma Vira, was appointed by the Janata Government in November 1977. The government has rejected some of its conclusions, accusing it of being "unduly critical" of the police, of adopting a "biased approach" and of going by "the findings and observations of the Shah Commission" that enquired into emergency excesses.

The Commission has appended to its report a draft Act to replace the "outmoded" Police Act of 1861 with a view to bringing about "basic reforms" in tune

with the times. It says that police have an accountability to law, to the organisation and to the people for their performance. Therefore, all activities of the police are governed by various provisions of law and each action of the police is to conform to the law of the land.

It is essential that the police personnel should know clearly the source of authority to which they have to account for their performance. A similar understanding is essential on the part of the source of authority to which the police is accountable. Lack of understanding on either side would result in misplaced goals and objectives and consequent displacement of authority.

The Commission has called for the establishment of a central police committee, as well as for security commissions in the states. The central body will advise both the government and the state security commissions on police reforms, organisation of the force, monitoring and evaluation procedures and norms, and related issues. There is a danger of over-centralisation where local flexibility is required, and the Commission seems to be aware of this, for it suggests the creation of an independent cell at state level to judge police performance.

At the same time, accountability is provided for by giving people the right to petition the state security commission against the behaviour of senior police officials like a station house officer. The Commission also points out that the new and growing challenge for the police is in the rural areas.

The Committee on Jail-Reforms submitted its report to the Home Ministry on March 31, containing more than 600 recommendations. The Committee was set up in July 1980 and was headed by eminent jurist A.N. Mulla. It has expressed dissatisfaction over prison administration in the country and called for all-round improvement in it.

The Committee has recommended improvement in treatment of prisoners with special reference to the custody and treatment of children, young offenders and women offenders. It has formulated a phased programme for the implementation of its major recommendations. The Committee made an intensive study of the problems faced by prison administrations in the country and collected relevant data from within the country and abroad.

BOMBAY TEXTILE STRIKE SOLUTION OF SORTS

The deadlock on the Bombay textile workers' strike was broken when Union Commerce Minister Vishwanath Pratap Singh and textile workers leader Datta Samant met in New Delhi

on March 6. The meeting, the first between Samant and the Centre after the strike began on January 18 last year, covered the whole gamut of the textile workers' demands and problems of the industry as a whole. The talks were held without any preconditions. The two agreed to arrive at some "formulations" to end the strike, including the scrapping of the Bombay Industrial Relations Act 1946, and provision of leave and other facilities for the workers. The two agreed to meet again.

However, a reply by the Labour Minister in the Rajya Sabha on March 21 suggested that the longest ever textile strike in Bombay has virtually fizzled out. The minister said, on the basis of information provided by the Maharashtra Government, that 53 of the 60 cotton mills in Bombay had resumed work by the beginning of March. The mills included those owned by the National Textile Corporation.

The attendance figure in the mills was placed at 1,06,872, comprising 93,066 workers and 13,806 technical and supervisory staff. Earlier, in March, Samant, whose union organised the strike involving over 2,00,000 workers, contested the official figures of workers who have returned to work. According to him, not more than 25,000 of the striking workers had rejoined duty.

Whatever the position, by the end of last year the strike had resulted in the loss of 48.43 million mandays and loss in textile production of the value of Rs 1,000 crores. The estimated loss of exports till the close of 1982 was Rs 200 crores.

INDO-US RELATIONS DIPLOMATIC INTRIGUE

The Times Of India's Washington Correspondent J.N. Parmoo reported on March 27 that India's Ambassador in the US, K.R. Narayanan, had deposed, "informally", before the Human Rights Committee of the House of Representatives on the Assam issue. He was reportedly grilled on the question whether the Indian Government could have prevented the Assam massacre by taking advance protective measures.

On the face of it the report said the US considered the poll related massacre in Assam a human-rights issue which was "the outcome of the authoritarian policies of the Government of India". Did it mean that India was answerable to the US Congress on a subject that was essentially a law and order issue concerning one of its states, and patently an internal affair of a sovereign nation? The US—and Narayanan, if one goes by the report—obviously thought so. First, this was a clear breach of a very impor-

tant canon of international diplomacy. All of America would have been outraged had its ambassador testified before any Indian parliamentary committee on the Miami riots. As a US political observer put it: "We are not answerable to you, nor are you to us. It is Pakistan that is getting billions in aid from the US. Not you."

Yet, when Pakistan's case came up for human rights violations before the Committee on September 21, 1982, not one Pakistani Embassy or Government official was asked to present his country's case. This at a time when a debate was raging in the American media concerning Gen Zia-ul-Haq's repressive policies in Pakistan. Likewise, the human rights situation in South Korea, the Philippines and China also came up before the Committee last year, but none of these three countries sent their representatives for the hearing. Neither did Great Britain send its representative to Capitol Hill when the scale of violence and rioting had reached a crescendo in Northern Ireland after the death of the young Irish Revolutionary Army leader, Bobby Sands. (It may be remembered that London politely rebuked Washington when it placed its services as a mediator in the ongoing dispute in Northern Ireland.) All this, plus the mute silence the Indian diplomatic circles maintained when approached by Parmoo for clarification, made Narayanan's actions unfathomable—and suspicious.

Back in India, the issue predictably, sparked off a controversy in Parliament and, to some extent, in the press. In Parliament, on March 30, Prime Minister Indira Gandhi "emphatically denied" that Narayanan had been summoned by the Committee. This, of course didn't mean he had not testified before the concerned Congressmen. External Affairs Minister P.V. Narasimha Rao put that doubt to rest in Parliament the next day. Said he: "The ambassador did meet informally a few members of Congress, together with some congressional aides, at Capitol Hill on March 24. Of the five Congressmen present, only one Levine of California, belonged to the Human Rights Sub-committee. It is common practice in Washington for an ambassador to meet Congressmen to discuss with them and give them background information as also factual account about matters of current interest," added Rao.

Informal discussions, if it was that—are not uncommon. For example, on the US arms package to Pakistan, Narayanan had put forth India's stand in talks with Congressmen. Why the furor, then?

AJAY AHUJA

ARMS RACE

IN DEFENCE OF DEFENCE

The Reagan administration could be embarrassed by the findings of its own agency, the CIA, that the US has been overestimating the growth rate of Soviet arms spending for the past six years. While the Pentagon had been estimating the Soviet arms expenditure to be increasing by 4 per cent per annum, the new CIA assessment shows that it is 2 per cent. The Pentagon, however, insists that the downward adjustment of figures by the CIA is unjustified.

Despite Pentagon's assertions, it is true that the US outspends the USSR on armaments and is also ahead in qualitative terms. If Soviet arms expenditure in roubles were compared with American spending in dollars—the "fairest" method according to the Stockholm International Peace Research Institute—it will show that Washington outspends Moscow by at least a third. Reagan, therefore, has no justification for raising the alarmist clamour that the gap between US and Soviet military power is widening—to Russia's advantage.

What is of significance to all countries, however, is that neither side shows any sign of diminishing their arms expenditure. Recently, a document entitled "*Fiscal Years 1985-1989: Defence Guidance*", accompanied by a covering memorandum dated March 1, 1983, and signed by Defence Secretary Casper Weinberger was made available to the American news agency UPI. The document was a secret Pentagon blueprint projecting military expenditures of \$1,958.6 billion through this decade.

More recently, President Reagan went on the air in late March armed with charts, graphs and recently declassified aerial photographs of a Soviet listening post in Cuba, Soviet weaponry in Nicaragua and an airstrip in Grenada to prove that the Soviet Union had a "massive arsenal of new...nuclear weapons" and was not only arming at home but also expanding abroad. His message: the US must resolutely rearm to counter the Soviet threat. But he added that it should also project its peaceful intent alongside its military might. He called on the scientific community to do more research work aimed at

Reagan on national TV: Okay, no zero-option.

providing a futuristic defence against Soviet Intercontinental Ballistic Missiles.

Moscow immediately reacted by charging the President with wanting to perpetuate the arms race and declared that his ABM plan would violate the 1972 agreement limiting Soviet and US anti-missile systems and their development. Closer to home, too, many prominent persons are unhappy with the President's speech. The House Speaker, Tip O'Neill, said that Reagan's "vicious remarks" reminded him of McCarthyism.

US-EL SALVADOR VIETNAM RETOLD

There was a feeling of *deja vu* when the Reagan administration began to ring El Salvadoran alarm bells again in March. Depicting the Salvadoran struggle in its starkest ideological colours, recalling former Secretary of State Alexander Haig's controversial efforts to cast El Salvador's rebellion as a major East-West conflict, President Reagan announced in early March that he wanted \$60 million in emergency military aid to El Salvador. This was later raised to \$110 million on top of a relatively uncontroversial \$67 million in economic assistance. To minimise opposition from Congressmen, it was stated that \$110 million will not be new money: \$60 million would be redirected from military aid funds already appropriated to other countries while \$50

million would be switched to El Salvador from military assistance funds that the Reagan administration has already requested for other countries. The money would be spent partly on military spare parts and ammunition and partly for training Salvadoran government troops in US. If Congress objects to the last point, the Reagan administration has warned that more "advisers" would have to be sent to El Salvador—an action that most Congressmen dread. Reagan has also persuaded the El Salvadoran leadership to advance the date of presidential election from March 1984 to some time later this year. This was meant to sound like a Salvadoran initiative, but a TV reporter blew the story.

Since March 1982's elections, the Reagan administration had tried to bolster the economy and political system of El Salvador rather than win a war. But the guerilla offensive in winter, which had resulted in temporary victories for them at Berlin, Corinto and Meanguera, upset the Americans. Lt-Gen Wallace H. Nutting, head of the US Southern Command at Panama, sent warning signals to National Security Adviser William P. Clark. Jeane Kirkpatrick, the US Ambassador to the UN, undertook a 10-day fact-finding mission to the region and her report was a 1983 version of the domino theory. She warned that only an immediate infusion of aid to El Salvador would prevent the rebels from capturing it—and if El Salvador fell, the rest of Central America would follow. And, therefore, the aura of urgency has again enveloped American-Salvadoran relations.

But one remembers that the US-involvement in Vietnam began with only a handful of advisers. Can Reagan guarantee that El Salvador will not become another Vietnam?

EGYPT NEW TRADE PARTNERS

Egypt, which had hitherto been considered an EEC market, was bagged by America last January, when the Americans snatched a 1-million tonne wheat-flour deal with Egypt. The EEC hit back in late February by lining up a cheap wheat sale of over 1 million tonnes to China. In order to secure the sale with the bargain-hunting Chinese, the EEC

offered an extra £ 4 rebate on top of the Community's already-generous export subsidy for wheat of £ 52 per tonne. The EEC expects to sell 6,00,000 tonnes of wheat to China during the next six months, and another 6,00,000 tonnes in the autumn. The amount is huge when compared to the 5,00,000 average yearly EEC wheat sale to China since 1979.

Yet, the Chinese deal is less spectacular than America's cut-price sale to Egypt. The EEC is in no position to engage in an all-out subsidy war with the US, although it has bagged the Chinese wheat export market, which had so far belonged to the US. Although the skirmishes have so far been over cereals, the biggest challenge from the US is likely to come from the dairy sector. The US has started to accumulate dairy surpluses only recently, but if it were to break into the world market in a big way with its subsidised dairy products, it would certainly upset world prices, which have so far been rigged by the two principal exporters—the EEC and New Zealand. The Irish already complain that subsidised American sales have cost them the £40 million a year Mexican skimmed-milk-powder market.

In another development regarding the EEC, the Community's finance ministers agreed on a major EEC monetary shake-up on March 21. For the first time in its history, all the eight currencies of the European Monetary System (EMS) are to be realigned at once—five upwards and three downwards.

NICARAGUA ACTIVE INSURGENCY

At the UN Security Council, Nicaraguan Deputy Foreign Minister, Victor Hugo Tinoco, charged that the fresh spate of anti-government guerilla activity was inspired and armed by the Reagan administration. The US Ambassador to the UN, Jeane Kirkpatrick, sharply rebuked him, but the fact remains that she did not address the main Sandinista contention: that the guerilla warfare in Nicaragua is part of a covert operation directed by the CIA.

Till late last year, the Nicaraguan Democratic Force (FDN) had camps in Honduras, where they were trained by the CIA. Initially, *la contra*, as the counter-revolutionary movement is known, concentrated on quick raids across the border. But over the last month they have begun to penetrate deep into Nicaraguan territory. The Sandinista Government charged that 1,500 Honduran-based rebels got as far as Matagalpa, which is only 90 miles from Managua, the Nicaraguan capital, as part

of a US-sponsored invasion. The Nicaraguan Defence Minister, Umberto Ortega, also accused Honduras of supporting the guerillas by air and in late March there was a brief shoot-out with Honduran troops along the border. The Hondurans, on the other hand, have disclaimed any responsibility for the rebel activity.

The guerillas include former national guardsmen who served under the late dictator, Anastasio Somoza, Miskito Indians, former Sandinistas and disaffected civic leaders. Other rebel groups in Costa Rica have not yet joined the FDN. But the former Sandinista leader, Eden Pastora, known as "Comandante Zero", who is now in Costa Rica and is something of a national hero in Nicaragua, announced recently that he plans to launch his own guerilla campaign against the Sandinista regime shortly.

The Sandinistas face a lot of problems in Nicaragua: the economy is on decline, political freedoms have crumbled; and the government is embroiled in a messy feud with the Roman Catholic Church. However, they are still more popular than the former Somoza government, and as long as the rebels have links with the followers of Somoza and the CIA, the Sandinistas stand a good chance of retaining their position. Besides, their 22,000-strong army is much more powerful than the FDN.

ZIMBABWE DEMOCRACY GOES SOUR

It was another instance of democracy going sour in Africa. The ruling party never seems to tolerate democratic opposition, which, in its turn, reverts to illegal means. The scene of the drama this time was Zimbabwe, and the principal characters PM Robert Mugabe and Opposition leader Joshua Nkomo, who had earlier been comrades-in-arms against the white Rhodesian regime of Ian Smith.

In the pre-independence elections of 1980, Mugabe, whose Shona tribal constituency makes up for 80 per cent of the country's population, won. Friction between the two leaders started shortly afterwards, especially after arms caches were discovered a year ago on property belonging to Nkomo's political allies. Nkomo's Ndebele tribesmen, who are in a minority, were charged with plotting a coup and Nkomo was dismissed from the Cabinet. Two months ago, Mugabe's government sent an armed force led by the North Korean-trained Fifth Brigade into the Ndebele homeland, Matabeleland. The stories that trickled out spelt horror: more than a thousand persons, many of them civilians, were

killed. In early March, the Fifth Brigade moved into the suburbs of Bulawayo, the regional capital of the Matabeleland, and house-to-house searches for dissidents were conducted. Nkomo's own house was ransacked on March 5, and a few days later he fled via Botswana to London.

Nkomo's flight makes it easier for Mugabe to convert to one-party rule, a desire of which he has never made any secret. Nkomo's party, Zimbabwe African People's Union (ZAPU), is in disarray. Of the 20 ZAPU members of Parliament, two are in detention, two (including Nkomo) are in exile, and Dumiso Dabengwa, probably the most influential person now in ZAPU, is on trial for treason. Mugabe, however, is mindful of Western approval, and would perhaps prefer some kind of accommodation with the main Opposition, rather than its liquidation.

Even so, the problem is far from over. Former members of Nkomo's Zipra guerilla forces are dissatisfied and have taken to armed insurgency. The targets are Matabeleland's white farmers. On March 18, an elderly white farmer and his family were murdered in cold blood. Two days earlier, dissidents abducted Robert Dyer Smith from a farm near Bulawayo and left a message saying that dissident bands were holding a number of prisoners who would all be killed if Dabengwa and other former Zipra commanders, now being held by the authorities, were not set free. It is significant that at a trial of Dabengwa and six others at Harare shortly afterwards, the six others were acquitted on the main charge of plotting to overthrow Mugabe's government, although they still face charges of illegally concealing weapons.

FRANCE THE BALANCE TILTS

The honeymoon is over and France's Socialists have been jolted back to reality. On March 6 and 13, only 22 months after French voters swept Francois Mitterrand and his Socialists into power, the electoral balance shifted again to the Right during France's nationwide municipal elections. Mitterrand had expected a minor tactical defeat. Instead, conservative candidates gained a six per cent margin over the Left. The Left lost some of its long-time fortresses—Avignon and Arles in the south and Roubaix in the north, a birthplace of French socialism. Jacques Chirac, the leader of France's neo-Gaullist party and Mitterrand's political arch-rival, was re-elected mayor of Paris with a wide margin.

Although the Socialists still enjoy an absolute majority in Parliament, the

municipal elections have come as a warning. The French are anxious about their economy. Unemployment is 8.9 per cent compared with 7.2 per cent when Mitterrand was elected. Inflation, which runs at 3.7 per cent in West Germany and 4.9 per cent in Britain, remains 9.7 per cent in France. The trade deficit was a record \$9 billion last year. Law and order too was an issue during the elections and the conservatives exploited fears of a rising crime rate and blamed it on immigrants, especially from North Africa. In fact some overtly racist candidates who called for the expulsion of Arab immigrants from France received a large number of votes.

Mitterrand, however, took the hint. Later in the month he reshuffled his government and devalued the franc for the third time in two years. Although Mitterrand has risked trouble from his more radical supporters by this move, the alternative would have been to adopt a leftist protectionist 'fortress France' policy. But this would have meant abandoning the basic principle that France's partnership with West Germany within the EEC is essential to its prosperity. Mitterrand's government is also planning a drive to cut France's trade deficit, hold down consumption, cut the public sector deficit and channel more savings into industrial investment. His new "combat team" consists of 15 members instead of the previous 34. Perhaps the most influential in the group now is Jacques Delors, the Finance Minister, who skilfully handled the realignment of the European Monetary System (EMS) at Brussels.

CHINA GOING NUCLEAR

Is China going nuclear? Yes, said China's Defence Minister, Zhang Aiping, in a defence-policy statement published in the party journal *Red Flag* on March 1. The unusually frank statement followed a long debate among Chinese leaders on China's defence needs. It is significant that before becoming the Defence Minister, Zhang was in charge of China's nuclear programme and was responsible for a number of major tests. In 1980, the Chinese tested their first land-based missile with enough range to hit targets in both the US and the USSR. In 1981, they developed multi-warhead missiles and in 1982, fired their first submarine-launched missile. Zhang sees China's nuclear-weapons programme as the most cost effective route to a secure defence. This is a clear sign to the two superpowers that China would like to stand on its own feet not only politically but also militarily.

POPE JOHN PAUL SHAKING THE CONSERVATIVES

Pope John Paul II is a man of courage. Barely two years since he was wounded in an assassination attempt, he set off on an eight day trip (March 2-9) to strife torn Central America. He visited Nicaragua, Guatemala, Honduras, El Salvador, Costa Rica, Haiti, Belize and Panama. The risks were tremendous: in 1980, Archbishop Romero of San Salvador was shot down while saying mass; about 120 other priests have been killed in El Salvador's civil war; and 16 priests have been gunned down in Guatemala in the past five years.

Although the Pope insisted that the purpose of his visit was 'eminently religious', the dividing line between religion and politics was very thin. His expressed aim was to entice some Central Americans back to the Roman Catholic fold from Protestant fundamentalist sects. But the overtones of politics were obvious. He urged the people to resolve their conflicts "without resorting to methods of violence or systems of collectivism, which can become no less oppressors of the dignity of man than pure economic capitalism". He was heckled at in Nicaragua, where Sandinistas chanted revolutionary slogans during an outdoor mass and at a private meeting, complained about American economic and political interference in the region.

However, the Pope showed that he was no friend of anti-communists who violate human rights either. He chastised the Guatemalan President, Gen Efraim Rios Montt, for executing six men on the charge of subversive activities, shortly before his visit to the region. He was also very critical of Haiti's President-for-life Jean-Claude Duvalier, and publicly endorsed the slogan of Haiti's year-long Encharistic Congress: "Something Must Change Here".

In most of the countries, however, the Pope was received enthusiastically and thousands of people crowded to his masses. Vatican officials hoped at the end of the Pope's visit that the Holy See's forceful social message would shake conservative church leaders out of their complacency and drive them to action.

INDONESIA A GOVERNMENT THAT WORKS

"Cara Kerja Tentara", or, the military way of doing things, as the Indonesians put it, works. The general session of the Indonesian People's Consultative Assembly (MPR), which met in early March, ran

without a hitch and returned the incumbent, President Suharto, who is also a former General, to a fourth term of office. But something he said during his swearing-in has set rumour rolling that this may be his last term: "The next five-year period, 1983-88, will be the last phase of the rounding up and completion of [the] historic task of the '45 [War of Independence]-generation. I am part of this '45 generation."

The next five years may be the most challenging yet for Indonesia. It faces an array of worsening problems ranging from population explosion to widespread corruption at every level. Muslim fundamentalism, though still embryonic, has reared its head. And the economic outlook is far from promising. After years of rapid economic growth, fuelled by oil exports, the country is now suffering from the sharp drop in world crude prices. Suharto's government has already adopted some tough austerity measures like restriction on the import of some luxury consumer goods, extension of a year-old freeze on government and military salaries and the elimination of state subsidies for food and fuel. This, however, has resulted in a sharp jump in the prices of basic commodities like milk and rice and this is something that a country, which has 1/3rd of its population living below the poverty line, cannot afford.

Yet, Suharto's record in the economic field has been reasonably impressive so far. Last year, the World Bank put Indonesia's per capita income at \$520 a year, thus giving it a middle-income status. After his election, Suharto made some changes in the Cabinet and observers feel that most of the changes have been for the better. Another former General Umar Wirahadikusumah, has become the Vice President replacing Adam Malik who was not very popular with the armed forces. Younger men in the old Cabinet, were promoted and some new people were also brought in. Outside the Cabinet, Lt-Gen Benny Murdani was made the Commander-in-Chief: this is the first time that an officer not of the so called 1945 generation has reached this position. There is great hope among the general public that the new government will finally rid itself of corruption and pursue a more equitable development policy.

USSR-CHINA SILENT OVERTURES

When Mao Zedong was asked how long it would take for China to sort out its dispute with Russia, he replied, "10,000 years". When the late Soviet Premier Alexei Kosygin tried to break the deadlock in 1969, Mao reduced

the deadline by 1,000 years. One wonders what Mao's comments would have been at the latest developments.

In mid-March two weeks of "silent" negotiations took place between the Chinese and the Russians in Moscow. The semi-official report from Moscow was that "substantial" progress had been made and troops may be thinned out on both sides of the border. This has to be taken with a pinch of salt because the post-Brezhnev era has not taken too kindly to China's preconditions: reduction of Russian troops on the border, withdrawal of Russian occupying forces from Afghanistan and withdrawal of Soviet support to Vietnam's occupation of Kampuchea. Recently, the Chinese communist party journal, *Red Flag*, dropped clear hints that they are ready to restore party ties on the basis of the five principles of "peaceful coexistence", the first being non-interference in each other's affairs. The Russians, however, prefer "proletarian internationalism", under which slogan the Soviet Union had made it its business to interfere in the affairs of its allies. The Chinese of today will not want to go back to the big-brother-little-brother relationship of the 1950s and if this is going to be the attitude of the Soviet Union, Mao's comments may have had something to them.

Meanwhile, the US too is taking a risk with its relationship with China. Last year President Reagan had promised to keep arms sales to Taiwan below the 1979-81 level, and to reduce them gradually. The Americans have hit a unique way of getting out of this promise. They chose 1979, the peak year, adjusted the dollar value of arms sales for inflation and came up with \$830 million. The US plans to sell arms worth \$800 million to Taiwan in 1983, which is a 3 per cent reduction. But in real terms, it is more than either 1981 or 1982. The Chinese have issued formal protests and have accused the Americans of violating the agreement of last August.

ISRAEL

SHIFTING LOYALTIES

Israeli Prime Minister Menachem Begin suffered yet another debacle when the Knesset elected the Labor Party candidate, Chaim Herzog, to serve as President for the next five years, by a vote of 61 to 57. He defeated the Likud candidate, Supreme Court Justice Menachem Elon. Herzog, a former Ambassador to the US, is a popular and prominent figure in Israel and has close ties with both the Ashkenazic and Sephardic communities.

Herzog's victory disturbed Begin for another reason. It meant that seven mem-

bers of Begin's coalition had defected. Political analysts feel that the defectors belonged to two tiny parties in the coalition: the ultra-religious Agupat Yisrael and Tami, an ethnic party of Sephardic Jews.

Meanwhile, Begin's government has been trying to improve its strained relations with Washington. The driving force behind this is Israeli Defence Minister Moshe Arens, who had been the Ambassador to the US till six weeks back. The Cabinet recently voted to resume Israel's practice of sharing military intelligence information with the US, a practice that had been halted by former Defence Minister Ariel Sharon during the Israeli invasion of Lebanon. In late March, the US administration had announced that it would sell Israel 200 sidewinder air-to-air missiles for \$16 million. However, on key issues in the negotiations for the withdrawal of Israeli troops from Lebanon, the Begin Government remains firm and has not yet yielded to pressures from the US.

USA

BLACK DAYS FOR THE BLACKS

The blacks in Miami, Florida, are convinced that "the white cops are out to kill us". If one looks at the list of recent incidents—not to mention the 1979 incident when Miami blacks rioted after a black insurance salesman, Arthur McDuffie, was beaten to death by policemen—one can see the truth in this statement. On October 6, 1982, prison guard Ernest Kirkland was shot four times by Metro detective Thomas Pellechio, on October 20, Anthony Nelson was killed by a Dade County cop, after being stopped near a stolen truck, on December 28, Nevell Johnson was shot down in a video-games arcade by Miami officer Luis Alvarez. The last resulted in two days of rioting during which Alonzo Singleton was killed by another Miami officer. The most recent case was in mid-March this year, when Donald Harp was shot dead by Metro officer Robert Koenig. Harp was unarmed, intoxicated and in custody, and was a bystander in what was, at the most, a traffic offence. His own offence was to make a sudden move!

The only common denominator in all these cases is that the victims were blacks and the policemen whites. Miami is increasingly acquiring the status of a major racist city. In mid-March there were two days of disturbances when a police attempt to break up a noisy street disco led to 51 arrests. The police are trying out new "sensitivity" techniques to handle ghetto disturbances—but they have not had much success so far.

OPEC

DISTRESS SIGNALS

"I am truly troubled and with OPEC distressed... The market is stagnant, the price of crude oil depressed": a doggerel that is the understatement of the year, written after a 12-day meeting in London of the Organisation of Petroleum Exporting Countries (OPEC), by the UAE Oil Minister, Mani Said al Oteiba. The outcome of the meeting: the official benchmark price was slashed from \$34 per bbl to \$29, the first cut in the cartel's 23-year history. An overall production quota of 17.5 million barrels was also set for the rest of 1983. The current market is, however, absorbing only 14 million barrels of its output per day. The cartel hopes that the demand for oil will pick up in the second half of the year.

The OPEC decision came after oil prices threatened to go into a free fall late in February. Since 1973, prices had more or less been going up from \$3.07 to \$11.65 in 1973 to \$34 after the Iranian revolution of 1979, which had precipitated a shortage. Price cuts began in February when Britain and Norway, which are not OPEC members, dropped their charge for North Sea oil by \$3 per bbl to \$30.50. Nigeria, then broke ranks with the OPEC and announced that it was slashing its price by \$5.50, to \$30 per bbl. To keep the price-cutting from getting out of hand, OPEC members began a desperate round of meetings, and for the first time non-OPEC members were welcomed into the discussions.

Although an agreement was arrived at, the cartel is shaky. The OPEC's less-wealthy members are under severe pressure to undercut the new agreement. Iran, for instance, plans to spend \$4 billion in 1983 in its war against Iraq and may have to breach its production quota of 2.4 million barrels a day to raise the money. Venezuela and Nigeria, burdened with large debts, may be tempted to break the agreement. Given the financial needs of the poorer OPEC nations, Saudi Arabia has so far accepted the role of "swing" producer, responsible for cutting output enough to match supply with demand. But the Saudis have already reduced output from 9.6 million bbl per day to 3.3 million, and are running out of room to manoeuvre. The Soviet Union, which is the biggest oil producer in the world, exporting over 3 million bbl per day, may also upset the balance, because at present it has a pressing need for foreign exchange to purchase food from the West.

And if the benchmark price is not sustained, will the cartel collapse?

APPOINTED

Justices Dinshah Pirosha Madon, Chief Justice of the Bombay High Court, **Sabyasachi Mukharji**, acting Chief Justice of the Calcutta High Court; **Manharlal Pranlal Thakkar**, Chief Justice of the Gujarat High Court; **Ranganath Misra**, Chief Justice of the Orissa High Court, to be judges of the Supreme Court, effective from the date of assuming office.

Indrajit Singh, Consul-General of India in Sydney, as Indian Ambassador to the Democratic Republic of Madagascar, succeeding Sa'indranath Puri.

Dr Ishaque Ahmed Sajjad, Deputy Director in the Ministry of External Affairs, as Indian Ambassador to Oman, succeeding Khiaangle C. Lalvunge.

Sharad P. Upesane, as Chairman of the Central Board of Film Censors, replacing Aparna Mohile, transferred back to her parent cadre of the Posts and Telegraphs department following the Prime Minister's directive that all officials out of their parent cadre for five years, be taken back.

Ranjit Sethi, a senior foreign service official, as India's High Commissioner to Malaysia, replacing Prakash Hiralal Shah.

Ashok Kumar Jain, Chairman of Bennett, Coleman and Company Ltd, New Delhi; **R. P. Goenka**, Calcutta industrialist; **Dr A. S. Kahlon**, Ludhiana; **Raghu Raj**, Chairman and Managing Director, Air India, Bombay; **R. Ganesan**, Chartered Accountant, New Delhi; **P. N. Devarajan**, President of the Projects Development Organisation, Bombay; **Jaharlal Sengupta**, Chairman and Managing Director of Chloride India Ltd, Calcutta; **Dr S. R. Sen**, New Delhi; and **Aditya V. Birla**, as Directors to the Central Board of the Reserve Bank, to replace an equal number of existing directors.

Lt-Gen Benny Murdani, as Commander-in-Chief of Indonesian armed forces, replacing Gen Mohammed Yusuf, to become the second most powerful man in Indonesia after President Suharto.

Andrei Gromyko, 73, Soviet Foreign Minister, as the first Deputy Prime Minister on March 24 by the Presidium of the Supreme Soviet.

Nipun Kumar Singh and **Krishna Kumar Adhikari** as judges of the Madhya Pradesh High Court.

Williamson A. Sangma, as the Chief Minister of Meghalaya following the resignation of B.B. Lyngdoh from the chief ministership.

ELECTED

E.K. Mawlong of the Meghalaya United Parliamentary Party (MUPP) as the Speaker of the State Assembly defeating the opposition Congress(I) nominee by 31 votes to 28.

Ira Marak, the opposition Congress (I) nominee, as Deputy Speaker of the Meghalaya Assembly, defeating the three-party Meghalaya United Parliamentary Party coalition government's nominee, Meckinson Sangma, polling 32 votes to his rival's 27.

Irshad Mirza, Congress(I) candidate, unopposed, to the Rajya Sabha from Gujarat in the by-election necessitated by the death of Piloo Mody.

RESIGNED

J.B. Jasokie, former Nagaland Chief Minister and leader of the Opposition Naga National Democratic Party, from the party's leadership, for "personal reasons".

B.B. Lyngdoh, Chief Minister of Meghalaya, after the State Assembly voted a Congress (I)-sponsored no-confidence motion by 31 votes to 27, on March 31.

DISMISSED

Prince Mabandla Dlamini, Prime Minister of Swaziland, by Ndlovukazi, the Queen Regent of Swaziland, without assigning any reasons.

VISITED

Melina Mercouri, stage and screen actress turned politician, on a four-day visit as the Greek Minister for Culture and Sciences, on March 19.

Ferenc Ratbai, Hungarian Minister for Education and Culture, on a five-day visit, on March 18.

Karlos Papoulias, Greek Vice Minister of Foreign Affairs, on a six-day official visit, for talks with Indian leaders on measures to strengthen bilateral relations on March 27.

AWARDED

The Directors' Guild of America

named Sir Richard Attenborough as the best director for his film *Gandhi*.

D.N. Jatia of Calcutta has been invited to sign the Roll of Distinguished Philatelists (RDP) on October 7 at Bath in England—the first Indian to be so honoured. Instituted in 1921 by the British Philatelic Federation, the honour is ranked as the top award in philately.

At the Tenth International Documentary Film Symposium in London, the coveted gold medal in the tourism section was won by the Indian entry *Glimpses Of India*.

The Guardian Fiction For Children Award, worth £ 250, to Indian author Anita Desai, for her book *A Village By The Sea*.

The United Nations Population Award, carrying a diploma, a gold medal and a cash prize worth \$ 12,500, to Indian Prime Minister Indira Gandhi and Chinese Family Planning Minister Qian Zinhong, "in international recognition of their efforts in tackling the complex problems of two of the world's largest populations".

The Sangeet Natak Akademi Awards for 1982 to 16 outstanding musicians, dancers and theatre artistes.

The 1982 British Academy Awards were won by the following. Best Picture: *Gandhi*; Best Actor and Best (outstanding) Newcomer To A Leading Film Role: Ben Kingsley, (the actor who played Gandhi); Best Actress: Katherine Hepburn for her performance in *On Golden Pond*; Best Supporting Actress: Rohini Hattangady who played Kasturba Gandhi in *Gandhi*, jointly with Maureen Stapleton for her part in *Reds*.

Dr B.C. Roy National Awards, instituted by the Medical Council of India, carrying a silver salver and cash prize of Rs 50,000 to 21 eminent medical men. The award for Eminent Medical Man and Medical Man-cum-Statesman to Dr B.N. Sinha and Dr T.V. Patel respectively.

The Campbell Memorial Gold Medal instituted by the Asiatic Society of Bombay in 1907, to Dr Kapila Vatsyayan, Additional Secretary in the Union Education Ministry, in recognition of her "outstanding contribution to the field of the history of Indian arts".

Bharat Ratna, the country's highest civilian award, posthumously to Acharya Vinoba Bhave, the Padma Bhushan Award for 1983 to 18 distinguished people and the Padma Shri Award to 71 people, at an investiture ceremony in Rashtrapati Bhavan on April 2.

ECONOMY

Rice procurement: The Food Corporation of India and other government procurement agencies have procured 5.80 million tonnes of rice during the current Kharif season against 5.97 million tonnes during the same period last year. Punjab contributed 3.20 million tonnes, Haryana 6.91 lakh tonnes, UP 4.51 lakh tonnes, Andhra Pradesh a record 8.22 lakh tonnes, Tamil Nadu 3.02 lakh tonnes and Karnataka 49,500 tonnes.

Indian wheat for Nepal: India has agreed to provide Nepal with 15,000 metric tonnes of wheat on a loan basis, following failure of last monsoons which caused a 20 per cent drop in Nepal's food production.

British Budget presented: Britain's Conservative government on March 15 announced a Budget of tax cuts for industry and individuals. Chancellor of the Exchequer Geoffrey Howe while presenting the £ 121 billion budget for the financial year beginning April 1983 was optimistic about the future of the world economy.

Oil prices: Following the OPEC decision to reduce the benchmark per barrel price of crude oil and the arbitrary hike in the prices of petroleum products announced by the government last month, the Indian oil industry stands to gain Rs 1,170 crores in the current fiscal year. The pre-budget rise in prices of petroleum products are expected to yield Rs 500 crores. The fall in prices of oil imports announced by the OPEC will mean another saving of Rs 710 crores. The gain will be partly offset by the lower price of Bombay High crude exports—the \$ 5 fall in price of per barrel will mean a loss of roughly Rs 150 crores.

The US trade deficit in 1982 totalled \$ 8.1 billion for all trade in goods, services and other financial transactions. The deficit for the fourth quarter alone was \$ 6.1 billion, the biggest ever quarterly shortfall. For the year as a whole, American imports declined to \$ 350.3 billion against the previous year's \$ 361.8 billion. But exports declined even faster to \$ 350.1 billion from \$ 372.9 billion, leading to the massive deficit.

Air India made a profit of Rs 36.10 crores in 1982-83 from its global operations despite a reduction in the overall load factor of the fleet of 747s and 707s. The profit is impressive, considering that the airline industry has been going through a recessionary phase. The corporation's revised budget for 1982-83 showed an operating profit of Rs 63.72 crores while the budget estimates for 1983-84, indicated an operating profit of Rs 96.31 cr.

World population in 1981 stood at

4,500 million people, with 2,625 million people in Asia, 623 million in the Americas, 485 million in Europe, excluding the USSR, and 484 million in Africa. The highest population growth rate was registered in Africa—2 per cent to 3 per cent, and the lowest in Europe—less than 1 per cent. China, followed by India, the USSR, the US and Indonesia are among 25 countries with the largest populations. The figures are cited in the United Nations Demographical Yearbook.

India's trade deficit during April-December 1982, on the basis of provisional figures, was Rs 4,060 crores compared to Rs 4,109 crores in the same period of the previous year. In the first nine months of 1982-83, exports rose by 15.1 per cent over the previous year while imports rose by just 8 per cent compared to 37.4 per cent in 1980-81 and 8.6 per cent in 1981-82. Export of crude from Bombay High from January 1982 along with an increase in indigenous production of crude helped decrease the share of India's total oil imports from 42 per cent in 1980-81 to 38 per cent in 1981-82. Preliminary data for the first half of 1982-83 show increases in exports to the regions of ESCAP, West Asia, Africa and Latin American countries and a decline in exports to developed markets.

Additional Plan assistance for states: The Centre has decided to grant additional Plan assistance of Rs 1,650 crores to the states for the last two years (1983-85) of the Sixth Plan. With this, the total plan assistance to states has increased from Rs 15,350 crores to Rs 17,000 crores. The Centre has also decided to allow all states a 20 per cent step-up compared to 1982-83 in market borrowings programme for 1983-84 instead of the 10 per cent envisaged in the Sixth Plan.

An UNCTAD report on March 30 revealed an alarming drop in aid given by rich countries to the Third World. The report said the world's 36 poorest nations would have received only slightly above half their required help to reach UN goals by 1985. Aid was expected to be \$ 8.1 billion by 1985 against UN's \$ 14 billion target for the year.

US grants for India: The US will provide grants of Rs 3.90 crores to India for integrated rural health and population project and development and management programme, following agreement signed between the two countries on March 31.

ONGC output recorded a new high of 18.2 million tonnes in 1982-83—an increase of 32 per cent over the 1981-82 output of 13.18 million tonnes. The oil flow from Bombay High was 12.87 million tonnes—auguring well for Indian self-sufficiency in oil production.

EVENTS

Age limit for state civil services exam increased: The age limit for appearing in the state civil services examination has been raised from 28 years to 31 years from February 24.

Propagandist theatre to stage a comeback in USSR: The Soviet Union has issued a directive demanding a return to the propagandist style of socialist realism on the stage. The Communist Central Committee on March 2, complaining of falling standards, said stage performances in future would have to put across the party line and instil proper attitudes to life and work.

30 more Jaguars for IAF: An agreement for the supply of 30 more Jaguar aircraft in knock-down condition for assembly at the Hindustan Aeronautics plant in Bangalore has been signed between the Indian Air Force and British Aerospace. The total number of Jaguars goes up to 115, closing the deal with the British company. The government has now finally scrapped plans to manufacture any of the Jaguars in India as was intended earlier.

N. Korea joins Japan-S. Korea dispute: North Korea on March 4 joined a 38-year-old dispute between Japan and South Korea, laying its claim to a small rocky island, in the Sea of Japan. The island known as Todo by the Koreans and Takashima by the Japanese, is located halfway between Japan and South Korea.

A new Islamic law under which evidence, in court, of a man would be equal to that of two women was adopted in modified form by Pakistani Federal Consultative Council on March 3. The law states evidence of two men or a man and two women will be needed in all cases not governed by specific Islamic laws, though a judge can accept the evidence of a single woman in the absence of the required number of witnesses.

Turkish Ambassador shot dead: The Turkish Ambassador in Belgrade, Galip Balkar, was shot on March 9, as he left the embassy in a car. He was hit by two bullets, one in the head and another which hit his spine. He later succumbed to the injuries. Balkar is the latest victim of a 10-year campaign by Armenian militants against diplomats and other Turks living abroad as revenge for what the militants say was the massacre of 1.5 million Armenians in East Turkey during World War I.

Canadian air-space for US defence tests: Canada has agreed to provide the US with its air-space and other facilities for its tests and evaluation of the

defence system. An agreement signed between the two countries envisaged the testing of artillery equipment, helicopters surveillance, identification systems, aircraft navigational systems and the guidance system for the controversial unarmed cruise missiles. The Pentagon wants to test the cruise guidance system over the north-west borders and northern Alberta in Canada because of the similarity of the terrain to that in parts of the USSR.

Exclusive Economic Zone: President Reagan has declared US sovereign rights over the mineral and fishing areas within the 200 nautical miles of US coastline. Within this controlled straits in the Pacific and the Caribbean. Known as the Exclusive Economic Zone it gives the US the right to exploit natural resources and to place artificial islands and other structures and to conduct marine scientific research and fisheries. It also gives the US exclusive rights to exploit the natural resources and fisheries in the continental shelf.

The Employees Family Pension Scheme: The Government has decided to increase the family pension paid from Rs 60 to Rs 100 to Rs 200 a month progressively with effect from April 1, 1983. For those drawing below Rs 400 a month the monthly rate of family pension will be 30 per cent of pay subject to a minimum of Rs 60 and maximum of Rs 120. For those drawing over Rs 400 a month the rate will be 20 per cent of pay subject to a minimum of Rs 120 and maximum of Rs 320.

Iceland Parliament dissolved: Prime Minister Gunnar Thoroddsen dissolved Iceland's Parliament and called for early elections on April 23. Thoroddsen's move followed the Althing's, (Parliament) preliminary approval to a constitutional amendment increasing its size by three seats and lowering the voting age from 20 to 18 years. The amendment must be approved by three succeeding Althings to take effect.

The Thai Parliament on March 16 voted against pro-monarchy constitutional amendments. The Parliament voted by secret ballot, with only 254 in favour of the draft, 10 short of the required 264 or just over half of the 301-strong elected House of Representatives and the 225-strong appointed Senate. The vote followed week-long demonstrations necessitating the deployment of a 300-member police force outside the Parliament on the voting day. The decision was welcomed with applause. Thai King Bhumibol Adulyadej, on March 19 dissolved the Lower House of Representatives and called for general election on April

18, nearly two months ahead of schedule. The King's move followed the abortive parliamentary attempt to change the constitution in favour of the armed forces.

Cosmos 1445, a Soviet-launched satellite, came down in the Indian Ocean on March 16, less than 12 hours after it was launched.

The Indo-Nepal trade treaty and the agreement of cooperation over unauthorised trade, due to expire on March 24 this year has been extended, following an Indo-Nepal inter-governmental committee meeting which concluded on March 21. The trade treaty has been expanded to include 10 more items in addition to the existing 26 items which will have duty-free access to the Indian market. India will also import raw pite from Nepal upto 35,000 tonnes annually through private trade.

Chinese planes for Pakistan: Chinese-built A-5 planes have been inducted into Pakistan Air Force.

Political crisis in Mauritius. Eleven ministers belonging to the ruling Mauritian Militant Movement (MMM) party resigned Cabinet posts triggering off another political crisis in Mauritius. Among the 11 was Paul Berenger, Finance Minister, who resigned from office a second time, the first time being in October 1982. No reasons were assigned for the resignation. The crisis followed the dismissal of the Mauritian Broadcasting Corporation Director General Gaetan Essou, a close associate of Berenger.

Indo-Soviet plans for space research: India and the Soviet Union have set up four joint groups for space research. The two countries have also considered the possibility of setting up a permanent working group for the investigation of earth's natural resources by satellites.

The Andhra Pradesh Assembly on March 24 adopted by a vote of 210 to

1, a statutory resolution seeking the abolition of the Congress(I)-dominated Legislative Council. The resolution was moved by Chief Minister N.T. Rama Rao.

The Vatican and Sweden re-established diplomatic relations on March 24, after a 453-year break in ties that began with the Reformation.

DIED

Arthur Koestler, 77, author of the much-acclaimed novel *Darkness At Noon*, and his wife were found dead on March 3 at their home in London. They had died following an overdose of drugs. Koestler, believed to have been suffering from Leukemia and Parkinson's Disease, was an ardent supporter of euthanasia or the right to commit suicide.

Georges Remi, 75, the creator of the comic book boy-hero Tin Tin, who has delighted millions of readers in over 30 languages, on March 4 in a Brussels hospital. Remi wrote under the pseudonym of Hergé.

Barney Clark, 62, world's first and only recipient of a permanent artificial heart on March 23, his 112th day with the plastic heart, at the University of Utah Medical Centre from "circulatory collapse and secondary to multi-organ system failure".

Kedar Panday, 63, former Union Irrigation Minister, on March 25 in New Delhi's Ram Manohar Lohia Hospital after being in coma for five days following a brain haemorrhage.

M. Chalapati Rau, 72, veteran journalist and former editor of the *National Herald*, on March 25 in a New Delhi teashop, of heart failure.

Prof. Gyan Chand, 89, distinguished economist, on April 6 in New Delhi. Regarded as a doyen among the progressive economists in the country, Prof. Gyan Chand was the economic adviser to the Planning Commission between 1948-51. He was with the International Monetary Fund for two years and also served as the head of the department of Economics in the Patna University.

Gen J.N. Chaudhuri, 75, former Chief of the Army Staff, on April 6 following a cardiac arrest. Gen Chaudhuri was the army Chief from November 20, 1962 to June 8, 1966. Following his retirement he was appointed Indian High Commissioner in Canada. Gen Chaudhuri had the distinction of being the first Indian to command an armoured regiment, the 16th light cavalry, during World War II in the battle of Meiktila. After independence, he led the first armoured division in the Hyderabad operation in 1948. He was also the overall commander of the Goa operation in 1961.

ANIL PENNA

FICCI'S NEW PRESIDENT

Ashok Jain, President of the Sahu Jain Trust and Chairman of the Times of India Group of publications, took over as the President of the Federation of Indian Chambers of Commerce and Industry (FICCI) for 1983-84, on April 4.

He had earlier served as President of the Indian Chamber of Commerce, All India Organisation of Employers, Indian National Committee of the International Chamber of Commerce, Cement Manufacturers Association, Indian Paper Mills Association, Bihar Chamber of Commerce and Bihar Industries Association.

TENNIS

Following were the major international tournaments held in March:

Jose Higuera (Spain) beat Eliot Teltscher (USA) 6-4, 6-2 to win the \$2,55,000 Grand Prix tennis tournament held in La Quinta (California) on February 27.

Vitas Gerulaitis (USA) beat Heinz Gunthardt (Switzerland) 7-6, 4-6, 6-3 to win the \$75,000 ATP tennis tournament in Kuwait on February 28. In the same tournament, India's Vijay Amritraj teamed up with Ilie Nastase (Romania) to win the doubles title beating Rod Fawley (Australia) and B. Dyke (USA) 6-3, 3-6, 6-2 in the final.

The latest ATP rankings for men are: 1. Ivan Lendl (Czechoslovakia); 2. Jimmy Connors (USA); 3. John McEnroe (USA); 4. Guillermo Vilas (Argentina); 5. Jose Luis Clerc (Argentina); 6. Vitas Gerulaitis (USA); 7. Gene Mayer (USA); 8. Higuera Jose (Spain); 9. Mats Wilander (Sweden); 10. Peter McNamara (Australia).

China came from behind to defeat holders India 2-1 in the finals of the Second Asian Tennis for the Ghaffar Cup at Kuala Lumpur on March 16. The break-up results:

Anand Amritraj beat You Wei 6-4, 6-3; Shashi Menon lost to Liu Shuhua 6-3, 6-7, 9-11; Anand and Nandan Bal lost to Shuhua and Ma Keqin 6-7, 7-5, 3-6.

BILLIARDS

The world championships for professionals ended at Peterborough (England) on March 20 with a victory for Rex Williams (UK), who beat Fred Davis in the final match.

MOTOR RALLY

The third rally of the year, the Portuguese Rally, which ended on March 6, was won by Hannu Mikkola (Finland) driving an Audi Quattro, with teammate Michelle Mouton (France) a close second. Reigning world champion, Walter Rohrl (West Germany) in a Lancia, finished third.

CRICKET

India lost the First Test (Kingston, February 23-28) and drew the Second (Port of Spain, March 12-17) of the five-Test series against the West Indies. The scores: First Test: India—251 and

Lendl: First among the best.

174, West Indies—254 and 173 for 6, Second Test: India—175 and 469 for 7, West Indies—394.

Karnataka regained the Ranji Trophy when they defeated Bombay at the Wankhede Stadium on the basis of the first innings lead. The match was played from March 11 to 14.

India lost the first 1-day international (Port of Spain, March 8) and won the second (Berbrice, Guyana, March 29) of the three 1-day internationals to be played against the West Indies.

FOOTBALL

Holders Bengal and Goa created history when they became the first-ever teams to share the Santosh Trophy at the 39th National Football Championships held in Calcutta on March 6. The two teams were involved in a goalless draw on March 5 and the following day's replay and then 30 minutes of extra time too failed to produce any goal.

Hungary won the Jawaharlal Nehru Invitation International Football Tournament defeating a fighting Chinese team by two goals to one in the finals held in Cochin on March 30. All the goals came in the second half. Deep defender Nagy and striker Dobany scored for the winners and linkman Liu Haiguang for China. Watched by a record crowd of over 75,000, the Hungarians, with the professional experience and skill, had the young Chinese team on the run for most of the time.

BADMINTON

Misbun Sidek (Malaysia) came from a one-game deficit to beat Morten Hansen Frost (Denmark) 9-15, 15-10, 15-13 to win the Swedish Open Championships held in Malmoe on March 13. Helen Troke (UK) outclassed compatriot Jane Webster in the women's final.

China bagged three of the five titles at stake at the All-England Championships held at Wembley from March 23-27. China won both the singles and also claimed the women's doubles title. The break-up results

Singles: Men: Luan Jin (China) beat Frost 15-2, 12-15, 15-4, Women: Zhang Ailing (China) beat Wu Jianqui (China) 11-5, 10-12, 12-9. Doubles: Men: Thomas Kihlstrom and Stefan Karlsson (Sweden) beat Mike Tredgett and Martin Dew (England) 15-10, 15-13, Women: Wu and Xu Rong (China) beat Lin Ying and Wu Dixi (China) 18-16, 11-15, 15-6 Mixed doubles: Kihlstrom and Nora Perry (England) beat Steen and Anne Skovgaard (Denmark) 15-9, 15-11.

BOXING

Jeff Chandler (USA) successfully defended his WBA bantamweight title for the seventh time, with a unanimous points decision over compatriot Gabby Canizares at Atlantic City on March 12.

Charlie Magrie (UK) became the new WBC flyweight champion when he scored a 7th-round T.K.O. over Eleoncio Mercedes (Dominican Republic), defending his title only for the second time, at Wembley in London on March 15.

Michael Spinks (USA), the WBA champion, became the undisputed world light-heavyweight champion after a points victory over the WBC title-holder, American Dwight Braxton (now calling himself Dwight Mohammed Qawi), at Atlantic City on March 18.

The WBC welterweight title is still vacant (after Sugar Ray Leonard's retirement in Nov '82) because the title fight between Colin Jones (Wales) and Milton McCrory (USA) ended in a draw at Reno, Nevada, on March 19.

Larry Holmes (USA) successfully defended his WBC heavyweight title for the fourteenth time, at Scranton, Pennsylvania, on March 27, with a unanimous

European champion, Lucien Rodriguez (France)

HOCKEY

Jaipur won the 47th National Hockey Championships (for the Rangaswamy Cup) for the third time when they defeated Bombay 1-0 in the finals held at Meerut on March 13. Gurmait Singh netted the winner in the 61st minute.

The Indian women's team won the three match series 2-1 against the touring Soviet team, winning 2-1 at Farida bad (March 4) and 3-2 in Jaipur (March 6) and losing 1-2 in New Delhi (March 10).

MOTOR RACING

On March 13, at the first Grand Prix of the year, the Rio de Janeiro crowd went wild with cheering as the Brazilian Nelson Piquet in a turbo-charged Brabham, took the chequered flag, just ahead of reigning world champion Keke Rosberg (Finland) in his Williams. But the latter was disqualified because his mechanics had helped push the car after a pit stop for refuelling.

A fortnight later, on March 27, the US (West) Grand Prix was held at Long

last race to be held at this picturesque setting, with the circuit winding its way through some of the city avenues. The local residents feel that the mounting financial burden of holding the race is not justified.

John Watson (North Ireland), starting in the 22nd position on the 26 car grid, worked his way through the cars passing them left and right and won the race, after no one had given him any chance. His McLaren teammate Nicki Lauda (Austria) finished second.

SQUASH

The ISPA championships, sponsored by Thornton and organised by the International Squash Players Association itself, was won by the defending champion Jahangir Khan beating fellow-Pakistani Qamar Zaman, 9-4, 7-9, 9-5, 9-7, in the finals held in Munich on March 1.

Raj Manchanda and Bhuvaneshwari Kumari retained the National Squash singles titles in Jaipur in the championship which concluded on March 6. Manchanda defeated Diniar Ali Khan 9-5, 9-4, 9-7 while Bhuvaneshwari beat Honey Sharma 4-9, 9-5, 9-2, 9-0.

ATHLETICS

Tamara Bykova (USSR) leapt to a new world record in the women's high jump in the 14th European Indoor Athletic Meet held in Budapest on March 5. She cleared a height of 2.03 m.

The ace middle-distance runner Sebastian Coe (Great Britain), who has set his sights for a gold at the inaugural World Championships (at Helsinki from August 8, 1983), made his intentions quite clear at the last two meets of the Indoor season. At Cosford, on March 13, he set a new indoor world record for his pet event, the 800 m, clocking 1:44.91 sec and then a week later, on March 19 at Oslo, he broke the 1 000 m indoor world record with a time of 2:18.58 sec. This was his twelfth world record.

On March 12, at Shanghai, the 20-km-walk Asian record (AR) was broken by Zhang Fuxin (China), clocking 1:27:38.0 sec. Two days later he also shattered the 50-km-walk AR with a time of 4:03:02.0 sec. The earlier records were held by Bachan Singh (India) at 1:27:57.6 sec and Qui Shi Yong (China) at 4:07:23.0 sec.

MINI-MAG

A ROYAL SHOW

Bullet-proof cars, roof-top watchmen, commandos and sharpshooters, metal detectors and TV scanners, food tasters in hotel kitchens, hospital rooms equipped with bullet proof glass. Before you start wondering if it is the setting for an action-packed Western movie, let us put an end to your suspense. These were all part of the elaborate security arrangements in Delhi which was the venue for the Seventh Non aligned Summit held in March. A "new experience" for India's capital which hosted the largest-ever such gathering in the world—nearly 100 countries participated in the Summit. Let's go back to the days just preceding the Summit, and take a look at the preparations that took place to host the mammoth event.

Security arrangements

With the help of more than 4,000 commandos and sharpshooters, an array of electronic surveillance gadgets and sophisticated hospital equipment, the Indian Government left nothing to chance as far as the security of VVIPs was concerned.

The capital's four five star hotels—Ashok, Maurya, Oberoi and Taj—which accommodated the 70-odd VVIP guests, were out of bounds to the general public during the Summit. Regular bookings in these hotels remained frozen from March 4 to March 16. The Intelligence Bureau (IB) coordinated the security operations. [More than 20 rooms in each hotel were occupied by the IB and RAW (Research and Analysis Wing) officials.] An impregnable cordon was thrown around these hotels and crack commandos took over. They could be seen on all the floors carrying stenguns and walkie-talkies.

All deluxe suites, where the heads of state and government stayed, had a hotline with the parent country and the Summit venue, Vigyan Bhavan. Each hotel had an OCS (Overseas Communication Service) control room, a police

(security) control room and a protocol section. There was random checking of food samples by food analysts to determine their safety and quality of preparation.

Every VVIP was given a bullet-proof Mercedes Benz for travel, his wife had an air-conditioned Ambassador and his foreign minister an ordinary Ambassador. (In all 1,400 cars, station-wagons and luxury coaches were kept on the ready by the ITDC, which managed the transport affairs of the in-coming contingents.) Each head of state or government was provided with three heavily-armed and specially-trained security men by the Indian authorities.

To provide quick and expert medical relief in case of an emergency, a team of 20 doctors was trained to perform emergency operations at Ram Manohar Lohia Hospital. Twelve to 14 rooms were also equipped with bullet-proof glass.

Vigyan Bhavan was virtually under siege before and during the Summit—scores of armed guards, security men in plain clothes and intelligence officials surrounded the premises. The heads of state and government were the only privileged personnel who walked in through Gate No. 1 of Vigyan Bhavan without any scanning. On the other hand, only a select few of the media representatives had access to the main hall. The rest covered the proceedings from the Media Centre which was equipped with a close-circuit TV monitor. In the main

Operation clean-up: Sprucing up the capital for the Summit are the motorised sprinklers of the municipal corporation.

building of Vigyan Bhavan, metal detectors, TV scanners and a host of other sophisticated gadgets were installed.

For two days (March 5 and 6) Delhi's Palam Airport was closed to all flights except those bringing in the VVIPs. An extremely tight security cordon was laid around the airport with BSF armed guards keeping vigil. An army helicopter hovered over the airport at regular intervals. Almost every police and military official was equipped with remote control walkie-talkie sets. The entire route from the airport to the four hotels was heavily guarded.

A 'new' Delhi

Over Rs 10 lakhs were spent in decorating the VIP route from Palam Airport to the four deluxe hotels and Vigyan Bhavan. Overnight, Delhi was transformed into a fairyland. The VIP lounge at the new airport, with its wall-to-wall carpeting and raw-silk curtains and furnishings, lent a royal look to the place. (The President, Vice-President and the Prime Minister virtually camped at the airport for two days—March 5 and 6—to welcome the 'special guests'.)

Sodium-vapour lights were installed all along the VIP route. And at an interval of every 100 metres, an arch said welcome in different languages. Besides,

there were satin bags of all sizes, many coloured silk festoons and blooming flowerpots. White-washed sidewalks, spotless pavements and newly-painted trucks, electric poles and road berms gave the city a festive look. The NDMC redeveloped 30 roundabouts with artistically-laid out flower beds. A round-the-clock mobile team was employed to keep the roads neat and clean.

The four hotels

The capital's four plush hotels which hosted the 70-odd presidents, prime ministers, kings, crown princes and emirs, went out of their way to pamper their honoured guests.

To stave off any controversy about preference in the allotment of hotels, the authorities found a simple solution—they went in for alphabetical distribution. Thus, Ashok Hotel housed heads from countries starting with alphabets 'A' to 'K', Maurya 'L' to 'N', Oberoi 'O' to 'R' and Taj 'S' to 'Z'.

However, there were a few exceptions to this rule—necessitated by force of circumstances. Bitter foes Iran and Iraq, who follow each other alphabetically, did not have to step onto each other's toes. While Iran was allotted Ashok, Iraq was provided Taj. Similar precautions were taken in the case of Syria and Saudi Arabia, Libya and Chad and the two Yemens.

At Ashok Hotel which hosted the largest contingent—41, all the luxury suites, lobby, convention hall and public areas were done up at a cost of more than Rs 2 crores. Each suite now has wall-to-wall carpets, exquisite furnishings, colour TV set, refrigerator and the lot. Not less than 10,000 flowers were arranged every day.

A whole new suite of rooms was added to the Maurya Sheraton which accommodated 16 VVIPs. A guest at Maurya could have his pick from delicacies ranging from idlis and dosas to caviar and smoked salmon.

The Oberoi Intercontinental which played host to 14 heads of state, spent over Rs 1 crore to redecorate 13 suites. New furniture and art objects were brought in and Jacuzzi tubs, costing over Rs 1 lakh each, were fitted in the mirror-finish granite walled bath rooms. The hotel flew in specialist Arab cooks from Cairo, flowers from Singapore and arranged to pipe Arab music into every room.

Although the Taj Mahal Hotel is only four years old, more than Rs 2 crores were spent on bringing it up to the VVIP level. The special guests—28 of them stayed here—had palate-tickling choices ranging from Chinese, Arabic and Continental to African cuisine.

Vigyan Bhavan

A combination of modern and oriental decor was used to beautify Vigyan Bhavan. Floor patterns with fresh flowers were made at the entrance and in the lounge by the CPWD. But the most significant alteration took place inside the main hall where the rostrum was enlarged to accommodate 80 heads of state and government, while the over-

The Day of the Jackal? It couldn't have been since 4,000 commandos and sharpshooters armed with high tech weapons and gadgets were deployed to the security of VVIPs.

all seating capacity remained the same—1,400.

There were three restaurants at Vigyan Bhavan. Ashok Mayur meant exclusively for the heads of state and government, the Samrat for the officials and a cafeteria for the newsmen at the Media Centre (the latter was specially set up by the PIB in the Vigyan Bhavan annexe).

In order to facilitate communication, the premises were equipped with an over 1,200-line French electronic telephone exchange. The Media Centre had 40 trunk-call booths where an international connection could be made within two to three minutes.

Media

More than 1,500 foreign and Indian journalists vied with each other in reporting the much-awaited event. For the first time, a wide range of modern facilities were provided in this country to facilitate the coverage of the Summit. These included the telephoto transmission facility where you can transmit a photograph through telephone-linked photo-transmission equipment. The Media Centre provided on-the-spot facilities for transmission of news, radio and TV reports and photos through telex, telephone and satellite. A computerised service for seeking interviews with visiting delegation members was also set up to facilitate the journalists.

While the journalists were busy covering serious non-aligned business, Delhiites had a royal time glimpsing world leaders in their Mercedes outside their hotels or on the VIP routes. It was, indeed, a royal week in the capital.

Aruna Chauhan, New Delhi

THE EMBLEM

Created by N N Srivastava of the College of Art, New Delhi, the emblem of the Seventh Non-aligned Summit was so designed as to symbolise equality, unity and peace. The five peepal leaves, which are the three 'limbs' of the symbol, represent the *panchsheel*—the five principles of peaceful co-existence between na-

tions. They also symbolise the five continents, signifying the global nature of the Non-aligned Movement (NAM). The similarity of each leaf in size and shape symbolises the equality of all nations.

The number 7 in the emblem represents the stem or trunk of a tree. Apart from standing for the Seventh Summit, it hints at what has been the most common meeting place of people in the Orient since bygone days—the big trees under which was conducted all the important business. The dove, placed in the centre of the symbol, indicates that the concern of the Summit is peace.

NOTICES

TALKING CAR...

Top: Maestro's dashboard with computer. Above: Margaret Thatcher outside 10 Downing Street going for a trial run in the Maestro.

The British Austin Maestro Vanden Plas goes vocal, thanks to the talking computer on its dashboard. The voice—that of TV actress Nicolette McKenzie—comes through a larynx in the dashboard. Europe's first talking car, it will be produced at British Leyland's plant in Oxford, England.

...AND TRAFFIC LIGHTS

When cars start talking, can their friend, guide and admonisher, the traffic lights, be far behind? Talking lights for pedestrians have already started tattling in the Japanese town of

AP, they were 'thought up' to deal with pedestrians who have a somewhat negligent attitude to traffic regulations and tend to cross streets at red lights.

When the lights go red, a pleasant female voice warns people that they shouldn't cross. 'Talking technology' is becoming increasingly popular in Japan. There are gas stoves which inform housewives when a dish is ready to be taken out of the oven and a voice in the car that reminds drivers to fasten their seat belts.

Rajeev Sethi, Khandwa

THE QUIET ACHIEVER

Quieter than a Rolls Royce, gasoline consumption zero, pollution-free—and mobile. Never fear. It isn't a dream—or an alien spaceship. It is reality—and it is *The Quiet Achiever*, Australia's first solar-powered gondola-like car. In mid-January, souls in Sydney stared, laughed and then cheered loudly as the car pussy-footed in with a 2,500-mile trouble-free trek across Australia on its speedometer.

Talking of speed, the car averaged 15 miles per hour and logged in 10 hours a day. Said Hans Tholstrup, one of the car's drivers, after the run: "We've proven that solar energy cannot only run a vehicle, but that it is cheap as well. Our only expense was the 20-cent toll to cross the Sydney Harbour Bridge."

For an aborigine in the Australian outback, *The Quiet Achiever* may still be dear. It cost Tholstrup and Australian auto designer Larry Perkins \$15,000 to build. British Petroleum (BP), makers of the vehicle's solar panels, financed most of the project. Costly as it is, *The Quiet Achiever* could yet be Australia's—and the world's—futuristic car. Never mind the terrain: the car has a lightweight steel chassis,

wheels powered by a single-horsepower electric motor. Never mind the weather: for a good part of the trip, Australia's usually-bright skies were overcast. Thanks to BP's solar panels, which were far more efficient than expected, *The Quiet Achiever* made the run ahead of schedule.

BLUES FOR THE BLUE-COLLAR

There are plans to replace the blue-collar with a metallic one in the US. The General Motors company—with 1,090 robots already reporting on duty—plans to use 5,000 by 1985 and, God willing, 14,000 by 1990, in its car and truck plants.

The estimate is that the total number of robots in use in the US will reach 1,15,000 by 1990.

To attain this level, the robot industry needs a large infusion of capital to develop a manufacturing base. As orders and income increase, working capital will become available for expansion and further research, the US Department of Commerce reports.

AN OPEL COUPLE

Love is walking down the highway to your Opel on a windy day. This new Opel Senator CD from the FRG has a swing-action stabiliser on the front axle that enhances comfort and safety thus endearing the car to drivers who believe in action. The aerodynamic refinement of the car reduces fuel consumption up to seven per cent. This four-cylinder version, top speed 180 kmph, hits the market around June this year.

Courtesy Inter Naciones

The Bridge That Launched A Thousand Deaths

World War I started here. This bridge over the Miljacka river in Sarajevo has been firmly entrenched in history as it was here that a young Bosnian on June 28, 1914, shot and killed Austrian heir to the throne, Archduke Frank Ferdinand, an event which led to the Great War. Notwithstanding history, this 4,50,000-strong city is to host the 25th Olympic Winter Games from February 8 next year.

HOVENTURE VENTURES

AN INDIAN EXPERIENCE

Richard and Mopsa English, a young British couple, were recently in Delhi, in the course of a three-year 80,000-km journey on wheels round the world. Driving a 650 cc Triumph Thunderbird with a heavy-duty fibreglass side-car, Richard and Mopsa set out from London last August and have already covered Western Europe and 10 other European and Asian countries. Besides the thrill of driving, the couple feel their tour is providing them an excellent opportunity to make contact with different cultures. They are fast learning not to have pre-conceptions about countries and are particularly impressed with the hospitality, kindness and variety of the Indian people, the efficiency of the Indian tourist industry and the level of advancement of the economy and, especially relevant to them, the roads! A first-hand account:

It was in August 1982 that, with some trepidation, we set off through the London rain on our Triumph Thunderbird 650 cc motorcycle, complete with side-car box to carry spare parts, equipment, clothing, etc., etc.—in fact, with all the necessities we would need for our three-year 'round-the-world' journey. We planned to travel down through Europe and the Middle East, by boat from Dubai to Pakistan, into India, and then on to South-East Asia, Australia, the Americas and finally to Africa. To this end we had been planning, saving and organising for over two years.

Seven eventful and exciting months later, we were in Delhi—we crossed into India at Amritsar where, among other things, we visited the beautiful Golden Temple: we had forgotten that tobacco is forbidden in the Sikh religion and as we entered we failed to remove a packet of cigarettes from our bag. However, as we tried to take a photograph of the Temple shimmering in the waters of the tank the camera jammed—maybe someone was trying to tell us something? We enjoyed the Punjab tremendously—green and fertile and its people, very talkative and friendly, telling us a great deal about India and its peoples and culture during our first few days here; they were very helpful and considerate: a fine introduction to the country. We drove to Delhi via Chandigarh, pleasantly surprised at how good the roads were—particularly after a few bumpy rides in Pakistan and the Middle East. But we were a little shocked by the inconsiderate driving of some people, despite the many road safety signs. On several occasions, we were forced off the road by approaching buses overtaking one another, luckily with no damage done.

Delhi was preparing for the Non-aligned Conference when we arrived and here we began organising our programme. We visited Srinagar in Kashmir (not by motorbike but by train and bus—a welcome rest after so much driving) where,

*Thumping Thunderbird Triumph:
Richard and Mopsa English on the road for a taste of India.*

houseboat and arriving late at night, we were kidnapped and taken to another, the owner swearing we had really booked with him. The next morning we found the correct houseboat and promptly moved, being well looked after and fed by the family we had originally booked with. It seems that out of the main season in Kashmir everyone is desperate for business and will go to all sorts of lengths to get it. Despite it being wet and cold we enjoyed our stay there, hiring a bicycle, riding around the lakes and visiting Gulmarg, under 5 feet of snow to talk to and watch the winter skiers. The Kashmiris were cheerful and friendly despite their obsession with 'business'. Our return to Jammu by bus was held up for eight hours by a landslide across the road—a quite frequent occurrence at this time of the year, it appears.

We have seen a small part of this vast country and plan to travel south and experience the many and varied places that go to make up India.

Club Desk

In response to our suggestion to the readers to form their own CCTimes clubs, over 200 of them have already been set up in different cities and towns all over India. Here we feature activities of some of these clubs. Why don't you too club your resources and write to us about the goings-on at your club?

CCTimes Club, Chas (Bihar), initiated a discussion on the Assam situation in February while the polls were being held there. The views expressed were diverse, some even questioning the legitimacy of holding the elections. The Club plans to hold a similar discussion on the Non-aligned Movement and has requested CCTimes to provide guidelines for this.

CCTimes Club, Berhampur (Orissa), conducted seminars on planning in India and budgetary trends and fiscal policy; arranged an essay competition entitled *Self-employment*, arranged a guest lecture on *Employment Opportunities for Students in India*; and conducted a debate competition on the *Role of Women in India*.

CCTimes Club, Chandausi (UP), organised a debate on the *Uses of Science in Daily Life*. Prizes were awarded to the three best debaters.

CCTimes Club, Gaya (Bihar), organised a debate on *The Evil of Dowry in Hindu Society*.

'NO STOPPIN' CRUYFF

"Perhaps just the best, with his deceptive simplicity, his economy of movement, his determination. Yes, I would rank him above Pele," said Franz Beckebauer, the captain of West Germany's 1974 World Cup soccer winning team, of the 'electric-heeled' Dutchman Johan Cruyff. High praise indeed—coming as it did from the most astute defender in world soccer.

Cruyff was born in '47 in a poor quarter of Amsterdam and went to Ajax as a boy. He was already attracting attention when he was in the junior team. He made his debut at the age of 17 in the league side and got capped for the Netherlands in 1966 against Hungary. Temperamental as he was right through, Cruyff's international career suffered an early setback when he was sent off in his second game against Czechoslovakia, after a violent argument with the referee. The Dutch Federation suspended him for a year but it was commuted to six months. He came back in the national side soon. His subsequent experiences with the national team also tended to be stormy. In 1969 he was left out of the national side against Bulgaria in a vital World Cup match for arriving late at a training camp.

Cruyff has been on the championship-winning team seven times, Dutch Champions six times and Spanish once. In 1972, he was the star player of the Ajax team which became the first European club to win their domestic league and cup, the European Cup and World Club championships in the same year. Further, Cruyff is the only footballer to win the 'Golden Ball' award (annually awarded to the best footballer in Europe) thrice.

Cruyff's physique has nothing to do with his dazzling success and effectiveness. Tall and slim, tipping the scale at just about 10½ stones (147 lbs), he had, early in his career, a lot of difficulty in getting any real power behind his shots. He developed the whiplash power in his shots later. He is terribly fast, though he insists that he is simply quick off the mark. It is reported he can, from a standing start, run 30 m in 3.0 sec. His ball control is extraordinary in that his long, thin legs can galvanically twist and turn, beating an opponent with the sheer speed and the unexpectedness of his turn. He is no mean player in the air, either.

In such a physical era, it is inevitable that a player of Cruyff's powers and talents should often be maltreated. For a long

time he was inclined to retaliate, sometimes bearing the consequences. But later he developed a more mature outlook, saying that when a player fouled him, he preferred to get his revenge by making him look stupid.

His popularity, the world over, is so great that a survey in 1973, the year he left Ajax to join Barcelona for the period August 1 to 30, revealed that 84,969 sq cm review space was accorded to Cruyff in the town's papers. This was more than any other sportsman in any part of the world.

Cruyff forsook his club Ajax, at the peak of his career, to join Barcelona F.C. of Spain. The transfer money involved was nearly one million pounds with Cruyff pocketing about £40,000 plus monthly payments and a house in addition. The reason, it came out later, was not just money; it was the jealous attitude of his Ajax teammates that Ajax could do perfectly well without him.

In the early part of last year, Cruyff came out of retirement to play for his old club Ajax Amsterdam. Soon attendances doubled and Ajax started moving up in league standings. Ajax are currently leading the table. Even now, in his mid-30s and past his prime, he has the requisite charisma and presence to bewilder opposing defences, and talent to enthral spectators and fill stadia.

So great is his game that Cruyff took the Dutch team into the finals of the World Cup twice—in 1974 at Munich and in 1978 at Buenos Aires. But

unfortunately, Holland needed more from Cruyff to take home the cup on both occasions. In 1974, they went down to West Germany 1-2, after leading by a goal scored in the very first minute. In 1978, they lost to Argentina 1-3 after a 1-1 deadlock at the end of the stipulated time. But even more agonising was the fact that Holland didn't even qualify for the 1982 World Cup in Madrid.

So there it was, the great Cruyff never achieved a footballer's dream— a World Cup winner's medal. He went into retirement after the 1978 World Cup and came out of it in early 1982, but his dream remained a dream. Such is fate. Sometimes even the greats are denied the ultimate glory.

V. Krishnaswamy, New Delhi

On The Lighter Side

Reading between the lines

"I have to go to the mountains because of respiratory trouble" (*His creditors won't let him breathe!*)

I have hundreds of people under me (*He is a watchman in a cemetery*)

Rana Sandhu, Jabalpur

A student, poor in mathematics, copied from his friend's geometry exam paper using a hand mirror. He got all his answers backwards. His friend got a grade of 91, he 19!

Ticket collector: "Lost your ticket, have you? Do you expect me to believe that?"

Passenger: "Why not? I believe the railways when they incur losses every year."

A gentleman to a prisoner: What made you go to prison?

Prisoner: Competition, sir.

Gentleman: Competition! Is it that tough?

Prisoner: Yes, I made the same coins as the government.

During an English class, the teacher wanted a sentence to be changed into past tense.

"He gives her a present," he said.

A student answered, "He gave her a past."

Shyam said to his dentist: "Ten rupees is a lot of money just for pulling out a tooth. It only takes you a couple of seconds to do it."

"I can pull it out very slowly if you like," replied the dentist.

Cherry Ka Baghicha: Environmental Theatre

A scene from *Cherry Ka Baghicha*: Ranevskya's garden party

IMAGINE THAT you have been transported in a time-machine from the present to the early 20th century, somewhere in Russia. You are amidst the sylvan surroundings of the Russian countryside, a large tile-roofed house stands before you, with a huge tree looming over it, its wide-spread branches swaying in the breeze; nearby lies a cherry orchard. And before your eyes unfolds a drama depicting those troubled times, just before the Glorious Revolution of 1917, with characters who look as if they've stepped out of a history book—the nobility who start clanking their finery and fiddles along with their retainers, back into the clothes.

It would be a unique experience, wouldn't it? Well, that's just what the ingenious Repertory Company of the National Council of Drama conjured up this time for the theatre fans of Delhi—a Hindi adaptation of Russian playwright Anton Chekhov's *The Cherry Orchard*. Called *Cherry Ka Baghicha*, the play was directed by Richard Schechner, the well-known American director and exponent of 'environmental theatre', and was staged in February-March at the open-air Megh-

doot Theatre. And what was so unique about it? Instead of being confined to a fixed theatrical framework, i.e., within the four walls of a theatre or on a single stage, the action shifts from one location to another after every act. In Act I, the audience is seated around two sides of the Ranevskya house. In Act II, the action takes place on two sides of the spectators in the cherry orchard beyond the house. A formal garden, decorated for a big party, is the setting of Act III, behind the Meghdoot Theatre. Finally, Act IV is enacted at the front of the Ranevskya house, with the audience standing by and watching. A carriage drawn by two horses also stands amidst the spectators, and takes the Ranevskya family away at the end.

The general idea, in Schechner's own words, is "to have you share the environments where *The Cherry Orchard* takes place: to give the story a three-dimensional feel... To offer in live theatre a physical experience to the audience—one that engages your whole being, not just your eyes and ears." The viewers are encouraged to move about freely in order to witness the performance from different quarters, thus making the experience fuller.

And this is what 'environmental theatre' is all about.

The play portrays the crumbling of feudal social order in Russia at the turn of the century and the emergence of a new class—dynamic and practical—which is slowly replacing the former. The focus is on an ancient family of landlords who have fallen upon bad days and are losing their hold on circumstances. Around this family revolve various other characters representing different classes, attitudes and ideologies. Lyubov Ranevskya, the owner of the cherry orchard, her brother Leonid Gayev and their old servant Feers are all representatives of the feudal order. Yermolai Lopakhin, the shrewd and business-like newly-rich merchant and Yasha, Ranevskya's young and ambitious servant, belong to the new upcoming class—the capitalists. Trofimov, lover of Ranevskya's daughter, rejects both feudalism and capitalism and dreams of the new order of socialism.

Actingwise too, it was a delightful performance, even though the acting is overshadowed by the environment many times. The actors notable for their good performance were Surekha Sikri as Ranevskya, G.K. Nair as Feers, Manohar Singh as Gayev and Vageesh K. Singh as Lopakhin. 'Environmental' Nissar Allana deserves a special mention for his wonderful work in designing the sets.

Coming back to the genre of environmental theatre at the end, it must be said that though it proved to be an interesting experiment and served to heighten the audience's involvement in the action of the play, it has a serious drawback. The spectators are so awed by the elaborate sets and their attention is so divided by action taking place at different parts of the setting, that they lose much of the flavour of the actual play—

the play as a work of literature with Chekhov's masterly touches in it. Wouldn't it be better to avoid the presentation of classics in this style, where one stands the danger of missing out on the niceties of the work of great masters because of lack of total concentration?

Hemendra S. Bartwal,
New Delhi

Travelling Theatre

SURABHI NATAKA Kalamandalam in Andhra Pradesh has theatre people in the true sense of the word. They know of no other job than the 'stage', even though the per capita income of the troupe works out to 65 paise a day and already some of the youngsters in the troupe are looking for other avenues for a decent living. The troupe consists of 120 artistes.

The 'Surabhi' troupe, going from village to village, erects a temporary auditorium and entertains the people, most of them unlettered, for about three months. There are about 25 plays in its repertoire, mostly mythological. They are enacted at night for five to six hours. The family stays in an improvised cottage behind the stage. Shortly, the Surabhi Kalamandalam is to celebrate its centenary. V. Govinda Rao was its architect.

The ancestors of the present family hailed from Maharashtra from where they migrated to Rayalaseema, about 200 years ago. The very first play of the family was *Keechakavadam* enacted around 1925. The scene setting, rendering of music in fact everything from ushering in to directing, are shared by the family members. The troupe adheres to tradition but in some areas like Telengana, to meet the demands of the local people, humour or dance items of about five to ten minutes are introduced in between two scenes. They carry the sets, scenes, etc with them.

BANK RECRUITMENT

PROBATIONARY OFFICERS/CLERKS

"Specialised Training in NSB Regular/Correspondence Courses has proved to be the guaranteed way to secure jobs in Banks as Probationary Officers & Clerks."

-says Editor, Citylight, Bombay.

If you have applied to State Bank of India or any Nationalised Bank Boards, for PO or Clerical Post, join our Course now.

Banking: A Rewarding Career:

Nearly 2500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. Any graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And, after nationalisation, Bank jobs have acquired a new status because now the Banks have taken upon themselves the responsibility of building a better India. Today, in our Banks, our social ideals find a dynamic expression. Bank jobs, therefore, offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects—(1) Reasoning (verbal, logical, non verbal) (2) Quantitative Aptitude (3) General Awareness and Current Affairs (4) English Comprehension (5) Essays, letters, precis writing—are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old, but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, ECGC as Officers. The subjects, syllabus, pattern of tests and examining body (NIBM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success oriented students join the Course well in advance of the test and benefit by our step by step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

JOIN NOW AND PREPARE FOR A RICH AND REWARDING CAREER. For details of vacancies, application forms and our special courses, write today with Rs 2/- P.O. or M.O. to

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers/Clerks are declared at intervals of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants, 2300 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A provenly competent, specialised and thorough coaching becomes a MUST.

NSB's Faith in Specialisation:

National School of Banking, head quartered at Bombay, was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams—of POs and Clerks. It has grown rapidly and is now the largest pre recruitment training institute in the country. Our continuous research and on going study of objective and descriptive exam question papers have contributed to our present pre eminence as the central institute for BANK RECRUITMENT training.

Make your gums strong.
And give your teeth a long life.

Only Forhan's has an exclusive astringent to strengthen gums.

The tingling sensation tells you it's actually working:

Even healthy teeth need the support of strong gums — if gums become weak and spongy your teeth no longer have a firm foundation. That's why Forhan's is formulated with an exclusive astringent that helps to tighten and

contract the gum tissue. The tingling sensation you feel when you brush your teeth with Forhan's is the astringent at work — making your gums stronger, firmer. So that your teeth stay healthy longer.

So give your teeth a firm foundation — Use Forhan's the toothpaste with an exclusive astringent.

If your gums are weak even healthy teeth become loose

Forhan's exclusive astringent tightens gum tissue

making your gums stronger giving your teeth a long life

Trust Forhan's It's the toothpaste created by a dentist.

LETTERS

Not So Non-aligned

The NAM (*Current Events*, April '83) continues to be a global trade union of economic have-nots consisting of black, brown and yellow ex-colonials. (Yugoslavia is the only white member.)

What is ironic is that there is no true non-aligned country in the NAM. Virtually all members tilt towards one superpower or the other for support.

Among the member countries, at least 25 are so small that their foreign policy has no impact on the international community; while a smaller number are preoccupied with their internal problems and are, therefore, unable to contribute anything worthwhile to world politics.

Jaydip Mishra, Dhankanal (Odisha)
Best Letter: Rs 40

Permanent Employment

The employment programme suggested in *Indian Economy: A Progress Report* (March '83) appears to be based on a permanent solution to the problem of unemployment. The need of the hour is to adopt a temporary programme that will create immediate jobs for the unemployed. Industrialisation, based upon the available resources and manpower, is an option. In these international conditions, it can be done. India has demonstrated its industrial capability. A number of the member countries in the NAM have also adopted this option. It is a time to think seriously about it. It should be a realistic and feasible proposal.

Kamran Khan, Bangalore
Prize-winning Letter: Rs 20

unresolved political and economic problems have led to an exceptionally explosive international atmosphere in present times.

All over the world 30 children die of starvation and poverty every minute; and every minute the world spends a million dollars on the stockpiling of armaments. This is a brutal paradox of our times.

In such a situation the consistent policy of opposing war and urging a relaxation of international tension and equal economic cooperation can play a major role.

Gaurav Bhatia, Lucknow

Pragmatic Policies

Indian Economy: A Progress Report (March '83) provides a deep insight into our increasing dependence on foreign aid. Maybe we cannot avoid taking foreign loans, but we can certainly reduce the amount of loans and better our precarious foreign exchange reserve position by adopting pragmatic and far-sighted policies. We should improve our industrial research facilities, set up export-oriented industries by utilising indigenous resources, create a free-trade zone to attract foreign investments for producing exportable goods and reduce imports by producing more import substitutes.

Dilip Chakrader, Patna

Where Did We Go Wrong?

Where Did We Go Wrong? (March '83) gives good ideas for improving our performance in future cricket Test series.

S.P. Mahanty, Ahmedabad

Elusive Semis

Vijay Amritraj has never reached the semi-finals of Wimbledon, as reported in the *News Capsule* (March '83).

P.V. Sundar Kumar, Berhampur

Bloody Mandate

Apropos Assam: *A Bloody Mandate* (*Focus*, April '83), we disagree with N.D. Arora when he writes that the Assam agitationists should have participated in the elections. Had they done so, they would have had to go by the 1979 voters' list, which would deprive about a million young Assamese, who have come of age since then, from casting their franchise; besides, it contains the names of a large number of 'foreigners'. The agitation leaders have time and again emphasised that the '79 list is incorrect, so how could they employ double standards now and go by the same list? Also, by joining the elections, the agitationists would have recognised lakhs of 'foreigners' on the voting list as citizens of India. So how could they act against them afterwards and ask for their deportation?

Bipul Bhuyan, Sonari; Sanjib Bhuyan, Titabor; Amar Jyoti Patgiri, Gauhati

Your article sheds no light on a very significant feature of the Assam situation—that the Assamese are destined to be a minority in their own land out of socio-economic compulsions. Assam's rural economy is completely dependent on the non-Assamese who comprise a very large section of the working force, including the agricultural labour. If the agitationists' demand to deport the foreigners is conceded, it will prove a great setback to the state's economy, which is already in doldrums.

Jogendra Krishna, Arrah

Redefine Reservation

The government should take urgent steps to redefine the 'backward classes' for the purpose of reservation in the spheres of education and employment. Why should the children of well-placed members of the SC/ST be given preference over others? The reservations should be made on the basis of the needs and circumstances of the SC/ST members rather than merely on the virtue of caste.

Chandra Sekhar, Srirangar

Banking Success

I am glad to inform you that I have been selected by the Banking Service Recruitment Board and posted in the Indian Bank, thanks to *CCTimes*, especially the November '82 issue (*What's Banking About?*). I found it to be a great help in my written exam as well as interview. (My Registration No: TI 170455.) As a regular reader of *CCTimes*, I have found it to be very useful in keeping abreast of current events and improving my English.

A.K. Bala Krishna Mohan, Tirunelveli

I read your magazine with great interest because it is the only magazine of its kind that gives photographs of news items.

G.N. Mohan Kumar, Dharwad

A Cruel Paradox

The threat of a worldwide conflagration hangs over us all, regardless of our political or religious views. The continuous stockpiling of armaments and the

Hello folks...

An American tourist, while travelling in a bus in Sweden, began talking to his neighbour. Glorifying the democratic system in his country, he said: "How real our democracy is. You may get a telephone call and guess who is speaking to you? The President of the United States!" The Swede looked at the American and retorted: "Well, here in Sweden, you might be travelling in a bus and talking to a person who might be our King." The passenger got down at the next stop. The American was told that the person was the King of Sweden.

In contrast is the story of an Indian minister who visited the Netherlands. The Indian ambassador received him at the airport and both were waiting for the minister's baggage. The minister, declaring how important he was in the Government of India, went on to lament about his being made to wait for his baggage like a commoner. The ambassador, instead of reacting to his grumbling, took him to a tall fellow at the other end of the baggage area and said, "Let me introduce you to His Majesty, The King of Netherlands." The King was also waiting for his baggage.

These two real-life incidents indicate two different qualities in two different types of people—modesty in one, arrogance and bragging in another. Unfortunately, more and more people are forgetting the virtue of modesty and are becoming increasingly arrogant. I remember a friend

who was preparing for the IAS. The moment he filled in the form he began to behave as if he was already an IAS officer. He would boast about what he would be doing when he became the Deputy Commissioner or a Secretary of the Government of India. He even picked up tiffs with policemen saying, "You will salute me after a few months." He, however, never qualified. An assistant in the Home Ministry, he is still called, "Mr IAS"

It always pays, in the long run, to be modest. A modest person, a stern realist in his dealings, is friendly, warm and possesses an open mind and a rational outlook. A believer in the goodness of man, he is not moved by selfish and crude interests. He does not try to downgrade people around him. In fact, he gives more importance to others than himself.

An immodest person is an antithesis of a modest one. Braggart, boastful, trumpeteer, and bravado-lover, he always finds an opportunity to let others down and is constantly busy talking about how important he is. He is ready to take credit whenever the results are excellent, claiming all went off well as it was done on his advice. However, if something goes wrong he's all set to pass the buck, saying it happened because his advice had not been followed.

It is usually believed that a person who talks too much about himself becomes popular as people begin to know what he has been doing. This is an erroneous notion because when you highlight your own achievements, your good qualities and your importance, you do not create any impression on others. Out of modesty others may not contradict you, but they definitely do not believe all that you say. If you are modest about yourself, you are likely to get much more recognition.

Being modest, however, does not mean that you have to be timid and obey others blindly. In fact, you can be firm and carry your point. Here's an example: Referring to an incident in the Working Committee, Gandhiji

wrote to Sardar Vallabhbhai Patel on July 1, 1946: "I did not like our conversation today. It is nobody's fault. You know that I have been at a loss to understand a number of things which you have done. You speak in the Committee with much heat."

To this, Patel replied: "What can I say after your letter? I must be at fault. Only I cannot see it, and that makes me very unhappy. I do betray some heat when I speak in the Committee... That is a temperamental defect... but there is nothing in it"

Modesty has certain virtues. Apart from inspiring more respect than a braggart, you are respectfully spoken of even when you are not present. Another advantage is that if you fail to achieve the expected results, you do not have to try and save face. And this kind of situation arises quite often. If you have been telling your friends and acquaintances that you will definitely succeed, you will be laughed at when they learn that you have not been successful. On the other hand, if you have been telling others that you are making an effort to do a certain work and you fail, no one will make fun of you. On the contrary, people will be sympathetic and will appreciate that you tried your best to do something. A braggart has to concoct stories when he fails. Sometimes, he narrates different stories to different people and when exposed, cuts a very sorry figure. A modest person does not face such situations.

An immodest person develops an attitude of self-righteousness, believing he can never be wrong. This stops the learning process. A modest person is always open to learning more and improving his personality.

So, why not be modest and win the world!

R. K. Thakur

DO WOMEN THINK YOU'RE TOO SHORT?

Women like their men to be tall. In every facet of life, greater height is one of the prime requirements for success.

NOW YOU CAN ADD 5-15 CMS IN JUST 10 DAYS

Guaranteed NEW HEIGHT method
Shows you how to do it - or your money back
immediately!

**NO STRETCHING - NO PAINFUL PROCEDURES
NO DANGEROUS PILLS**

"HERE'S POSITIVE PROOF YOU CAN INCREASE YOUR HEIGHT"

For many years, scientists, believed height increase was not possible after the end of childhood. Recent factual data proves they were wrong. Here is just one example of many. The throwing arm of baseball pitchers is normally 2.3 inches longer than their other arm. The extra length was attained after the age of puberty. If athletes can increase the length of their limbs, you can certainly increase the length of your legs and complete torso. And you can do it scientifically, without artificial contraptions or possible injury by using the New Height method.

THE SCIENTIFIC METHOD :

The New Height method is an all-new, scientific method based on an exclusive Swiss principle which re-activates the body growth Factors that contribute to height increase such as stature and posture correction, diet and nutrition and specialized exercises are included. New Height is remarkably effective in both Men & Women. This easy-to-use programme requires no stretching machines, no pills or

medications, no expensive equipment. All you need is the information in the New Height method and your own desire to grow taller.

GUARANTEED SATISFACTION OR YOUR MONEY BACK

Being taller means being more successful. Research has shown that taller people are more desirable to the opposite sex, get better jobs, earn more money, get more respect and are happier than short people. Try the New Height method on our unconditional money - back guarantee. If within 10 days you are not fully satisfied that the New Height method is helping you to increase your height, send it back for an immediate refund (less P + F charges).

Tick the word or phrase you believe is *nearest in meaning* to the key word.

1. **asset** (ă'set): A: ancestral property B: a valuable quality
C: a precious gift D: inborn sense
2. **aura** (aw'ra): A: a dramatic setting B: circle of light round the heads of gods C: the external part of the ear D: a characteristic atmosphere
3. **bountiful** (bow'ntifal): A: enterprising B: abundant C: courageous D: greedy
4. **circumflex** (sēr'kamfleks): A: saying in many words what may be said in few B: line that marks out a circle C: narrowing down D: a mark written over a letter to indicate pronunciation
5. **circumspect** (sēr'kamspekt): A: giving full details B: cautious C: tidy D: above suspicion
6. **comprise** (kəmprī'z): A: to contain B: press together C: make up D: arrange
7. **conflagration** (kōnfla grā'shan): A: great destructive fire B: loss of human life C: large-scale gathering D: defiant opposition
8. **consecutive** (kənsek'yootiv): A: adjoining B: unchanging C: in unbroken succession D: side by side
9. **deprive** (diprī'v): A: to prevent from using B: snatch roughly C: drive out D: make trouble
10. **epilepsy** (ē'pilēpsi): A: disease spreading rapidly among people B: small disorders in the body C: skin disease that forms silvery scales on the skin D: nervous disease causing a person to fall unconscious
11. **espionage** (ē'spiənahzh): A: use of make-up to deceive

the enemy B: use of secret agents C: secret survey of enemy's strength D: plan to capture enemy territory

12. **frequent** (frē'kwant): A: particular B: rapid C: habitual D: usual
13. **indefatigable** (indifā'tigəbəl): A: untiring B: that cannot be defeated C: without equal D: that cannot be removed
14. **indiscriminate** (indiskri'minat): A: given without care B: unyielding C: vague D: selective
15. **inhabited** (inhā'bitid): A: restrained B: received as legacy C: occupied D: deeply fixed
16. **perennial** (pə're'nial): A: at regular intervals B: happening every year C: continuing throughout the year D: happening once in a decade
17. **proscribe** (prōskri'b): A: to denounce as dangerous B: take risk C: advise D: decide beforehand
18. **protracted** (prōtrā'ktid): A: guarded B: curving outwards C: long drawn out D: temporary
19. **spastic** (spā'stik): A: person with a defective leg B: having a diseased growth in the body C: one suffering from cerebral palsy D: one suffering from lung disease
20. **stranglehold** (strā'nggəlhōld): A: a tight constriction B: hindrance C: deadly grip D: a fortified place

FOREIGN WORDS

BY THE AARBES

1. **prima facie** (primā fa'shiē) L: at first sight; on the first impression. She gave reasons which were *prima facie* untenable.
2. **primum mobile** (primūm mō'bili) L: outermost sphere added in Middle Ages to Ptolemaic system, supposed to revolve round the earth in 24 hours; prime source of motion or action. In his case self-interest was the *primum mobile* of all his actions.
3. **primus inter pares** (primūs intar pār'ēz) L: the first among equals; senior/spokesman member of a group. There is no reason to question the prime minister's place among her cabinet colleagues as *primus inter pares*.
4. **pro forma** (prō fōr'mā) L: for the sake of form; invoice sent to purchaser in advance of goods, for completion of

business formalities. (a) The secretary was asked to prepare a *pro forma* financial statement for the chairman's approval. (b) It is customary to receive a *pro forma* invoice from the shipping agents.

5. **pro rata** (prō rā'ta) L: proportional(ly). All of them agreed on a *pro rata* distribution of shares.
6. **pro tempore** (prō tē'mpəri) L: for the time being (chosen to occupy a position). He was called upon to act as chairman *pro tempore*.
7. **putsch** (pooch) Gk: attempt at a revolution; secretly plotted and suddenly executed attempt to overthrow a government or governing body. Troops were called in to meet any eventuality, especially the much-feared *putsch*.
8. **quid pro quo** (kwid prō kwō) L: thing given as compensation, return made, consideration; something for something. The Chinese will not give up their claim to Indian territory in the east without some *quid pro quo*.

Note: L—Latin; Gk—Greek.

FOCUS

AFGHANISTAN

POSITIVE TRENDS

BY AJAY VERMA

Since the Soviet military intervention in Afghanistan in December 1979, the already complex and explosive international scenario has become murkier. New alignments have been struck; the *jihad* of morals and human values has once again been raised by the West; and South and South-West Asia have become the hotbed of political and military intrigues.

Afghanistan is a landlocked country—picturesque and mountainous, having an area of 6,50,000 sq km and a population of some 16 million. The Afghan society mainly comprises various tribes known for their fierce independence but unending fighting among themselves. Afghanistan has been a cross road for historical and religious forces between Europe and Asia, right from the time of Alexander the Great. Whether it was Alexander, Babar, Nadir Shah or Taimur Lane, each one was aware of the strategic importance of Afghanistan.

Enhancement of Russian interests in Central Asia troubled the British rulers in India throughout the 19th century. They were under the perennial fear of a Russian invasion of India through Afghanistan. Many have termed this fear as 'Russophobia', forcing the British to embark on the disastrous Afghan wars. The Russian desire to annex Afghanistan did not also crystallise. That is how Afghanistan was allowed to remain a buffer state by the parties concerned; and all attempts at conquering it came to nought.

The importance of Afghanistan lies in its strategic position as a gateway to not only the Indian sub-continent but also to Central and West Asia and in a way to Europe. This fact had been known to the various invaders, from Alexander to the Russians and British rulers in India. One can understand why Afghanistan has long been

the bone of contention between various powers and how it had come to be a buffer state between imperial Russia and British India till World War I and in recent years between the USSR and the US-Pakistan-China combine. The conclusion of World War II saw an ideological confrontation

Afghan guerillas, armed with captured Soviet-made Kalashnikov rifles, on the lookout for Soviet warplanes in the hills of Lega: 'Jihad' against the godless reds.

between the USSR and the US in order to bring Afghanistan into the purview of their respective in-

ARGUMENTS...

The point is that the developments forced us to make a choice: we had either to bring in troops or let the Afghan revolution be defeated and the country turned into a kind of Shah's Iran. We decided to bring in the troops. It was not a simple decision to take. We weighed all the pros and cons before taking it. We knew that the victory of counter-revolution and of religious zealots and revenge-seeking feudal lords would result in a bloodbath before which even the crimes committed by the Chilean junta would pale. We knew that the victory of counter-revolution would pave the way for massive American military presence in a country which borders on the Soviet Union and that this was a challenge to our country's security. We knew that the decision to bring in troops would not be popular in the modern world even if it was absolutely legal. But we also knew that we would have ceased to be a great power if we refrained from carrying the burden of taking unpopular but necessary decisions, extraordinary decisions prompted by extraordinary circumstances...

As regards the 'non-interference' argument, I could quite

simply quote appropriate clauses of the Soviet-Afghan treaty and the UN Charter. Let us get to the gist of the problem. Non-intervention is a good thing but the principles of international law do not exist in a vacuum. There was a committee for non-intervention in the affairs of Spain, and that non-intervention resulted in the 40-year dictatorship of Franco. Should the Vietnamese who were asked for help by the Khmers who were being murdered by power-crazed maniacs have read their lecture on non-interference in reply? History and politics cannot always be fitted into legal notions. There are situations when non-intervention is a disgrace and a betrayal. Such a situation developed in Afghanistan. And when I hear the voices of protest from people who claim to be democrats, humanists and even revolutionaries, saying they are outraged by Soviet 'intervention', I tell them this: it is logic that prompted us. If you are against Soviet military aid to revolutionary Afghanistan, then you are for the victory of counter-revolution. There is no third way.

—Alexander Bovin, *Izvestia*, April 1980

nances. America, already having aligned itself with Pakistan, Iran and Turkey, wanted to further consolidate its hold on the region. Russia, on the other hand, would not brook the presence of the US right at its doorstep and for this a favourable policy towards Afghanistan had to be evolved and pursued.

The Afghan leaders themselves, over the years, have not been averse to let their domestic and foreign policies be influenced by the Soviet Union, though at times they have sworn to remain non-aligned and even made half-hearted attempts to forge some sort of understanding with the US. But the creation of the CENTO in the '50s finally decided for Afghanistan where its interests lay. Afghanistan on its part has given a *quid pro quo* to the USSR. The trouble in the North West Frontier Province of Pakistan over

the Pushtun question as well as Baluchi demand for autonomy affecting Iran and Pakistan, actively aided and abetted by Afghanistan, helped provide a potential source of instability against the two CENTO allies, much to the benefit of the USSR. When President Daud came to power for the second time in 1973, he caused apprehensions in Moscow by underplaying the Pushtun and Baluchi issues and trying to befriend both Iran and Pakistan. Various economic agreements with the Shah of Iran, officially dropping claims on Pakistan's NWFP territory, were indeed firm steps in the direction of rapprochement. The 'Saur Revolution' of April 1978 saw the overthrow of Daud and the installation of Nur Mohammad Tarraki as President. This indeed was a blessing in disguise for the Soviets, for the Tarraki takeover was occasioned by inter-

nal events in Afghanistan rather than through direct Soviet orders. This honeymoon could not last long because of the alienation of Tarraki from the religious leaders of the country. The mullahs found Tarraki's policies to be communistic and anti-Islamic. The resentment kept brewing and eventually culminated in the overthrow of Tarraki by his Defence Minister, Hafizullah Amin, in September 1979. Though initially Amin was granted recognition by Moscow, he lost his clout later on. Ultimately, on December 27, 1979, Soviet troops marched into Kabul and installed Babrak Karmal as the President of the Republic of Afghanistan.

The Soviet Union presumed the intervention to be a low-key operation. That the US had not taken an active interest or even vigorous stand during the 1978-79 revolutions also encouraged the Russians in their venture. Furthermore, the preoccupation of the US with its economic worries, the hostage problem with Iran, presidential primaries and the like, made it difficult for it to respond strongly and effectively to the events in Afghanistan, as was expected of it as a superpower.

At the same time various theories have been put forward to explain the action of the Russians, like decreasing Soviet influence over Amin, fear of the rebels getting foreign support, crystallisation of the cleavage between the communists and the mullahs at a time when Moscow seemed to be actively aligning itself with Islamic fundamentalism and so on. It is unlikely that the Soviet intervention was prompted by the fear of the effects of Muslim self-consciousness on USSR's Turkic/Muslim population, as suggested by some critics. The Soviet action was also not a move to divert the public attention in Russia from its supposed economic woes. The view that found most support among analysts was that the Russians aimed at finding a direct route to the warm-water port of Gwadar in the Arabian Sea, thereby giving them leverage over the entrance to the Persian Gulf and enhance their presence in the Indian Ocean. With increasing importance of West Asia in the international strategy of either superpower, this reason may not

...AND COUNTERARGUMENTS

Making the world safe for socialism has always been a euphemism for protecting Soviet interest, just as championing "wars of national liberation" has been a pretext for installing comradely governments and thwarting the US in the Third World. While paranoid in motivation, such a policy is often predatory in practice. The men in the Kremlin would not feel entirely secure unless the whole world were made up of fraternal (i.e., satellite) or at least Finlandised countries.

The Soviets are most on the defensive and therefore most likely to take the offensive along their own borders. Their invasion of Czechoslovakia in 1968 was a case in point. So is the invasion of Afghanistan. The Kremlin leaders want to position their forces as advantageously as possible for the chaos still to come in Iran and possibly in Pakistan as well. The Soviets would dearly love eventual access to the oil and warm waters of the Persian Gulf, but those are not their immediate goals. They have moved into Afghanistan primarily because the Muslim insurgency there threatened to turn a friendly neighbour into an unfriendly one.

The Afghan rebellion is doubly

dangerous because it has Chinese backing. China represents one of the two strategic obsessions of the Soviet Union; the other is upheaval in Eastern Europe. Many sophisticated Russians believe war with their largest and most unfriendly neighbour is inevitable. The fear of China was one of the main incentives for Leonid Brezhnev to embark upon a policy of detente with the West. He did not want to wage cold wars—with the ever-present threat of hot ones—on two fronts.

The Soviets have had 30 years' experience confronting American presidential doctrines about containment. But much has changed in the Soviet Union's favour since Harry Truman's time. Most significant, the USSR now enjoys equality with the US in intercontinental nuclear weapons and superiority in conventional forces. Whatever their historical insecurities, the Soviets have a new-found military self-confidence that translates into political boldness. They are much more inclined than in the past to go out into the hostile world that surrounds them to buy friends and bully enemies.

—Strobe Talbott & Bruce Nolan, *Time*, February 1980

be as implausible as the others. Both superpowers are well aware that oil holds the key to their economic survival and, therefore, endeavour to create their own pockets of influence in the Gulf. However, in this age of nuclear missiles and warheads, warm-water ports are a trivial military pleasure. Furthermore, if this was a part of a broader design, Moscow would have resorted to a more plausible excuse and would have not only acted at a more appropriate time seasonally but would have also pursued its overall plan with vigour.

The Afghanistan 'invasion' set off a chain reaction which brought the American allies into open confrontation with the Soviet bloc. The reaction of the West was at first hysterical and unduly moralistic instead of being realistic and prudent. What these countries were aiming at was the destabilisation of Soviet influence on Afghanistan rather than the freedom and well-being of the Afghans. The policy makers in Washington did wrong to ignore such decisive factors as geographic proximity, ethnic relations and a history of close ties between the Soviet Union and Afghanistan before voicing their condemnations and threats. A realistic appraisal should have incorporated all of these.

The Soviet intervention and the subsequent American reaction to it, once again, initiated the Cold War. Whatever had been the gains of detente over the years were thrown to the winds. The two countries most affected by this worsening of superpower relations in South West Asia were India and Pakistan.

India has a long record of friendship and cooperation with the Soviet Union. Mutual respect for each other's status and appreciation of policies has been a cementing force of this ever-growing relationship. The Soviet Union has lent continued support to India during various crises. But this does not alter India's status of a non-aligned country which decides individual issues on their merit irrespective of bloc considerations. Keeping this in mind New Delhi chose the right path of not playing Washington's tune and openly coming out against the Russian intervention without taking into consideration the factors which

whether Russia would have acted on such a scale in Afghanistan had the Pak-US-China combine not provided arms and other facilities to the Afghan rebels and sought to organise not only subversion but an actual invasion of Afghanistan. But whatever the circumstances or excuses, India has voiced her stiff opposition to the continued presence of foreign troops in a sovereign country and at the same time spoken for the need of a political settlement rather than simply indulge in condemnation. One country which has benefited the most by the Afghan crisis is Pakistan. Pakistan has long been used by the US as a pawn to counter Soviet thrust in South Asia. Thus, it was least surprising to see Islamabad jump on the Washington bandwagon in December 1979. Pakistan was suitably rewarded by 3.2 billion dollars worth of American aid, besides the gift packets from Saudi Arabia and China. The American support helped bolster the rickety regime of General Zia ul-Haq. Pakistan has also got a pretext to substantially increase and revamp its defensive and offensive capabilities. The nuclear programme, too, has got an added fillip. At the same time, Pakistan has been opportunistic to align itself with the Islamic brotherhood bloc and thereby reap additional military as well as monetary benefits.

Evidently, India's fortunes have suffered grievously since the Soviet intervention. Beginning from the Indian envoy's statement in the UN in January 1980, India has been accused of acquiescing to the Soviet action. The truth is quite to the contrary, though. Both publicly and privately our leaders have hoped for the withdrawal of the Soviet troops from Afghanistan and stood for the sovereignty and non-aligned status of Afghanistan.

The Afghan crisis has changed the character of problems confronting the South Asia region. Though the very notion that Russia would next step into Pakistan and finally gobble up India, is absurd, nevertheless, the compulsions of superpower rivalries cannot be predicted easily. Countries are wooed and dropped as and when it suits their scheme of things. However, it is for the countries of the region to ensure that they are

It is in the light of all this that India's efforts for regional unity and amity should be appreciated. Indira Gandhi has done well by endeavouring to normalise relations with Pakistan and China and at the same time stepping up the process of regional cooperation with other countries. The sailing, however, is not so smooth. One cannot take at its face value the Pakistani desire for amity. How is it that such a desire surfaces only when Pakistan receives huge military supplies, amidst protests from India? Furthermore, the General's regime being unpopular and shaky as it is, what shall be the credibility of an agreement with the military junta? As regards China, many a Sinophile is baffled by its blow-hot-blow-cold attitude. Today it expresses the hope for normalising relations and the next day it issues a statement protesting against the inclusion of a dance troupe from Arunachal Pradesh in the Asiad pageant, reviving claims on Indian territory. Also, regarding regional amity and cooperation, India being the most dominant power in South Asia makes it vulnerable to blackmail, both political and economic.

Whatever the drawbacks, whatever the obstacles, India's destiny, as also of other regional countries, lies in close cooperation in South Asia. Inter-dependence and co-operation will alone enable them to withstand the whims and fancies of the superpowers trying to compromise their freedom and honour.

The Indian Government has been prudent by not allowing "one friendship to come in the way of the other". The relations of India with Russia are as strong as ever and those with the US are sought to be placed on a better footing. Considering that India is the Chairman of the Non-aligned Movement, it is imperative for her to maintain good relations with both Moscow and Washington. The added responsibility of the Chairmanship coupled with such good relations and a strong leadership should enable India to play a constructive role in lessening some of the tensions emanating from the Cold War. The new position will also afford India the opportunity to help in deciding the fate of non-aligned Afghanistan.

PAC/PICUP/83-21 (E)

BACKGROUND INDIAN OCEAN

BY P.N. KUMRIA

With the US base in Diego Garcia as a staging post for the Rapid Deployment Force; with the present instability in Iran; with the Soviet quest for a warm-water port corroborated with their intervention in Afghanistan; and with their warships roaming these blue waters at will, the Indian Ocean, today, is the centre of superpower rivalry. What does this mean to poor littoral nations, already crushed by enormous defence spending and inflation? Our background traces the strategic importance the Indian Ocean has acquired over the years and suggests the steps to be taken for diffusing tension in the region.

A strife is on in the Indian Ocean today, whose sea lanes carry the world's precious petroleum products and other important commodities that turn the wheels of the international industry.

It commenced in the early seventies, when the Arabs used oil as a weapon to bring pressure on the Israel-backing West. The results far exceeded their expectations and OPEC (Organisation of Petroleum Exporting Countries), formed in late 1960, took advantage of their fast-dwindling oil resources. In a 10-year period, the prices were hiked about 10 times till the crash came in 1983 because of a drop in the demand for oil, recession and a hunt for alternative sources of energy.

The strategic importance of oil for the world, however, increased and the superpowers got locked in a struggle to maintain their hold on oil in the Gulf and Arabian Peninsula, which had 67 per cent of the world's proven oil deposits. The Indian Ocean, thus, became an arena for superpower conflict.

CENCOM: The change in the security perceptions of the US after the fall of the Shah of Iran, the 'Policeman of the Gulf', has resulted in the raising of over one lakh troops of the Rapid Deployment Force (RDF), consisting of seven divisions, two wings of strategic B-52 bombers, three aircraft carriers and necessary escort and supply ships. The RDF will be mobile in TA-KK ships and CX aircraft and its equipment will be carried in roll-on-roll-off (RORO) ships capable of loading and unloading under their own steam. This force, though capable of operating without bases to project the US military power over 7,000 miles, will increase its potential with the help of bases, particularly Diego Garcia in the Indian Ocean. The Gulf states of Saudi Arabia, Kuwait, Bahrain, Qatar, UAE and Oman have formed the Gulf Cooperation Council mainly for economic and political purposes. The US, in January 1982, established a unified South West Asian Central Military Command (CENCOM) in Tampa (Florida), to control the RDF. The aim of the CENCOM is to protect US interests in the Arabian Peninsula, mainly oil. Its jurisdiction will be over 20 countries covering Pakistan, Afghanistan, Iran, Iraq, Jordan, Arabian Peninsula including Saudi Arabia, UAE, Bahrain, Qatar, Oman, North and

South Yemen, north eastern states of Kenya, Somalia, Djibouti, Ethiopia, Sudan and Egypt, and it may supersede the RDF.

Military balance: What kind of military balance is sought to be achieved in this region? The entire area of the Indian Ocean, except the region between Egypt and Pakistan and Arabian Peninsula touching Kenya to the South, is controlled by the US Pacific Command (PACOM). PACOM covers Diego Garcia, lying 1,000 miles south of India, the member countries of the Association of South-East Asian Nations, Japan and Korea.

PACOM and CENCOM represent the US efforts to preserve their supremacy and interests in the region. The occupation of Afghanistan by the Soviets, the changed situation in Iran after the fall of the Shah and the Iran-Iraq war have resulted in changed perceptions and realignment of the US global strategy. Pakistan has emerged as a front-line state of the US on account of the situation in Afghanistan and is closely linked with the security of the Persian Gulf, which makes it the back door to the Gulf and also the front door to India. A spill-over of any conflict in the region of the Gulf and Pakistan cannot leave India and other littoral nations of the Indian Ocean untouched. The Soviet Union has equally high stakes in the region and will prevent any action that reduces its strategic gains.

The future: The Seventh Non-aligned Meet held in New Delhi has shown the path to prosperity in the zone of the Indian Ocean. No amount of militarisation of this region by the superpowers can succeed against the moral force of over 100 nations who constitute over two-thirds of the world and represent the Non-aligned Movement. The united movement can frustrate the designs of superpowers to escalate the arms race and establish military bases in the region. Expeditionary forces operating thousands of miles from their bases can get lost in the countries, sub-continent and peninsulas of Asia and Africa whose shores are washed by the Indian Ocean, and who refuse to provide bases and join the military alliances of the power blocs. The theory of power vacuum is a false bogey that was never raised when the British ruled this region.

Whether the big and superpowers will respond to the peace initiative of the non-aligned nations to turn the region of Indian Ocean into a peace zone, is difficult to answer. Their interests in the area and its resources will preclude active cooperation. The non-aligned nations cannot, however, remain unconcerned and should continue to project the voice of moral force. □

ESSAY

GLOBAL RECESSION

BY J.D. SETHI, Former Member of Planning Commission

Do you imagine yourself as a prospective officer? Whether you are in the Civil Services, Banks, Forest Service or any other field—you need to know a lot more than your own subject. You can't hope to solve a problem in isolation. A wider perspective gives you that added advantage over your competitors. And in a world suffering from economic pressures, what can be more important than understanding your country's position in the global context?

The global recession has given India valuable breathing time to plan for policies relating to exports and imports, transfer of technology, foreign investment, etc. In fact, the government has got a genuine opportunity, though not of its own making, to put planning back on the rails.

First, the global recession has brought about a crash in oil prices, both official and spot. India was bankrupted externally because of repeated hikes in oil prices. OPEC refused to agree to dual prices which, if they had done so, could have now given them some cushion in the form of increased consumption of oil in the developing countries. But the oil sheikhs were too drunk with money power to be reasonable. Now the poor nations can heave a sigh of relief. There is no reason for them to bemoan the sharp decline in OPEC's surpluses from \$ 120 billion to \$ 20 billion. The OPEC surplus was not invested in developing countries.

If OPEC had had its way, the projected price of oil in 1983-84 would have been above \$ 65 a barrel. Consequently, India's balance-of-trade deficit would have been more than doubled to around Rs 12,000 crores. This would have happened despite domestic oil production going up to 20 million tonnes. The import of oil has not declined. Recession has made our position safe but the government has become complacent.

Secondly, until three years ago it was not easy to attract large-scale capital from the international market or acquire or buy appropriate technology on terms which were not onerous and economically justified. The picture is now completely changed. For every project opened up, not only the specialised financial agencies of the UN but also the multinationals, the banks and governments of the developed countries are

coming forward to offer whatever we need on reasonable terms. For the first time since independence, India has got freedom to choose technology, level of investments and even terms of transactions. There is a glut in the world market not only of oil, but of money and technology as well. In 1982-83 India signed 950 collaboration agreements, twice the normal rate. Unfortunately, what seems to have determined the choice is the size of the kickbacks.

India's position remains unique in another field. Whereas during the '60s and '70s other countries were borrowing money from the international banking system at a rapid rate and using it injudiciously, India's borrowings were modest. Mexico, Argentina and Brazil alone have an external debt of more than \$ 225 billion. As against this, India's total external debt stands at about \$ 15 billion. Naturally, the international banking system is looking for new and safer markets because of the inability of the big debtors to pay even the interest, let alone the instalment on the original sum. Besides, India has a large potential market which can be opened up in a big way if a balance is struck between domestic growth, distribution and exports.

The government did not realise the significance of this situation for over two years. Even now there is no sense of urgency. The oil crisis had brought the realisation that India must earn more to pay for the large import bill or be obliged to borrow. Unfortunately, it did not plan properly and ended up with a large IMF loan. Nevertheless, that realisation did raise serious questions about the role of trade in Indian economic development. The proportion of trade to GNP had always remained very low. Even now, it hovers around 10 per cent for imports and 5 per cent for exports. Sharad

favourable comparisons of India's performance with much smaller countries in Asia and Latin America cannot be ignored.

The main question now is whether India should move towards export-led growth. If it fails to pay for imports from exports or if the import content of economic development declines, not only will the growth rate decline but the balance-of-payments gap will also widen. The underlying assumption is that if the level of imports and exports is simultaneously raised, there will be an automatic and positive impact on the growth rate. This is a false assumption. In fact, things did not happen that way. Our imports, exports and GNP all grew with an increased balance-of-payments deficit. It was overlooked that at least one of the variables has to be independent for creating a general balance or equilibrium.

Probably the right question has not been asked. For instance, the role of import substitution in the new situation is not yet a subject for serious analysis. In the past, indiscriminate import substitution and its extension to non-essentials totally distorted domestic patterns of production and income. Now import substitution must be linked to export promotion and improvements in economic efficiency and competitiveness. How can these linkages be established in the entirely new situation? This is the crucial question.

It is curious that while debate about the dangerous role of multinationals continued for three decades in practice, multinationals were allowed in practically every field of industry. The strong point of collaboration agreements with multinationals has been that the Indians remained senior partners. The weak point was the neglect of R & D and an independent technological base. The result is India has become more dependent on multinationals for further development.

The Industry Minister, N.D. Tiwari, while addressing FICCI in early April, warned about the continued neglect of technological upgradation and modernisation. He said, "The inoperativeness of our industry to research and develop meant our addiction to the craze to borrow the latest technology from abroad, leaving a primitive industrial system which, if not replaced in the '90s, will indeed be a disaster in the '90s." In this context, one may ask about the fate of the new technology policy which Indira Gandhi announced with great fanfare. It has almost failed to take the shape of a policy in the global recession. It is a question of last hour.

WHAT MAKES HER A WINNER

BY SANJUKTA BANERJI, University of Delhi

Some are born great, some achieve greatness and some have greatness thrust upon them. Into which category does Indira Gandhi fall? She was, no doubt, born into a great family, but from all accounts she showed very few signs of greatness as a child. As late as 1936, a famous historian called her "a silly little girl without an idea in her head", and Harold Laski's widow described her as a "mousy, shy little girl who didn't have any political ideas". According to her own account, she was so shy that when she was asked to speak before the India League in London during her student days at Oxford, she "just couldn't get anything out at all" and someone from the audience (she hoped he was drunk) brought her speech to an abrupt end by shouting, "She doesn't speak, she squeals." Later, as a young woman, she lived in her

father's shadow, serving as his hostess and bringing up her own two sons.

Within a few years of Jawaharlal Nehru's death, however, she became, what the London *Economist* has described, the "Queen Empress of India". How did this sea change occur? Was greatness thrust upon her, or did she achieve greatness over the years? The answer lies somewhere in the middle. Initially, she was not a leader in her own right but was manoeuvred into the primeministership by K. Kamaraj to avoid a contest between Morarji Desai and Gulzarilal Nanda. But having acquired the primeministership, Indira Gandhi developed certain qualities, some of which were innate, and the 'kung-makers' soon found out to their dismay that they had bitten off more than they could chew. Regarding his role in making Indira Gandhi prime minister,

man's daughter, little man's big mistake."

The qualities which she already possessed were bravery, fearlessness and firmness. Her actions during the Indo-Pakistan war of 1965 were to win her the title of "The only man in a Cabinet of old women". She was in Srinagar on a brief visit when Pakistan launched its armed infiltration and she refused to leave till the situation was stabilised. During the course of the war, she was a frequent visitor at various forward positions. Despite warnings by senior Air Force officers, she visited the front near the Haji Pir Pass, the scene of heavy fighting in the Kashmir sector. The best example of her firmness, perhaps, is her own marriage to Feroze Gandhi. Once she had made up her mind, neither her beloved father, nor the spiritual, intellectual and political 'guru' of 'gurus' of the time, Mahatma Gandhi, could shake her determination. That she was spirited and strong-willed despite the veneer of femininity, was evident from early childhood. She was brought up in a family which led the national movement in the country, and certain leadership qualities apparently rubbed off. According to accounts left by Nehru, she used to shake her fist at policemen who came to take away valuables from Anand Bhawan because the Nehrus refused to pay fines imposed by the British courts, when she was only four years old. At another time she sacrificed her foreign-made doll at the height of the Swadeshi Movement because she realised the incongruity of possessing a foreign doll while consigning foreign-made clothes to the flames.

Her childhood was lonely and turbulent. She constantly saw members of her family being hauled away to jail and she herself wandered from one school to another. She lost her mother at a time when a girl needs her mother most. But what is commendable is that she learnt from these experiences. She did not waste away her youth, deprived as she was of close parental guidance. She became a voracious reader, reading books ranging from science to adventure to fairy tales to the biographies of nationalist heroes/heroines like Joan of Arc, William Tell, Garibaldi, and Benito Juarez, and the seeds of ambition—the desire to become a leader of men—were probably sown in this period. It was also perhaps around this time that she developed the quality to face calamities. She does not accept ill-fortune lying down—she has developed the quality to bounce back. This has stood her in good stead as evidenced by

ing a major electoral defeat in 1977, when most political commentators felt that she was politically finished.

All her qualities were, however, not innate. Some were developed after she became the prime minister, and these are perhaps the ones which make a leader great. The 'gungi gudiya' (dumb doll) came to power at the worst possible time for a leader to take over the reins of the nation. The language controversy was still simmering in the south and south-west, there was an acute economic crisis: 1965 had been a year of unparalleled drought; the 1962 China war and the 1965 Pakistan war had made serious dents in the country's scarce resources for development, the Sikh community was demanding a Punjabi Suba or a Punjabi-speaking state; the Naga secessionists were also creating problems in the east, and, finally, in the international field, the prestige and respect which India had enjoyed in the heyday of Nehruvian non-alignment had been drastically eroded since 1962. Indira Gandhi, however, was not cowed down. Although some of the decisions she took were unpopular at the time, she followed them through and guided the nation through the crisis period, to emerge as the undisputed leader of the country. Despite mob violence and communal rioting, she followed through her decision to create a Punjabi Suba and Punjab was divided into Punjab and Haryana. She held peace talks with the Nagas despite criticism from chauvinistic elements in the Congress and the Opposition. And in the international field, her prestige sky rocketed in the ensuing years. The US, which had dragged her through mud during the emergency period, gave her a warm welcome in 1982. The world loves a fighter, and Indira Gandhi is a fighter.

She is also adept at the art of crisis management. The Bangladesh crisis is a case in point. Nobody can deny the capable manner in which she guided India through a period of peril when millions of refugees poured into this country from East Pakistan. Her remarkable sense of timing and the way she prepares the ground for action were also evidenced in 1971. Although some military leaders wanted to attack Pakistan much earlier than December, she stuck to her decision that it was not the right time. She sounded foreign nations before taking any step and referred to East Bengal as Bangladesh for the first time as late as May 24, stating that Pakistan's internal problem had become India's internal problem because of the influx of refugees which caused a heavy

“The world loves a fighter, and Indira Gandhi is a fighter.”

drain on the country's resources. Yet, she refused to concede the demand for the recognition of the Bangladesh Government-in-exile as late as August. In fact, her sense of timing was so perfect that she made it appear that Pakistan was the culprit and that India had nothing to do with forcing a war on Pakistan. When Pakistan launched its attack on India on December 3, Indira Gandhi was in Calcutta telling a public meeting, "I do not want war. I earnestly desire peace. . . I will be the last person to start a war. But if a war is thrust upon us, we are prepared to fight in defence of our freedom and our ideals." She could, therefore, later say with a clear conscience that she had done everything in her power to secure the independence of Bangladesh without a war.

Indira Gandhi has not achieved the position she has through sitting idle—she believes in hard work and in personal discipline. She does not indulge herself with regard to food or luxury and takes exercises regularly to keep fit. The result is that she can work for hours without tiring. She has also developed the capacity to get over fatigue very fast—a remarkable achievement this for a person who was very sickly as a child. She also works very systematically. She is an inveterate scribbler of notes. There are memo pads in every nook and corner of her house, in her car and in her office. She jots down all ideas that come to her at any point of time. In fact, the basis for her talks with Richard Nixon, the then

US President during the Bangladesh crisis, came from a number of points she had noted down on scraps of paper at various times during preceding weeks.

She has also developed the quality of patience in addition to the quality she already possesses—charm. When she was a young woman, many people including Sanjiva Reddy considered her to be arrogant. She has apparently got over this—now she is modest and does not brag about her achievements. On the contrary, she gives others credit where it is due, and is ready to listen to good advice. She is a keen observer and very little escapes her eye. She has a quick mind and she reacts to people and events with determination. She seldom makes the same mistake twice and learns from her mistakes. For instance, after she devalued the rupee by 57.6 per cent in 1966 on the advice of some persons close to her, she realised that it was a wrong decision because it failed to solve the balance-of-payments problem or stimulate productivity. After that, she did not depend on these advisers so much. In fact, she is an astute politician who knows when to drop a person and when to keep him. During Nehru's time, when serious allegations were made against M. O. Mathai, the PM's Principal Private Secretary, Indira Gandhi, despite her personal closeness to him, dissociated herself from him with sound political sense. In her present term, despite the fact that one of her Cabinet colleagues, Ghani Khan Choudhary, is facing a lot of public criticism, she has not yet dismissed him—not because he is a friend, but because he is the only member of a minority community in the Cabinet. While Nehru was a sentimentalist and a thinker, his daughter is a doer. She believes in action—and once she has made up her mind, she sticks to it.

Few persons in history have achieved such a scintillating success in so short a time as Indira Gandhi. Like all persons in the public eye, she has come in for a lot of eulogy as well as a lot of flak. But what one often fails to see is that she is a very successful leader of a very problematic nation, and what one must consider is—what is it that has made her the person she is. She has developed some qualities like confidence, patience, self-restraint and the capacity to work hard. Is it not possible that others too can learn from her experiences, select the factors which make a person great, inculcate these qualities and follow her path? It may not lead to the position she has reached, but it will lead to success in the various fields that we have chosen for ourselves. □

Group discussion has become an important stage in the selection process of a large number of public and private sector companies, and professional institutes like management schools and teachers' training colleges. The candidates are first made to go through the grind of a written test and sometimes the personal interview as well. In the process, most of them lose out and just a few are left. Of these few, only some are to be selected. These candidates then go through a group discussion. A topic is given to them, there is to be no coordinator, the candidates are expected to discuss the topic among themselves while the selectors sit by and observe them.

What is it that these selectors are looking for? Is it merely how good the person is at the subject? Obviously not, since the candidates have already gone through one or two stages of the selection process and their level of knowledge has been tested. A group discussion brings out the leadership qualities in a person. Hence, what is being tested is the candidate's ability to conduct himself in a group, his tact, his persuasive and reasoning powers, his personal charm. In effect, all his innate qualities are under observation. The candidates, therefore, should bear in mind that it is not merely what they are saying that will count, but also how they are saying it. A candidate is expected to be humble, but not to the point of being timid, he should be forceful without being aggressive, he should be polite, concede to other people's view point if he is proved incorrect but at the same time he should be clear about his own views.

A group discussion is not to be taken lightly because it is often the deciding factor that may tilt the decision in your favour. If you are about to go through one in the near future, watch yourself from now—you can train yourself through self-observation. We present here a mock discussion to give you some guidelines on how to and how not to conduct yourself in this vital stage of the selection procedure.

A: Language, as I see it, can only unite. People who speak the same language have a common bond—language binds them together. I do not see how language can divide.

B: Language can obviously divide. A nation is not necessarily made up of only one linguistic group. Take India, for instance.

CAN LANGUAGE UNITE?

ance. It is a multi-lingual nation. And almost every linguistic group in this country wants to maintain its own linguistic identity. In spite of the fact that we have a national language—Hindi—there is chaos so far as language is concerned, even though attempts have been made to impose Hindi for over 30 years now on non-Hindi-speaking people.

A: Yes, but India is a special case. There are not many countries which have so many linguistic groups. In most countries language helps to unite. What about Germany, France, the UK and the US?

B: No, you are taking the wrong examples. The topic is 'Language can divide as well as unite'. I did not say that language does not unite; it does. But I am refuting your point that it cannot divide.

C: The problem, I feel, is imposition. Every linguistic and religious group within a country would naturally want to maintain its own religious and linguistic identity. People would obviously resent any language or religion foreign to them, if it was forcibly imposed on them. The result would be analogous to the Tower of Babel. However, it is easier for dialects to be replaced. That is why one sees so much unity in the field of language in so many other countries. The UK actually has minor linguistic differences between areas—Welsh, Irish and Scottish are not the same as English, but because the differences are not so deep, unity is maintained.

A: But can you name any country other than India, where the language problem acquired such major dimensions?

B: Well...

C: Yes, Pakistan, if we go back just a few years. The problem between East and West Pakistan began with language. The Bengalis in Pakistan resented the imposition of Urdu and the problem snowballed. Finally, Bangladesh came into existence with its own language—Bengali.

D: I partly agree with C. But I think that in most cases politics plays an important role. It is not merely a question of religion and language.

B: Politics is not so important because the basic problem is language or religion and politicians are just about the language riots in Karnataka and earlier in Tamil Nadu. To go back further, what about the creation of a separate state for the Gujaratis on the basis of language? And then there are contemporary problems, you have the

giving example of Assam.

E: Not to mention Khalistan.

D: I am afraid the question of Khalistan is not a question of language. And by mentioning Assam you have just proved my point. I think that Assam is a political problem in which the question of language has been blown out of proportion. It was a problem created by politicians and is being sustained by politicians.

C: I am afraid we are going slightly off the point. Language and religious problems are both political problems, and it is only natural that politicians would try to make the maximum out of any situation profitable to them. The fact is that the Khalistan problem is a political problem which has a wide religious basis and is one example of how religion can divide. The Assam problem too, although it has broad political overtones, stems from religious and linguistic causes.

F: Excuse me, but my English is not good, so I don't speak till now. I feel that C is right. In international field too, we see examples of religion and language uniting and dividing. Historically, the crusades is good example of how religion can unite despite language differences. So many European countries, each speaking different languages, got together on the basis of religion to fight people who belonged to different religion. It was Christian against Muslims.

A: Yes, that is an example of how religion can unite. The Muslims, too, were united against the Christians. In fact, when it comes to fighting against non-Muslims, the Muslims have always been united.

C: I am sorry, I cannot agree with that point. Religion, it is true, can unite, and within a state, one often sees divisions on the basis of religion. In earlier periods of history religion played an important role—probably the most important role—in uniting or dividing a nation. In modern times, however, I feel that religion does not play that important a role.

D: It is politics that is vital in modern times.

C: Yes, politics is important, but I would like to put it another way. It is self-interest which guides a nation.

F: Yes, example-wise, I bring the Arab states forward. Arab states did not all help PLO in the recent problem it faced in Lebanon after Israel attacked, although all had same religion. Why they not help, PLO? Because self-interest guides.

C: I think that is a very good example. Most Arab nations did not help the PLO when they were being massacred by the Israelis last year in Lebanon. If Islam

united all Muslims against *Kafirs* in the modern world, the Arab states would have declared a *jihad* against Israel. But that would have been political suicide. The superpowers would have inevitably been drawn into the melee because the US will never allow the destruction of Israel.

D: Yes, I agree that self-interest is the guiding spirit so far as nations are concerned. But religion still plays an important role—Israel's unity, for instance, is based on religious unity.

B: It is also based on years of suffering and on Hitler's concentration camps.

F: No, in early times, religion more important. Iran-Iraq war is not religious. Shia-Sunni war basically. If so, why other Sunnis not help Iraq? Why, on other hand, France help with arms, when French language and religion different?

C: Yes, that is a good point. In the international field, as I have said earlier, it is self-interest which guides a nation. I feel that in the contemporary world, or in the immediate future, a situation similar to the crusades cannot recur. I must also point out that in the crusades, although the common soldier was motivated by religion—that is, defence of the Holy Land, throwing the infidels out of the land of Christ—the kings and leaders were often motivated by self-interest. However, religion was the prime mover then. Between nations it is no longer the prime mover.

B: What about the 'Islamic Bomb'? Nations also get together for Islamic conferences.

C: I am speaking from the practical point of view, not the theoretical.

F: But continuing what C said, within nation, divisions on language and religious basis very possible. India begin in 1947 with division on religious ground, and states formed on language basis.

C: Yes, I too feel that within a country these divisions are quite possible.

A: But unity, too, is possible. Take America, for example. It is made up of people from all parts of the world—people who originally spoke widely-differing languages, with different scripts, etc. But now English has united them all. Many religions also exist in the US, but one does not see communal riots, perhaps because the majority religion is Christianity—although there are many sects within it.

A C: Oh yes, America is perhaps the best example of the melting pot and all those who go there accept English as their mother-tongue in about one generation. One reason for this is probably the prosperity of the country. Those who go there, go in search of prosperity

and are ready to conform to its values.

B: But I have been saying from the beginning that India is not America. When Indians go to America, whether they be Hindus, Muslims or Sikhs and whatever language they may speak, they do accept English and follow their own religion without making much hullabaloo about it. Yet, when they are in India they make a lot of fuss about both religion and language.

C: That is exactly the point. Language and religion can both unite and divide. While between nations these divisions are less important now than they were in the past, and in times of external threats divisions among linguistic and religious groups within a nation are generally forgotten, at other times language and religion can both divide and unite.

Assessment

What does the selector look for in a candidate while a group discussion is going on? The candidate has come through various tests and group discussion is one of the important subsequent stages of the screening process. What the selector is looking for is a poised, self-confident person, polite but able to think for himself and express his views without being aggressive.

In the model discussion given above, the personalities of the various candidates come through. Candidate 'A' begins the discussion without really thinking about the subject under discussion and very soon runs out of arguments. This often happens to candidates who want to make a mark by being the first to speak. 'A' also commits himself to a certain point of view and does not know when to back out gracefully. Candidate 'B' is aggressive, interrupts others and tries making wisecracks without much success. This indicates a lack of depth in the person. Candidate 'D' digresses from the main theme and is prone to contradict himself without realising that he is doing so. Candidate 'E' makes the big mistake of opening his mouth when he should not have—and thus disqualifies himself immediately. Candidate 'F' is intelligent, knowledgeable, well-read, but his problem is that he cannot express himself too well in English and very often lack of good expression is a minus point, however intelligent you may be. Candidate 'C', on the other hand, emerges as the best candidate in this group. He is polite even when he is refuting a point made by another candidate. He has depth of knowledge and can express himself well. It is obvious in a short while that he is in full control of the situation and, in fact, is guiding the discussion. In short, he fills the bill.

S B

READING THE RAPID WAY-3

Reading over 45 type units in one glance is just as important as getting its meaning. A strategic speed reader does just that. Our third instalment tells you how to become one.

Mind training for better reading

What do you mean by "learn to use your mind better"?

I mean that you should become a strategic reader: that is, a reader who follows a system for getting to the meaning of the matter. Think of the East Bengal or Mohun Bagan football teams. They don't just rush out and play their opponents. They have a strategy. They study their opponents. The goalie—does he move equally well to the left and right? Does he make the first move when he is attacked alone? Or does he wait for the attacker to move first? The centre-forward—where does he usually pass? What are the weak spots of the defence? East Bengal or Mohun Bagan win championships because they play intelligently and approach the game systematically. They have done much work even before the game begins.

And is there a system that will help me read more efficiently?

Yes, there is. The secret of strategic reading lies in one small phrase—Survey Q3R.

What does it mean?

Survey stands for Survey; Q stands for Question; 3R stands for Read, Re-state and Review.

Carve it on a tree, write it in your book. Stick it on your mirror. Make a flag and hang it on the wall. Write a song about it, but remember the formula: Survey Q3R. Make it a habit. You'll become a strategic reader and you'll read more, faster and better for the rest of your life.

I think you are exaggerating.

Not at all. You don't know how ignorant most of us are when it comes to reading. We read like white ants. We bury our nose in the opening words of a book and carry on till we finish. Then either we can't remember what we've read or we find that what we've read was not worth reading. Many people, otherwise very intelligent, are poor readers. But Survey Q3R can change all this. Let's start with Survey.

First step

What do you mean by 'Survey'?

Survey means that when you pick up a book or anything else to read, the first thing you should do is to take a good look at it, inspect it and skim over its contents. Never start by reading. Reading is thinking. The way to get your thinking started is by inspecting the material and skimming over it. First, see if you can quickly find the author's purpose—this is most important. Think also about your own purpose: Why do I want to read this? Next, look at the chapters or headings. Try to look at it with X-ray eyes and get to the very core of the meaning. What kind of material is it? Stories will be different from reports, newspaper articles will differ from book reviews; textbooks will be written in yet another style.

Look at the paragraphs: are they big or small? Reading is like digesting food. You have to see beforehand what kind of food is about to be served. If the paragraphs are big, you can expect heavy, solid food like a plate of rice. There will be a limit to how much you

can digest in one sitting. If the paragraphs are small, you can expect a series of small underdeveloped ideas. It will be something like eating *chana*.

Skimming is the next step in surveying and the key to effective reading. Just as a swallow skims over the pond in the evening dipping in the water only where he sights food, so should you skim through the chapter giving particular attention to the following:

A. Read the first and last sentences of the first and last paragraphs and the first sentence of the paragraphs in-between. Often, that can give you the entire gist of the chapter in less than a minute. The first and last paragraphs of any chapter are likely to be more important than the other paragraphs, just as the first sentence of every paragraph is usually more important than the succeeding sentences. While going through these sentences, therefore, it is very probable that we will be reading the most meaningful sentences of the entire chapter or article.

The last paragraph is particularly important because it often contains the essence of the matter, a summary of the chapter. It may seem strange to read the last paragraph first, but that is just what strategic readers do. You never get on a bus without asking where it is going. Knowing where the bus is going makes you a more intelligent passenger. You understand why the bus turns this way and that, and you know where you are all the time. Similarly, try to find out where the author is going

before you start reading.

B. **Word in italics:** The author italicises words just to tell you: "This is something I wish to stress", "This is important". Make sure that you read them.

C. **Key Words:** Note the key word/words of a paragraph. These are the words that convey the meaning of the whole paragraph. Searching for such key words and jotting them down improves your concentration and helps you understand it better when you are reviewing it a second time. Also, pay attention to words such as first, secondly, lastly, in summary, in short: these are important clues to what the writer is trying to say.

D. Skip examples if you have understood the point of the example

(Time to be spent on surveying the material: 5 per cent of the total time.)

Exercise: First and last sentence practice

Choose a partner. Then select a chapter of any book, story or article you would like to read. It could be from your Social Science or History or Literature book. You have exactly two minutes. Time yourself strictly. Within these two minutes read the first and last sentences of every paragraph in between. When the two minutes are over, close the book and tell your partner as much as you can about the main points and meaning of the chapter. After you have done this, let your partner do the same.

Second step

Question. After surveying the material, you're still not ready to read. Never start reading until you have questions in your head. You should be asking questions *before* you start reading, as well as *while* you are reading. Questions should start with the title: What does the title tell me about the contents of the article or book? What do I think will be included and what do I think will be excluded? How much time do I wish to devote to this reading?

Let us take an example. Suppose the title is: "Great Batsmen of India". The title itself gives you many clues as to what will be in the material and what will not. You know it will be about batsmen and not about bowlers. You know it will be about leading batsmen, not mediocre ones; and you know it will be about batsmen in India and not abroad. Try to recall how much you already know about India's great batsmen. You may wonder whether Viswanath's name will be included or Gavaskar's.

Reading is thinking plus questions.

• We only learn when we ask questions; we read and remember best when we read to answer our questions and problems. By raising questions continually

from the title and headings, we put ourselves in the right frame of mind for reading.

We must ask questions not only *before* we read but *while* we are at it. Just like a person driving a scooter. He has to drive defensively: Will that cyclist turn left or will he continue straight? Will that goat dash across the road or won't it? A careful driver is always asking questions. Similarly, as we read, we too should ask questions: Do I agree? Who says so? What proof? What follows from this? Where will the author go from here? Questions should continually dance in our head as we read. Otherwise, we are just watching a book.

(Time to be spent on questions: 5 per cent of the total time.)

Prediction exercise

From a book of your choice, choose any chapter that you have not read. Looking only at the title of the chapter and any headings or sub-headings that may exist, make five predictions about the contents of the chapter by completing the following sentences:

In this chapter the author will:

1. _____
2. _____
3. _____
4. _____
5. _____

When you have finished, skim through the chapter quickly to see how many of your predictions came true. Do you think making predictions helped you to read more effectively?

(To be continued)

ESSAY

(Continued from page 15)

However, the government has taken a small step by creating a basket of technologies for domestic industry to enable it to select the right type of technology from a varied mix, either for partial or total improvement in its competitive strength. The DGTI has been assigned this task but, strangely, has also been asked not to take more than six countries to begin with for the induction of contemporary technologies. The intention is to forecast the technology requirements for the Indian industry in keeping with the changes taking place elsewhere in the world. This is sought to be done by monitoring the technological advances taking place in a selected group of industries, to begin with, then suggesting their adoption in India.

The government is certainly aware of the fact that overseas suppliers may not be interested in parting with certain technologies. But now that the situation is quite favourable, with proper planning of policies it could select contemporary alternative technologies so that the domestic industry has a good mix from which to choose. The availability of new international financial liquidity provides as many opportunities as it poses threats. In reality, liquidity does not exist for everyone, certainly not for those who are burdened with large debts. If large funds are borrowed to match imports of high technology in selective areas in the producer-goods sector, we can lay a strong and independent base for industry. But if funds are used as easy options for all kinds of manufactures through collaborations, we shall only be repeating the mistakes of the past. It seems that just as we need a consortium approach for exports, we must have the same for import of goods, technology and investments. Reports that the government is thinking of borrowing from abroad to create rupee counterparts at home unmistakably show that it has not grasped the novelty and urgency of the situation.

The global recession is not going to last for long, but it is there for at least another two years. Thinking and planning is needed to exploit world markets in order to lay the basis for an independent economy. If we miss the opportunity, keep borrowing on a larger scale, sign collaboration agreements indiscriminately and allow liberal imports, we shall end up in a near-Brazilian or Mexican situation.

Excerpts from *Blessed Is The Recession*,
Indian Express

NEWS IN PIX

Above: From Russia With Peace: Samantha Smith (10) of Manchester, Maine, holds up a letter from Soviet leader Yuri Andropov that gave his personal assurance that the Soviet Union "will never, but never, be the first to use nuclear weapons against any country". The fifth-grader had written in early April to Andropov congratulating him on his new job. Above right, NAM Ministerial Meet: PM Indira Gandhi with visiting NAM delegates at Hyderabad House on April 30. Ministers from Algeria, Argentina, Bangladesh, Cuba, Indonesia, Sri Lanka, Tanzania and Yugoslavia attended the two-day meet inaugurated by External Affairs Minister P.V. Narasimha Rao. The meeting formulated a three pronged strategy to approach developed countries and convince them of the urgency of a North-South dialogue. As NAM Chairperson, Mrs Gandhi will "address suitably" the US President and other participants in the Williamsburg Summit to be held shortly; get in touch with the GDR President and other participants at the Summit of the Council for Mutual Economic Assistance of the Socialist bloc; and also write to the Secretary-General of the Organisation for Economic Development.

Above: Death Of A Dove: The PLO Chief European representative, Issam Sartawi, was shot dead in a southern Portugal hotel lobby while he was attending the 16th Socialist International Congress in Lisbon on April 10. Though the pro-Syrian PLO militant Abu Nidal claimed responsibility for the killing, Yasser Arafat chose to pin the blame on Israel's secret service, Mossad. Sartawi's crime in his fellow Palestinians' eyes: in the Palestinian National Council (PNC) meeting in February, he called for active consideration of Reagan's West Asia peace plan and had enough backing of PLO moderates to get it through with the help of Jordan's King Hussein and Saudi Arabia's King Fahd; he insisted that what had happened to the PLO in Lebanon was a defeat—not a victory as PNC claimed; he called for the recognition of Israel in the larger interests of peace in the Middle East; and refused to accept a decision calling on him to resign from the PNC.

Above: The Ghetto Story: April 19 marks a "spiritual watershed" for Jews worldwide. That day 40 years back, the infamous Nazis decimated the Warsaw ghetto through aerial bombing and tank shelling because crack German troops could not cope with a handful of poorly-armed Jew resisters. Pic shows a group of Jews, including a small boy mistakenly named as Arthur Schmlontak by the Agence France Presse, being escorted from the Warsaw ghetto by German soldiers. The picture formed part of a report from SS General Stroop to his commanding officer, and was introduced as evidence in the 1945 Nuremberg War Crimes Trial.

Above: Governors Meet: Inaugurating the two-day state governors conference beginning April 9, President Zail Singh called upon the states to keep a special watch on the communal situation and to mobilise public opinion against communal and anti-national elements rearing their heads in different parts of the country. The governors (pic shows some of them sharing lighter moments), on their part, suggested that with a view to promoting national integration, recruits from outside the states should form a large proportion of the cadre of all India services posted in the state. Among other things, the governors discussed the political and economic situation in the states and the public-distribution system in the country.

RBI Officers (Gr. 'A') SC/ST

The Reserve Bank of India Services Board, Bombay, will hold a competitive exam exclusively for members of SC/ST, for recruitment of Officers in Grade 'A' in RBI, on July 16 and 17, 1983. To be eligible, candidates must possess a bachelor's degree and should be between 21 and 31 years of age as on 1.5.83. The last date for receipt of applications is 3.6.83. For format of application form and details, see *Employment News* dated 7.5.83 and *The Hindustan Times* dated 4.5.83.

Assistants' Grade Exam

The UPSC will hold the Assistants' Grade Exam from 11.10.83. Candidates must be degree-holders and should have been born not earlier than 2.1.58 and not later than 1.1.63. Last date for receipt of applications is 13.6.83. For details and format of application form, see *The Hindustan Times* or *Employment News* dated 30.4.83.

P.G. Courses, IIT Delhi

IIT Delhi invites applications for its postgraduate programmes, i.e., M.Sc., M.Tech., and Ph.D., in various disciplines for the year 1983-84. Application forms and detailed information brochure may be obtained free of cost from Assistant Registrar (Academic & Examination I) IIT, Hauz Khas, New Delhi-110 016, by sending a self-addressed stamped (Rs 1.30) envelope (27 x 12 cm), superscribing 'Application form for M.Sc./M.Tech./Ph.D.' (as the case may be) on it. Last date for receipt of requests for application forms is 31.5.83 and that for receipt of completed applications is 7.6.83.

P.G. Courses, University Of Hyderabad

The University of Hyderabad will be conducting an admission test for M.A./M.Sc./M.Phil./Ph.D. / Master of Computer Applications courses for the 1983-84 session, between 21 and 27.7.83. Admission bulletin and application forms may be obtained from the Assistant Registrar (Academic), University of Hyderabad, either in person or

by post by means of a crossed I.P.O. for Rs 5, drawn in favour of the Finance Officer, University of Hyderabad, payable at Hyderabad G.P.O. Requests for application forms must reach the above-mentioned by 4.6.83. Last date for receipt of completed applications is 15.6.83.

Combined Defence Services Exam

The UPSC will hold the Combined Defence Services Exam from 23.10.83 for admission to the Indian Military Academy (IMA), the Naval Academy (NA), the Air Force Academy (AFA) and the Officers' Training School (OTS) for the Short Service Commission (Non-Technical) Course (SSC-NT). For IMA, NA and OTS (SSC-NT), candidates must hold a degree or equivalent qualification. For AFA, in addition to holding a degree, candidates must have passed the Hr. Sec. or 12th class of 10 + 2 pattern with Maths and Physics. Candidates should have been born after 1.7.62 and before 2.7.65 for entry to IMA, NA or AFA, and after 1.7.61 and before 2.7.65 for OTS. Application forms and details are obtainable from Army, Navy and Air Force authorities, as also from Secretary, UPSC, Dholpur House, New Delhi-110 011, on payment of Rs 2 either by M.O. or crossed Indian

Postal Order (I.P.O.), payable to the above-mentioned at New Delhi G.P.O. or on cash payment at the UPSC counter. Last date for receipt of applications is 27.6.83.

Sub-Inspectors (Executive) CISF

Graduates in Arts, Science, Commerce or Law, interested in joining the security services, have an opportunity to join the Central Industrial Security Force as Sub-Inspectors (Executive). Proficiency in sports and athletics and membership of the NCC are desirable qualifications. The age of the candidates must not be below 19 and above 25 years as on 1.7.83. Last date for receipt of applications is 18.6.83. For format of application form and other details, see *Employment News* dated 14.5.83.

Archival Studies Diploma

The School of Archival Studies, New Delhi, offers a one-year diploma course in Archival Studies to post-graduate students of History having at least second-class marks and an optional paper in Modern Indian History (Post-1500 period). No fee is charged for this course and five scholarships, each worth Rs 300 p.m., are awarded to candidates on merit. Prospectus and application forms may be had on payment of Rs 2, either personally or by sending M.O./I.P.O., addressed to the Director of Archives, National Archives of India, Janpath, New Delhi. Last date for receipt of applications is 5.6.83.

Educated Unemployed

Here's a superb opportunity for the educated unemployed youth to enter into the transport business. The basic requirements are: applicants should be males below 35 years of age, preferably educated upto matriculation level, at least; should be capable of arranging an initial deposit of Rs 30,000 and providing some reserve fund for working capital; and should be able to produce good security/guarantors for the bank loan. For further details, write to National Association of Educated Self-Employed Youth (NAESEY), 117 Trade Centre, Wallajah Road, Madras-600 002.

HEIGHTS OF GLORY

SHAR, Sunday, April 17, 11-06 a.m.: Suddenly several hundred pairs of eyes discovered a great ball of yellow-white flame; the sound they heard was equivalent to "100 express trains speeding simultaneously along a rail track". And even as Indian space scientists congratulated each other, the 22.7-metre, pencil-like, red-and-white SLV-3 D2 rocket pierced the horizon perfectly to hurtle the 41.5-kg Rohini 2 satellite it carried in its nose cone in a near-earth orbit.

The flawless launch was a testimony to the advances in the country's space technology and the skill and hard work put in by over 10,000 scientists from four major space centres—the Space Applications Centre (SAC), Ahmedabad, Vikram Sarabhai Space Centre (VSSC), Trivandrum, Indian Space Research Organisation (ISRO) Satellite Centre, Bangalore and the Srihankota High Altitude Range (SHAR), Nellore.

Echoing the thoughts of every Indian, Prime Minister Indira Gandhi, who watched the launch at SHAR, said: "For me, it was a special thrill. Although I am well above 60, I have not lost the sense of wonder and marvel at what man can achieve."

For a late starter, India's achievement has few parallels in the world: it has been faster than Western nations like Britain, France and Japan. Only 20 years back, a launching pad worthy of space research was set up: the Thumba Equatorial Launching Station (TERLS) in the VSSC premises. In a 14-year span beginning 1964, TERLS was the launching site of some 500 sounding rockets under supervision of scientists from the USSR, France, West Germany, the UK and the US. Of these, only one—the US-made Apache rocket—was launched solely by the Indians in 1969. By then, Indian space research had gained momentum. Other history-making launches were not far in coming: Aryabhata (1975); Bhaskara (1979); SLV-E01 (1979); SLV-E02 (1980); APPLE (1981); SLV-3 D1 (1981); INSAT-1A (1982).

Success came in spurts, though. Only SLV-E02, which put a 35-kg Rohini satellite in an elliptical orbit around the earth, was the first real breakthrough. Now, the SLV-3 D2 launch comes as a precious second.

SLV-3 D2: Perfect launch.

Barring some last-minute trepidations, the April 17 launch went off smoothly as scheduled. Of the four stages in the SLV-3 D2 rocket, the 10-metre-long first stage was jettisoned 72 seconds after the lift-off, thereby increasing the speed of the remaining part tremendously, the second stage was jettisoned 140 seconds after launch, accelerating the system further into space; the third after 450 seconds, while the fourth stage was separated and Rohini 2 hurtled into space exactly 9 minutes 43 seconds after lift-off at a speed of nearly 28,000 kmph. Rohini then started moving in the programmed elliptical orbit—the maximum distance from earth called apogee being nearly 975 km and the minimum distance called perigee being 438 km—circling the earth once every 97 minutes on an average.

Considering the concerted efforts of the various Indian space agencies and the hard work the scientists put in, leaving nothing to chance, the 'textbook-perfect' launch was not surprising. The four-stage, solid-fuel, 16.9-tonne SLV-3 D2 rocket, with over one lakh high-tech components, involved a million joints. Over 10,000 scientists from SAC, VSSC, ISRO Space Centre and SHAR integrated these components piece by piece, painstakingly, over an 18-month

period. VSSC supplied 320 kg of solid propellants packed in three stages of the 14-rocket assemblies.

The efficiency of the rocket was raised many times over by the modified fourth-stage Kevlar motor. Developed by ISRO and pre-tested at SHAR's vacuum chamber, Kevlar's significant modification is its casing: it is made of plastic-reinforced fibreglass. "With this material, the deadweight of the motor was brought down from 26 kg to 16 kg and the fuel pack [went] up from 270 kg to 320 kg," said VSSC Director Vasant Gowarikar. "This helped the rocket travel further and propel the satellite at a greater height." In fact, scientists could have either increased the payload above the 40-odd-kg limit, or the orbital height. They chose the latter—and Rohini's orbital height was increased from 300 to 450 km. However, not much was compromised by way of keeping Rohini's weight at 41.5 kg.

Though dubbed as a "veritable space pygmy", the spin-stabilised Rs 40-lakh Rohini packs a lot of punch. It carries on board a 'high-precision' two-band (optical and infra-red) solid-state camera—called 'smart sensor', and aptly so. It provides a better 'contrast' in pictures to identify landmass—for 'refinement' of the orbital path and altitude—and other ground features like distribution of water reserves, clouds, vegetation, bare land, snow, etc. Says Prof U R Rao about the camera: "Harvests depend to a great extent on rain forecasts. We do not have a complete picture of agricultural production, or of our forest resources. Nor do we have glaciological maps of the Himalayas which are vital in water supply. The camera attached to Rohini 2, with its 'smart' capabilities, is a big step in this direction."

Rohini also incorporates an L-band beacon, with a power output of 100 milliwatts, to provide better tracking accuracy. Mission Director Ved Prakash Sandlas said the satellite is transmitting "very healthy" signals to the four earth stations at Srihankota, Thumba, Car Nicobar Islands and Ahmedabad. The upgraded L-band beacon is responsible for this.

Rohini cannot carry on such onboard operations without, first, a power source and, second, a device to reduce the satellite's spin-rate. The first is taken

with rechargeable nickel-cadmium storage batteries as the secondary power source; the second is made possible by an additional "yo-yo mechanism"

In terms of hardware alone, the entire rocket cost Rs 1.50 crores, while the project cost Rs 26 crores. In terms of returns, much depends on Rohini's life in space. An optimistic Sandlas said the satellite would remain in orbit for at least two to three years, many times more than "the predicted minimum life of 100 days in space". The government, sharing Sandlas' optimism, has agreed to spend nearly 1,000 crores on space efforts during this decade.

And there are four such programmes at present: INSAT-1B from the US this September; Indian Remote Sensing Satellite (IRS) from the USSR in 1985-86; a 150-kg satellite aboard the Augmented Satellite Launch Vehicle (ASLV) in 1986-87; and IRS-2 aboard Polar Satellite Launch Vehicle (PSLV) in 1989-90. The last two are more important: first, they will be Indian endeavours lock, stock and barrel, and second, they are the direct spin-offs of the present launch.

The excellent performance of the modified Kevlar motor, evidenced by the near-perfect orbiting of Rohini 2, has come as a boon for the ASLV and PSLV programmes, aimed at launching heavier satellites into orbits at greater distances from the surface of the earth. The Rs 20-crore project work on the five-stage ASLV has already begun. It will aim at placing the 150-kg satellite in a 400-500-km near-circular orbit, its first-stage power increased by two 'strap-on' rockets. The PSLV programme is much more ambitious. While the project cost is nearly 311 crores, the PSLV, using six 'strap-ons', is expected to put a 1-tonne satellite into a polar sub-synchronous orbit, 900 km above the earth's surface. The increased payload capacity and greater orbital height is sought to be achieved, partly, by using an indigenous liquid fuel: Unsymmetrical Dimethyl Hydrazine (UDMH), to be manufactured by Indian Drugs and Pharmaceuticals Ltd. UDMH, along with fuming Nitric Acid, will be the component of the bi-propellant for the liquid-fuel second-stage of the PSLV.

The 'work-horse' SLV-3's superb performance has opened one more avenue besides tossing heavier satellites yet farther into space. SLV-3, in principle, can be converted into a 'war-horse'—an Intermediate Range Ballistic Missile (IRBM)—by replacing the fourth-stage and the Rohini satellite with a 400-kg warhead. In practice, a

warhead of such a weight class can incorporate complete casing, electronics and trigger system. And by adding enough punch to the rocket's three stages, the warhead could be fired to a distance of upto 5,000 km. The tele-guidance system employed in the SLV-3 D2 is very much similar to those used in IRBMs.

In fact, China, a space power with 13 orbital crafts to its credit, has already launched an Intercontinental Ballistic Missile in 1980 as a direct offshoot of its rapid advances in space technology, since venturing into this field in 1959. Japan, the other indigenous satellite power in Asia, is restricted by a 1969 Diet resolution not to take up military applications of space. Its space programme is thus civil, commercial and science-oriented.

Politically, India does not face Japan's problem. Still, taking into account India's aversion to using its nuclear capabilities for military purposes, one can understand Mrs Gandhi's views—as expressed to reporters in SHAR—on not making the country's space programme defence-oriented. Said she: "You are jumping two steps ahead"

But nuclear and space programmes can only be non-military in outlook till there is no war. What if there is one? Civil-oriented programmes cannot be converted to military ones overnight. Realising this, the government has already given its approval to Indian scientists to work on the defence possibilities of the SLV-3 D2. But the scientists face a technical problem. How to toughen the nose cone using heat shields to withstand temperatures of about 2,500°C, which a warhead will be subjected to on re-entering the earth's atmosphere. At present, the fibreglass honeycomb heat shield on the SLV-3 D2 can bear temperatures of upto only 600°C—and heat-shield technology is a closely-guarded secret.

The optical and infra-red sensors developed in satellites can be used to detect intercontinental ballistic missile launches. They can also be used to enable aircraft in flight to communicate with ships, earth stations thousands of kilometres away, and even submerged submarines. With the onboard detectors, the satellites can be used to monitor nuclear tests in the atmosphere and also serve as early-warning sources for nuclear explosions. A fully-developed satellite-network system can provide reliable full-time communication between various military-force elements.

NAGARAJAN V. with B.L. ARORA &
SURINDAR SINGH

FIDEL CASTRO

Cuba's cigar-smoking President in battle-greens, Fidel Castro, is a newsmaker par excellence, an ideal subject for our new biographical feature of the same name. From a rich landowner's son fighting for the uplift of the poor; to an altruistic lawyer with a vision; to a daredevil revolutionary with a will to win; to a shrewd political operator with a superhuman capacity for survival—Castro has made his own ism, Fidelismo. Which is: not taking orders from "great centres of revolutionary authority" like USSR and China; and establishing a "brand new social order", completely original, and not to be found in textbooks.

Castro's Cuba is "one of the pillars of the Non-aligned Movement". As outgoing NAM Chairman Castro captured the imagination of the press and people of the Third World. To Castro this is not new: for 30 years now, he has been the messiah of the "dispossessed and the disinherited of the earth", be they in despot-ruled Latin America or in neo-colonial black Africa.

Fidel Castro Ruz has captured the imagination of the world as the leader of a nation that has made rapid strides in a period of just two decades after it overthrew the oppressive regime of Fulgencio Batista in 1958. Born the second son of a wealthy cane-plantation owner in the Oriente Province of Cuba, Castro is a born leader, an outstanding speaker, and a great sportsman. In 1944, he secured the top position in Cuban school athletics. Fired with a burning zeal against injustice, Castro, at the age of 13 organised a strike of farm workers against his own father. He finished law studies in 1950 and defended few cases of poor peasants free of charge. His only aim was to free Cuba from the oppression of dictator Batista.

In July 1953, he and his younger brother, Raul, collected 100 men and launched an attack on Cuban army barracks having over 1,000 soldiers. It was a costly attack—they lost three men and were captured soon after. After nearly two years in prison, he, with his brother, fled to Mexico. In 1955, Castro, his brother Raul, Che Guevara and four-score guerillas on board the fishing yacht Granma, landed in his home province Oriente. Their strength dwindled to a mere 15 but the spirit of revolt had caught on and Batista fled the country in 1958, leaving Castro the ruler of Cuba at the age of 33.

Castro is worshipped as a hero not only in Cuba, the only communist country in the Western

hemisphere, but all over the world. The tall, handsome and masculine Castro in his soldier's uniform looks benignly at his people who have a great affection for him despite the changes he has brought about in Cuba. He was, however, not a communist when he freed his country from Batista. The indifference of the West coupled with the extreme poverty of his people made him turn to the Soviet Russia and communism. Over five lakh Cubans fled to the US and repeated attempts were made by them to dislodge Castro from power. The Bay of Pigs invasion launched from Florida by anti-Castro refugees in the US turned into a disaster

with Castro becoming the hero of his people. Though eight assassination attempts have been made on his life by the US, he carries on as strongly as ever.

Though a hard core communist and Marxist, Castro does not take orders from the Soviet Union. He has become a champion of the black African nations fighting apartheid and exploitation. Castro's troops are fighting in Angola against South African-engineered subversion. His volunteers are in Ethiopia and Mozambique combating similar threats. He has opened a university in the Isla de La Juventud (Isle of the Youth) where students from Africa, Asia and Arabia come to study.

What kind of revolution does Castro export? He believes that revolutionaries should create conditions for struggle rather than wait for suitable conditions to appear. Castro's vision of a communist society and the new socialist man is the dominant theme of Cuba's communist philosophy. He always addresses himself to the masses to raise the level of their political awareness so that the revolution brought about in Cuba continues to prosper and thoughts generated by it are exported to the Third World.

The island of Cuba in the Caribbean Sea, inhabited by ten million Mestizos of mixed Spanish, Negro and aboriginal Indian descent, has emerged as the Mecca for revolutionary movements. Castro was the Chairman of the Sixth Non-aligned Summit in Havana and a prominent figure at the Seventh Summit in New Delhi, where he worked with Indira Gandhi to make it a resounding success.

P.N.K.

NEWS IN BRIEF

DECEMBER '82-MARCH '83

It's people, places or issues which always make news. And in important competitive exams like Civil Services, Reserve Bank Grade 'A' and banking, questions are invariably based on them. For your instant success in exams featuring such questions, and to save yourself the bother of scanning through four-month-old newspapers and magazines, CCTimes brings you news from December '82 to April '83 in an easy-to-follow format.

NATIONAL

PEOPLE

A.B. A Ghani Khan Choudhary: The Railway Minister who created a furore in railway circles by his high-handedness. He attacked the Railway Board and stated that the then Chairman of the Board, M. S. Gujral, would have to go "if he did not mend his ways". He also created considerable confusion by giving contradictory orders on the one hand, he has been calling for decentralisation but on the other, his specific orders include one in which he stated that no train should be cancelled without his permission.

Ashok Sarkar, Chief Editor of the *Ananda Bazar Patrika* and doyen of Bengali journalism, died in February.

Ashwini Kumar was elected Vice-President of the International Olympic Committee for a period of four years on March 27.

Justice Baharul Islam Supreme Court judge who resigned in January to join Assam politics.

C.K. Daphtary, eminent jurist and doyen of the legal profession, a former Attorney General of India and a winner of the Padma Vibhushan died on February 16.

C. Sivaramamurthy, noted scholar, author and exponent of Indian art, died on February 6.

Sant Harchand Singh Longowal Akali Dal President who was in the news

all through this quarter for the various agitations he spearheaded. Other important Akali leaders who figured in the news: Surjit Singh Barnala, Prakash Singh Badal, Gurcharan Singh Tohra, Jagdev Singh Talwandi, Balwant Singh and Ravi Inder Singh.

Kapil Dev: Chosen captain of India's cricket team (after Sunil Gavaskar) to lead them in their tour of the West Indies.

Kedar Pande, former Union Minister, died of brain haemorrhage in March.

Mohinder Amarnath was adjudged India's Man of the Series in India's cricket Test series against Pakistan this winter. **Imran Khan** was adjudged Pakistan's Man of the Series.

M. Chalapathi Rau, veteran journalist and former Editor of the *National Herald*, died in March.

M.M. Choudhury, former Governor of Punjab and a former Chief Minister of Assam, died on December 27.

N.T. Rama Rao: Starry success.

N.T. Rama Rao: Founder leader of the political party, Telugu Desam, he was chosen as the AP Chief Minister after his party won a landslide victory in the state Assembly elections held in January.

Phoolan Devi, the elusive woman dacoit, who surrendered before MP Chief Minister Arjun Singh. Another dreaded outlaw, **Ghanshyam,** surrendered with her.

Piloo Mody, veteran parliamentarian, died on January 29.

Profulla Chandra Ghosh, first Chief Minister of West Bengal and an active politician, died in February.

Vice-Chief of the Army Staff won Lt-Gen A.M. Sethna in January.

PLACES

Aleppey was rocked by sporadic violence in late December, after a clash between police personnel and a violent crowd on Prophet Muhammed's birthday. Violence spread to other parts of Kerala, including Trivandrum and Cochin, and it assumed communal forms. The army had to be called out to quell the trouble.

Baroda: Riots of a communal nature began on December 14, when the Police Commissioner, Jashpal Singh, was transferred out of the city. Violence continued for about a week.

Bellary in Karnataka Mob violence erupted over the alleged rape of a teenaged girl in a local police station in mid-February.

Gohpur area of Darrang district in Assam: About 100 people were killed and 6,000 houses razed to the ground between February 12 and 14 in pre-poll communal violence.

Howrah: Scene of a major railway accident in mid-February.

Nellie in Assam: The scene of one of the bloodiest pre-election massacres. Tribals were responsible for the bloodbath. Other places which were badly affected were Mangaldoi, Balahiti, Mikirbheta and Kachwagaon.

Sriharikota Range. The Rohini 560 rocket was launched on January 12. It was developed by the Vikram Sarabhai Space Centre at Thumba.

Varanasi: On January 4, gold plates worth Rs 25 lakhs were stolen from the famous Vishwanath Temple.

ISSUES

Economy: Facts and figures on the rate of India's economic growth were published by the Central Statistical Organisation of the Ministry of Planning in February. The national income recorded an increase of 5 per cent in real terms during 1981-82, over and above a marked rise of 8.1 per cent in 1980-81, according to quick estimates. The per capita income in real terms was estimated at Rs 720 for 1981-82 against Rs 700 in 1980-81. At constant prices (1970-71 base period), the total national income of 1981-82 was estimated at Rs 49,887 crores against Rs 47,490 crores in 1980-81. At current prices, the national income stands at Rs 1,21,243 crores in 1981-82. The increase in national income in real terms was attributed to the moderate improvement of 3.3 per cent in the performance of the agricultural sector, accompanied by a marked increase in the mining sector by 12.5 per cent, electricity, gas

and water supply by 10.8 per cent, and registered manufacturing by 7.5 per cent. Forestry, fishing, transport, trade, hotels and restaurants, hauling and public administration and defence also contributed to the increase. Production of foodgrains increased from 126.6 million tonnes in 1980-81 to 133.1 million tonnes in 1981-82. The production of crude petroleum increased by 54.1 per cent, coal by 8.9 per cent, and power generation by 11.2 per cent. Net domestic saving increased as well, from Rs 20,024 crores in 1980-81 to Rs 24,075 crores in 1981-82.

However, a different picture emerged from the pre-budgetary economic survey as presented to Parliament on February 22. It admitted a fall in both agricultural and industrial production in 1982-83 and severe strains on the balance-of-payments and budgetary resources. It pointed out that in agriculture, despite increases of 9 million hectares in the irrigation potential and 2 million tonnes in fertiliser use in the period 1978-79 to 1982-83, there had not been any significant increase in the level of foodgrains production. However, it said that the economic outlook for the next fiscal year was favourable. The Opposition had serious objections to the government's claim of a sound economy.

The public sector, however, appears to have taken a turn for the better. After suffering losses year after year, it made a net profit of Rs 485 crores in 1981-82, according to estimates published by the Bureau of Public Enterprises.

In February, the Union Government, in a surprise move, raised the price of petroleum products including diesel, aviation turbine fuel and kerosene. Petrol and LPG prices, however, were spared. The price of petrol in Delhi, in fact, was reduced by 8 paise. In February, a five-member Economic Advisory Council, consisting of prominent economists like Prof Sukhomoy Chakravorty and Dr C.H. Hanumantha Rao, was set up to deal with issues relating to economic policy and development. The Council was hailed by all sectors.

Purse strings were pulled tighter when news of the railway budget was published. It envisaged for 1983-84, gross traffic receipts at Rs 5,145.68 crores and total working expense at Rs 4,520.77 crores. As a result, prices of railway tickets are to cost more. Freight, too, would cost more. Around the same time postal and telecommunication rates also went up.

The national budget for 1983 was modest and was made to give a boost to savings and farmers. It provided for a higher surcharge on income-tax, and for relief at the lowest slab. While cement prices were increased, those of sugar,

scooter tyres, bulbs, tubes, etc, fell. The budgetary deficit for 1983-84 was Rs 1,555 crores. There were deficits in the state budgets as well and most states got prepared for price hikes. The cumulative deficits in the budgets of 13 of the 14 major states (the exception being Madhya Pradesh) came to Rs 885 crores for 1983-84. Against this, the states raised Rs 200 crores by way of tax and non-tax revenues. The persistence and widening of the state deficits has raised the spectre of mounting overdrafts once again, which the Centre will probably have to write off in the future.

Congress (I) dissidents: Congress (I) dissident legislators in Maharashtra became active in early December and demanded the removal of CM Babasaheb Bhosale. And they were successful in their attempt, as the events of the new year showed, when Vasantrao Patil replaced Bhosale. Dissidence has been on the upswing in Rajasthan, Bihar, Gujarat and Orissa also. In Orissa, the Union Minister of State for Chemicals, Ramachandra Rath, has made common cause with the dissidents in the state to undermine the position of the chief minister. The Gujarat Congress (I) breakaway group led by former state party President, Raterbhai Adani, formed a new political party called the Rashtriya Congress, in December. Rajasthan dissidents increased their pressure for the removal of the CM, Shiv Charan Mathur.

The Congress (I) working President, Kamalapati Tripathi, took steps to curb dissidence within Congress (I) ranks by ordering dissidents not to visit Delhi with their grievances. He also emphasised the importance of Pradesh Congress Committees and their presidents.

In another move, the entire unit of the Congress (S) in West Bengal, headed by Priya Ranjan Das Munshi, merged with the Congress (I) on March 26. The Congress (I) has benefited from this because of Munshi's powerful following. The Das Munshi group was against the alignment of the Marxists and the Congress (S) in Assam, and had been counting the Marxists in association with the Congress (I) for sometime. The dissidents finally broke away from the main body of the Congress (S) in March. Another longtime dissident group—the breakaway faction led by Maneka Gandhi—formed the Rashtriya Sanjay Manch in late March. The party claims a membership of 8 lakhs. It has come as a threat to the Congress (I) in some sectors. The president of the Bangalore rural district Congress (I) resigned from the party to join the Manch, and declared that there were many more in Karnataka who would do the same.

Centre-State relations: Non-Congress (I) Governments continued to have their usual grouse against the Congress (I)-

ruled Centre on the question of resource allocation and "discrimination" against them. The question of imposition of Hindi also came up, especially in Tamil Nadu. Tamil Nadu Governor S.L. Khurana claimed in January that some Central departments like the Ministry of Information and Broadcasting were trying, directly and indirectly, to impose Hindi on the state through TV and AIR broadcasts. However, he said that Tamil Nadu was committed to the two-language formula of Hindi and English.

Later, in February, Tamil Nadu CM M.G. Ramachandran created high drama in the state when he went on a token fast on February 9 against the Centre's refusal to give rice to Tamil Nadu, which was in the throes of a food crisis. The Centre, however, responded quickly and de-escalated the crisis. The PM also sanctioned Rs 10 crores as drought relief for Tamil Nadu.

The Karnataka Government set up a 12-member 'think tank' in January to review Centre-State relations in the fields of finance, administration and allied subjects. It was a healthy development since it was an expert committee set up to advise the state government on strengthening the federal structure to enable the functioning of the Centre and the states in a manner which would stimulate better relations.

In March, the chief ministers of Tamil Nadu, Karnataka, AP and the Union territory of Pondicherry, all of which are under non-Congress (I) leadership, paved the way for a council of chief ministers for the southern region. The moving spirit behind the council, Karnataka CM Ramakrishna Hegde, initially declared that the council was not intended to be a forum to confront the Centre. The idea, he said, was that the chief ministers should, as far as possible, settle mutual problems at their own level and go to the Centre only when they failed to solve their problems. Nevertheless, the focus shifted soon afterwards, and the conclave demanded a wholesale reorganisation of the financial and fiscal pattern of Centre-State relations. It emphasised the state's rights in very strong terms.

Following these developments, PM Mrs Gandhi announced the formation of the first-ever Commission to review Centre-State relations on March 24, to recommend such changes as may be appropriate within the constitutional framework. The Commission would comprise a former Supreme Court judge, R.S. Sarkaria. More members are to be added later. The Sarkaria Commission has been widely welcomed.

Press: In December, the Press Council of India called for the codification of the

privileges of the administration. It further suggested that the administration of the law of parliamentary privileges ought to be such that it does not fetter or discourage the free expression of opinion or criticism and recommended the setting up of a joint parliamentary committee.

Another important development in this field was the defeat of the Bihar Press Bill in February-end.

Regionalism and communalism: Two major problems which have plagued India ever since its inception, remained unabated in this quarter. Besides communal violence in Baroda and Kerala and the free-for-all in Assam during the state elections, the formation and victory of regional parties like the Telugu Desam and the Karnataka Kranti Ranga Front proved that divisive tendencies were on the rise

Akalis in Delhi: Show of strength.

in Indian politics. The Akali agitation with its religious and regional demands took violent forms time and again. To deal with the problem of communalism, the Union Government has decided to raise five battalions of peace police, in addition to three already in existence. The government is also considering a proposal to set up tribunals to deal with communal riots. One hundred and forty-two districts have been identified in the country where communal tension is apprehended. However, the RSS gained ground in this period. An impressive show of strength was displayed at one Maharashtra state-level camp in late January. The actual attendance crossed the 36,000 mark. It was the first time since 1948 that the RSS had organised a camp of such magni-

the RSS has been rapidly expanding. The RSS General Secretary, Rajendra Singh, alleged that lakhs of infiltrators from Bangladesh had settled on Bengal's borders. According to him, only Hindus should be let in while Muslims should be considered as foreigners and not be permitted to enter. Otherwise, it would be a repetition of the Assam problem in West Bengal.

Among Muslim communal groups, the Mulk-o-Millat Bachao Tehrik Movement, headed by a former Union Food Minister, Shahnaz Khan, made headlines in February, when it presented a memorandum to the Prime Minister saying that it would launch a civil disobedience movement in collaboration with other like-minded forces unless its demand for curbing communal trends in the country were conceded.

Foreign affairs: India continued to build up her image in the international field in this period. India and Pakistan set up a joint commission to promote economic, scientific, industrial, trade and cultural cooperation between the two countries in December. India and Vietnam, too, agreed to set up a joint commission in the same month. In February, a major breakthrough was achieved in Indo-Nepalese relations when the two countries agreed upon the joint execution of three major multipurpose river-valley projects, which will enable the two governments to harness the waters of the Karnali, the Rapti and the Pancheshwar rivers for irrigation and power generation in the future. India and France agreed on a draft of the commercial contract for the supply of French nuclear fuel for the Tarapur Atomic Power Station.

An Indo-Soviet trade protocol, providing for an 11.2-per cent growth in two-way trade, was also signed. India and the Netherlands signed an agreement to promote economic and technical collaboration between the two countries. India and Romania agreed to expand bilateral trade and economic cooperation. With China, however, India made no headway in these four months. A large number of foreign dignitaries came to India on state visits. Among them: Nepalese PM Surya Bahadur Thapa; Mauritius PM Aneerood Jugnauth; West German Naval Chief Vice-Admiral Ansgar Bethge; and the Afghan PM, Sultan Ali Keshtmand, besides all the NAM dignitaries. Even so, India received the maximum boost in March, when the Seventh Non-aligned Summit was held in New Delhi. Indira Gandhi took over as NAM Chairwoman from Cuba's Fidel Castro. Although the Kampuchean issue came in for much debate, the general consensus was that the Summit was a major success, and it was felt that with India chairing NAM, it was back on the

Assembly elections: Elections to state Assemblies were held in Andhra Pradesh (AP), Karnataka and Tripura in January. The Congress (I) was defeated in all the states. In Tripura the CPM-led four-party Left Front secured an absolute majority and the second successive Left-Front Ministry was sworn in under Nripen Chakravorty. In AP, the Telugu Desam swept the polls and N.T. Rama Rao became the Chief Minister. In Karnataka, the electorate failed to give a clear mandate to any party but the Janata-Karnataka Kranti Ranga Front, which included the CPI and CPM and received the support of the BJP, formed a government headed by Ramakrishna Hegde, the leader of the state Janata legislature party. The Kranti Ranga leader, S. Bangarappa, was, however, dissatisfied with the decision and later took steps to revive the Kranti Ranga as a separate party. The Congress (I), however, fared much better in the Delhi Metropolitan Council and Municipal Corporation elections, winning 57 of the 100 Municipal Corporation seats and getting a majority in the Metropolitan Council. After a massive bloodbath following anti-election agitations, the Congress (I) also received a two-thirds majority in Assam, and Hiteswar Saikia was sworn in as Chief Minister. In Meghalaya, the Congress (I) increased its strength in the 60-member Assembly from 20 to 25, but the two major regional parties, the All-Party Hill Leaders Conference (APHLC) and the Hill State People's Democratic Party won 15 and 16 seats each, and a coalition ministry led by the APHLC was formed under the chief ministership of B.B. Lyngdoh.

Cabinet reshuffle: There were a number of Cabinet reshuffles, too, in this period. Among the prominent changes: H.K.L. Bhagat became the Minister of State for Information and Broadcasting and Bhagwat Jha Azad became the Minister of Food and Civil Supplies. The Cabinet's strength has come down from 20 to 18. Some states were also given new governors: A.P. Sharma took over as Governor of Punjab after the resignation of Chenna Reddy; A.N. Banerji, the Governor of Himachal Pradesh, was appointed Governor of Karnataka. Former Nagaland CM Hekiehe Sema has been appointed Governor of Himachal Pradesh.

AWARDED

Kalinga Prize (1981) for the popularisation of Science, jointly to David F. Attenborough, British author and TV producer, and Dennis Flannagan, Editor of the *Scientific American*.

Borlaug Award (1981) for outstanding contribution to research and agriculture.

Agricultural Research Institute.

National Award of the Federation of UNESCO Associations for the promotion of the activities and objectives of UNESCO, to Dr D.S. Kothari.

Sahitya Akademi Awards (1982) to 22 writers for works in 22 languages, including English and Sanskrit. Hindi satilist Hari Shankar Parsai, Indo-Anglian novelist Arun Joshi and Malayalam short-story writer V.K. Narayanan Kutty, were among those to get the award. Priyankar Maniar was given a posthumous award for his collection of poems *Lilero Dhal*. The winner who refused the award was a Dogri writer, Deshbandhu Dogra, for *Nutan*.

Padma Shri Awards to sports stars

...Singh, Kaur Singh, Satpal Singh, Vijay Amritraj, M.D. Valsamma, Chand Ram, Eliza Nelson, 'Guru' Hanuman and Daddar Raghunir Singh.

Indian National Science Academy Awards (1982) to 16 young scientists for outstanding work.

Bharat Ratna (1983) to Acharya Vinoba Bhave posthumously.

Padma Bhushan (1983) to 17 awardees, prominent among them being Sir Richard Attenborough.

Fortieth Annual Golden Globe Ceremony (Hollywood) Awards: Five awards to the film *Gandhi*. It also received the British Academy Award for the Best Picture in London in March.

Olympic Gold Order to PM Indira Gandhi in New Delhi in March.

Secretary of State in late December and over a month afterwards undertook a goodwill mission to the Far East.

Helmut Kohl of the Christian Democratic Union was elected Chancellor of West Germany in the general elections held in March. He defeated the Social Democratic candidate, Hans-Jochen Vogel.

Kohl: Fresh mandate.

Hugh Hambleton, a Canadian Economics professor, convicted of being a Soviet spy. While working as an economist at NATO's Paris headquarters between 1956 and 1961, he gave the Soviets copies of 80 NATO documents. Among other recently-blown spies are Geoffrey Prime, a Russian-language expert at Britain's top-secret Cheltenham communications centre, and British diplomat Rhona Ritchie.

Ichiro Nakagawa, a Japanese parliamentary leader who ran against Yasuhiro Nakasone in the recent election for president of the ruling LDP, and therefore for prime minister, committed suicide in early January.

Imran Mohammad Zain: Radical Indonesian Muslim leader, sentenced to death for subversion, including the masterminding of an aircraft hijacking, escaped from a Jakarta detention camp with the help of civilians in early February. However, he was recaptured later in the month.

Leo Su: The infamous Chinese-born opium warlord of South-East Asia's Golden Triangle, he died of gunshot wounds in February. Another warlord, Khun Sa, is looking for a place in the sun for himself.

INTERNATIONAL

PEOPLE

Adhaji Ali Baba, Nigerian Minister of Internal Affairs, who started an exodus of foreigners by his announcement on January 18 that aliens without valid permits must leave Nigeria within a fortnight. He made an exception for professional and skilled personnel. There has been a sharp increase in xenophobia in Nigeria in the past few months.

Amintore Fafani formed his fifth and Italy's 43rd government in December. He headed a four-party centre-left grouping of Christian Democrats, Socialists, Social Democrats and Liberals.

Ariel Sharon was replaced as Defence Minister of Israel in February, by Moshe Arens, Israel's Ambassador to Washington.

Arthit Kamleng, the Thai Army Chief, who recalled Parliament from

Shultz (right) with Reagan: Team-player.

a recess to pass necessary amendments so that the military's long-established role in politics could be upheld. A premature election has been called on April 18.

Arthur Koestler, the author of the masterpiece *Darkness At Noon* and many other books, died recently.

Bob Hawke: Leader of the Australian Labour Party, he defeated Malcolm Fraser, leader of the Liberal-Country Party coalition and the second-longest-serving Prime Minister in Australia, in the general elections held on March 5, to become the country's next PM.

David Lange, the new leader of New Zealand's opposition Labour Party, he replaced Bill Rowling in early February.

Edward Kennedy said in early December that he would not contest the 1984 presidential elections.

George Shultz, US President Ronald Reagan's team-playing Secretary of State, toured Europe for the first time as

eight-day religious trip to eight troubled Central American countries in the first week of March. The trip, nevertheless, assumed a lot of political overtones. Meanwhile, the investigations on the attempt to assassinate him two years ago, have been leading to Bulgaria and may even implicate the KGB.

Julius Jayewardene: Sri Lanka President, who held a referendum on December 22, 1982, to extend the term of the current Parliament by another six years to August 1989. Earlier, he had held an election on October 20 to renew his mandate.

Klaus Barbie, a wartime Gestapo chief in Lyons, who was extradited by the French from Bolivia on February 5. He will face charges for conducting mass executions in France during World War II.

Captain Lee Ung Pyong: The seventh North Korean Air Force pilot to defect to South Korea since shortly before the outbreak of the Korean war in 1950. On February 25, he flew south in his Chinese-built MiG 19, which was the second such aircraft to reach the South in four months. At a news conference, he revealed that North Korea is conducting bombing exercises in preparation for attacks aimed at destroying 30 to 40 per cent of the South's major cities, missile bases, key factories and ports during the initial phase of a new war.

Marty Feldman, the British comedy actor, died in Mexico City on December 2. Among his best known films are *Young Frankenstein*, *Silent Movie* and *The Last Remake Of Beau Geste*.

Miguel de la Madrid Hurtado became Mexico's 21st President since the 1910 Revolution, in early December.

Nikolai Podgorny, the Soviet rubber-stamp President from 1965 to 1977, died in January.

Philip Habib: Special envoy of the US President to the Middle East who has been entrusted with the task of finding a way to end the impasse in the peace negotiations in the Middle East.

President Suharto was re-elected for another five-year term as President of Indonesia, in March. Umar Wirahadikusumah became the Vice-President.

PLACES

Algiers: The 16th session of the Palestine National Council (the Palestinian Parliament in exile) met in Algiers on February 14. PLO leaders met before this at Aden on January 26. There was a considerable show of unity despite the cleavages in the PLO.

Berlin: A town in El Salvador, it was occupied by guerrillas for four days upto February 3. Although the town has

doubts about the ability of El Salvador's Defence Minister Gen Jose Guillermo Garcia. The Reagan Administration has recently shown eagerness to step up its military aid to El Salvador and this includes an increase of US "trainers" in the country.

Dhaka: Secular and Islamic fundamentalist student groups clashed on the Dhaka University campus on February 6, after a speech by Lt-Gen H.M. Ershad on January 4, in which he discussed the possibility of making Bangladesh an Islamic state. Nearly 200 were injured.

France: In the municipal elections of March 6 and 13, President Francois Mitterrand's socialist and communist supporters got an unpleasant rebuff from the French. There was a rightist comeback all over France.

Karachi was the scene of a violent showdown between Sunni and Shia Muslims on March 18. A number of people were killed and many injured.

Matagalpa: A city in Nicaragua, close to the capital, Managua. Anti-Sandinista guerrillas reached this city in March, leading to a fresh spate of accusation and counter-accusation on the part of Nicaragua, the US and Honduras.

Philippines: Over a hundred people died in fighting between communist and government forces in the country in this period. The centre of insurgency is the island of Mindanao. The communist New People's Army (NPA) has lately grown dramatically in size and also improved in organisation and tactics. At the end of January they briefly occupied the town

Suharto: Re-elected.

arsenal. The reason for the NPA's growing support was the repressive policies of the Marcos regime.

Senegal: A multi-party election was held on February 27, and although President Abdou Diouf was predictably re-elected, the good news is that the system allowed four candidates to stand against him, one of them getting 13 per cent of the votes.

Zimbabwe was in turmoil throughout this period. It began with a military sweep in the third week of January against anti-government guerrillas in Matabeleland. The basic cause was rivalry between the ruling ZANU (PF) Party and the opposition ZAPU. In early March, ZAPU leader Joshua Nkomo fled to London. But the troubles continue.

ISSUES

French colonialism: Although a socialist government is in power at home, the sun has not set on the remains of the French 'empire': New Caledonia, Reunion, Mayotte, French Polynesia, French Guiana, Guadeloupe, Martinique, Saint Pierre, Miquelon, French Southern and Antarctic territories, Wallis and Futuna. Before coming to power, the Socialists had treated the overseas colonies as a foreign-policy matter. Now, Mitterrand speaks of the overseas citizens as becoming even more French than in the past. However, the local inhabitants of some of the French colonies, like Melanesians of New Caledonia, are dissatisfied with French rule. Several small independence movements have been active in Guadeloupe as well.

Euromissiles: About three years ago NATO members signed an agreement to deploy 572 US Pershing II and Tomahawk cruise missiles in Western Europe as a counter to the Soviet arsenal of medium-range SS-20s. Barring a breakthrough in the slow-motion Geneva talks on European theatre nuclear forces, the American missiles are due to begin arriving on British, West German, Italian, Dutch and Belgium soils in the autumn of 1983. Public opinion in many of these countries, however, is against the establishment of nuclear-strike bases on their soil. There have been active protests in West Germany and Britain in the last few months. If under such pressures the NATO powers fail to meet the deadline, it will show that the Western powers are not capable of carrying out the most important collective decision they have made in many years. And this would be to the Soviets' advantage. Thus, the Soviets have been trying to woo the European nations by acting devilish. The US, too, has been desperately trying to get its arms-control

message across the Atlantic through task forces headed by persons like Vice-President George Bush and Peter Deley, the US Ambassador to Ireland.

International debt: Never have so many nations owed so many nations so much money with so little promise of repayment. The sum at stake: \$706 billion held by banks, governments and international financial institutions against a group of financially-troubled developing and East-bloc countries. A default at any point may trigger off far reaching political and economic repercussions everywhere. The banking system of the Western world is in danger. New York's Chemical Bank, for example, has \$1.4 billion on loan in Mexico and \$370 million to Argentina, a sum amounting to 92 per cent of its shareholder's equity. Among the biggest debtor countries are Brazil (\$87 billion), Mexico (\$80 billion), Argentina (\$43 billion), South Korea (\$36 billion) and Venezuela (\$28 billion). Among East-bloc states, Poland owes \$26 billion and the USSR \$23 billion. The crisis is potentially dangerous and efforts are being made by the IMF as well as the US to rescue the debtor nations. Reagan emphasised the financial aspect of international problems during his recent tour of selected Latin American and Caribbean countries. The fear is that a surge of defaults could turn the world recession into depression.

Racialism—British-style: The new British Nationality Act, passed on January 1, is racial. It has created three categories of citizenship: (1) full British citizens who have the right to live in the UK; (2) citizens of the remaining British dependent territories who have the right to live there, but not in Britain; and (3) British overseas citizens, who live elsewhere in places from which Britain has withdrawn its former imperial promises of protection. People in the last two categories may not live in, or even visit, Britain without conforming to strict and sometimes humiliating immigration rules. Almost all the people covered in the last two categories are blacks or Asians—the precise reason for their exclusion from Britain. Residents of British colonies are also treated differently on the basis of colour; while Chinese from Hong Kong have no right to enter Britain, Gibraltarians and Falklanders enjoy full citizenship rights. The Act also lays down that children born in Britain will no longer be automatically entitled to British citizenship and protection. Only children born to British citizens and to non-British people lawfully settled in Britain will get citizenship rights, while

children born to foreign students or transit workers will not.

European Monetary System (EMS): On March 21, the EMS was realised. According to the changes in the ECU central rates, the currencies which have gone up are: Deutsch Mark (5.5 per cent); Dutch Guilder (3.5 per cent); Danish Kroner (2.5 per cent); and Belgian Franc (1.5 per cent). The currencies which have gone down are: French Franc (—2.5 per cent); Italian Lira (—2.5 per cent); and Irish Punt (—3.5 per cent). Britain and Greece have never joined the EMS's currency grid, so their currencies were not affected. Prior to the agreement at one Big Ten's finance ministers' meeting in Brussels, the alliance between France and West Germany came close to cracking up. West Germany was concerned lest a big upvaluation of the D-mark would hurt German exports and thus push up German unemployment. The French finance minister, on the other hand, threatened to leave the EMS in the absence of an agreement, float their own currency and retreat behind national trade barriers. Britain's Chancellor of the Exchequer, Geoffrey Howe, acted as an honest broker and an agreement was arrived at. This is the seventh realignment since the EMS was established in 1979. France devalued its currency for the third time since Mitterrand took over.

Neo-protectionism: A deal was concluded on February 12 by EEC's Wilhelm Haferkamp and Viscount Etienne Davignon and Japan's Nakasone by which the Japanese renewed their "self-limitation" agreement not to sell more than 1.68 million cars a year to the American market and keep exports of video recorders and colour TV tubes to the EEC within specific limits. It appears that the world's three main trading powers, with the EEC in the lead, are bent on following a policy of neo-protectionism, although officials in Washington and Brussels still maintain that voluntary export restraints of the kind elicited from the Japanese are not protectionist since they are not expressly banned by GATT. According to many trade experts, about 30 per cent of world trade is now "managed"—i.e., subject to direct or indirect protectionism. The list of protected sectors in the EEC includes agriculture, steel, ship-building, textiles and clothing, mechanical watches, radio sets and electronic components.

Dissidence in China: Outside the mainstream of Chinese politics, there are pulls from the right as well as the left. Although revisionist Deng Xiaoping and Zhao Ziyang have now got rid of Mao-fixated leaders like Wu De, Wang Dong-

Pershing II missile.

xing and Hua Guofeng, Mao's ghost still hovers around the corridors of power. On the other hand, there is a small but growing number of people who call themselves the Chinese Revolutionary Party. They are violently anti-Maoist and regard the present so-called liberal regime to be no better than Mao's. What they want is a parliamentary multi-party democracy for China. Abroad, a dissident student movement spread from New York to Hong Kong. Its journal *China Spring* appeared first in New York in December. Concerned that the dissident movement could gain support on the mainland, Chinese authorities began to attack the *China Spring* movement in March.

OPEC crisis: There was a crisis in the OPEC this quarter and there was a chance that oil prices may crash into a free fall as crude prices began falling. First, the price of North Sea crude was reduced; Nigeria lowered its prices to compete with Western Europe. The Soviet Union too lowered its prices to Western customers. Finally, after much negotiation which threatened to break the OPEC, the benchmark price was reduced from \$34 to \$29 per barrel. If the global oil glut continues, the chances of the poorer of the oil-rich nations breaking ranks with the OPEC, will increase. And if the OPEC breaks up, economists fear

to think of the consequences for world economy. However, although OPEC countries are still producing more than the demand, the demand is expected to pick up later in the year.

Intermediate Range Nuclear Missiles: The US is trying to use the threat of stationing new missiles in Europe (Pershing II ballistic missiles and Tomahawk cruise missiles) as a bargaining chip to force the Soviets to discard the most powerful and modern of their intermediate-range missiles (333 SS-20s, 280 SS-4s and SS-5s) already in place. Negotiations to this effect are going on at Geneva, and the three types of missiles are under discussion there. The SS-20 is propelled by solid fuel, is mobile and has a range of up to 3,000 miles. It carries three 150-kiloton warheads, each with its programmed target. Two thirds of the SS-20s are stationed west of the Ural mountains, pointing westwards with an approximately 20-minute flight to West Germany. The Pershing II has a range of 1,000 miles and is also propelled by solid fuel. It is theoretically ten times as accurate as the SS-20. The Tomahawks, unlike the Pershing II and SS-20, which are ballistic missiles, are more like unmanned jet planes. It has remarkable mobility, accuracy and stealth but has a cruising speed of only 500 mph. While the Pershing IIs are destined for West Germany, the Tomahawks will go to Italy, West Germany, Britain, Belgium and the Netherlands.

A Law of the Sea (LOS) convention was signed by delegates from 117 countries in Jamaica in late December. The convention, if ratified as expected, will establish, among other things, a country's right to claim a limit of 12 nautical miles to its territorial waters; a 200-mile exclusive economic zone (EEZ); a 350-mile continental shelf as its territory, and the right for an archipelagic state (like Indonesia) to claim as its internal waters all the sea enclosed by a boundary drawn around the outermost islands of its grouping. While the LOS seems to provide an orderly method of establishing a nation's rights and responsibilities regarding its surrounding waters, the new pattern of control is superimposed on one of transnational resources and activities and may be the source of new disputes. For instance, Indonesia and Vietnam, separated by hundreds of miles of water, now have overlapping claims to the continental shelf area north of the Natuna Islands. Overlapping EEZ claims regarding fishing rights and oil-bearing seabed structures may also occur. Furthermore, the LOS has done little to solve current problems existing between nations.

Dense Pack Plan: In late November/early December, US President Ronald

Reagan urged the deployment of 100 huge new MX intercontinental ballistic missiles in a Dense Pack cluster near Cheyenne, Wyoming. The plan calls for the missiles to be implanted 1,800 feet apart along a 14-by-1½ mile strip. Their concrete-and-steel silos would be hardened to a degree never attained before. The rationale behind it is a fratricide theory: in case of a Soviet ICBM attack, the first group of Soviet warheads would knock out only some of the closely-packed MX missiles in their silos, but the explosion would destroy or disable those coming behind, which would be forced into close proximity because of the small target area of the Dense Pack site. The theory is not tested and has been the subject of much debate. And as things stand today, MX may never take off as Congress has withheld funding of missile deployment and production in the absence of an as yet practical and invulnerable basing mode.

The Balkans again: After World War II, the problem of the minorities living in the Balkans became a side issue. But recently, territorial disputes regarding "national contradictions" have re-emerged. Among the most bitter is a dispute between Hungary and Romania over Transylvania, a province in Romania with a large minority of Hungarians. There is also a dispute between Bulgaria and Yugoslavia regarding the nationality of the slav inhabitants of Macedonia, which is a republic of the Yugoslav federation. While Bulgaria accepts the present frontier, it insists that the inhabitants in question are Bulgarians and not "Macedonians". While Yugoslavia is an independent Communist country, Bulgaria is a close ally of the USSR. The Yugoslavs fear that one day the Soviet Union may allow Bulgaria to renew its old territorial claim on Macedonia as a prelude to a general Soviet-bloc onslaught on Yugoslavia. Another vulnerable spot is the province of Kosovo on the Albanian border, where a Yugoslav-Albanian minority lives. In 1981, they demanded that the province be upgraded to a republic. Although Albania has given only moral support so far, it may do more in future, especially if it is backed by a superpower.

Zero Option: President Reagan's proposal to the Soviet Union, under which NATO members would reverse their decision to deploy new nuclear weapons if the Soviets dismantled all 333 of their SS-20s everywhere in the USSR, including the Far East, plus the 280 aging SS-4 and SS-5 missiles. He unveiled the option in a live broadcast on November 18. It was a counter to Leonid Brezhnev's "peace campaign" and his call for a moratorium on nuclear weapons in Europe.

S.B.

FOCUS: AFGHANISTAN

(Continued from page 12)

Pakistan's willingness to participate in the Geneva tripartite talks with the Afghan Government and the special representative of the UN Secretary General paves the way for a negotiated settlement of the Afghan tangle. But it should be realised that no such solution can be found without all outside help to the Afghan rebels being stopped. In fact, Egypt's President Anwar Sadat himself disclosed, just before his assassination, that he channelised American arms to the rebels. Despite the protestations of Pakistan, it is a known fact that it acts as the base camp for all rebel activity and replenishment of arms. The rebels have indeed succeeded in giving the Russians a tough time and making their entrenchment a costly affair—economically, politically and militarily. Nevertheless, the new Soviet chief, Yuri Andropov, will never allow Afghanistan to be exposed to such subversion and threat to its sovereignty, whatever be the cost, lest Russia's own borders are made pregnable. Thus, cessation of all help to the rebels is a pre-requisite for a negotiated settlement. With strong credentials to back its efforts, India can work for a political solution of the Afghan crisis on these lines:

- Guarantee by all concerned parties to desist from arming Afghan rebels in their subversive activities;
- Concrete measures to be taken by Western countries to uphold and maintain the sovereignty and non-aligned status of Afghanistan;
- Complete non-interference in the internal affairs of Afghanistan by all the concerned parties;
- Letting the people of Afghanistan decide their future as well as choose their friends and foes.

Unless these conditions are created, no lasting solution can be found. Both the US and USSR can continue piling their nuclear arsenals, but unless they come to the negotiating table they cannot find a solution to their problems, much less handle the Afghan crisis. And surely India can chip in its own efforts, given the goodwill and opportunity to function in a positive way. ■

PRACTICE TESTS

In preparing these tests we have tried to visualise the questions you are likely to face in your actual exam. Great care has been taken to frame questions which are of the same standard as those you'll encounter in your exam.

Rating: Evaluate your performance on the basis of the following score-card:

| | | |
|-----------------------------|---|-----------|
| 100 questions in 60 minutes | — | Excellent |
| 60 questions in 60 minutes | — | Good |
| 50 questions in 60 minutes | — | Fair |
| 35 questions in 60 minutes | — | Poor |

Tips: 1. Do not waste time over questions you are not sure about. 2. Give the problems some thought before choosing the answers. 3. Read the directions carefully before answering the questions. 4. Do not try to guess the answer.

TEST OF REASONING

BY LT COL I. R. MANCHANDA, former Dy President, S. S. B.

FOR CIVIL SERVICES (Prelims) & PO Exams

This section forms an important part of the GENERAL STUDIES paper of the Civil Services (Prelims) exam and the TEST OF REASONING paper of the PO exam (SBI Associate Banks, Central Recruitment Board), both to be held this month.

Time: 35 minutes.

Scores: 1. Give yourself one mark for each correct answer. 2. Deduct one mark for each wrong answer. 3. Then rate your score as under:

| | | |
|-----------------------|-----------------------|------------------|
| Excellent . . . 35-38 | Very Good . . . 30-34 | Good . . . 25-29 |
| Fair . . . 20-24 | Poor . . . Below 20 | |

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Answers are given at the end of this supplement.

Directions: Questions 1 to 5 are based on the following:

| Party Position—Assembly Elections (Jan '83) | | | | | |
|---|--------|-----------|----------|--------|-----------|
| | Andhra | Karnataka | | Andhra | Karnataka |
| Total seats | 294* | 224* | | | |
| Congress (I) | 60 | 81 | BJP | 3 | 18 |
| Telugu Desam | 202 | --- | CPI | 4 | 3 |
| Janata | | | CPI (M) | 5 | 3 |
| (With Kranti Ranga) | --- | 95 | "Others" | 19 | 23 |

*One result in each of the Assembly Elections was countermanded.

- Madras and Karnataka were captured by the Congress (I).
- (a) 21
(b) 24
(c) 27
(d) 30
2. Based on the percentage of seats captured by the CPI, which of the following is true with respect to this party?
- (a) Its performance in Karnataka was better than in Andhra
(b) Its performance in Andhra was better than in Karnataka
(c) It performed equally well in both states
(d) None of the above
3. Approximately—per cent of the total seats won by the BJP in both the states were won by the Telugu Desam.
- (a) 109
(b) 460
(c) 662
(d) 962
4. In Karnataka, the Janata (with Kranti Ranga) secured approximately—per cent more seats than the Congress (I).
- (a) 12
(b) 17
(c) 22
(d) 27
5. Approximately—per cent of the seats won by the Telugu Desam were won by the other parties excluding "Others" in Andhra?
- (a) 24
(b) 36
(c) 48
(d) 60
6. If $93 \times 72 = 129$, $32 \times 4 = 54$, and $91 \times 11 = 102$, 25×10 equals
- (a) 27
(b) 57
(c) 71

| | | |

| 16 | (190) | 22 |
| 17 | (252) | 25 |

- (a) 136
(b) 176
(c) 216
(d) None of the above

8. Tilak was born 11 years before the house was constructed. Inder was born a year after the house was constructed. Ved was 4 years old when Inder was born. How old was Ved in 1978, if Tilak was 52 in 1973?

- (a) 45
(b) 46
(c) 48
(d) 49

Directions: In questions 9 to 13, some of the letters in the capitalised word are underlined. You are required to arrange these letters into a meaningful word and then select from amongst the lettered choices, the one which gives the first letter of the word so formed.

9. P A T T E L A

- (a) E
(b) L
(c) P
(d) T

10. B A R G A I N I N G

- (a) A
(b) N
(c) G
(d) I

11. R E F R I G E R A T I O N

- (a) E
(b) G
(c) R
(d) T

12. P E R S O N A L I T Y

- (a) L
(b) O
(c) R
(d) S

- (a) E
- (b) R
- (c) T
- (d) U

Directions: In questions 14 to 20, there are two premises followed by a conclusion. Without challenging the authenticity of the premises, state whether the conclusion drawn is valid or not.

14. (a) None of the soldiers present in the regiment today is unfit
(b) No soldier of the regiment is absent today
(c) Therefore, all soldiers of the regiment are fit
15. (a) Any two persons who contradict each other cannot both be lying
(b) Ram and Shyam have contradicted each other
(c) Therefore, both Ram and Shyam could not be lying
16. (a) If a man is innocent, he is comfortable under cross-examination
(b) If a man is clever, he is comfortable under cross-examination
(c) Therefore, if a man is clever, he is innocent
17. (a) If the teachers are men of high calibre, students will be creative
(b) If the teachers are paid well, men of high calibre will join the teaching profession
(c) Therefore, if the teachers are paid well, students will be more creative
18. (a) No great thinker is ever self-satisfied
(b) Rajinder is never self-satisfied
(c) Therefore, Rajinder is a great thinker
19. (a) No great man preaches

what he does not practice

- (b) Ramanand does not preach what he does not practice
 - (c) Therefore, Ramanand is a great man
20. (a) Only intelligent students are able to pass the National Talent Search Examination (NTSE)
(b) X is a very intelligent student
(c) Therefore, X will certainly pass the NTSE

Directions: In questions 21 to 30, select from amongst the lettered pairs of words the alternative that has the same relationship as the key word-pair in capital letters

21. GAMES: HYDROPHOBIA
(a) Tetanus: malaria
(b) Dengue: kala-azar
(c) Myopia: hypermetropia
(d) Cerebrum: fore brain
22. HUMERUS: FEMUR:
(a) Voice-box: larynx
(b) Trachea: windpipe
(c) Upper arm: thigh
(d) Peanuts: groundnuts
23. PITUITARY BRAIN:
(a) Thyroid: neck
(b) Endocrine: adrenalin
(c) Hormones: chemical
(d) Abdomen: belly
24. SCALPEL: GUN:
(a) Teacher: knowledge
(b) Carpenter: clerk
(c) Surgeon: soldier
(d) Refugee: immigrant
25. LACONIC: VERBOSE:
(a) Latent: hidden
(b) Intrepid: brave
(c) Lethargic: enervated
(d) Laudatory: defamatory
26. MOTIF: THEME:
(a) Mundane: spiritual
(b) Munificent: generous
(c) Nadir: zenith
(d) Enervating: invigorating
27. WINE: GRAPES:
(a) Liquor: intoxicant

- (d) Dry: wet
28. IRRITATION: RAGE::
 (a) Break: make
 (b) Permanent: evanescent
 (c) Shower: deluge
 (d) Doctor: exotic
29. TEAR: FRACTURE::
 (a) Relative: hostile
 (b) Small: big
 (c) Ligament: bone
 (d) Cloth: paper
30. SPIRITS: SORCERY::
 (a) Scholar: erudite
 (b) Learning: knowledge
 (c) Ghosts: necromancy
 (d) Spiritual: mundane

Directions: Questions 31 to 34 are based on the following: A man's energy output depends on the kind of physical activity in which he is engaged, on the size of his body and on the climate around him. Unless energy output, i.e., the work done by him, is adequately compensated for by energy input, i.e., food, a man shall not survive for long. When lying down, completely relaxed, comfortably warm, and at rest (but still awake), a man produces, every hour, about 1 calorie (cal) of heat per kg of body weight. In other words, the energy requirement of a man weighing 60 kg under these circumstances would be 1,440 cal per day. A table given below shows the approximate energy requirement per kg of body weight per hour (cal/kg/hr) under comfortably warm conditions:

| Activity | Approximate energy requirement (cal/kg/hr) |
|---------------------|--|
| At rest, lying down | 1.0 |
| Sitting upright | 1.4 |
| Standing upright | 1.6 |
| Slow walking | 2.0 |

Sleeping

0.9

Note: All questions are to be answered assuming that the climatic conditions are comfortably warm unless otherwise stated.

31. X's activities during the day are: sleeping 8 hours; moderate exercise 2 hours; slow walking 3 hours; sitting upright $4\frac{1}{2}$ hours; standing upright for the remaining hours. If X weighs 70 kg, what will be his energy requirement in cal?
- (a) 2,343
 (b) 2,443
 (c) 2,553
 (d) 2,653
32. X weighing 80 kg sleeps for 8 hours and sits upright for 16 hours. Had he slept for 16 hours and done moderate exercise for 8 hours, his energy requirement would have been approximately—per cent of his energy requirement in the first case.
- (a) 57
 (b) 150
 (c) 157
 (d) 167
33. The daily routine of two athletes is as under:

| | Severe exercise | Rest, lying down | Slow walking | Sleeping |
|----|-----------------|------------------|--------------|----------|
| X. | 4 hrs | 4 hrs | 8 hrs | 8 hrs |
| Y. | 6 hrs | 2 hrs | 6 hrs | 10 hrs |

If both the athletes weigh 60 kg each, approximately—per cent more or less would be the energy requirement of X than that of Y.

(a) 14 per cent less
 (b) 14 per cent more
 (c) 23 per cent less
 (d) 23 per cent more

...of the 100, there are five figures. Four of these are similar in some way and one is different. You are required to spot the odd-figure out.

Directions: In questions 37 and 38, you are required to select from amongst the lettered figures, the one which goes with those in the box on the left.

EDITOR'S NOTE

All possible care is taken to check the information given in this supplement. But we do not take responsibility for chance errors or omissions. Authoritative corrections will be gratefully received.

GENERAL KNOWLEDGE

Questions published in this section appeared in the General Knowledge paper of the Clerks' Grade Examination held in July 1982. These are based on the candidates' memory as they are not allowed to take their question papers out of the examination hall. Though we have compiled these questions as close to the original as possible, we take no responsibility for any discrepancies.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. Julius Nyerere is the President of
 - (a) Kenya
 - (b) Tanzania
 - (c) Zaire
 - (d) Zimbabwe
2. The growth of GNP in India in 1980-81 was — per cent
 - (a) Zero
 - (b) 3
 - (c) 5
 - (d) 5.5
3. Netaji Subhas Chandra Bose Park is in
 - (a) Assam
 - (b) Kerala
 - (c) Karnataka
 - (d) UP
4. Mahatma Gandhi Setu, the world's longest bridge, is on the river
 - (a) Brahmaputra
 - (b) Ganga
 - (c) Yamuna
 - (d) Narmada
5. Who delivered the keynote address at the UN Conference on New and Renewable Sources of Energy held at Moscow in 1982?
 - (a) Daniel Arap Moi
 - (b) Indira Gandhi
 - (c) Kurt Waldheim
 - (d) Pierre Trudeau
6. ——— is a gas-cooled nuclear power plant
 - (a) UP
 - (b) Rajasthan
 - (c) Karnataka
 - (d) Tamil Nadu
7. The Chairman of the Indian Space Research Organisation and the Space Commission is
 - (a) H.N. Sethna
 - (b) Satish Dhawan
 - (c) M.G.K. Menon
 - (d) None of the above
8. Jupiter has — known satellites.
 - (a) 10
 - (b) 12
 - (c) 14
 - (d) 15
9. Two new oil refineries are proposed to be set up at
 - (a) Karnal and Mangalore
 - (b) Sonapat and Calicut
 - (c) Bhatinda and Aihaphey
 - (d) Paradeep and Kandla
10. At ——— Steel Plant stainless steel is produced
 - (a) Bokaro
 - (b) Bhilai
 - (c) Durgapur
 - (d) Salem
11. ——— per cent of India's population lives below poverty line.
 - (a) 38
 - (b) 43
 - (c) 48
 - (d) 53

- declared 1902 as the
- (a) Women's Liberation Year
 - (b) Year of Removal of Leprosy
 - (c) Year of the Disabled
 - (d) Productivity Year
13. According to the 1981 census — has the highest literacy rate.
- (a) Tamil Nadu
 - (b) West Bengal
 - (c) Kerala
 - (d) Maharashtra
14. The Indus Valley people established commercial contacts with the
- (a) Egyptians
 - (b) Greeks
 - (c) Sumerians
 - (d) Mesopotamians
15. — was the great woman scholar of Rigvedic age.
- (a) Gargi
 - (b) Janaki
 - (c) Lakshmi
 - (d) Vaidehi
16. Sarnath, the famous Buddhist site near Varanasi, was the place where Buddha
- (a) Attained his enlightenment
 - (b) Attained his Mahaparnirvana
 - (c) Delivered his first sermon
 - (d) Was born
17. — was the celebrated Indian astronomer and mathematician who adorned the court of Vikramaditya.
- (a) Aryabhatta
 - (b) Banabhatta
 - (c) Shashanka
 - (d) Vagabhatta
18. Most of the Gupta sovereigns followed
- (a) Buddhism
 - (b) Jainism
 - (c) Hinduism
 - (d) Islam

- the
- (a) Cholas
 - (b) Pallavas
 - (c) Pandyas
 - (d) Rashtrakutas
20. The 1982 World Cup Soccer games will be held at
- (a) Barcelona
 - (b) Madrid
 - (c) Mexico City
 - (d) Munich
21. — was the first woman to climb Mount Everest.
- (a) Junko Tabei
 - (b) Phantong Phantog
 - (c) Takashi Osakhi
 - (d) Wanda Ruthkiewicz
22. — won the Rovers Cup (1981).
- (a) East Bengal
 - (b) Mafatlal
 - (c) Mohammedan Sporting
 - (d) Mohun Bagan
23. In the parliamentary form of government
- (a) The Executive is responsible to the Legislature
 - (b) The Executive is responsible to the Judiciary
 - (c) The Legislature is responsible to the Executive
 - (d) The Judiciary is responsible to the Legislature
24. In a federal state, the powers are divided between the
- (a) President and the Cabinet
 - (b) Executive and the Legislature
 - (c) Centre and the Units
 - (d) Two Houses of the Legislature

- (a) Directive Principles of State Policy
 - (b) Centre-State relations
 - (c) Fundamental duties
 - (d) Fundamental rights

- marxism.
 (a) Nation State
 (b) Separation of powers
 (c) Social contract
 (d) Class war
27. The Great Indian Bustard is found in
 (a) Gujarat
 (b) Maharashtra
 (c) Punjab
 (d) Rajasthan
28. The *People's Daily* is a well-known newspaper published in
 (a) China
 (b) France
 (c) Italy
 (d) Vietnam
29. The first recipient of the Jnanpith Award was
 (a) Firaq Gorakhpuri
 (b) G. Shankara Kurup
 (c) K.V. Putappa
 (d) Tara Shankar Bandopadhyaya
30. The — industry is the most power-oriented.
 (a) Aluminium
 (b) Cement
 (c) Cotton textiles
 (d) Ship-building
31. The largest producer of iron-ore in India is
 (a) Bihar
 (b) Goa
 (c) Orissa
 (d) Madhya Pradesh
32. — has the largest area under tea cultivation.
 (a) Burma
 (b) China
 (c) India
 (d) Sri Lanka
33. A day of 24 hours occurs on June 21 every year in the
 (a) Arctic Circle
 (b) Antarctic Circle
 (c) Tropic of Cancer
 (d) Tropic of Capricorn
34. — is the most predominant gas in the atmosphere.
 (b) Carbon dioxide
 (c) Nitrogen
 (d) Oxygen
35. The purest form of water is
 (a) Rain water
 (b) Tap water
 (c) Spring water
 (d) Sea water
36. Atomic weight of an element is equal to
 (a) Electrons and neutrons in one atom of the element
 (b) Electrons and protons in one atom of the element
 (c) Protons only in one atom of the element
 (d) Protons, neutrons and electrons in one atom of the element
37. Iron obtained from the blast furnace is known as
 (a) Cast iron
 (b) Pig iron
 (c) Steel
 (d) Wrought iron
38. The first entirely synthetic fibre was
 (a) Polythene
 (b) Nylon
 (c) Rayon
 (d) Terylene
39. — is most elastic.
 (a) Glass
 (b) Plasticine
 (c) Rubber
 (d) Steel
40. When two bodies vibrate sympathetically the increased loudness produced is called
 (a) Beat
 (b) Echo
 (c) Resonance
 (d) Sonic boom
41. — wrote the National Song *Bande Matram*.
 (a) Bankim Chandra Chatterjee
 (b) Rabindranath Tagore
 (c) Sarat Chandra Chatterjee
 (d) Subramaniam Bharati

- ... the Muslim League was founded by
- (a) Shaikat Ali
 - (b) Liaquat Ali Khan
 - (c) M.A. Jinnah
 - (d) Nawab Salimullah Khan
43. — was the first woman President of the Indian National Congress.
- (a) Dr Annie Besant
 - (b) Kasturba Gandhi
 - (c) Kamala Devi Chattopadhyaya
 - (d) Sarojini Naidu
44. During the three decades of planned development in India, which one of the following objectives has been achieved?
- (a) Eradication of poverty
 - (b) Reduction in the concentration of income and wealth
 - (c) Self-sufficiency in food production
 - (d) Removal of unemployment
45. The highest priority was accorded to the development of agriculture in the
- (a) First Five Year Plan
 - (b) Third Five Year Plan
 - (c) Fifth Five Year Plan
 - (d) Annual Plans for 1966-67 to 1968-69
46. Agricultural income in India is taxed by the
- (a) Union government
 - (b) State governments
 - (c) Land development corporations
 - (d) Municipal corporations
47. The largest food crop produced in India is
- (a) Wheat
 - (b) Maize
 - (c) Millets
 - (d) Rice
48. — is the Chairman of the Indian Law Commission.
- (a) K.K. Mathew
 - (b) Nasirullah Beg
 - (c) P.N. Bhagwati
 - (d) None of the above
49. The world's largest airport is in
- (a) Jeddah (Saudi Arabia)
 - (b) Moscow (USSR)
 - (c) New York (US)
 - (d) Paris (France)
50. F-16, which is being acquired by Pakistan from the US, is
- (a) A missile with nuclear head which can be fired from land, sea and air
 - (b) An amphibious tank with armour which cannot be pierced
 - (c) The latest type of hunter submarine
 - (d) A sophisticated fighter-bomber aircraft
51. The largest thorium resources are reported to be in
- (a) India
 - (b) The US
 - (c) The Soviet Union
 - (d) West Germany
52. The main objective of the Social Security Certificate Scheme introduced in the Union Budget of 1982-83 is to
- (a) Collect funds for financing social security benefit payment
 - (b) Raise funds to pay unemployment relief
 - (c) Raise funds for financing developmental expenditure
 - (d) Raise additional resources so as to reduce budgetary deficits
53. Vikram Sarabhai Space Centre is located in
- (a) Bangalore
 - (b) Sriharikota
 - (c) Trivandrum
 - (d) Trombay
54. 'Bully' is a term used in
- (a) Golf
 - (b) Hockey
 - (c) Polo
 - (d) Tennis
55. — won the 'Uber Cup' (1981).
- (a) Denmark

- (b) Indonesia
(c) Japan
(d) Malaysia
56. — is the national sport of Australia.
(a) Cricket
(b) Football
(c) Hockey
(d) Tennis
57. UN Day is observed annually on
(a) June 6
(b) October 24
(c) October 30
(d) November 14
58. The UN Charter was signed on June 26, 1945, in
(a) Dumbarton Oaks
(b) California
(c) Geneva
(d) San Francisco
59. The extent of the empire under the Muslim sultans of Delhi was the greatest during the reign of
(a) Balban
(b) Ala-ud-Din Khilji
(c) Iltutmish
(d) Mohammad-bin-Tughlaq
60. Babar was invited to invade India by
(a) Daulat Khan Lodi
(b) Ibrahim Lodi
(c) Mohammad Lodi
(d) Sikandar Lodi
61. The only prominent Hindu who accepted the Din-i-Ilahi of Akbar was Raja
(a) Birbal
(b) Bhagwan Das
(c) Todarmal
(d) Man Singh
62. Alberuni came to India in the time of
(a) Mohammad Ghorī
(b) Mahmud Ghaznavi
(c) Ala-ud-Din Khilji
(d) Qutab-ud-Din Aibak
63. Mughal painting reached the highest stage of development during the reign of
(a) Akbar
(b) Aurangzeb
(c) Jehangir
(d) Shahjehan
64. Qutab Shahi dynasty ruled in
(a) Bijapur
(b) Ahmadnagar
(c) Berar
(d) Golconda
65. Aurangzeb's grave is at
(a) Ajmer
(b) Daulatabad
(c) Nizamuddin (Delhi)
(d) Sikandra (near Agra)
66. The master craftsmen who built Taj Mahal came mainly from
(a) China
(b) Egypt
(c) Greece
(d) Persia
67. M.F. Hussain is a famous
(a) Journalist
(b) Painter
(c) Musician
(d) Poet
68. The author of *Panchatantra* is
(a) Bharat Muni
(b) Bhavabhuti
(c) Jai Dev
(d) Vishnu Sharma
69. Kaka Saheb Kalelkar was well known as a
(a) Singer of classical music
(b) Painter
(c) Militant revolutionary
(d) Devoted disciple of Mahatma Gandhi and dedicated social worker
70. Mohini Attam is a classical dance style which originated in
(a) Andhra Pradesh
(b) Kerala
(c) Manipur
(d) Orissa
71. Which of the following ragas in Hindustani music is related to the rainy season?
(a) *Behag*
(b) *Bhairavi*
(c) *Jai-Jaiwanti*
(d) *Malhar*

76. Which of the following statements holds good in respect of the Rajya Sabha?

- (a) One-third of its members retire every three years
- (b) Two-thirds of its members retire after every three years
- (c) Two-thirds of its members retire after every two years
- (d) One-third of its members retire after every two years

73. — is a Union territory.

- (a) Himachal Pradesh
- (b) Mizoram
- (c) Nagaland
- (d) Sikkim

74. — has a Vidhan Parishad

- (a) Andhra Pradesh
- (b) Gujarat
- (c) Haryana
- (d) Kerala

75. Which of the following qualifications are essential for a candidate seeking election as Vice-President of India?

- (a) He must be a graduate
- (b) He must own a house in any part of India
- (c) He must be eligible for election as a member of the Rajya Sabha
- (d) He must have served as a governor in at least one state

76. A Welfare State does not care to promote

- (a) Public parks
- (b) Church
- (c) Schools
- (d) Hospitals

77. — regards the State as an unnecessary evil

- (a) Collectivism
- (b) Individualism
- (c) Anarchism
- (d) Utilitarianism

78. Asia's largest alumina complex will be located at Damanjoti near Jeypore in

- (a) Andhra Pradesh
- (b) Rajasthan

(c) Orissa

(d) Madhya Pradesh

79. During equinoxes all places have equal

- (a) Days and nights
- (b) Temperature
- (c) Sunshine
- (d) Atmospheric pressure

80. In — earthquakes are common

- (a) Australia
- (b) Eastern Asia
- (c) Germany
- (d) The US

81. The earth's crust is made up of

- (a) Liquids
- (b) Gases
- (c) Metals
- (d) Rocks

82. The world's top sugar producer is

- (a) Cuba
- (b) Indonesia
- (c) Mexico
- (d) West Indies

83. Alcoholic drinks contain alcohol

- (a) Ethyl
- (b) Methyl
- (c) Propyl
- (d) Butyl

84. A sodium salt of a fatty acid obtained either from plants or animals, is known as

- (a) An alcohol
- (b) An ester
- (c) An oxide
- (d) A soap

85. Conversion of water into steam is a — change.

- (a) Biochemical
- (b) Chemical
- (c) Physical
- (d) Biological

86. Colour blindness is

- (a) A defect of vision
- (b) A defect of hearing
- (c) A defect of taste
- (d) A defect of smell

87. Albert Einstein is known for

- research work in
- (a) General theory of relativity
 - (b) Photoelectric effect and mathematical physics
 - (c) Mass-energy relation
 - (d) Special theory of relativity
88. A piece of paper and a cricket ball are dropped simultaneously from the same point. They will strike the ground simultaneously if they
- (a) Have the same weight
 - (b) Have the same mass
 - (c) Have the same density
 - (d) Are in vacuum
89. —contain(s) maximum energy.
- (a) Fats
 - (b) Proteins
 - (c) Sugar
 - (d) Vitamins
90. The number of heart beats per minute in an average adult is
- (a) 42
 - (b) 72
 - (c) 100
 - (d) 120
91. —is the largest organ in an adult.
- (a) Heart
 - (b) Kidney
 - (c) Liver
 - (d) Spleen
92. —do not suffer during inflation.
- (a) Debtors
 - (b) Creditors
 - (c) Persons with fixed income
 - (d) Lawyers
93. Which of the following means of financing developmental expenditure by the government would be most inflationary?
- (a) Borrowing from the public
 - (b) Borrowing from the Reserve Bank of India
 - (c) Increased taxation of income and wealth
 - (d) Taxing commodities and services
94. —are/is not a credit instrument.
- (a) Bonds issued by
 - (b) Shares issued by private-sector companies
 - (c) Bank drafts
 - (d) Banker's acceptance
95. The purchasing power of money declines most rapidly during a period of
- (a) Depression
 - (b) High production
 - (c) Recession
 - (d) Galloping inflation
96. During India's freedom struggle, Bal Gangadhar Tilak and Bipin Chandra Pal advocated
- (a) Conciliation
 - (b) Cooperation
 - (c) Moderation
 - (d) Extremism
97. Bardoli Satyagraha is associated with
- (a) Rajendra Prasad
 - (b) Acharya Vinoba Bhave
 - (c) Sardar Vallabhbhai Patel
 - (d) Mahatma Gandhi
98. —Movement was started by the Indian National Congress in 1942 as a part of the independence struggle.
- (a) Home-rule
 - (b) Civil Disobedience
 - (c) Swadeshi
 - (d) Quit India
99. Gandhi's economic philosophy was that we can find happiness by
- (a) Reducing our wants to the minimum
 - (b) Destroying machines
 - (c) Accepting poverty as the result of our 'Karma'
 - (d) Increasing the production of wealth to the maximum
100. —is the present World Bank President.
- (a) Alden Winship Clausen
 - (b) Roberto Eduardo Villoa
 - (c) Robert McNamara
 - (d) Sigvard Eklund
101. UN Secretary-General Javier Perez de Cuellar is a

- (a) Bolivian
(b) Brazilian
(c) Mexican
(d) Peruvian
102. — is not a member of ASEAN.
(a) Kampuchea
(b) Indonesia
(c) Singapore
(d) Thailand
103. In — India's second newsprint factory has started production.
(a) Assam
(b) Karnataka
(c) Madhya Pradesh
(d) West Bengal
104. UN headquarters are located in
(a) Bonn
(b) Geneva
(c) New York
(d) Tokyo
105. The UN General Assembly has proclaimed 1983 as the
(a) World Productivity Year
(b) Year of the Child
(c) World Literary Year
(d) World Communication Year
106. — is not a subsidiary agency of the UN.
(a) IAEA
(b) IACO
(c) IRC
(d) WHO
107. — is the most irrigated state in India.
(a) Bihar
(b) Haryana
(c) Punjab
(d) UP
108. — energy is the largest alternative energy resource.
(a) Atomic
(b) Geothermal
(c) Tidal
(d) Solar
109. The world's largest wheat producer is
(a) China
(b) India
(c) The US
(d) The USSR
110. — receives the highest rainfall during winter in India.
(a) Andhra Pradesh
(b) Haryana
(c) Punjab
(d) Tamil Nadu
111. An isotherm is a line joining places having equal
(a) Air pressure
(b) Humidity
(c) Rainfall
(d) Temperature
112. The Ghadar Party, which carried anti-British revolutionary activities abroad, was the work of the Sikh settlers in
(a) Malaya
(b) Germany
(c) England
(d) The US
113. — was concerned with the firing in Jallianwala Bagh on April 13, 1919.
(a) Michael O'Dwyer
(b) General Dyer
(c) Captain Doveton
(d) Col O'Brien
114. At the time of the annexation of Oudh by Lord Dalhousie, its Nawab was
(a) Asafuddaulah
(b) Amjad Ali Shah 'Hazarat'
(c) Muhammad Ali
(d) Wajid Ali
115. The fifth Sikh Guru, Arjan Dev, was sentenced to death by
(a) Bahadurshah II
(b) Aurangzeb
(c) Jehangir
(d) Shahjehan
116. Burma was separated from Bengal in
(a) 1903
(b) 1905
(c) 1919
(d) 1935
117. A person, who is born to

- be eligible for contesting for membership of the Legislative Assembly of his state in
 (a) 1988
 (b) 1991

 (a) Aristotle
 (b) Karl Marx
 (c) George Washington
 (d) Abraham Lincoln
122. Organs of reproduction of a plant are
 (a) Buds
 (b) Flowers
 (c) Fruits
 (d) Seeds
123. The number of chromosome
 (a) 20
 (b) 22
 (c) 23
 (d) 24
124. — is part of man's digestive system
 (a) Pituitary
 (b) Prostate
 (c) Pancreas
 (d) Platelets
125. Goitre is caused by the enlargement of — glands.
 (a) Adrenal
 (b) Parathyroid
 (c) Pituitary
 (d) Thyroid
126. Edible part of the ginger plant is obtained from
 (a) Fruit
 (b) Leaf
 (c) Stem
 (d) Root
127. Haemophilia is a genetic disorder which causes
 (a) Blindness
 (b) Loss of haemoglobin
 (c) Rheumatism
 (d) Non-clotting of blood
128. Universal blood donors belong to blood group
 (a) A
 (b) B
 (c) O
 (d) AB
129. During the day, plants give out
 (a) Carbon dioxide
 (b) Ammonia
 (c) Oxygen
 (d) Nitrogen
130. In India, the 'Food for Work' programme was initiated to
 (a) Increase food production
 (b) Increase employment opportunities

- (d) Been reduced from Rs 4,000 to Rs 3,000

142. — Finance Commissions have so far been appointed by the government.

- (a) Six
(b) Seven
(c) Eight
(d) Nine
143. — is the present Chief of Naval Staff.
(a) K.V. Krishna Rao
(b) R.L. Pereira
(c) O.S. Dawson
(d) None of the above
144. The Kailash Temple at Ellora was built by
(a) Guptas
(b) Rashtrakutas
(c) Pallavas
(d) Satvahanas
145. The Tamil *Ramayana* was the work of
(a) Andal
(b) Jayangondar
(c) Kambar
(d) Ramanujam
146. — is the oldest monument:
(a) Ajanta Caves
(b) Khajuraho
(c) Taj Mahal
(d) Qutub Minar
147. Tulsidas lived during —'s reign.
(a) Akbar
(b) Aurangzeb
(c) Babar
(d) Shahjehan
148. The foremost saint-poet of *Brajhasha* is
(a) Gyaneshwar
(b) Surdas
(c) Tulsidas
(d) Vidyapati
149. — is known as the 'father of modern painting in India'.
(a) Baroda Ukil
(b) Ravi Verma
(c) Nandal Bose
(d) Satish Gujral
150. — was not an astronomer.
(a) Aryabhata
(b) Bhaskaracharya
(c) Banabhatta
(d) Varahamihira

THE MISSING ONE

What is the missing number?

Answer

(The series consists of prime numbers which cannot be divided by any number other than themselves and one.)

From *IMPROVE YOUR OWN I.Q.* by Glenn Wilson

BSRB (PO) Exam Feb '83

GENERAL AWARENESS

Questions published in this section appeared in the GENERAL AWARENESS paper of the PO exam of the Banking Service Recruitment Board, Delhi, Northern and Western regions (Feb '83). These are based on the candidates' memory as they are not allowed to take their question papers out of the examination hall. We have compiled these questions as close to the original as possible. Hence, we take no responsibility for any discrepancies.

DIRECTIONS: For each of the following questions, tick mark the choice that best answers the question. Do this before looking at the answers given at the end of this supplement.

1. The Government of India had recently called off the visit of an official delegation to
 - (a) Israel
 - (b) China
 - (c) Bangladesh
 - (d) Pakistan
 - (e) The USSR
2. Which is the smallest Indian state in terms of area?
 - (a) Tripura
 - (b) Nagaland
 - (c) Sikkim
 - (d) Kerala
 - (e) None of the above
3. The Bombay textile strike was organised by the
 - (a) INTUC
 - (b) AITUC
 - (c) CITU
 - (d) MGKU
 - (e) None of the above
4. Who is the founder of Telugu Desam?
 - (a) N.T. Rama Rao
 - (b) M.G. Ramachandran
 - (c) Raj Kumar
 - (d) K. Karunakaran
 - (e) None of the above
5. Vrindaban is associated with
 - (a) Ram
 - (b) Krishna
 - (c) Shiva
 - (d) Vishnu
 - (e) None of the above
6. The official timers to the IX Asiad were
 - (a) HMT
 - (b) Philips
 - (c) Omega
 - (d) Seiko
 - (e) None of the above
7. The Seventh Non-aligned Summit will begin on March 7, 1983, in
 - (a) New Delhi
 - (b) Baghdad
 - (c) Cairo
 - (d) Belgrade
 - (e) None of the above
8. What is Jarvik-7?
 - (a) A new variety of wheat
 - (b) An anti-tank missile
 - (c) A type of bomb
 - (d) A super-fast train
 - (e) An artificial heart
9. Who is the President of the Shiromani Akali Dal?
 - (a) P.S. Badal
 - (b) S.S. Barnala
 - (c) G.S. Tohra
 - (d) J.S. Talwandi
 - (e) None of the above
10. What is the new name of MX missile?
 - (a) Cruise

- (b) Sam
(c) Pant
(d) USM
(e) None of the above
11. Who is the chief of the Soviet Communist Party?
(a) Y. Andropov
(b) D. Ustinov
(c) A.P. Kirilenko
(d) N.I. Ryzhkov
(e) None of the above
12. Who called for a 'total revolution' ?
(a) Indira Gandhi
(b) Jawaharlal Nehru
(c) Jaiprakash Narayan
(d) Lal Bahadur Shastri
(e) None of the above
13. Find the odd one out:
(a) Chandigarh
(b) Tripura
(c) New Delhi
(d) Mizoram
(e) Pondicherry
14. The Nobel Prize for Literature, 1982, went to a/an——author.
(a) German
(b) French
(c) Colombian
(d) American
(e) None of the above
15. The cooperative year ends in
(a) January
(b) March
(c) April
(d) December
(e) None of the above
16. The Esanda Hockey Tournament was held in
(a) Karachi
(b) Bombay
(c) Melbourne
(d) Barcelona
(e) None of the above
17. Who got the Norman Borlaug Award recently?
(a) Dr M.S. Swaminathan
(b) Dr Hari Krishna Jain
(c) Dr R. Mahajan
(d) Dr H.R. Raheja
(e) None of the above
18. What was the emblem of the IX Asiad?
(a) Appu
(b) Sundial of Jantar Mantar
(c) Lotus
(d) Peacock
(e) None of the above
19. Who was the President of the Asian Games Federation?
(a) Raja Bhalindra Singh
(b) Buta Singh
(c) Rajiv Gandhi
(d) Indira Gandhi
(e) None of the above
20. Who was the winner of the 1982 Ramon Magsaysay Award?
(a) Maheshwar Dayal
(b) G.R. Taban
(c) Mohammad Ali Siddiqui
(d) S.M. Pottekkatt
(e) Arun Shourie
21. Which state organises the Tansen Festival of Music?
(a) UP
(b) Bihar
(c) MP
(d) Gujarat
(e) None of the above
22. Recently,——died in Beijing.
(a) P. Dasgupta
(b) C.D. Deshmukh
(c) Baburao Patel
(d) Devraj Urs
(e) None of the above
23. Who is the Chief Election Commissioner of India?
(a) M.S. Swaminathan
(b) R.K. Trivedi
(c) Manmohan Singh

(e) None of the above
24. Panini was a
(a) Dancer
(b) Scientist
(c) Mathematician
(d) Politician
(e) None of the above
25. The death centenary of—— falls on March 14, 1983.
(a) Karl Marx

- (c) Lejpat Rai
(d) Bal Gangadhar Tilak
(e) None of the above
26. Kampuchea's old name was
(a) Saigon
(b) Cambodia
(c) Surinam
(d) Malvinas
(e) None of the above
27. India won——medals in the IX Asiad.
(a) 47
(b) 51
(c) 57
(d) 61
(e) None of the above
28. Who is the winner of the 1981 Jnanpith Award?
(a) Amrita Pritam
(b) S.M. Pottekkatt
(c) Mahadevi Verma
(d) R.K. Narayan
(e) None of the above
29. Who is the author of *Future Shock*?
(a) John Dean
(b) Norman Mailer
(c) Alvin Toffler
(d) Saul Bellow
(e) None of the above
30. Where is the Sea of Tranquility?
(a) Mars
(b) Venus
(c) Moon
(d) Pluto
(e) Saturn
31. Who is the Chairman of the Railway Commission Board?
(a) L.K. Jha
(b) A.B.A. Ghan, Khan Choudhary
(c) Vasant Sathe
(d) L.K. Tripathi
(e) None of the above
32. Who played the title role in *Gandhi*?
(a) Richard Attenborough
(b) Ben Kingsley
(c) Dustin Hoffman
(d) Richard Burton
(e) None of the above
33. J.R.D. Tata piloted a——to Karachi recently
(a) Leopard Moth
(b) Pushpak
(c) Boeing
(d) MiG
(e) None of the above
34. Find the odd one out
(a) Baraun
(b) Ujan
(c) Mathura
(d) Kayab
(e) Bongaigaon
35. Which country will supply fuel for Tarapur?
(a) The US
(b) The USSR
(c) The UK
(d) Japan
(e) France
36. Who is the Asian to score 100 centuries in first-class cricket matches?
(a) Ranjit Singh
(b) Sunil Gavaskar
(c) Zaheer Abbas
(d) Imran Khan
(e) None of the above

1

- (c) speed
(d) strength

- Directions:** In questions 7 to 13, some of the sentences have errors, others have none. Each is divided into three parts marked (a), (b) and (c). Tick mark the part which has an error. If there is no error mark (d).

8. This carpenter is the most skilled/of all the other carpenters/in our workshop. No error.

- 54 Career & Competition Times June 1983**

tute. No error.

10. On arriving at the airport/my
friend's father was there/to

greet us. No error.

11. This is the boy whom/I think
had broken/the window-pane
with his ball. No error.

12. I warned him that/there may be
danger/from his employees.

No error.

13. The houses in our street/are
more beautiful/than on the
main road. No error.

Directions: Read the following passage carefully and answer the questions that follow.

Many critics of our (i.e., British) public schools complain against games being made compulsory. But every non-athlete student has not some profitable hobby or interest; and model engineering or stamps collecting can be no substitute for exercise in the fresh air in the company of other boys.

But then the hero-worshipping of athletes is worse. It creates a false image of the athlete in his own eyes, an image which he will have to discard for the true picture of himself as seen by the world outside when he goes out into the wide world to earn his living.

The community must lay emphasis on the essential triviality of talents that are merely physical,

unless we are willing that our ideals should be those of the jungle.

But there are many for whom sport is a kind of religion. To them the sporting spirit is the finest attitude with which to face life, since its possessor is very conscious of his obligations to the community.

Yet the said truth is that "religion" of sport fails to produce the sportsman. Games have practically no effect on character, for a selfish boy will play his games selfishly in spite of all, while a chivalrous boy will be chivalrous in his games. Games afford an opportunity for showing the spirit within; they are a vehicle for virtue or for vice; not for making a bad man good.

If we support the system of compulsory games, let it be for the right reasons.

14. The reason why the author does not accept the argument against sports being compulsory in the public schools is

- (a) that it is not proper to force anyone to play games
- (b) that some hobbies are far better than sports
- (c) that it is good for school-boys to be out playing in the fresh air with other boys
- (d) that every hobby is not profitable

15. What does the author think about idolising the school athlete?

- (a) Idolising schoolboy athletes is good because hero-worshipping is good.
- (b) Idolising the athlete is good for the athlete himself.
- (c) It is not good because it gives him a false image of himself.
- (d) It is good because it helps

him to get a good job.
16. How would you characterise the author's attitude to hero-worshipping the school athlete?

- (a) It is wrong because it makes the athlete very vain.
- (b) His attitude is very clear-headed and realistic.
- (c) It is wrong because it applies to all athletes, including the good ones.
- (d) It is good because hero-worshipping is bad.

17. There are many people who support sport as a kind of religion. This means that they believe

- (a) that sport brings us nearer to God
- (b) that sport makes the sportsmen keenly aware of their duties to their fellow citizens
- (c) that sport enables a man to come face to face with life
- (d) that sport brings out the best in a man including the qualities of leadership

18. "...unless we are willing that our ideals should be those of the jungle." This means that

- (a) we accept that might is right and worship it as such
- (b) we believe that the survival of the fittest is the cardinal moral principle
- (c) we believe that the weakest and the smallest deserve to be killed
- (d) in effect we believe in no ideals because the jungle has no ideals

19. "If we support... compulsory games let it be for the right reasons." The right reasons are:

- (a) They make good men out of bad men

(b) They teach us our duty to the community.

(c) They afford opportunities for exercise in the fresh air and also serve to reveal character.

(d) They help a young man to get on in life.

Directions: In questions 20 to 30, four words have been given in each set and just one of them is wrongly spelt. Tick the mis-spelt word in each set.

20. (a) speech

(b) preech

(c) teach

(d) beach

21. (a) musical

(b) chemical

(c) physical

(d) vehical

22. (a) discussion

(b) admission

(c) omission

(d) ocaasion

23. (a) interfere

(b) interest

(c) interrupt

(d) interrogate

24. (a) brief

(b) belief

(c) reciept

(d) relief

25. (a) grammer

(b) hammer

(c) stammer

(d) clamour

26. (a) enjoy

(b) reject

(c) suggest

(d) juyment

27. (a) lawful

(b) skilful

(c) willful

(d) handful

28. (a) pier

(b) mere

(c) career

(d) cricketeer

29. (a) siege

- (b) peice
- (c) seize
- (d) receive
- 30. (a) irresistable
- (b) irritable
- (c) notable
- (d) debatable

Directions: In each of the questions 31 to 37 there are three masculine nouns. Opposite each are given the corresponding feminine nouns. Some of the feminine forms are incorrect. Indicate the error. If there is no error mark (d).

- 31. (a) master—mistress
- (b) sir—madam
- (c) earl—countess
- (d) all correct
- 32. (a) director—directress
- (b) porter—portress
- (c) songster—songstress
- (d) all correct
- 33. (a) dog—bitch
- (b) horse—mare
- (c) drake—drone
- (d) all correct
- 34. (a) hero—heroine
- (b) fox—foxen
- (c) beau—belle
- (d) all correct
- 35. (a) launderer—laundress
- (b) prosecutor—prosecutress
- (c) manager—manageress
- (d) all correct
- 36. (a) ram—ewe
- (b) stag—hind
- (c) tiger—tigress
- (d) all correct
- 37. (a) washerman — washer-woman
- (b) dairy-man—dairy-maid
- (c) footman—footwoman
- (d) all correct

Directions: In questions 38 to 45, there is a sentence at the beginning of each question which has the infinitive form of one or more verbs given in brackets. Four alternative tense forms of the verbs given in

the brackets are suggested. Only one set of the suggested forms is correct. Tick the right alternative.

- 38. While we (get) ready for school, our lazy cousins (be) still in bed.
 - (a) are getting; are
 - (b) get; are being
 - (c) have been getting; have been
 - (d) will be getting; will be
- 39. This year when the long vacation (come), I (go) to learn swimming.
 - (a) is coming; am going
 - (b) will come; shall go
 - (c) comes; am going
 - (d) comes; shall go
- 40. When you (send) out the invitations to the wedding, please (not forget) to send me one.
 - (a) will send; not to forget
 - (b) shall send; don't forget
 - (c) will be sending; will not forget
 - (d) send; don't forget
- 41. I (like swim); but I (not like swim) when it is cold
 - (a) like swimming; don't swimming
 - (b) like to swim; don't like swimming
 - (c) like swimming; don't like to swim
 - (d) like swimming; don't like to be swimming
- 42. I must not forget (ring) him up or else he will start (think) that I don't like him.
 - (a) ringing; thinking
 - (b) to ring; thinking
 - (c) ringing; to think
 - (d) to ring; to think
- 43. I (always feel) that he (be) not trustworthy.
 - (a) have always felt; is
 - (b) always feel; will have been
 - (c) am always feeling; would be
 - (d) always felt; would have been

44. If you (tell) me what you wanted I (get) it for you.
 (a) told; will get
 (b) had told me; will be getting
 (c) had told me; would have got
 (d) will tell; would have got
- 1 45. If it (not rain) tomorrow, I shall go out in the car I just (buy).
 (a) does not rain; have just bought
 (b) will not rain; bought
 (c) is not raining; have just bought
 (d) will not be raining; am just buying
- 1

Directions: In each of the questions 46 to 53 there is a word or phrase given in the beginning. There are four alternative sentences in each question, suggesting different positions for the given word or phrases. Tick the sentence in which the word/phrase is correctly placed.

- 1 46. AGO
 (a) Two days ago I saw him with his wife at the railway station.
 (b) I saw him two days ago with his wife at the railway station.
 (c) I saw him with his wife two days ago at the railway station.
 (d) I saw him with his wife at the railway station two days ago.
47. HARDLY
 (a) Hardly had he entered the house when the women started weeping loudly.
 (b) He had hardly entered the house when the women started weeping loudly.
 (c) Hardly he entered the house when the women started weeping loudly.
 (d) He had entered the house hardly when the women started weeping loudly.

48. ONLY
 (a) You can only get in if you have a ticket.
 (b) You can get in if you have only a ticket.
 (c) You can get in only if you have a ticket.
 (d) You can get in if you only have a ticket.

- (b) obedient
- (c) cheerful
- (d) intelligent

62. Near the market the road becomes very *wide*.

- (a) spacious
- (b) crowded
- (c) dingy
- (d) narrow

63. He is one of the *clever* boys in the class.

- (a) foolish
- (b) average
- (c) senseless
- (d) backward

64. Ramu's uncle seems to be quite *drunk* today.

- (a) very jolly
- (b) thoughtful
- (c) sad
- (d) sober

- (a) innocent
(b) pure
(c) angelic
(d) virtuous
66. In that situation his action was perfectly *legal*.
(a) law abiding
(b) lawless
(c) illegal
(d) criminal
67. You can rely on him; he is very *straight*.
(a) crooked
(b) cunning
(c) deceitful
(d) dishonest

Directions: In questions 68 to 77, fill in the blanks with the right pair of the given prepositions.

68. — the corner of the street stood a policeman — an umbrella, shivering in the rain.
(a) on; with
(b) near; under
(c) by; in
(d) at; under
69. — the room it was very hot; but — the terrace it was cool.
(a) within; near
(b) in; outside
(c) inside; on
(d) outside; inside
70. Will you play — me — a while?
(a) with; for
(b) for; in
(c) for; within
(d) against; over
71. You may leave — Sunday or before, but you must return — seven days.
(a) from; after
(b) after; by
(c) on; within
(d) since; before
72. — my word, I am telling you nothing — the truth.
(a) by; from

- (c) on; outside
(d) by; but
73. — you and me — ten o' clock this morning, I have had five good offers for my radio.
(a) between; since
(b) within; before
(c) amongst; after
(d) among; within
74. — cover of darkness, the enemy crept — the hill.
(a) in; over
(b) in; along
(c) under; up
(d) through; upon
75. He leapt — the steps three at a time, and ran — the road to catch the thief.
(a) over; down
(b) from; through
(c) down; over
(d) down; across
76. His tutor went — endless trouble to prepare him — the test.
(a) through; for
(b) over; before
(c) over; against
(d) through; in
77. I shall be back — a week — your return.
(a) before; from
(b) within; of
(c) in; of
(d) within; after

Directions: In each of the questions 78 to 84, there is a sentence in indirect speech. Four alternative ways of turning it into direct speech are also given. Only one of these is correct. Tick the correct one.

78. I told them that I had never seen him before.
(a) I said to them, "I have never seen you before."
(b) I said to them, "I never saw them before."
(c) I said to them, "I have never seen him before."

ever see you before."

79. The priest asked us to remember that the wicked are always punished by God.

- (a) The priest said, "Remember, the wicked are always punished by God."
- (b) The priest said, "I ask you to remember that the wicked will always be punished by God."
- (c) The priest said that, "The wicked are always punished by God."
- (d) The priest said, "I warn you that the wicked have always been punished by God."

80. He proposed that they should have some tea.

- (a) He said, "Give us some tea."
- (b) He said, "Let us have some tea."
- (c) He said, "Should we have some tea?"
- (d) He said, "May we have some tea?"

81. He said that he was ignorant of whether he was leaving that day or the next day.

- (a) He said, "I am ignorant whether I am leaving today or tomorrow."
- (b) He said, "I don't know whether I was leaving that day or the next."
- (c) He said that, "I am ignorant whether I am going today or tomorrow."
- (d) He said, "Am I leaving today or tomorrow? I don't know."

82. John suddenly asked me whether I knew the rule of the road.

- (a) John suddenly asked me, "Do you know the rule of the road?"
- (b) John reminded me sudden-

the road?"

(c) John suddenly said to me, "Do you know the rule of the road?"

(d) John suddenly pointed at me and said, "Do you know the rule of the road or not?"

83. My brother requested me to post his letter.

- (a) My brother said to me, "Will you please post my letter?"
- (b) My brother said to me, "Post my letter, will you?"
- (c) My brother reminded me, "I request you to post my letter."
- (d) My brother ordered me, "Post my letter."

84. The teacher asked the class to be silent.

- (a) The teacher said to the class, "I order you to be silent."
- (b) The teacher said to the class, "Silence, please."
- (c) The teacher said, "Class, be silent, will you?"
- (d) The teacher said, "Silence!"

Directions: In questions 85 to 94, each sentence has two blanks. Fill in the blanks with the right pair of given words

85. Sitting in the car we watched the country unroll itself mile- - - mile, a moving - - -.

- (a) by; picture
- (b) after; panorama
- (c) following; spectacle
- (d) upon; film

86. A holiday is no- - - unless you have - - -.

- (a) relaxation; variety
- (b) holiday; change
- (c) rest-cure; books
- (d) good; money

87. If he had never done much - - - in the world, he had never done

- (a) good; bad
(b) charity; damage
(c) kindness; evil
(d) good; harm
- 1 88. The garden looked very — — though the soil was not — —.
(a) bare; barren
(b) neglected; dry
(c) wild; sandy
(d) poor; rocky
- 1 89. First we — — about on the beach; then, as the clouds gathered, we — — briskly over the fields to our house.
(a) walked; flew
(b) strolled; walked
(c) sat; strode
(d) loitered; crawled
- 1 90. The contractor wants a lot of — — labour; he also has a — — job for an accountant.
(a) irregular; small
(b) migrant; temporary
(c) casual; transitory
(d) casual; temporary
- 1 91. They went out to — — a film; I was content to — — television at home.
(a) visit; see
(b) view; see
(c) see; watch
(d) watch; attend
- 1 92. We were — — a problem; we were not — — about anything.
(a) discussing; quarrelling
(b) arguing; debating
(c) discussing; disputing
(d) disputing; fighting
- 1 93. I want men who are — — but not — — for this dangerous job.
(a) prudent; over cautious
(b) foolhardy; brave
(c) courageous; foolhardy
(d) timid; careful
94. The room was filled with the — — of roses; but the — — of the gutter spoiled it all.

- (b) scent; stench
(c) odour; smell
(d) fragrance; odour

Directions: In each of the questions 95 to 100, there is a sentence containing an idiom in italics. Four alternative meanings of the idiom are given below. Choose the one which best expresses its meaning.

95. Many people believe that World War III is *out of question*.
(a) impossible
(b) possible
(c) certain
(d) doubtful
96. He was *pulled up* for his bad behaviour.
(a) warned
(b) questioned
(c) taken to task
(d) accused
97. He protested that he was being *brought to book* for nothing.
(a) abused
(b) criticised
(c) warned
(d) punished
98. We are usually *taken in* by sweet talk.
(a) influenced
(b) flattered
(c) deceived
(d) encouraged
99. The proposal was *turned down* by the committee.
(a) rejected
(b) accepted
(c) refused
(d) condemned
100. The worker was asked to *account for* his long absence from duty.
(a) describe
(b) reveal
(c) explain
(d) discuss

TEST OF REASONING

1. (c), i.e., approximately 27 per cent. $\frac{141}{518} \times 100$ gives the percentage of seats won by the Congress (I) in both the states.
2. (b), i.e., the performance of the CPI in Andhra Pradesh was better than in Karnataka, since $\frac{4}{294} \times 100$ is greater than $\frac{3 \times 100}{224}$.
3. (d), i.e., approximately 962 per cent. If x per cent of the total seats won by the BJP in both the states were won by Telugu Desam, then $\frac{x}{100} \times 21$ must equal 202.
4. (b), i.e., approximately 17 per cent. The Janata (with Kranti Ranga) secured 14 seats more than the Congress (I). When expressed in percentage, we get $\left(\frac{14}{81} \times 100\right)$ per cent, which equals 17 per cent approximately.
5. (b), i.e., approximately 36 per cent. If we assume that the seats won by the other parties (excluding "Others") were x per cent of those won by Telugu Desam, $\frac{x}{100} \times 202$ must equal 72. This gives us x equal to 36 per cent approximately.
6. (c), i.e., 71. In each of the given equations, the result has been obtained by adding the digits constituting the numbers. For e.g., $9+3 = 12$ and $7+2 = 9$, and the result, therefore, is 129. Since $2+5 = 7$ and $1+0 = 1$, the result should be 71.
7. (a), i.e., 136. First row $(14+16) \times 3$; Third row $(16+22) \times 5 = 190$; Fourth row $(17+25) \times 6 = 252$. The missing number in the second row should, therefore, be $(15+19) \times 4 = 136$.
8. (d), i.e., 49. Since Inder is 12 years younger than Tilak and 4 years younger than Ved, Ved must be 8 years younger than Tilak. If Tilak was 52 in 1973, Ved that year must have been 44. Ved in 1978 was, therefore, 49.
9. (c), i.e., P in PALATE.
10. (a), i.e., A in AGING.
11. (c), i.e., R in REGRET.
12. (d), i.e., S in SOLAR.
13. (c), i.e., T in TRUER.
14. Valid. The two premises, when reduced to affirmative statements, would read — (a) all those soldiers who are present in the regiment today are fit, (b) all soldiers of the regiment are present today. In the light of these positive statements the conclusion is self explanatory.
15. Valid. The first statement implies that one of any two persons contradicting each other must be telling the truth. The rest is self-explanatory.
16. Not valid. If all cases of A are cases of B, you cannot say with certainty that all cases of B will also be cases of A. In other words you cannot,

is what has been done in the argument under consideration.

17. Valid. The statements in the question can be equated as under: (a) If A, then C; (b) If B, then A; (c) Therefore, if B, then C. 'Men of high calibre will join the teaching profession' is the same as saying 'that the teachers will be men of high calibre'. In the argument under consideration, we are only affirming the consequent by affirming the antecedent, and is, therefore, valid.
18. Not valid. The conclusion implies that all those who are never self-satisfied are great thinkers. Since this is not implied by the opening statement, the conclusion is not valid. If the opening statement had been "only great thinkers are never self-satisfied", then the conclusion would have been valid.
19. Not valid. The opening statement when stated in the affirmative implies that all great men preach only what they themselves practice. It, however, does not imply that all those who have this attribute are great men.
20. Not valid. The first statement does not imply that all intelligent students are able to pass the NTSE. It only implies that if a person passes the NTSE, he must be intelligent, i.e., 'none but the intelligent students pass the NTSE'.
21. (d), i.e., cerebrum is to fore-brain. The relationship in the key-word pair is that of synonyms.
22. (c), i.e., upper arm is to thigh. The upper arm-bone is called humerus while the thigh-bone is called femur. The other choices give the relationship of synonyms.
23. (a), i.e., thyroid is to neck. The pituitary body (gland) is situated beneath the brain whereas the thyroid gland is in the neck.
24. (c), i.e., surgeon is to soldier. Scalpel is the weapon of the surgeon in the same way as the gun is that of the soldier.
25. (d), i.e., laudatory is to defamatory. The relationship is that of antonyms. Laconic means brief, concise, whereas verbose means more words than are wanted. Laudatory means praiseworthy, commendable whereas defamatory means words spoken to tarnish someone's image. Choices (a) and (b) give the relationship between synonyms. The words in choice (c) do not bear any logical relationship.
26. (b), i.e., munificent is to generous. Munificent means splendidly generous, bountiful. In other words, the relationship is that of synonyms. Motif means the dominant idea or the constituent feature which is the same as theme. Choices (a), (c), and (d) give antonyms.
27. (c), i.e., vodka is to potatoes. Vodka is prepared from potatoes in the same way as wine is prepared from grapes.
28. (c), i.e., shower is to deluge. Intense irritation results in rage in the same way as heavy shower in deluge. Deluge means great flood, inundation, heavy fall of rain. Choices (a) and (b) give antonyms. Evanescent means quickly fading. Choice (d) does not give any logical relationship. Exotic means strange, bizarre.
29. (c), i.e., ligament is to bone. Ligament gets torn in the same way as bone gets fractured. The other choices do not bear any logical

- ...aining the future by communicating with the dead or with ghosts. Sorcery deals with spirits and usually uses witchcraft.
31. (d), i.e., 2,653 calories (cal). $70 (8 \times \frac{1}{10} + 2 \times 4 + 3 \times 2 + \frac{1}{2} \times \frac{1}{10} + \frac{1}{2} \times \frac{1}{10})$, which is equal to $70 (7.2 + 8 + 6 + 6.3 + 10.4) = 70 \times 37.9$, i.e., $70 \times \frac{17}{10} = 2,653$ cal.
32. (c), i.e., approximately 157 per cent. The energy requirement of X in the first case works out to— $80 (8 \times \frac{1}{10} + 16 \times \frac{1}{10}) = 80 (7.2 + 22.4) = 2,368$ cal. His energy requirement in the second case would be $80 (16 \times \frac{1}{10} + 8 \times 4) = 80 \times (14.4 + 32)$, i.e., $80 \times (14.4 + 32)$, i.e., 3,712 cal. In other words, his energy requirement in the second case would be $\frac{100 \times 3,712}{2,368}$ per cent of that in the first case. This works out to approximately 157 per cent.
33. (a), i.e., approximately 14 per cent less. The energy requirement of X would be $60 (4 \times 6.5 + 4 \times 1 + 8 \times 2 + 8 \times \frac{1}{10})$, i.e., 3,192 cal. Energy requirement of Y would be $60 (6 \times 6.5 + 2 \times 1 + 6 \times 2 + 10 \times \frac{1}{10})$, i.e., 3,192 cal. In other words, the energy requirement of X is 528 cal less than that of Y. When expressed in percentage, we get $\frac{528}{3,192} \times 100$.
34. (c).
 35. (c).
 36. (d).
 37. (c).
 38. (b).

From *TEST YOUR OWN APTITUDE* by James Barrett
and Geoffrey Williams

THE FREEDOM MOVEMENT

BY RAJU MANSUKHANI

If you're to administer a nation, defend it, or even take an active part in formulating its foreign policy, success will depend on the knowledge you have of your country's history. And the Indian freedom movement forms an integral part of it—as also of every important competitive exam, be it the written test or the interview.

The second instalment of our serial on the nature and course of political activity in India from 1857-1947 discusses the growth of an 'Indian' consciousness, the Swadeshi Movement and the emergence of Gandhi as a national figure.

1870-1919

The phenomenon known as political extremism was so called because of the moderate politics pursued earlier. The rise of Bal Gangadhar Tilak in Maharashtra, Lala Lajpat Rai in Punjab and Bipin Chandra Pal and Aurobindo Ghosh in Bengal is associated with extremism. They were unconstitutional to the extent that they had no faith in the British constitutional spirit and in Western civilisation as a whole.

From the 1870s, the development of the ideological beliefs of Swami Dayanand Saraswati, Swami Vivekanand, Muhammed Iqbal and Bankim Chandra was a proof of the rising Indian morale. It was no longer a crass Western solution to politics but the growth of an Indian consciousness.

From the 1890s, Tilak and his Chitapawan Brahmins raged through Maharashtra organising Shivaji and Ganpati festivals. Cow protection was another slogan for political mobilisation. Bipin Chandra Pal was doing the same in Bengal. The overt Hindu tone was unmistakable. For Tilak, a man steeped in Hindu theology, it was a repudiation not only of Western learning but also of his Western educated opponents in the Congress.

Aurobindo Ghosh, a semi-mystic, spread political ideas

through religious idioms.

Lajpat Rai was the militant, furthering the cause of the Arva Samaj in Punjab. In 1901, he suggested that the Congress should be a bold Hindu political organisation. Much later, by 1920 when he had become a follower of Gandhi, he adhered to the principle of Hindu-Muslim unity.

The Swadeshi Movement

It was in December 1903 that the British Government announced the transfer of Chittagong division, Dacca and Mymensingh to Assam thus partitioning Bengal. The reason given was administrative convenience. But a study of Curzon's and Minto's papers have revealed that the British wanted the diminution of the power of Bengali political agitations.

The Anti Partition Movement started on a moderate note. S.N. Banerjee became a force to reckon with. Press campaigns, meetings and numerous petitions were sent out to reach the conscience of the British. Anti Partition was linked to the general platform of constitutional reform.

Another trend of the Movement was one of self-reliance, constructive work and *atmashakti*. The schoolteacher of Barisal, Ashwini Kumar Datta, is an example of constructive social work. But it is Rabindranath Tagore who is the most memorable. The attack on government policies, the plea for *atmashakti* and the need to bridge the gap between the educated elite and the masses—this new spirit of Swadeshi Samaj was at its clearest. Many swadeshi schemes were developed—textile mills, handlooms, transport, soap and match factories. More important were educational programmes—national schools and colleges were becoming a reality.

Between 1905-07 complete political independence appeared as the objective of the struggle. A systematic boycott of British goods and 'passive resistance' or non-cooperation became the means of achieving the objective. Its main exponents were Bipin Chandra Pal and Aurobindo Ghosh.

By 1908, the political atmosphere underwent a change. It was no longer open and passive politics but the extremist action of secret societies using terrorist methods. Chapekar brothers, H.L. Dhingra, Khudiram Bose, P. Chaki, Ajit Singh and Lajpat Rai were the *dramatis personae* of that short-lived terrorist drama.

By 1910, this intense political activity which had gripped Bengal, Punjab and Maharashtra was coming to an end. The extremists, who had managed to generate such an intensity, could not evolve a conscious programme regarding the peasants and the Muslims.

The reaction of the British Government to these political events was repressive in nature.

The viceroyalty of Curzon saw the attack on various institutions. The number of Indians in the Calcutta Corporation was reduced, and official control was increased in Indian universities—such measures instigated the students and the middle class in general.

It was Minto, Curzon's successor, who played the game of 'divide and rule'. In October 1905, a deputation of Muslim notables led by Agha Khan met him in Simla and secured the promise of communal electorates. In 1906, the All-India Muslim League was founded.

In 1909, the Morley-Minto reforms made for separate electorates on communal lines. The Imperial and Legislative Councils had the same official dominance and the Indians felt cheated. Reforms of this nature made for political divisions on religious grounds—a trend which did not augur well for the future.

World War I gave a tremendous impetus to nationalism all over Asia and Africa. The Allied nations—Britain, the US, France, Italy and Japan—were promising an era of democracy to colonial countries.

Though the Congress had split in 1907 at Surat, by 1915-16, only Tilak was there to assert his supremacy over the Congress. He had come out of jail and wanted to

Government. He joined hands with Annie Besant, the theosophist from Madras, to establish the Home Rule League.

Tilak's League had massive support in the Central Provinces, Berar, Karnataka and Maharashtra. The total League members were 60,000, though the Brahmin support was overwhelming. Annie Besant was concentrating on appealing to students. There was a systematic spread of pamphlets and cheap newspapers. What Gandhi was to do boldly a few years later, the League started out haltingly.

The attitude of the Muslim League to politics in 1915-16 was the same as in the 1880s. Then, Syed Ahmed Khan had warned his co-religionists that whatever the variations in regional standing they had in the country as a whole, as a minority community they would be the losers. The Congress was seen as benefiting the lot of educated Hindus.

The Lucknow Pact of 1916 was a joint effort of the Congress and the League at getting concessions from the government. British power had been shaken during the war, a situation which the Indians wanted to exploit.

On August 20, 1917, Lord Montague announced some administrative reforms. 'Dyarchy' was introduced in 1919 and made for 'transferred' and 'reserved' subjects of administration. Important matters like finance rested with the governor. The Congress found these reforms disappointing, though men like S.N. Banerjee accepted the proposals of the government and left the Congress. Banerjee wanted to work for self government—"to be the adopted sons of the Empire", as he said.

Early political experiences of Gandhi

Gandhi's work in South Africa was a campaign to stem the tide of racial discrimination which threatened to engulf the Indian community. He campaigned against franchise restrictions, property holding, living areas and immigration regulations. His goal in life was the search for truth, and thus *satyagraha* or 'truth force' was evolved. Great importance was placed on the method to achieve that goal.

made Gandhi formulate his attitude to the West. He experienced deep disillusionment with Western civilisation. In *Hind Swaraj*, a booklet written in 1909, he made it clear that modern civilisation was not the answer to the Indian problem. Politically, his disenchantment with the British Empire grew in South Africa.

1917-18 were marked for Gandhi's entry into Indian politics. Champaran district in Tirhut division of Bihar was a potentially prosperous area wholly dependent on agriculture. The effect of the war in 1917-18 on prices was disastrous. The world market of indigo was lost to the Champaran cultivators. Their method of cultivation was indirect—leasing land from planters, binding themselves to grow indigo every year on specified lands for an advance taken earlier. Added to the low prices, the *raiya*s were not allowed grazing and tree-felling rights or the use of wastelands.

The net result of socio-economic grievances was a disturbed area into which Gandhi stepped. Initially, the local administration was hostile to him, but Gandhi's cause had been taken up by the media. A commission of enquiry was appointed by the government. Though the problem was not solved, Gandhi realised that constant mediation between the planters and the cultivators was necessary. Above all, a backdrop of harmony and class peace and not hostility was necessary.

The problem of Kaira in Gujarat district was also one of wartime distress. The kharif crop of 1917 was destroyed and the government was giving no land-revenue remission. From March 22 to June 6, 1918, Gandhi organised a *satyagraha*, urging farmers not to pay their land revenue.

In Champaran and Kaira he took up an issue which was comprehensible and important to peasant cultivators. This rural discontent was highlighted through the press, mass meetings and pledges.

In 1918, Gandhi had his first involvement with the Indian working class in an Ahmedabad textile-mill strike. He organised a peaceful strike. Settlement on the wage issue soon followed. Gandhi formulated his own ideas about trade unions. He never believed in hostility

between the millowners and workers. The concept of trusteeship of property was evolved. The rich were the property owners who would be morally bound to work for the welfare of the poor. They would be the trustees of the national wealth. The workers would be cooperative, non-violent and discharge their duties. Thus, an honourable equality would prevail between capital and labour.

In 1919, the Rowlatt Act was passed. It concerned government power to deal with sedition and conspiracy. It affected a very limited circle of politicians and barely the lives of ordinary people.

Gandhi opposed the Act and the manner in which it was foisted on the country without regard to public opinion. This was similar to the problem of Kaira but on a bigger scale. Thus, its repeal was "necessary to appease national honour".

Gandhi used the organisation of the Home Rule League. The heart of the movement was in Bombay and Ahmedabad. Figures like Vallabhbhai Patel and Sarojini Naidu, among others, came to Gandhi. A *Satyagraha Sabha* was formed to violate the Act peacefully. There was the public selling of political literature and many courted arrest. A massive *hartal* of shops and offices was organised on April 6, 1919.

It was successfully observed in Amritsar, Lahore, Delhi, Ahmedabad and Bombay. But as a *satyagraha* it was a failure, for it could not lead to the repeal of the Rowlatt Act. However, it led to the emergence of Gandhi as an all-India leader of immense potential.

On April 13, 1919, the Jallianwala Bagh massacre took place in Amritsar. In spite of martial law, a public meeting had been organised condemning the Rowlatt Act. The troops of Gen O'Dwyer fired upon the unarmed crowd killing hundreds. Gandhi campaigned for a government enquiry as in Champaran and Kaira. In May, the Hunter Committee was appointed. The Congress also appointed its own sub-committee comprising C.R. Dass, M. Nehru, Fazlul Haq, Jayakar and Gandhi. In May 1920, the Hunter Report was published, justifying the imposition and the deeds of martial law.

HOW TO MAKE NOTES-2

BY YASMEEN LUKMANI

Just ten days to your exam... with just as many books to read! Don't panic. You don't need to take down word for word. Just read the passage; isolate the important ideas and jot them down in the right order. This instalment gives you a clue to the best ways of locating clues to the main ideas.

In the last instalment we discussed the necessity for learning to make notes, the distinction between 'summary', 'precis' and 'notes' and that the aim of the series is to develop the skill to isolate relevant ideas, to measure their relative importance and to express them in appropriate language. A method of making notes on a given passage was also demonstrated and explained.

Let us now look at some of the ways of isolating important ideas in a passage by locating the clues provided and the ordering of the ideas.

Let's look at the following passage:

Exercise 2: It is well-known that when an individual joins a group he tends to accept the group's standards of behaviour and thinking. He is expected to behave in accordance with these norms—in other words the group expects him to conform. Many illustrations could be given of this from everyday life, but what is of particular interest to psychologists is the extent to which people's judgments and opinions can be changed as a result of group pressure. Some remarkable conclusions were reported by Asch and others (1952). They noticed that people in a group will agree to statements that are contrary to the evidence of their senses or that contradict their own benefits. It would be a mistake to think that only particularly docile people are chosen to take part in experiments of this type. Usually highly intelligent and independent people are used and this, of course, makes the results even more disturbing.

Notice that the passage starts with the words 'It is well known that...' indicating the established framework within which the particular ideas to be presented, operate. Sentence 2 is a further elaboration of sentence 1. Sentence 3 moves from possible 'illustrations' of this general thesis to something. This then, is what the passage is about, the new discovery, not the information contained in sentences 1 and 2. They merely provide background information. Sentences 4 and 5 are a statement of evidence for the new discovery presented in sentence 3. The words signalling this are 'some remarkable conclusions were reported by...'; 'they noticed that...'. Sentences 6 and 7 highlight an aspect of this evidence which is particularly crucial to the discovery presented. The fact that sentences 6 and 7 are part of the evidence given by the researchers who are quoted, and are not the author's own opinion, is made clear by the use of the words 'people are chosen,' 'people are used', which indicate a psychological experiment; and 'makes the results even more disturbing'. The disturbing nature of the results is the author's own interpretation, but the statements in sentences 5 to 7 relate to the actual results.

Clues to highlighting of major ideas:

In every passage, major ideas are highlighted and those of lesser importance are subordinated. It is essential then, to be able to pick on the clues which indicate the relative importance of ideas.

Exercise 3: Now read the following passage and isolate the major idea and the subsidiary idea. Note which aspects of language indicate the relative importance of the ideas. When the same lexical items recur in a passage or phrases of these, that is a sure indication that the ideas that are signalled are key ideas. For e.g., in the passage of *Exercise 2* the important part of sentence 3 is echoed in sentence 5 (with a slight difference in wording and some increase in information). Also, the word 'group' recurs. These are clear

signals to the importance of the idea of group pressure.

The earliest American dictionaries were simple little schoolbooks based chiefly on the famous dictionary of the Englishman Samuel Johnson. The first important date in American dictionary-making is 1828, the year that Noah Webster published *An American Dictionary Of The English Language*, in two volumes. Webster's book has many weaknesses (such as a crude pronunciation system actually inferior to that of Walker's dictionary of 1791), but in its insistence upon American spellings, in definitions keyed to the American scene, and in its illustrative quotations from the founders of the Republic, it provided the country with the first native dictionary comparable in scope to that of Dr Johnson. Yet, because of its two-volume size and its relatively high price, it never achieved any great degree of popular acceptance in Webster's own lifetime. Probably, its greatest contribution to later American dictionaries was in its style of definition writing—writing of a clarity and compactness never approached before its day."

The next instalment of this series will carry a discussion of this, against which you can compare your work

Exercise 4: Let us go back to the passage in *Exercise 2* now and write notes on it.

1. Framework of psychological theory to be presented: known fact that individuals conform to standards of behaviour and thinking of the group they belong to.

2. Particular finding: People's judgments and opinions can be considerably changed as a result of group pressure (Asch and others, 1952).

(i) Group pressure affects even highly intelligent and independent persons.

Exercise 5: On the basis of your analysis in *Exercise 3*, write notes on that passage (Key to notes in next instalment.)

You will find that quite often the pattern of arrangement of ideas in a factual or informative passage is

general idea; (ii) framework; (iii) Chronologically earlier position; (iv) Topic sentence containing the one idea in the passage, the rest being examples or explanations.

Later statement: The main topic in passages with opening statements of the kind (i)-(iii) comes later, followed by explanation and illustrations (if any). With opening statements of type (iv) the rest will normally consist of an example or explanation.

Language in note-making Use of numbering and punctuation, abbreviations and telegraphese. Let us go back to the notes made in Exercise 1 (instalment 1, *CCTimes* May '83). Four ideas are brought out in the passage as signalled by the number: 1, 2, 3, 4. In 2 and 4, there are sub-points (i), (ii), etc. The major point in each is underlined. The event; Nature of the chemicals; Use; Effects of the discovery. Please note that each of these headings is of the same level

the major heading for 1 would have been the statement of a particular event and therefore not of the same level of abstraction as Nature; Use; Effects. In order to match these three, the heading for 1. The event had to be created from the sense of the text; it is not actually stated in it.

Notice also the use of the colon. In these notes, it indicates that an elaboration and particularisation of the idea is to follow, e.g., 1. The event: A new discovery: opiate-like chemicals. . . .

In writing notes, not only are ideas separated and stated with clarity, but the language is more condensed, leaving out the in-essentials of grammar.

We shall now go back to part of the notes on Exercise 1 (instalment 1) to examine the language that is used. In some cases, the language will be further reduced than in the notes provided, in order

actual notes.

E.g. "1. The event: new discovery: opiate-like chemicals being produced by brain." The indefinite article is not required before 'new discovery'. It is obvious there is only one. It is implied that (some) opiate-like chemicals (are) being produced by (the) brain. The words in brackets are not absolutely necessary in order to clearly convey the meaning. They are required only in a fuller write-up. One can similarly reduce many of the articles and forms of the verb *be*, e.g., *are, is*.

E.g. "4. Effects of the discovery: (i) on world view: If human emotions (are) controlled by (the) extent of (the) endorphins produced in (the) system, then notions of traditional morality have to change."

Except where necessary to condense ideas or clarify the difference in points, the language in notes is taken from the passage itself and then reduced to its essentials.

(To be continued)

Answers to TEST YOUR WORD POWER

1. **asset**: B: a valuable quality or thing. The dignity of a referee is his most precious asset.
2. **aura**: D: a characteristic atmosphere. One of the last places where Tibetan Buddhism is practised as a living religion, Ladakh still retains some of its aura of mystery and inaccessibility.
3. **bountiful**: B: abundant, generous, liberal. Bountiful in its natural beauty, hospitality and the friendliness of its people, Brazil is the vast paradise of the South Atlantic.
4. **circumflex**: D: a mark written over a letter to indicate pronunciation. The letter 'e' often has a circumflex over it in French, as in the word 'fête'.
5. **circumspect**: B: cautious, paying careful attention to everything before taking action. Politicians should be quite circumspect in their behaviour as they are always in the public eye.
6. **comprise**: A: to contain, include, be composed of. The main sources of commercial energy are oil, coal and electricity, while the non-commercial energy sources comprise firewood, dry dung and animal and vegetable wastes.
7. **conflagration**: A: great destructive fire. The saturation bombing of Dresden in World War II caused a conflagration that levelled the city.
8. **consecutive**: C: in unbroken succession, following continuously. The present power cut in Kerala is due to monsoon failure in two consecutive years.
9. **deprive**: A: to prevent from using. In the spring of 1942 the Jews in Berlin were deprived of all electric appliances, cameras, typewriters and bicycles.
10. **epilepsy**: D: nervous disease, causing a person to fall unconscious (often with violent involuntary movements). One person out of 200 in the world suffers from epilepsy.
11. **espionage**: B: use of secret agents, practice of spying.

The KGB, the Soviet secret police and espionage agency, is the world's largest information gathering organisation and certainly its most mysterious.

12. **frequent**: C: habitual; often happening; numerous. Frequent use of antibiotics can not only make them ineffective but can also prove harmful.
13. **indefatigable**: A: untiring; unflagging. The sweep of the Oscar awards made by the Indo-British production, *Gandhi*, is a tribute to the indefatigable spirit of its maker Sir Richard Attenborough.
14. **indiscriminate**: A: acting, given without care or taste. Over 74,000 children born in India in the 30 years are likely to have serious genetic disorders caused by indiscriminate use of X-rays for medical diagnosis.
15. **inhabited**: C: occupied; lived in. For an average Mizo, India is a different land inhabited by people who know little about them.
16. **perennial**: C: continuing throughout the whole year, lasting forever. Karnataka's perennial power famine stems from its total dependence on hydro-generation.
17. **proscribe**: A: to denounce as dangerous; prohibit; condemn. All nations should agree to proscribe chemical warfare.
18. **protracted**: C: long drawn out. Even in the most affluent societies, the protracted economic recession has caused some of the moral strictures against child labour to be ignored.
19. **spastic**: C: one suffering from cerebral palsy. Just a decade old the Spastics Society of India is helping thousands of spastic children all over India to lead useful lives.
20. **stranglehold**: C: deadly grip. The Western stranglehold over the Indian Ocean is one of the least discussed subjects in the Western press.

17/15 correct excellent
14/12 correct good

OIL A SLICK PROBLEM

BY N.V. SUBRAMANIAN

Man-made troubles seem destined for West Asia. OPEC Gulf states, faced with a worldwide oil glut, have now a massive oil slick right in the Persian Gulf, which threatens to damage irreparably the eco-system there. A direct consequence of the Iran-Iraq war, no plans are afoot to check the menace, even as thousands of barrels of viscous oil a day are being added to the already awesome slick.

Oil brought untold wealth to six Gulf states—Kuwait, Qatar, UAE, Saudi Arabia, Bahrain and Oman—and Iran and Iraq. Since February 8, it has only brought misery—and promises to bring still worse things.

That day, a ship accidentally collided with a rig in Iran's offshore Nowruz Oil fields, 100 km from its main oil-export terminal at Kharg Islands. Iraqis followed that up on March 2 by straffing two more wells in the region, contending—as they did since the start of the over 30-month-old Iran-Iraq war—that oil installations were legitimate military targets.

The results have been horrendous for the Gulf: upwards of 3,000 barrels of oil a day are gushing into the Persian Gulf, adding to the over 2,50,000-barrel oil slick, dubbed "monster patch" which is over two-thirds the length of the Gulf, about 8,000 square miles of its area and over a yard in thickness. Worse still, 25 per cent of the slick is made of vast, tarry, oil globules surrounded by a kind of lighter oil called sheen. Since it is practically impossible to burn or disperse tarry oil, any operation planned to remove the oil-slick menace would mean scooping up the oil.

Oil slicks cause environmental pollution of the worst kind. To water-starved Gulf, the slick threatens to damage, irreparably, its sea-water desalination plants. Already, a fresh-water barrel sells at twice the price of an oil barrel. And the extent of the spillage is enough to endanger marine life along the coasts of the Gulf states—especially the fishing and shrimp industry—ports, power plants, industrial power-cooling systems, offshore oil installations, oil refineries and beaches. Some of them have been shut down while protective

measures have been taken in others. They include cordoning off the systems in question with heavy-duty inflatable plastic booms—Bahrain bought these from Denmark to protect its desalination plants, power station and oil refinery. But this may not be enough, admits Bahrain's Acting Director of Environmental Affairs, Walter Vreelend, because the "main slick consists of a submerged platform of congealed oil a couple of feet thick. A curtain of strong netting would also be needed."

Even the strongest netting man can devise cannot save Bahrain or the other affected states if the source of the oil spillage—the three wells, two of them ablaze, in Nowruz—is not capped. And there is no scope of this being done in the immediate future because of the intransigence of the two warring parties, Iran and Iraq, which are actually responsible for the present crisis. Till March 19, when the oil slick first appeared on Bahrain's coast, Iran chose to keep all the Gulf states in the dark about the impending danger. And belatedly, the six Gulf states plus Iran and Iraq met twice—at technical and ministerial levels—to cope with the crisis. But to no avail. In the first official contact between the warring Iraqis and Iranians both of them could not agree on the nature of a ceasefire, the first step towards solving the problem. Iran wanted an ad hoc and local ceasefire—more specifically an explicit Iraqi "safe-conduct" assurance for international oil-repair men—while Iraq was angling for a formal and general ceasefire. This was much on the lines of the ceasefire calls they had put forward many times earlier on.

As before, the Iranians found this unacceptable. They had another reason too for not taking the slick crisis seriously as it presented itself then. Around that time wind and wave direction in the Persian Gulf is generally southwards and eastwards. And what better Islamic justice than the slick moving, because of the elements, from the head of the Gulf onto the shores of the Arab states supporting Iraq in its war against Iran. Teheran mis-

Plastic boom outside the desalination plant in Bahrain.

calculated, though. The wind blew from the south instead and the dark, viscous slick came perilously close to Iranian coasts. Helicopter and space-satellite surveillance shows that most of the slick is in Iranian waters now.

But all that may change. Says Howard Rodda, Deputy Head of Bahrain's meteorological office: "So far we have been very fortunate. But the south-easterlies have blown themselves out and the wind is veering round to the north again."

If that be so, in a year of depressing oil prices and, consequently, a proportionate reduction in development funds, the oil slick could have come at no worse time for the "unrepresentative sheikhly" regimes of the Gulf states. Nearly always complacent in the face of natural disasters, these sheikhs thought they could buy their way out. But now, all their petrodollars cannot change the harsh geographical realities of the Persian Gulf and thus the true portents of the oil slick—the Gulf is a shallow lake, the Strait of Hormuz, its only outlet, is very narrow and just 40 miles wide at one point, and the slick, itself 30 miles wide, will not oblige the sheikhdoms by squeezing through the Strait and into the Indian Ocean.

The war they financed for Iraq has backfired on them: the hordes of oil-pollution experts and oil fighters—including the world-famous Red Adair—stationed in the Gulf refuse to enter the Iran-Iraq war zone and cap the wells in Nowruz in the absence of an airtight "safe-conduct" guarantee, the desperately-needed information about the precise size, location and composition of the main slick is hard to procure because no one dares to cross the so-called "Geneva line" dividing Iranian waters from the rest of the Gulf. And if all these problems are overcome, capping operations will take another 10-12 days. If not for years, the aftermath of the oil slick will certainly menace the Gulf states for months to come. □

CAREER COUNSELLING

BY G.J. UNNITHAN

Director, Students' Advisory Bureau, University of Rajasthan

I am a student of B.Sc. First Year at Delhi University and am interested in taking up further studies in Oceanography. Which Indian institutes conduct this course? Also give me full details regarding the admission procedure and eligibility.

Rajesh Raheja, Delhi

The universities of Andhra, Waltair and Cochin conduct an M.Sc. course in Oceanography. Candidates for admission to the Andhra University's Department of Meteorology and Oceanography must have a B.Sc. degree in Physics, Chemistry or Maths in 1st or 11th division. Seats being limited, the merit for admission may go well above 1st division. The same is the case for admission to the Department of Marine Sciences at the University of Cochin, Foreshore Road, Cochin-682 016, where candidates must have either passed B.Sc. (Hons) Physics or Maths. The National Institute of Oceanography (CSIR), Goa, also has research facilities.

I have appeared in the B.Sc. (Hons) Physics final exam. I am confused about what to do next. Would I be eligible for the postgraduate course in Operations Research (OR)? What are the prospects of an OR postgraduate? Please give me the names of some reputed colleges/institutes which conduct OR courses and the admission procedures followed by these.

Basudib Chakraborty, Khagra (West Bengal)

I am a science graduate with honours in Maths. I wish to know the prospects in the field of OR.

Tapan K. Garain, Bombay

OR scientists must be numerate and highly intelligent with an analytical mind and the ability to cooperate with all kinds of people. Their job concerns analysing complex management, planning or organisational problems using scientific methods, particularly mathematical. The problems are expressed in mathematical terms, i.e.,

a 'mathematical model' is developed. Using this model in conjunction with other data, the OR scientists are able to estimate for managers the outcome of various alternative courses of action.

OR scientists are employed in industrial or commercial organisations, management consultancy firms, the Armed Forces or the Civil Services (here they investigate problems of national importance, like transport, urban planning and defence).

The University of Delhi conducts M.A./M.Sc. courses in OR in Hindu College, Hans Raj College, Indraprastha College for Women, Kirori Mal College, Ramjas College and St Stephen's College. Eligibility: B.Sc. Maths/Physics (Hons) with 55 and 60 per cent marks respectively. Also eligible are graduates (Hons) and post-graduates in other disciplines of Arts and Science. Bombay University also conducts an M.Sc. course in OR for Science (Maths) graduates.

The Operational Research Society of India, 7/3 Mandeville Gardens, Calcutta-700 019, offers a two-year graduateship exam in OR. It is recognised by the government for appointment to senior posts. Engineering graduates and graduates with Maths as a subject are eligible. Other graduates will have to take a qualifying exam in Maths. The last date for registration is December 15.

Please provide detailed information about the Institute of Surveyors, New Delhi, since it is very useful for more than three lakh civil engineers/engineering students.

V. Lakshmikanthan, Salem

The Institution of Surveyors, Kashmir House, King George's Avenue, DHO P.O., New Delhi-110 011, promotes and regulates the science, profession and practice of surveying: land surveying, hydrographic surveying, cadastral surveying, building and quantity

surveying, valuation surveying, etc. The institution conducts the professional exams annually. Candidates must first be enrolled for not less than six months before being permitted to take the exams. For further details, look up the booklets—separate for each sub-division—published by the institution. A pass in the Institution of Surveyors' Final or Direct Final Exam is recognised by the government for recruitment to higher posts.

I have passed M.Sc. Chemistry and am orthopaedically handicapped, my leg being affected by polio since childhood. I satisfy all other physical standards specified in the Gazette Of India Extraordinary, dated December 18, 1981, relating to the physical examination of candidates contained in Appendix III of the rules for the Civil Services Exam, 1982. Yet, I would like to clarify whether I am eligible for selection in the Civil Services Exam.

Suryanarayan Meher, Bolangir

It would be better to seek a clarification from the Secretary, UPSC, Dholpur House, New Delhi-110 001. When you write in, please enclose a doctor's certificate regarding the extent of your disability. □

NOTE TO READERS

Before rushing in your career problem, check if it can be solved by looking up our sections on *Careers* or *Career Counselling* in the earlier issues. Space is limited; the mail received staggering. Letters chosen are those of general interest or in particular cases where the information is hard to find or has not been published before. Many students ask for a personal reply. Sorry, this is not possible. So please don't send postage or envelopes. Make your queries specific and brief. Send them to Career Counselling, Career & Competition Times, 10 Daryaganj, New Delhi-110 002. Your letters should be accompanied by the coupon.

NEW SERIES OF TEXTBOOKS

for
IAS & COMPETITIVE EXAMINATIONS

Prepared by
a team of Academics & IAS Officers
with

V.K. Agnihotri, IAS as Chief Editor

COMPLETE GUIDE TO INDIAN HISTORY with answers (1983 ed.)

A Bestseller in its earlier editions, this book has been a trendsetter in the field of objective question writing. Presents a thematic study of Indian History according to the prescribed syllabus. Like previous years it is hoped that the reader will find in this volume the answer to almost every question that is likely to find place in the question paper this year!

1983 xiv + 480 pp. Rs. 55.00

COMPLETE GUIDE TO GENERAL STUDIES with answers (1983 ed.)

Contents include

(1) Indian History; (2) Indian National Movement; (3) Chronological Table of Indian History (From Ancient to Modern Times); (4) Indian Polity; (5) World Geography; (6) Geography of India; (7) Indian Economy; (8) Current Events of National Importance; (9) Current Events of International Importance; (10) General Sciences; (11) General Mental Ability and Aptitude Test; (12) General Heritage in India; (13) Test Paper with Answer Sheet.

1983 530 pp. Rs. 50.00

ADVANCED GENERAL STUDIES (1983 ed.)

To be published in September 1983.

The Management Page

is now a special feature in
THE ECONOMIC TIMES
Every Wednesday & Saturday
covering eight Management areas.

| Wednesday | | Saturday |
|-----------|---|--|
| First | Finance Management | General Management |
| Second | Marketing Management
(including sales & advertising) | Information
Management
(including systems &
communications) |
| Third | Legal Management | Taxation Management |
| Fourth | Production Management
(including materials management) | Personnel Management
(including manpower
development) |

The Management Page raises issues, presents techniques and approaches, studies the actual experience of decision makers at all levels and deals with specific problem-oriented situations in all management areas. Mainly written by managers, the articles are brief, practical and frank. Principles emerge, wherever possible from the way specific problems are handled.

Plus three extra pages on these two days, focussing on many a sector of the economy - industries, commodities etc

THE ECONOMIC TIMES

A paper for decision-makers.

Published simultaneously from New Delhi, Bombay & Calcutta

WHAT'S HAPPENING?

April 3 Tension in Punjab as para-military forces take up position on eve of Akali Dal's road blockage stir.

Nine killed in Sibsagar district in police firing on April 2.

Rashtriya Sanjay Manch launched under Maneka Gandhi's leadership.

April 4 Twenty people killed in firing on Akali agitators in Punjab as road blockage stir turns violent.

No guarantee of peaceful agitation, says Akali Dal President Sant Harchand Singh Longowal.

Iran turns down Iraq's limited cease-fire offer for solution to the oil slick problem.

US space shuttle Challenger launched successfully.

April 5 Blast in Amritsar triggers off pitched battles.

Houses set ablaze in Goalpara district, Assam, overall situation quiet as troops maintain vigil.

France expels 47 Soviet diplomats and officials in intelligence clean-up.

April 6 Nine killed in fresh violence in Assam during last 48 hours.

Longowal rejects government offer for resumption of talks.

April 7 Punjab police stations alerted following theft of arms from Ferozepur Home Guards armoury.

China freezes cultural relations with US in retaliation to US giving political asylum to Chinese woman tennis player, Hu Na.

April 8 Longowal announces Akali plan to raise one lakh volunteer force to "do or die for Sikh land".

Four more die as violence hits new areas in Assam's Goalpara district.

April 9 Seven more Assam areas declared "disturbed" as troops move into Goalpara.

Challenger returns to earth after successful space flight.

April 10 Judicial inquiry into Punjab police firings on April 4 announced by Chief Minister Darbara Singh.

PLO leader shot dead in Portugal.

April 11 Delhi Akali Dal unit dissolved; 21-member ad hoc committee appointed to reorganise party.

Punjab Government suspends Ferozepur armoury commander in connection with arms theft.

April 12 Para-military forces to stay in Assam till peace returns, says Home Minister P.C. Sethi.

Statewide alert in Punjab following arms theft in Rajasthan.

April 13 Assam Government to create task force to check violence and

noting in the state.

Freak tornado kills 24 in Bongaon subdivision of West Bengal's 24 Parganas district.

April 14 Akali Dal launches recruitment of volunteers for proposed "army of one lakh" to make supreme sacrifices for the Sikh cause. Over 30,000 volunteers take oath.

Himachal Ministry sworn in, all six ministers in outgoing Cabinet retained.

Trade union leader Datta Samant held with 1,100 others for defying a prohibitory order in Bombay.

April 15 Country's import-export policy for 1983-84 announced in Lok Sabha—impetus to export, and import-curbs to net Rs 500 crores.

April 16 Countdown for launching of SLV-3 D2 begins at Sriharikota.

April 17 Rohini satellite placed into orbit.

Longowal offers to resume talks with Centre; blames Punjab CM Darbara Singh for deadlock.

Assam Government asks Centre for seven more battalions of security forces.

April 18 J & K Assembly dissolved, stage set for early elections.

Car bomb blasts US Embassy in Beirut killing 32 people.

April 19 AP and TN sign agreement for sharing of Krishna waters.

J & K elections to be held on June 5.

Beirut embassy blast toll rises to 47.

April 20 Nine people killed in arson and clashes in Assam's Dibrugarh district.

Akali Dal desires amicable solution, says Longowal.

April 21 Formula for solution to Akali tangle evolved, formalisation of agreement awaits Centre's consultations.

April 22 No deal with Akalis on Darbara Singh's status—Centre makes position clear.

US and Australia expel four Soviet diplomats accused of spying.

April 23 Beirut embassy blast toll rises to 52, police estimate number of dead and missing between 63 and 68.

April 24 Entry of armed persons into Golden Temple banned; Union Minister for Parliamentary Affairs, Buta Singh, fails to arrive in Amritsar—talks with Longowal postponed.

Soviet Union expels US Vice-Consul in Leningrad in response to Washington's expulsion of three Soviet officials for spying.

Austria goes to the polls.

April 25 Jullundur Deputy Inspector General (DIG) of Police A.S. Atwal shot

dead near Golden Temple, army units put on alert, head priest denies report of arms ban in Golden Temple.

Storms kill 30 in Bangladesh.

April 26 Seat adjustment talks between National Conference and Congress (I) fail, Congress (I) finalises J & K poll list.

CBI probe into Punjab DIG's killing announced; censure motion on murder admitted in Lok Sabha.

Syrian forces open fire on Israeli vehicles in Lebanon.

April 27 Concessions in budget proposals totalling Rs 50 crores announced in Lok Sabha; one per cent deduction on export turnover allowed.

Adjournment move on Punjab crisis rejected in Lok Sabha, Sethi does not rule out possibility of police entering Golden Temple.

Resignations of Akali MLAs rejected by Punjab Speaker B. B. Mehra.

Syrian firing on Israeli forces continues.

April 28 Speaker's refusal to accept resignations a defeat for government, says Longowal.

Centre gives week's ultimatum to Shiromani Gurudwara Prabandhak Committee (SGPC) to return criminals taking shelter in Temple, says P.C. Sethi in Rajya Sabha, Akali call to thwart entry of cops.

Landslide kills 100 in southern Ecuador.

April 29 Foreign ministers and representatives of nine non-aligned countries begin deliberations on economic issues in New Delhi.

SGPC given list of 40 criminals in Golden Temple.

No ultimatum to SGPC, Sethi clarifies.

AASU suspends all sub-committees including volunteer force, instructs students to return to classes by May 2.

April 30 NAM ministerial meeting authorises PM Indira Gandhi to write to world leaders on global economic cooperation, NAM group plan to break North-South impasse.

May 1 PM rules out possibility of President's rule in Punjab; calls for resumption of talks.

Morcha to continue till all demands accepted, say Akali leaders.

May 2 Communal violence flares up in Patiala, curfew imposed and shoot at sight orders issued.

Pranab Mukherjee announces 5 per cent ceiling on investment by non-resident Indians in existing Indian companies. A.P.

ASSAM

CONFUSION CONFOUNDED

It's a Catch-22 situation in Assam. The Union Government is being blamed for refusing to restart the process of negotiation on the foreigners' issue until the "restoration of normalcy", on the grounds that normalcy would be restored if the talks were resumed without delay. On the other hand, agitators in Assam continue to indulge in nefarious activities like preventing the return from the refugee camps of Bengali-speaking citizens of the state who wish to get back to their ravaged villages to reclaim their lands at the start of the sowing season. It is difficult for the government to negotiate with the agitators, who use the pretext of detecting and deporting illegal citizens to grab the lands of Bengali speaking Assamese citizens whose families have been butchered.

In some parts of Assam, half a dozen killings are considered to be routine even now. On May 4, Union Home Minister P. C. Sethi admitted to the Rajya Sabha that as many as 3,000 persons had been killed in Assam. The Opposition maintained that the figure was 5,000 and demanded that a Supreme Court judge be appointed to conduct a judicial inquiry into the killings. The government has, however, so far agreed only to an administrative inquiry ordered by the state government.

The killings continued into April and sporadic acts of violence took place all through the month. Prime Minister Indira Gandhi, who visited Assam in early April, assured the state government that the Centre would provide all necessary assistance to maintain law and order and give relief to the victims of the recent disturbances. Later in the month, the army and paramilitary forces were instrumental in checking violence by mobs in Goalpara district.

Meanwhile, the Assam situation continued to agitate people all over the world. At an Iraqi-sponsored Islamic popular conference held at Baghdad in mid-April, Bangladesh and Pakistan tried without success to pass a resolution on the Assam killings charging the Indian Government with direct responsibility for the death of hundreds of Muslims. A motion supported by about 100 MPs was also introduced in the British House of Commons, accusing

the Indian Government of "unlawful and deliberate" killings of men, women and children for "political reasons". India was bracketed with El Salvador, Guatemala, Chile, Iran, etc., in a "murder-by-government" motion. India's name, however, was later dropped from the motion which would have the British House of Commons support Amnesty International's campaign against "murder-by-governments".

PUNJAB

STILL CRITICAL

The situation in Punjab became critical after the murder of Avtar Singh Atwal, DIG Jullundur Range, who was gunned down while coming out of the Golden Temple. An 11-year-old boy was also killed. The escaped assassin has still not been identified.

The situation took a turn for the worse when riots broke out in Patiala. Trouble started when a BJP leader, Shambhu Dayal, objected to the blaring loudspeaker near his shop. According to newspaper reports, his shop was gheraoed and show windows damaged. This sparked off widespread violence in various parts of the city.

These two events have caused a change of heart on both sides—the Akalis and the Centre. The Akali Dal chief has done well to set up a screening committee to check on the residents of the Golden Temple. Only those connected with established Sikh bodies will be allowed to stay on. On May 8, a large number of unidentified people staying in the Golden Temple left on their own.

The Centre has evolved a new formula to solve the vexed Punjab problem. It proposed that the 1981 accord on the sharing of the Ravi-Beas waters be referred to the Supreme Court and Chandigarh be divided between Punjab and Haryana. The Centre is also willing to refer this issue to the Commission. The initial feeling was that the Akali leadership would consider this formula and some agreement would be reached. However, this seems to be wishful thinking. At the time of going to press, the Akali Dal had rejected the formula and threatened to launch its action programme as part of the next phase of the agitation on June 17. The details of the new programme will be disclosed to Akali volunteers by the party's district presidents on June 14. The

party has decided to continue administering the "do-or-die" oath upto the end of May instead of May 12, as originally scheduled. About 1,15,700 volunteers have already taken the oath against the target of one lakh.

KRISHNA WATERS ACCORD

HOPE FOR THE DROUGHT-HIT

The unprecedented water famine in Madras city has forced the chief ministers of Andhra Pradesh and Tamil Nadu to reach an agreement on the Krishna waters. The agreement would provide 15,000 million cubic feet of Krishna waters to the residents of Madras city, who are at present getting only 55 litres per person per day, which is less than two-thirds of what the citizens of Bombay are getting.

The project would also irrigate 1,10,900 hectares in Kurnool and Cuddapah and another 1,20,000 hectares in Nellore. (Unfortunately, the dried districts of Anantpur and Chittoor are left out.) This should give a boost to agricultural production in the drought-prone areas of Rayalseema. It is also possible that the canal will also recharge ground water sources in the region and rejuvenate derelict wells and tanks of an earlier era. The project involves the construction of about 480 km of canal linking the Krishna with the Pennar river and the Somasila Dam. The canal has been named Telugu Ganga by Andhra Chief Minister N. T. Rama Rao. The target date of the plan is 1990. The estimated expenditure will be around Rs 750 crores. Two-thirds of the outlay would be incurred by Andhra Pradesh.

This is not a new agreement. In fact, it only gives effect to the earlier one which was arrived at in principle in 1976 by Andhra Pradesh, Maharashtra and Tamil Nadu. It was, in fact, signed in New Delhi on October 27, 1977.

Though the agreement is commendable, certain problems may come at the implementation stage. First, the cost phenomenon, and there is every likelihood that it will go up as inflation rises. Second, the official estimate is that it will take six years to complete the project. Though engineers say that it is possible to complete the scheme in three to four years, the government record is dismal. It doesn't provide any immediate relief to those living in Madras.

Third, the success of the project would depend upon the aid received from the Centre. The Andhra Government has asked for Rs 200 crores from the Centre. How much the Centre would be willing to give remains to be seen.

INDUSTRY THE NON-RESIDENT THREAT

The falling quantum of foreign aid motivated Indian industrialists at the time of the Festival of India in London to invite non-residents to invest in Indian industries. They recommended that the Indian Government should offer attractive concessions to non-resident investments. Accepting this the Union Finance Minister, Pranab Mukherjee, announced certain concessional tax facilities like reduced income-tax rates and exemptions from capital gains and gift tax on non-resident investments, gifts and bank deposits. Probably, the fading Gulf boom of 1975-80 (causing falling foreign remittances) and the wide trade deficit of Rs 5,800 crores induced the government to open its doors to non-resident investors. Though no definite estimates were made, it was guessed that Rs 200 crores would flow into India in foreign exchange. However, no one imagined that non-residents would attempt to take over the well-managed industries, shaking Indian industrialists to the bone.

It is speculated that certain well-connected Indian businessmen abroad, particularly in England, got prior information of tax concessions to non-resident investments. They, therefore, began the silent buying of DCM shares in October 1982. Till February 1983, no suspicion was aroused. The initial feeling was that "family lighting" between Charat Ram and Charat Ram and the ambitions of R P Goenka (his successes with Ceat, Kamani and Bakelite Hylam and near-success with Premier Auto) were behind this buying. It was only when Escorts' shares were bought in bulk that the Indian industrialists started realising the magnitude of the raid. By April 15, 6 lakh shares of Escorts and 3.5 lakh shares of DCM had been bought, causing a price hike of 100 and 50 per cent respectively. Now, it is being said that Swaraj Paul, who has substantial business in England and is distantly related to H.P. Nanda of Escorts, and Hinduja are behind the share buying.

The DCM-Escorts affair has caused an unprecedented scare in the industrialists' club. Their fear is that non-residents abroad have fabulous amount of white money which, if invested in

shares in India, can give them control over several Indian industrial houses.

The official view in the beginning was that Indian industrialists were over-reacting because only 3.75 per cent of the total DCM shares (3 lakh of the 80-lakh shares) and 1.5 per cent of the total Escorts shares (2 lakh of the 135-lakh shares) were, in fact, sold. Not only this, about 45 per cent of DCM's and 54 per cent Escorts' shares are with the financial institutions and the existing law can take care that no harm is done to Indian industrialists.

The fear among the Indian industrialists emanates from the fact that family holding of equity shares in most Indian industries is less than 15 per cent. Therefore, an acquisition of 6 to 10 per cent by an individual can make them vulnerable. So, there may not be any imminent danger, but a sword of Damocles would be hanging on their head.

The Indian industrialists feel bitter because non-residents have been exempted from paying hefty taxes. They, therefore, can afford to hold a larger size of shares. Moreover, the non-residents should be encouraged to invest in new ventures rather than disturbing the existing well-managed units. The government has sympathies with the Indian industrialists and has announced a 5 per cent ceiling on the total investment by non-resident Indians in existing companies. Mukherjee has also assured that public financial institutions will not permit the overthrow of good management. However, the criteria for good management has not been laid down.

The 'non-resident threat' has raised certain issues. Should a new class be created which is allowed to hold unlimited wealth with no questions asked? Why should concessions not be given to Indian entrepreneurs? Why not restrict non-residents to sick or new units?

PRESS SWELL PERFORMANCE

Circulation of newspapers in the country has crossed the 50 million mark for the first time, according to the 1980 annual report of the Registrar of Newspapers.

One of the positive findings of the report is the general growth in all spheres of newspaper industry which achieved an annual growth rate of 9.6 per cent. The total number of general news interest and specialised journals increased from 17,168 in 1979 to 18,140 in 1980, registering an increase of 5.7 per cent. And for the first time in the history of the Indian Press, the gross circulation of daily newspapers in English and Hindi crossed the 3 million

mark. In the state-wise break-up too, the press in all states and Union territories, except Andhra Pradesh, Tamil Nadu, Dadra and Nagar Haveli, Chandigarh and Pondicherry, improved circulation in 1980 in comparison to the previous year.

The newspapers, apart from being published in 16 principal languages, are also published in another 70 languages. The new additions in 1980 were Greek, Naga, Simte and Paite Pau (Manipuri).

Despite the impressive overall performance, the Indian press suffers from certain inherent problems. The 1980 circulation figure of dailies still comes to a poor average of 21 copies per 1,000 of population in terms of per capita consumption.

Secondly, the Hindi-speaking belt is the worst as far as newspaper reading is concerned. Despite having the highest circulation figure of 1,37,09,000 copies, the performance is unimpressive when compared with the total Hindi speaking population. Moreover, newspaper reading is, by and large, confined to state capitals and big suburban towns.

Another unhealthy trend manifested in the report is the monopoly of 'big' newspapers. The *Indian Express* and *The Times Of India* stand in first and second positions respectively, in the total net circulation of multi-editions. What is intangible but can certainly be felt is the degree of influence these English newspapers wield. The status and prestige they enjoy is unequalled by any other Indian language press.

INDO-SOVIET TRADE HEAVY WEATHER

The Soviet Union was the first country to start trade with India about two decades back. The agreement helped India in developing its economy. Trade was to be conducted to the mutual advantage of both the countries. India was importing heavy machines, oil and technology, and the USSR was importing from India consumer goods like cotton textiles, coffee, shoes, rice, cosmetics and cashew kernels. The current level of mutual trade among these two countries is about Rs 3,000 crores.

Indo-Soviet trade, unfortunately, has entered into a critical period. The problems have arisen because of a gap between the exports and the imports in India's favour. In 1981, our exports to the USSR totalled Rs 1,600 crores, whereas we imported goods worth just Rs 1,300 crores. The trade gap of Rs 300 crores is likely to go up to Rs 600 crores this year. The gap has turned towards

purchases of crude oil and petroleum products. India is also not willing to buy sophisticated equipment and engineering goods. Reacting to this, the USSR is trying to reduce its imports from India. While one reason for this is that the USSR wants to balance its trade with India, there is another important reason: other countries are willing to provide cheaper goods to Russia. For example, Indian textile exports are facing stiff competition from China with which the USSR has recently concluded a trade agreement. Brazil is replacing India in the supply of coffee. It has offered a price cut of 50 per cent on the internationally fixed price. India is willing to extend a small concession of 10 per cent. They are also replacing cashew kernels with Afghan almonds and hazelnuts and have refused to buy non-basmati rice because of its poor quality.

EX-IM POLICY

BOON FOR EXPORTS

Each year, at the beginning of the new fiscal year, the government announces the export-import policy. The 1983-84 policy, announced on April 15, claims to retain the liberal framework of the 1982-83 policy. The new policy is expected to further stimulate exports and encourage savings in imports. The expected savings are Rs 500 crores in 1983-84. The export target has been fixed at Rs 10,500 crores showing a growth rate of 15 per cent over the previous year.

The highlights of the new policy are: 144 new items of industrial machinery have been included for import under the Open General Licence (OGL); 33 items have been withdrawn from the OGL column; and 40 items of raw materials have been added to the banned list. This is likely to support the indigenous industry.

Eight items of import (related with metals and printing industries) have been added to the canalised list through public sector agencies; four items (industrial oils) have been decanalised and the export of castor oil to general currency areas has been partially decanalised. Besides, nine items (benzenes, oils and acids) in the canalised list which were not being imported have been shifted to the banned list.

The duty free scheme for replacement licences has been enlarged and automatic licences will now be available on a repeat basis for many kinds of exporters, sparing them the need to apply afresh every year.

On the export side, more facilities

export-oriented units. They can import second-hand capital goods, diesel generating sets, consumables and packing materials. The ban on export of sugarcane and khandasari sugar has been lifted. Peanut butter, jaggery, barley and cattle feed have been included under the OGL. This is likely to bridge the trade gap.

The export-import policy has received a mixed response. The Federation of Indian Chambers of Commerce and Industry (FICCI) President Ashok Jain has said that the policy has been formulated without keeping in mind the change in economic conditions. Associated Chambers of Commerce and Industry (ASSOCHAM) President Raunaq Singh welcomed it as a production and export-oriented one. *The Hindustan Times* took a basic stand: no export-import policy will be effective unless we overcome the problems emanating from the structural deficiencies in domestic production and management. *The Times of India* thinks it an ad hoc arrangement at having a manageable trade gap this year. *The Indian Express* feels that the policy does not liberalise the import of technology. "The country cannot achieve modernisation with liberal imports of machinery unless technology is liberally available too". *The Economic Times* forecasts it would increase the involvement of bureaucracy in decision-making on every issue, without laying down specific policy guidelines.

CRR

RAISED

The Reserve Bank of India (RBI) has raised the cash reserve ratio (CRR) of the commercial banks from 7 to 8 per cent. This has been done because the RBI feels that there is excess liquidity in the banking system which may lead to inflationary pressures. The estimates show that the excess liquidity in the banking system in the first week of April was around Rs 1,500 crores. The raising of the CRR would impound banking funds of around Rs 540 crores. The CRR is to go up in two stages—7.5 per cent effective May 27, 1983 and 8 per cent effective July 29, 1983.

The RBI has given a forewarning to banks that they should be ready to provide Rs 150 crores on concessional terms for a new scheme for providing productive and gainful self-employment to the Indian youth. RBI would also provide another Rs 100 crores for underpinning the bill discounting scheme and the Industrial Development Bank of India, for the purchase of commercial vehicles by state transport undertakings.

state electricity boards.

The RBI announcement has been appreciated because inflation, after dipping low, has again started moving up. The economic situation in the coming months is not very definite. Therefore, a flexible credit policy is the need of the day. If unfortunately we face another drought later this year, probably every weapon may have to be used to curb prices. However, if we are fortunate in having the monsoons, the monetary strings may be loosened to stimulate growth as it is easier to reverse the CRR and let extra funds flow into the canal. If the RBI, instead of raising the CRR, had raised the statutory liquidity ratio, the impounded money would have gone to government securities. It would have been difficult to convert it into liquidity if the needs of the economy warranted it. The RBI has adopted a wise policy in maintaining flexibility in its credit policy.

PAC REPORT ON IRRIGATION CRITICAL

The Public Accounts Committee (PAC) Chairman, Satish Agarwal, presented the report on 'Planning process and monitoring mechanism with reference to irrigation' to the Lok Sabha on April 4. The report was critical of the deliberations of the Planning Commission for the past three decades and highlighted the tremendous wastage of colossal sums of money. The long gestation periods of eight projects which were sanctioned during the First and Second Plans have been lingering for 15-20 years. The originally estimated cost of these projects was Rs 386.07 crores. This has now escalated to Rs 2,144.75 crores.

Pointing out the identified lapses in planning, the PAC suggested that the Planning Commission, before sanctioning the projects, should make sure of the availability of funds, technical personnel and indispensable inputs like steel, cement, coal, etc., which are scarce. Irrigation and power, being priority areas, the central agencies should ensure adequate allocations.

The report felt the need for a shift from major to minor irrigation, which can provide employment, promote involvement of farmers in execution, operation and maintenance of schemes. It recommended setting up of monitoring cells at state and project levels for concurrent evaluation and monitoring of projects.

Certain achievements of planned development were either ignored or undervalued by the report. Among the major achievements of planned develop-

ment is the role of Punjab which set an example with 85 per cent of its cropped area being under irrigation—the highest in the country. Now the stress is being laid on preventing wastage of water. India started its planned development with 22.60 million hectares under irrigation or 17.6 per cent of the gross cropped area. By 1980, the figures had escalated to 56.60 million hectares or 40 per cent of the total arable land. In these three decades, the country has also increased the use of the total available water resources from 20 per cent to nearly 65 per cent. This includes ground-water irrigation of more than 22 million hectares.

The National Agricultural Commission (1976) wanted a full irrigation potential of 113.50 million hectares to be achieved by 2025 A.D. However, the annual report of the Union Irrigation and Agriculture Ministry is more optimistic, and believes the set target could be achieved as early as the turn of the century.

J & K ELECTIONS COUNTDOWN TO COMMUNALISM

The Jammu & Kashmir Assembly was dissolved on April 18 in preparation for the state general election which will be held on June 5. The pity is that at a time when the country's atmosphere is charged with communal tensions, the elections in J & K are also taking a communal turn. The responsibility for this lies squarely on the shoulders of some political leaders in the state. Shortly after the election date was announced, an attempt was made to build an electoral alliance between the Congress (I) and the National Conference. While some members of the state PCC (I) led by the Party President, Mufti Mohammed Syed, were strongly opposed to the alliance, Rajiv Gandhi strove to bring the two parties together. The alliance, however, fell through and Chief Minister Farooq Abdullah was accused of indulging in "emotional blackmail" of the Centre by Muzaffar Hussain Beg, the Vice-Chairman of the People's Conference. He alleged that Abdullah was raising the issue of discriminatory treatment by the Centre with regard to funds and treatment of minorities on the eve of the elections to mobilise the minority vote and wrench concessions out of the Centre. He charged that earlier, when the Assam massacres had been going on, Abdullah had not protested. On the contrary, he had electioneered on behalf of the Congress (I) in the Delhi civic elections.

As a result of the coming elections, the political climate in J & K may deteriorate further. If Abdullah receives a clear majority, it would mean that the state is divided along communal lines. If, on the other hand, the Congress (I) wins, Abdullah may play on the sentiments of the Kashmiri Muslims, who make 97 per cent of the population in the valley, in order to stay in power. The Jamaat-Islami with its extremist programme and dangerous slogans may also make capital out of confusion, especially if neither the Congress (I) nor the National Conference wins a clear majority.

INDUSTRIAL INCENTIVES FORWARD POLICY FOR BACKWARD AREAS

The Industry Minister, Narain Datt Tiwari, announced in Lok Sabha on April 22 a package of concessions to attract industrial investment in backward areas and hoped that the new incentives would go a long way in their development.

The current scenario of India's industrial production looks gloomy. Industrial growth in 1982-83, as measured by CSO index of industrial production, was 4.7 per cent compared to 9.3 per cent in 1981. According to the Finance Ministry's annual 'Economic Survey for 1982-83', the production performance of the manufacturing segment was a mere 2.5 per cent. It is half the overall rate of 4.7 per cent.

The continued fall in the industrial growth rate throws a bad light on the economy's performance, which has suffered due to extensive power cuts, fall in export demand, incipient credit shortage and labour unrest.

Given this background, the announcement of concessions seems to be a timely and appropriate step. The Central subsidy on new units taken up in 'zero-industry' districts and special areas like the north-east has been raised to 25 per cent of the total investment with a ceiling of Rs 25 lakhs. Prior to this, the ceiling on investment subsidy was 15 per cent and Rs 15 lakhs.

For the purpose of central investment subsidy, backward areas have been classified into three categories: (a) no-industry districts and special regions like Assam, Jammu & Kashmir, Arunachal and Himachal Pradesh—15 per cent subject to a maximum 25 lakhs; (b) districts currently eligible for central subsidy excluding category (a)—15 per cent subject to a maximum 15 lakhs; (c) existing 246 concessional finance districts excluding those included in categories (a) and

(b)—10 per cent subject to a maximum 10 lakhs.

To speed up ancillarisation in backward areas, certain industrial areas would be recognised as 'nucleus' plants and the respective state governments would extend a composite package of assistance like exemption from sales tax liability and capital investment subsidy from state funds.

Tiwari, however, strongly denied the charge that the government was deviating from the industrial policy resolution of 1956. He defended collaboration with foreign firms for acquiring new technology in those spheres where indigenous technology could not be developed.

Despite the criticism, the industrialists and businessmen welcomed the scheme.

INDUSTRIAL RELATIONS BREAKDOWN

Industrial relations in India are becoming counter-productive. This is reflected in the increasing number of mandays lost. In 1982, the Year of Productivity, total number of mandays lost crossed the 100 million mark for the first time. The country lost 43.38 million mandays through strikes and lockouts last year. To this was added the staggering figure of 62.07 million mandays lost due to the Bombay textile strike. The annual report of the Union Labour Ministry says that these mandays were lost in 514 cases of work stoppage comprising 372 strikes and 142 lockouts respectively.

The breakdown for these two different kinds of labour action is not given in the report. However, there is a feeling that lockouts cause more loss than strikes. The supporting evidence comes from West Bengal, which accounts for the second-highest number of mandays lost in 1982. There the figure of lockouts was 40 times that of strikes. The textile strike in Bombay is an exception, not the rule.

The main reason for the deterioration in industrial relations is that the labour unions are highly politicised. The government is the biggest employer in the country and industrial relations are used as a means to change national and political alignments. Almost in every industry, every major political party has its own trade-union wing. Their working is governed more by the political leaders than the labour leaders. The decisions are taken more in the interest of the political party than of labour. This has not helped the working class in any way.

MOHAN, S.B. & N.V.S.

US-USSR RELATIONS FRESH INITIATIVE

Over the last few months, the rhetoric in US-Soviet relations became more and more harsh. US President Ronald Reagan called the Soviet Union an "evil empire", while Yuri Andropov accused Reagan of uttering "an outright lie" about Soviet missile deployment. But suddenly the situation appeared to mellow. The initiative was taken by Andropov in early May, when he offered the West equality of nuclear potential in both delivery vehicles and warheads on the European continent. He said that the Soviets would reduce the number of warheads on their medium-range missiles to correspond with the cut in the number of warheads on British and French missiles, and would have this arrangement cover medium-range aircraft stationed in Europe as well. This would maintain the present equality between the USSR and NATO both in medium-range nuclear-weapons delivery vehicles and in the warheads on them. Along with this offer, Andropov warned that "the one who will once again say 'no' to this proposal will assume grave responsibility before the peoples of the world".

The US apparently does not want to assume "grave responsibility". In a heavily-qualified statement, the US State Department responded that "we welcome this as a sign of progress" if "the Russians now recognise that warheads on launchers are the proper unit of account". A presidential commission asked to find means of deploying the MX inter-continental missile, has also recommended that the Reagan Administration should look for a "new approach" to the Geneva talks, which should emphasise a cut in nuclear warheads rather than launchers. The White House revealed on May 3 that the US would modify its proposals at the Strategic Arms Limitation Talks with the USSR before the negotiations resume in Geneva.

US-FRG

AVERTING A CRISIS

West German Chancellor Helmut Kohl is a friend not only of the US but of Reagan too. That is why he tried to avert an emerging row between the US and its West European allies during his recent visit to the White

House. Seven leading industrial nations—the US, West Germany, France, Italy, Britain, Japan and Canada—are due to meet at Williamsburg, Virginia shortly and the Europeans are worried that the US is thinking of tightening the screws on East-West trade again, due to the ideological war between Moscow and Washington.

The last time it tried to do so in the summer of 1982, when it attempted to block the planned natural-gas pipeline from Russia to West Europe, it created serious tensions in its relations with the Western allies. Some US officials are now proposing that NATO's Coordinating Committee on Export Controls (COCOM), a body created in 1950 to monitor and restrict the flow of strategic Western industrial goods to the East, should be revived and given the authority to examine the potential military use of any Western technology before it is sold to the Soviet Union.

Kohl told Reagan and other US leaders that West European nations were not very keen on this. He pointed out that a crisis would be touched off if the idea of punitive trade restrictions were to arise at the Williamsburg Summit. He emphasised that the Summit should deal with more global issues like high interest rates and the dangers of protectionism.

MIDDLE-EAST TALKS NO HEADWAY

April was a bad month for the Reagan peace plan. There was many a slip 'twixt the cup and the lip and King Hussein of Jordan who, after months of intense haggling, felt that he had won a mandate from the PLO to negotiate the fate of the West Bank and Gaza strip, saw the prize slip away at the eleventh hour. PLO leader Yasser Arafat backed out at the last moment and did not sign the final communique. Hussein had tried to convince the PLO that the Reagan plan was the best, but the PLO does not want anything less than an independent Palestinian state. There is evidence, however, that Arafat himself was not unwilling to accept Hussein's suggestions, but the PLO's Syrian-backed radicals played the last card.

On the other side, Israeli Prime Minister Menachem Begin too rejected the Reagan plan and made matters worse by announcing plans to expand 68 settlements in the West Bank and increase Jewish population in the occupied ter-

ritories from 30,000 to 50,000. This deprived Reagan of his best bargaining chip.

Shortly after the Hussein-Arafat talks broke down, a car bomb ripped through the US Embassy in Beirut, killing at least 47 Americans and Lebanese and injuring about 130 others. A pro-Iranian Lebanese terrorist group claimed responsibility.

President Reagan, however, was not to be deterred. He sent Secretary of State George Shultz to the Middle East for further negotiations with Israel and Lebanon. Although the wider aim of reviving the Reagan plan for a Palestinian-Israeli peace is very much in the picture, the immediate aim appears to be to persuade Israel to withdraw its forces from Lebanon. Shultz will find his task difficult, to say the least, because a large number of vital differences still remain outstanding between Israel and Lebanon.

On April 27, the Lebanese Parliament declared that there should be no Israeli military presence in Lebanon and no joint patrols. The status of Major Saad Haddad is also disputed. The Israelis insist that the Major, who is wholly under Israel's control, should command a special south Lebanon army. The Lebanese want Haddad only as a liaison officer between the Israeli and Lebanese armies.

CHINA-VIETNAM TENSION ON THE BORDER

On April 10, the Chinese Foreign Ministry handed the Vietnamese Embassy in Beijing a note accusing Vietnam of conducting armed provocations and intrusions along their common border. Vietnam responded two days later with a diplomatic note protesting 25 similar incidents by Chinese forces in the final week of March, and later the Hanoi Radio charged China of being "a thief crying 'stop thief'". The result of all these charges and counter-charges? Perhaps the most serious fighting between the two communist neighbours since May 1981, when tanks as well as artillery were involved in a clash in the Yunnan province.

Sino-Vietnamese clashes began seriously on April 16, although both China and Vietnam charged each other of harassment along the frontier since late March. On April 16, Chinese frontier artillery units in the Guangxi Zhuang

Autonomous Region opened fire on Vietnamese earthworks in response to what the New China News Agency (NCNA) charged were "armed provocations" by Vietnamese troops. The fighting spread to the Yunnan province by next day.

There was no evidence, however, that China might be planning a new invasion of Vietnam like the one it had conducted in early 1979. While the Chinese press insisted that the artillery shelling was purely in response to Vietnamese provocations locally, some Western diplomats in Beijing felt that the move was aimed at disrupting Vietnam's latest offensive against insurgents in Kampuchea and tying down Vietnamese forces, on the Sino-Vietnamese border. In fact, the official Chinese newspaper, *People's Daily*, acknowledged in mid-April that the border tensions were linked to Vietnam's drive against the Chinese-backed guerrillas in Kampuchea. It said that whenever Hanoi launched major "aggressive military operations" in Kampuchea, the Sino-Vietnamese border became tense because of "provocations" from the Vietnamese.

FRANCE

STRENGTHENING NUCLEAR FORCES

Around the time that NATO is trying to strengthen its conventional defences in order to avoid resorting to nuclear weapons in a war in the first instance, France has come up with a plan to strengthen its nuclear forces. According to a plan presented by French Defence Minister Charles Hernu, and approved by the Cabinet on April 20, France intends to invest in a seventh nuclear-armed submarine, a tactical missile system that can reach East Germany, nuclear air-to-ground missiles to be carried by Mirage and Super Etendard aircraft and a land-based mobile strategic missile system. The money for this will come from cuts in the conventional forces. Hernu's plan provides for cuts of 35,000 men between 1984 and 1988. France has traditionally insisted that it would use its nuclear forces only to safeguard the country's vital interests, but according to the latest plans, it appears that the country would take part in a "forward battle" in Europe. Why else would it build missiles that can reach East Germany?

NATO is probably pleased about the change in the traditional attitude, but it will certainly not like the cuts in the conventional forces.

POLAND

ANTI-WORKERS

"Working people have the right to celebrate May Day, however they see fit... If no one beats us, if no one shoots us, we will pose no threat." So said the leader of the outlawed independent trade union Solidarity, Lech Walesa—and the Jaruzelski Government took heed. As the May 1 deadline approached, so-called military operational groups went across the country, just as they had done before the martial law crackdown. Poland's military regime was obviously wary of the underground leaders of the banned Solidarity union, although it has been trying to show the world that things are returning to normal. In fact, to emphasise the fact, Walesa received permission recently to resume the job of electrician, which he had once held in the Gdansk shipyard.

But May 1 demonstrated that the confrontation between the Solidarity underground and the government is far from over. Security forces were called in to disperse thousands of people taking part in informal May Day rallies called by the Solidarity underground wing in most of Poland's major cities. Violence erupted again in Warsaw on May 3 (Constitution Day), when police firing water cannons and wielding batons scattered a peaceful march by about 8,000 people. Reports of violence also came in from Gdansk. In the wake of the confrontation, the police sealed off the US Embassy in Warsaw, thus blocking Poles from entering the complex.

Seen in the light of the Pope's impending visit to Poland, the fresh spate of violence assumes harmful dimensions. Both Walesa and the Roman

Authorities firing water cannons and tear-gas shells on Solidarity demonstrators. The usual government solution.

Catholic Primate, Cardinal Josef Glemp, had hoped that the papal visit would present an opportunity to prepare the way for a new dialogue. The Catholic hierarchy in Poland is opposed to anything that could threaten that hope.

Meanwhile, the Polish communist party is facing an embarrassing problem in a country which is primarily a workers' state. Since Solidarity began to function, membership in the communist party has dwindled by 25 per cent and is virtually non-existent at the factory level.

THAILAND

STILL A DEMOCRACY

Some felt that the electoral contest prior to the April 18 national elections in Thailand veered around an ideological debate over the shape of the kingdom's political structure. The question was whether Thailand was to have dictatorship or democracy, and at the superficial level democracy won. The government coalition partners, the Social Action Party (SAP), the Chart Thai and the Democrats, captured 221 of the 324 seats in the expanded House of Representatives. But at a deeper level, the main issue—the role of the army in running the country—has not been settled. There is likely to be another coalition government under the present Prime Minister, Prem Tinsulanond, a retired general, which will mediate between the country's civilian parties and the army.

What remains to be seen is whether senior generals will renew their efforts to seize the initiative following the defeat of their attempt to browbeat Parlia-

amendments which would have weakened civilian power and strengthened the army, recently. The amendments would have extended the legislative powers of the Upper House and allowed serving military officers and civil servants to hold Cabinet posts. The two provisional clauses providing for such a system were, however, due to lapse on April 21, when a new voting system, devised under an earlier constitutional change, was to have come into effect. To prevent these changes from taking place, the non-elected Prime Minister, Prem, called for elections on April 18.

Of the political parties, Chart Thai has been known to vacillate on the constitutional issue, and although the SAP and the Democrats believe that the amendments suggested by the military leaders represented a step back towards the days of military dictatorship, the SAP leader, Kukrit Pramoj, and the Democrat leader, Pichai Rattakul, showed signs of coming to terms with the army during the election campaign. The army, too, is divided over how far they should intervene in politics. While military leaders feel that the political parties should be given a chance, the Army Chief, General Arthit Kamlangek, believes that the parties are corrupt stooges of big business and the army should take a lead in pushing for political and social change.

PACIFIC REGION

BONE OF CONTENTION

The Pacific islands are not mere ciphers in a wide ocean: both the Soviet Union and China are seeking a larger presence in the region. It is significant that Chinese Premier Zhao Ziyang stopped first at New Zealand during his first Pacific tour since taking office. New Zealand's influence among the mini-states of the Pacific is well known, and so is its hostile stance towards the expanding Soviet influence. New Zealand, in fact, is very much a part of the Anzus military alliance with the US and Australia. During his visit to Wellington, Zhao endorsed the Anzus alliance despite the current differences between China and the US.

New Zealand and China share similar views on many international problems. For instance, both back the anti-Vietnamese coalition of Kampuchean resistance groups set up last year. Unlike the US, New Zealand has managed to avoid upsetting Beijing on the Taiwan issue and Prime Minister Robert Muldoon even promised to support China's bid for a seat on the Asian Development Bank. Zhao, on his part, tried to smooth

two countries regarding China's past testing of long-range missiles in the Pacific. Zhao assured Muldoon that China had no new and specific plans for missile tests and expressed support for a nuclear-weapon-free zone in the South Pacific.

PAKISTAN ISLAMICISATION IN EARNEST

One can see the shades of the Spanish Inquisition in the 15th and 16th centuries in modern-day Pakistan. Last November, a newly-born child, abandoned by its parents and thus presumed to be illegitimate, was stoned to death in Karachi. The reason for this horrible act of infanticide, President Zia-ul-Haq's plan to Islamicise Pakistan, which seems to have run away in the hands of maulvis.

Among the chief victims of Islamicisation are the women of Pakistan. The two bodies most directly responsible for the retrogression in the position of women are the Council of Islamic Ideologies and the Social Reform Committee. Pakistani women were not allowed to take part in the Asian Games and later the Pakistan Consultation Assembly, the Majlis-e-Shura, amended the law of evidence to make the word of one male witness the equivalent to that of two women. When women in Lahore protested against the latter act, they were charged by the police and many were injured. If the trend continues, women may lose the right to vote, drive cars (like in Saudi Arabia) and may have to study in segregated universities. The Women's Action Forum, an association of several women's groups, is fighting the various maulvi proposals.

Maulvi directions on how a 'good' Muslim should live have also created problems in Shia-Sunni relations. The Liaquatabad sector of Karachi has been torn by riots since late January, when a dispute broke out between the two rival sections over a mosque, which was subsequently taken over by the government and turned into a health resort. In sporadic riots, about 24 persons have died and many hundreds injured.

President Zia, however, has tried to control the problem through firm action. In April, about 44 persons were whipped, following their conviction by a military court for offences linked to violence. He also sent troops into Karachi to stop a march by 2,000 minority Shia Muslims in the Liaquatabad sector.

Zia's problem is that he is surrounded by lobbies and pressure groups like the radical Jamaat-i-Islami Pakistan, which

Pakistan receives a lot of monetary aid from Saudi Arabia, and the Saudi faction plays a retrogressive role in the Islamicisation process.

AFGHANISTAN

GIVING PEACE A CHANCE

A UN Under-Secretary Diego Cordovez, held separate meetings with the foreign ministers of Pakistan and Afghanistan as well as with a team of observers from Iran, in April. Russian experts were also conveniently available for consultation by both Cordovez and the Afghan foreign minister. Afghan guerillas were kept informed about the proceedings by the Pakistanis. The talks were adjourned in late April to allow the Pakistan and Afghan foreign ministers to consult their respective governments.

The scenario appears to be a preparation for the settlement of the war in Afghanistan. The two delegations are due to meet again in Geneva on June 16 for what is expected to be the last session of talks leading to a treaty. Both sides have made major concessions, and it is rumoured in Geneva that the Russians have accepted in principle a phased withdrawal of troops from Afghanistan. The Pakistanis, on their part, appear to have accepted that the flow of weapons to guerillas must be cut off. The Russians have also agreed that Afghan refugees in Pakistan and Iran should be allowed to return.

However, the question of what kind of government Afghanistan should have during and after a Soviet withdrawal does not seem to have been settled. Pakistan's suggestion is that the leader of Hezb-i-Islami, the most fundamentalist of the Afghan guerilla groups, Gulbuddin Hekmatyar, should join President Babrak Karmal's communist government in a coalition. A conflict may also arise over whether Russia should have a right to send in troops again in case of renewed fighting. If Russia gains this right, it would mean that Afghanistan has been absorbed into the Soviet sphere.

Pakistan and its ally, the US, however, appear to be more concerned about keeping the Russians out of Pakistan and are less interested in getting Soviet influence out of Afghanistan. In fact, there have been signs in the last few days that the Pakistanis are preparing the ground for a settlement. Five refugee newspapers have been closed down by Pakistan's refugee committee and the resistance groups have been ordered to move their headquarters out of Peshawar.

RUSSIAN SPIES GET THEIR MARCHING ORDERS

There was a spy in every closet, and French President Francois Mitterrand was at the end of his tether. He finally decided that enough was enough and expelled 47 Soviet diplomats, journalists and commercial staff from France on April 5 for spying.

France has become a special nest for the KGB in the last 10 years because of its advanced aeronautical and nuclear-weapons technology. Between 1971 and 1981, the number of Soviet citizens residing in France rose from 1,000 to 2,406 and the number of Soviet functionaries more than tripled from 200 to 700. According to France's Central espionage agency, the Direction de la Surveillance du Territoire (DST), about one-third of the Soviet functionaries are full-time agents of the KGB or the GRU, the Soviet military-intelligence service. The danger is that each agent can recruit at least 10 collaborators. Recently, Patric Guerrier, a French archivist, was caught passing classified documents relating to French energy plans to a Soviet attaché. According to a DST report, the KGB has penetrated about 30 per cent of classified French military and industrial technology. While former French Presidents had not taken action for fear of jeopardising France-Soviet relations, Mitterrand has little to fear from Russia because his relations with the Soviet Union are already chilly. Among the Soviet agents who were expelled were Nikolai Chetuerikov, the third-ranking diplomat in the Soviet Embassy, and Oleg Shirokov, Bureau Chief of the official press agency Tass.

This is the first time that a Western nation has thrown out so many Soviet diplomatic personnel since Britain expelled 105 Soviets in 1971. Recently, however, Britain threw out two Soviet diplomats and a journalist. The Italian Government, too, arrested the Deputy Director of the Rome Aeroflot office in March for obtaining microfilmed plans of NATO military positions in north-eastern Italy. Madrid also expelled a member of the trade delegation at the Soviet Embassy in March. There has been some speculation that Vladimir Kuzichkin, a senior KGB agent in Iran who defected last year to Britain, has had some hand in disclosing the names of other agents. The French, British and US intelligence sources, however, have denied the possibility of any link between the French crackdown and expulsions elsewhere in West Europe.

THE HITLER DIARIES: MUCH ADO ABOUT NOTHING

It was like reading notes left behind by a dull accountant," said a scholarly West German reporter of the recently unearthed diaries of the malevolent genius, Chancellor Adolf Hitler of Nazi Germany, who had helped to shape 13 of the most hideous years in human experience.

The authenticity of these diaries was endorsed by no less a person than Hugh Trevor-Roper, author of the celebrated *The Last Days Of Hitler* and an acknowledged historian of the Third Reich, who said, "I do believe the Hitler diaries are genuine." Said one of Europe's best-known graphologists, "There can be no doubt that these were written by Hitler."

And yet this "journalistic scoop of the post-World War II period" (as the diaries were dubbed by the *Stern* editors) turned out to be a fake. Sixty volumes of these handwritten, 8" x 12", artificial-leather bound, black-covered notebooks were acquired by a West German weekly magazine, *Der Stern*, in a way at best dubious. *Stern* reporter Gerd Heidemann, following a historical trail, traced the diaries to an East German town in 1980. The lead ran thus: Hitler was supposed to have kept a diary until two weeks before his death in 1945 in a Berlin bunker. In April 1945, as the Soviet army closed in on Berlin, the diaries and other private papers of Hitler were flown out of the city in an aircraft that subsequently crashed in East Germany. There, a Wehrmacht (the regular German army, not to be confused with the SS) officer appeared to have picked up the diaries and hid them in a hayloft—till they came into Heidemann's hands through frontmen.

The Hitler diaries created a stir through five continents and threatened to sweep away all notions and conclusions of scholars on the Nazi era and on Hitler. In the newspaper world, the Hitler diaries set off "a storm." *Stern* put up the diaries for sale and itself rushed excerpts to press, intending to bring out choice bits in instalments over an 18-month period. Press baron Rupert Murdoch, after getting the diaries authenticated, was equally hasty in buying up rights to the diaries for his newspapers in the US, Australia and for the prestigious *Sunday Times* of London. In the aftermath of the diaries being proven a fake, two top *Stern* editors resigned.

One could probably explain Trevor-Roper's rash judgment in pronouncing

the diaries genuine by the fact that *Stern* provided ridiculously little bits of the diaries for purposes of authentication by would-be buyers. Noted German historian Werner Maser was certain all along that the diaries were a fake. His reason: the Fuhrer was incapable of writing from January 1943 onwards as a result of severe shaking attacks. Other wary experts refused to take a final decision on the genuineness of the diaries till *Stern* provided more pages of Hitler's account. *Stern* refused. Even without providing more work-material, the purported fingerprints of Hitler on the diaries could have been compared with his genuine ones, which are available, thus establishing the authenticity of the diaries. It was Nazi hunter Simon Wiesenthal who came up with this sensible suggestion. But it was never followed up.

Anyway, experts had other ways to pronounce the diaries as fake. First, the paper used in the diaries was not obtainable till 1955; second, the synthetic material used for binding was not available before the end of World War II.

What was to be gained by the forgers who had overlooked such major details in an otherwise painstakingly-written voluminous diary? Ready Western money. Wiesenthal suggests another reason to repair Hitler's 'reputation' in history, Latin America-based Nazi 'big shots' could have authorised the 'manufacture' of the diaries. A glance at the diaries proves Wiesenthal's point. On the question of the Jews, the account contains virtually no reference to the extermination camps, no evidence that Hitler personally authorised the organised slaughter of the Jews, or even was aware that it was taking place. In fact, as a chronicle of evil, the diaries are strangely flat. According to the diaries, Hitler's reason for writing these accounts was to record "my own thoughts in the books so that I shall later be able to form an exact picture of certain events."

And his "exact picture" of certain events is "banal and cryptic, the mundane jottings of an unlettered man."

Excerpts

The English are driving me crazy—should I let them escape [from Dunkirk] or not? How is this [British Prime Minister Winston] Churchill reacting?

How on earth does [the Soviet Supremo Joseph] Stalin manage it? Always imagined that he had no officers left, but he did the right thing [in purging the officer corps]. A new command structure in the Wehrmacht is what we need, too.

ABBREVIATIONS

AIDS - Acquired Immune Deficiency Syndrome

ANTOR - Association of National Tourist Office Representatives

CAPSEM - Committee of Asian and Pacific Societies for Electron Microscopy

DRDL - Defence Research Development Laboratory

EARC - Economic Administration Reforms Commission

APPOINTED

Mustapha Niasse as PM of Senegal, by decree, following the February Legislative and presidential elections, which returned the Socialist Party to power

P.S. Bhinder, former Delhi Police Commissioner, as Joint Secretary in the Works and Housing Ministry

Subhash C. Tandon Inspector General, Central Industrial Security Force, as Delhi's Police Commissioner, succeeding Biring Lal, who "went on leave"

Richard Stone, former Senator, and a conservative Democrat, as US President Ronald Reagan's roving Ambassador to Central America

S.M.I. Aseer, Maharashtra Labour Minister, as President of Pradesh Congress Committee (I), by Indira Gandhi who dissolved the MPCC (I) headed by Gulabrao Patil after consultation with state CM Vasantrao Patil

V.S. Tripathi, Joint Secretary to PM, as her Adviser on Personal Staff, a newly created post, following his voluntary retirement from the IAS

AWARDED

The 1982 Third World Prize, instituted by the London-based Third World Foundation for Social and Economic Studies, to Dr M.S. Swaminathan, Director General of the Manila-based International Rice Research Institute

The Order of San Martin, Argentina's highest award, to Indian External Affairs Minister P.V. Narasimha Rao, in recognition of "not only Mr Rao's individual contribution to peace in the world, but of the role played by India in it"

The 23rd National Awards for Excellence in Printing, instituted by the Directorate of Advertising and Visual Publicity, to the *Tribune* (big newspaper category) from Chandigarh, *Hind Samachar* (regional language category) of Jullundur, *Mid-day* (medium newspaper category) of Bombay, *The Hitavada* (small newspaper category) from Nagpur. In the weekly and fortnightly sections, *Madhuri* (Hindi) bagged the first prize among Indian language publications while *India Today* bagged the first prize among English magazines

The Freedom Prize, carrying a cash prize of \$6,700, instituted jointly by the Swedish newspaper *Dagens Nyheter*, and the Danish newspaper *Politiken*, to Polish labour union leader Lech Walesa, in recognition of his "fight for human rights"

The Order of Australia, the second highest honour down under, to Nobel Laureate Mother Teresa for her contribution to the well-being of the poor and needy in many countries including Australia. She became the seventh non-Australian to receive the award

Pulitzer Prizes, America's highest awards in journalism, arts and letters, for 1982, to, among others, Alice Walker, the first black woman to win the prize for fiction, for her novel *The Colour Purple*, Russell Baker of *The New York Times* for his autobiography, *Growing Up*; Marsha Norman for her play, *Night, Mother*, Susan Sheehan for her non-fictional book, *Is There No Place On Earth For Me?*; the prize for musical composition to *Three Movements For Orchestra*, by Ellen Zwillich. Thomas L. Friedman of *The New York Times* and Loren Jenkins of the *Washington Post* jointly for their coverage of the Israeli invasion of Lebanon and its aftermath; Loretta Tofani of the *Washington Post*, the special local reporting award, Nan Robertson of *The New York Times*, the feature writing award; Bill Foly of Associated Press, the spot news photography award. There were 1,264 entries for the prizes, the 67th since inception.

The first prize in the West German Short Film Festival in Oberhausen, carrying an award of 5,000 marks (Rs 21,000), jointly, to Indian entry *Man versus Man*, directed by Shashi Anand, and

the Czech entry, *The Sunken World Of Gloves*, by Czech cinematographer Jin Barta.

The Population Action Council's annual Media Excellence Award to the *Pioneer* of Lucknow, being judged as having carried the best coverage in the developing world media on population issues. The Council is a Washington-based organisation. This is the third award being presented since its inception. Citations of merit went to *Dawn* of Karachi, and the *Bangladesh Observer* of Dhaka; the excellence award for the best international editorial on population issues to *The Daily Nation* of Nairobi

The 1983 Golden Wreath, accorded to the best poets at the annual Evenings of Poetry at the Macedonian resort of Struga in Yugoslavia, to Indian poet Sachidanand Vatsayayan 'Agyaye', from among 100 foreign and 200 Yugoslavian poets

The 1983 Dadasaheb Phalke Award, carrying a Golden Lotus, a cash prize of Rs 40,000 and a shawl, to veteran film-maker L.V. Prasad.

National Film Awards announced on May 2. Best Feature Film: *Chokh*, a Bengali film directed by Utpalendu Chakravarty who also won the Best Director award for the same film; Best Actor: Kamal Hasan for his performance in *Moondram Pirai*, a Tamil film; Best Actress: Shabana Azmi for her performance in *Arth*, Best Child Artist: Master Vimal for his role in *Aroodam*, a Malayalam feature film, which also won the Nargis Dutt National Award for national integration; Best First Film Of A Director: *Kann Sivandhal Mann Sivakum*, a Tamil feature film directed by Sreedhar Rajan; Best Feature Film On Family Welfare: Hindi film *Spandan*; Best Music Director: Ramesh Naidu for his score in the Telugu film *Megha Sandesham* which won for K.J. Yesudas and P. Susheela the Best Male and Female Playback Singer awards, respectively, Best Information Film: *An Indian Story* produced by Suhasini Mulay and directed by Tapan Bose, Best Book On Cinema: *Chalachitra Sameeksha* in Malayalam, written by Vijaya Krishnan. Mrinal Sen's *Kharij* was adjudged the Second Best Feature Film. The jury was headed by noted film-

RESIGNED

Bruno Kreisky, Chancellor of Austria and leader of the country since 1970, following poll defeat of his Socialist Party.

Shalibhai Patil, wife of Maharashtra CM Vasant Rao Patil, from membership of the Assembly from the Sangli constituency, to make way for her husband's election to the House.

VISITED

Samba Lamine Mane, Foreign Minister of Guinea-Bissau, New Delhi three days from April 23.

SCIENCE

Existence of first cancer-causing virus confirmed. Researchers in Duke University, North Carolina, USA, have confirmed the existence of the first cancer causing virus ever discovered. The researchers' isolation of the human T-cell leukemia verifies the work of Dr Robert C. Gallo, a scientist who discovered the virus recently. The T-cell leukemia is the most common adult blood cancer in Japan and has been found in the Caribbean Islands and south-eastern USA. Doctors were, however, not certain how the virus was transmitted.

Occultation witnessed. A rare astronomical phenomenon, called occultation, in which the bright Jupiter was shadowed by the moon and remained hidden for 70 minutes, was witnessed in north India on the night of April 29. Occultation is defined by scientists as the phenomenon of one celestial body passing in front of another and obscuring the latter. This was the second instance of occultation to occur during the year. The first on March 6 was not visible as it occurred during the day.

ECONOMY

India's per capita income in real terms, based on 1970-71 prices, was Rs 716 in 1981-82, a rupee increase from that in 1978-79. At current prices the per capita income increased from Rs 1,250 in 1978-79 to Rs 1,698 in 1981-82.

The USSR led the world in military spending and arms exports during the 1979-80 period. According to a report by the US Arms Control and Disarmament Agency, the USSR and Saudi Arabia were the only countries spending at least 10 per cent of their GNP for military purposes. During 1980, the Soviet Union spent \$ 188 billion on weaponry, compared to \$ 131 billion by the US. The USSR exported \$ 8 billion

worth of arms against the US \$ 6 billion. Total world military spending during the decade was \$ 595 billion annually. China in 1980 had the world's largest armed forces (4.5 million), followed by the USSR (4.3 million) and the US (2.1 million). India with 1.3 million stood fourth.

Indo-Soviet trade turnover last year amounted to Rs 2,514 crores in comparison with Rs 2,397.9 in 1981.

Excise duty concessions liberalised: Introduced last year, the excise duty concessions have been further liberalised to encourage production. The concessions will now be available to 71 commodities including soda ash, caustic soda, nylon-filament yarn, iron and steel products, dry batteries, fluorescent tubes, two-wheeler motor vehicles not exceeding 100 cc, tyres, tubes, agricultural tractors and boilers.

West German aid: West Germany will extend to India bilateral financial contribution totalling Rs 135 crores in the framework of development cooperation, and 13 crores worth technical assistance besides scholarships. The new financial assistance would be extended in the form of soft loans, with a maturity of 50 years at an interest rate of 0.75 per cent per annum while all technical assistance would be given in the form of grants. The West German Government has also offered 68 scholarships to candidates from India under its 1983 programme for which Rs 1 crore has been granted.

The Asian Development Bank (ADB) has decided to invest in equity capital of private or 'mixed' enterprises and in development finance institutions with the minimum and maximum investment in any enterprise ranging between \$ 1,00,000 to \$ 3 million. The Bank has set apart \$ 10-million initially for investment, but the amount will be enlarged as needs grow. It will, however, not try to seek a controlling interest in any enterprise, "except where necessary to safeguard its investment".

Record loans by IMF. The International Monetary Fund (IMF) has set a record for new loans in the year ended March 31, giving \$ 15.7 billion to countries in financial trouble. The previous record was for 1981 when loans totalling \$ 14.7 billion were made. The bulk of the new loans was to Mexico—\$ 4.5 billion.

Soviet crude for India: The Soviet Union will supply to India 2.5 lakh tonnes of crude oil additionally during 1983. This was agreed to during trade talks held in New Delhi between a Soviet delegation and the Commerce Ministry on April 22. The Indo-Soviet trade plan al-

ready provides for the supply of 2.5 million tonnes of crude and 2.3 million tonnes of petroleum products by the Soviet Union to India during 1983.

India's repayment of foreign loans with interest over the next 10 years will range from Rs 900 crores to Rs 1,100 crores a year, the projections being on the basis of loan agreements upto March 31, 1982. India's outstanding debt of foreign borrowings on December 31, 1982, stood at Rs 16,706 crores. Together with non-government, commercial and IMF loans, the debt liability was Rs 20,533 crores.

Tax relief. Finance Minister Pranab Mukherjee, on April 27, announced in the Lok Sabha tax relief to the tune of Rs 50.15 crores—Rs 40 crores in direct and Rs 10.15 crores in indirect taxes—in a year in the fresh taxation proposals of Rs 716 crores put forward in the 1983-84 budget. The relief would raise the uncovered deficit from Rs 1,555 crores to Rs 1,605.15 crores. In direct taxes, the finance minister said he proposed to exclude expenditure on travel by rail, motor car, ship, powered craft or aircraft from the ambit of the partial disallowances (20 per cent) of certain business expenditure. In indirect taxes, full exemption level of Rs 7.5 lakhs for small-scale manufacturers of 70 specified goods was proposed to be restored while retaining the upper limit of Rs 25 lakhs as revised in the budget.

China's new tax system. China, on April 28, took its first formal step to introduce a nationwide tax system for its increasingly decentralised economy. Under the new system, which will "extend industrial autonomy, boost managerial and administrative responsibility, break the iron rice bowl (the system of guaranteed employment), develop the economy and ensure state revenue", most state enterprises with retrospective effect from January 1, will stop ascribing all profits or losses to the state and pay a part in tax instead. Tax collection starts on June 1.

EVENTS

US artillery pieces for India. The US will sell to India several hundred 155 mm artillery pieces worth about \$ 900 million, US Under-Secretary of State for Security Assistance, William Schneider told the *Washington Post* on April 5.

Capitation fee: The Karnataka Government order providing for the abolition of capitation fee in a phased manner, was quashed by the state High Court on April 6, on the grounds that the order was issued without the authority of law and beyond the powers of the state.

Indo-USSR cooperation programme: India and the Soviet Union on April 8 signed a programme for cooperation in the field of purchase and sale of computers and electronics, under which the USSR will supply India with computers of the E-5 series, automatic processing of control systems and electronic components. India will sell to the USSR consumer electronics, computers, antennas, office equipment and computer software.

LDP loses Hokkaido to opposition coalition: Japanese Prime Minister Yasuhiro Nakasone's ruling Liberal Democratic Party lost the strategic Hokkaido Island in the north to a coalition of socialists and communists in the gubernatorial elections in 13 prefectures on April 12. A similar coalition also ousted the conservative incumbent governor of Fukoka in west Japan. Ruling conservatives, however, swept most other gubernatorial polls, including those in metropolitan Tokyo and Osaka and mayoral and local Assembly elections.

India-USSR sign shipping protocol: India and the Soviet Union on April 12 signed a new shipping protocol governing the flow of sea freight between the two countries, providing for water turn round of ships at each other's ports, two-way flow and repositioning of containers and recreation facilities for Indian ship crew waiting at Black Sea ports.

Planning Commission okays irrigation project: The Planning Commission approved the lower Dudhna irrigation project in Maharashtra, which provides for a 100,000-unit supply of 12,680 ha of irrigated area. Agriculture Minister Yashwantrao Chavan said the project would be completed by 1985.

Indo-Bangla exchange programme: India and Bangladesh on April 12 agreed to start an exchange programme of students, scholars and academics. The programme, based on the agreement of 1977 and renewing the one from 1961-62, under the pact India will offer 100 scholarships annually to Bangladeshi students, 74 for education and 26 for sports and culture, and Bangladesh will offer 100 such scholarships.

Finland has expelled North Korean Ambassador Yu Jae Han: After a long dispute, Finland on April 12 expelled North Korean Ambassador Yu Jae Han, after he had refused to leave the country in order to prevent Seoul from becoming the next victim of the nuclear proliferation and arms race, and the act of aggression against Finland and the Vienna Convention on diplomatic relations.

UP Government declares various services essential: The Uttar Pradesh Government on April 12 declared vari-

ous services in the Narendra Dev University of Agriculture and Technology, Faizabad, the Chandra Shekhar Azad University of Agriculture and Technology, Kanpur, and the Govind Ballabh Pant University of Agriculture and Technology, Pantnagar, Nainital, as essential services and has banned strikes in them.

New fingerprint law in South Africa: The South African Government has introduced a new law to fingerprint the country's 28 million people in an attempt to fight what it called "the total onslaught against South Africa". The Population Registration Amendment Bill, which was passed last year, proposes uniform identity documents for all race groups. The measure's significance lies in the fact that the government's monitoring powers over its citizens are greatly increased.

Three Soviet cosmonauts aboard the Soviet Soyuz-8 spaceship that failed in its mission of docking with the Salyut-7 space station returned to earth on April 22, nearly a full day after the docking was aborted.

Italian Government falls: Socialist leader Bettino Craxi on April 22 withdrew his party's support of Italian Premier Amintore Fanfani's coalition government in a move that made the government's fall inevitable. Fanfani's Cabinet, Italy's 43rd post-war government, is a coalition of the Premier's Christian Democrats, the Socialists, Social Democrats and Liberals. It took office on December 1, 1982. Socialists withdrawal of support deprives the party of its majority in Parliament.

UK explodes its biggest nuclear bomb: Britain on April 22 exploded its biggest nuclear bomb in several years at the Nevada desert site in west US. The device had an explosive force equivalent to 20 kilotons of TNT. The test came in the wake of Britain's plans to equip British submarines with US-built Trident missiles carrying atomic warheads.

SC refuses stay on Antulay's criminal trial: The Supreme Court on April 18 refused to stay the criminal trial of former Maharashtra CM A. R. Antulay before the special judge, Bombay, on charges of bribery and criminal misconduct in the discharge of official duty. The complaint had been lodged by Ramdas Samrao Naik of the BJP, who alleged that Antulay had received money from about 12 builders, some distilleries and sugar cooperatives for granting them undue favours. Antulay's counsel, K. K. Mehta, asked for the stay pending the disposal of three petitions admitted by Justice O. Chinnappa Reddy and A. B. Khanolkar on April 18.

US restrictions on Cuba's UN diplomats: The US has reimposed restrictions on the travel of Cuba's UN diplomats to an area within 40 km of New York City, for allegedly misusing "their freedom to travel by engaging in unlawful activities such as espionage". A 40-km restriction had been in force until 1977, when President Jimmy Carter lifted the ban as part of a broader attempt to seek accommodation with the Cuban Government.

Socialists win Portuguese elections: The Socialist Party of former Prime Minister Mario Soares triumphed in the Portuguese general elections on April 25, capturing 99 seats in the new Parliament and 36 per cent of the popular vote, but failed to secure an absolute majority.

Sweden recalls Ambassador to Moscow: Sweden on April 26 recalled its Ambassador to Moscow, Car de Geer, following an official report that six Soviet submarines had illegally entered Swedish waters last autumn. A government paper published from Stockholm accused the Soviet Union of sending the submarines to probe defences around military bases between September and November 1982.

US aid to Israel: The US Senate Foreign Relations Committee on April 28 voted to increase aid to Israel by \$425 million over the Reagan Administration's request, even as Secretary of State George Shultz toured the Mideast on his peace mission.

DIED

Gen J.N. Chaudhuri, 75, former Chief of the Army Staff and an internationally acclaimed authority on the deployment of armour, on April 5 in New Delhi, after a cardiac arrest.

Desmond Bagley, one of the world's top selling mystery writers, whose books have sold nearly 10 million world wide, on April 12 in a Southampton hospital in Southern England.

Gyula Illyes, 80, the "grand old man" of Hungarian literature, who achieved international recognition for his accounts of the political and social developments in Hungary, on April 15 in Budapest.

D.S. Desai alias Balasaheb Desai, 72, once regarded as the iron man of Maharashtra and one time strong contender for the chief ministership of the state, on April 23 in Bombay, of kidney trouble.

Buster Crabbe, 75, former Olympic swimming champion who made a film career as Tarzan and Flash Gordon, on April 24 in Scottsdale, Arizona.

ANIL PENNA

SPORTS

ATHLETICS

At the 3rd Rotterdam Marathon on April 9, the fourth-fastest time ever was recorded by Robert de Castella of Australia (the 1982 Commonwealth Games gold medalist), who finished in 2:08:37.0 sec, followed by Carlos Lopez (Portugal) and Rodolfo Gomez (Mexico). The world record holder and favourite for this race, Alberto Salazar (USA), finished fifth.

The 3rd London Marathon, run on April 17, in which more than 18,000 participated, was won by the Commonwealth Games bronze medalist, Mike Gratton (Great Britain), in 2:09:43.0 sec.

First among the women was the ace Norwegian long-distance runner, Grete Waitz, who equalled the world record time of 2:25:29 sec set by Allison Roe of New Zealand at the 1981 New York Marathon.

But Waitz was to enjoy the honour for only one day, because on April 18, at the 87th Boston Marathon, the first among women was American Joan Benoit, who simply shattered the record finishing in 2:22:42 sec. Second-placed Jacqueline Gareau (Canada) was 7 min behind.

The race was a clean sweep for the American men, who finished in the first three positions. Greg Meyer won in 2:09:00 sec to rank as the 9th fastest ever. Ron Tabb was 32 sec behind.

BOXING

Aaron Pryor (USA), who has held the WBA light-welterweight title since August 1980, defended it for the 7th time when he knocked out Kim Sang-Hyun (South Korea) in the 3rd round of their 15-round fight which was held in Atlantic city on April 2.

One of the longest-reigning world champions, Eusebio Pedroza (Panama), defended his WBA featherweight crown for the sixteenth time (a record in this division), with an unanimous points decision over the scheduled 15 rounds against Rocky Lockeridge (USA), at San Remo, Italy, on April 24.

GOLF

The seventh tournament on the Asian professional circuit, the Indian Open held in New Delhi which ended on April 3, was won by Junichi Takahashi of Japan, after a three-way play-off against Bob Tway (USA) and Hsieh Yu-Shu

Takahashi: Clinching the circuit.

(Taiwan). All three had finished on a 3-underpar, 285 strokes.

The richest tournament on the ladies PGA tour, the Mission Hills Country Club Open held at Rancho Mirage in California, was won by Amy Alcott with a 6-underpar 282. Beth Daniel and Kathy Wittworth both finished on 284 strokes.

The 47th US Masters Tournament, the first of the four major tournaments of the year, held at Augusta, Georgia, was won by Spain's Severiano Ballesteros (also won in 1980), who carded an 8-underpar 280. Americans Ben Crenshaw and Tom Kite finished joint-second, on 284. The players had to overcome gale-force winds in this rain-delayed tournament which ended on April 12.

The tenth and final tournament on the Asian professional circuit, the Dunlop-sponsored Japanese Open which ended on April 4 at Inamori near Tokyo, was won by American Larry Nelson, who finished one stroke less than the Japanese Masahiro Kuramoto.

The overall winner of the Asian circuit was the Taiwanese golfer, Lu Chien Sun.

The Tournament of Champions, played between those who have won at least one tournament in the last 12 months on the US-PGA circuit, at Carlsbad, California, which ended on April 24, was won by Lanny Wadkins, who now leads

this year's money table. Compatriot Raymond Floyd was second.

CYCLING

Hennie Kuiper won the famous one-day race, the 279-km Paris-Rubais Classic, on April 10, just edging out Gilbert Duclos-Lasalle of France.

Another one-day race, the Fleche Wallone Classic at Huy (Belgium), was won by the French ace, Bernard Hinault, just ahead of compatriot R. Rittinger.

FOOTBALL

In the final of the Asian Women's Championships held in Bangkok on April 17, Thailand beat India 3-0. The goals, all of which came in the last 15 minutes, were scored by Wannipa Yeep-racha (the skipper), Udorn Rajasri and Yupadee Chaisawad. Malaysia claimed the third place with a 5-4 victory on penalty kicks, after a goalless draw in regulation time against Singapore.

HOCKEY

Indian Airlines (IA) lifted the Bombay Gold Cup with a convincing 6-1 margin over Bihar Regimental Centre (BRC), Danapur, in the final in Bombay on April 17. Three goals were scored by Vineet Kumar off penalty corners; two, including a penalty flick, by the veteran Ashok Kumar; and one by Merwyn Fernandes. The consolation goal for BRC was scored by Kujur. IA had last won this cup in 1972.

The 12-nation 5th World Cup for women was won by Holland, defeating the surprise finalists Canada 4-2 at Kuala Lumpur, Malaysia, on April 23. The Dutch girls had earlier beaten the defending champions West Germany 2-0 in the semi-finals, and the latter also lost the 3rd place match to Australia. In the match for the 11th place, India defeated Wales 2-0.

Held simultaneously with the above championships in Kuala Lumpur, the Women's Intercontinental Cup was won by Republic of Ireland, with a 2-1 victory over Spain in the final on April 21.

E.M.E. Jullundur came from behind to outstroke Tata Sports Club 10-9 in the tie-breaker of the final of the Guru Tegh Bahadur Gold Cup Tournament held at Bombay on April 21. The score at full time was 11-1.

The fourth race of this year's World Championship calendar, the East African Safari Rally, was won by Finland's Ari Vatanen and his British co-driver and navigator, Terry Harryman, driving an Opel Ascona 400, at the end of 3,100 gruelling miles, in Nairobi on April 4. Hannu Mikkola (Finland), the current leader on the world championship points table, was second, followed by Frenchwoman Michelle Mouton, both driving Audi Quattros.

SHOOTING

At the 26th National Trap Shooting Championships held at Tughlakabad Ranges near New Delhi from April 24-26, the Army took the team title. In the individual section, contested under Indian rules, Raninder Singh (Punjab) took the title by scoring 74 out of a possible 100 hits, while Wasimur Rehman (UP) was runners-up at 73 hits.

The event under international rules was won by 17-year-old Mansher Singh (Punjab), who clinched the title with 179 out of 200, to easily beat Kunwar Man Singh, who scored 156.

In the women's section, Sharad Rastogi (UP) came first with 7 out of 25. Ramnesh Kaur with 5 and Usha Singh with 2 were second and third respectively.

CRICKET

India lost the five-Test series against West Indies 2-0. India lost the First (Kingston, February 23-28) and Fourth Test (Bridgetown [Barbados], April 15-20) and drew the Second (Port of Spain, March 12-17). Third (Georgetown, March 31-April 5) and Fifth Test (St. John's [Antigua] April 28-May 3).

India lost the three 1-day international series against West Indies 2-1. India lost the first (Port of Spain, March 8) and third 1-day internationals (St George's [Grenada], April 7) and won the second (Berbrice [Guyana], March 29).

TABLE TENNIS

The 7th Commonwealth Championships ended in Kuala Lumpur, Malaysia, on April 24. The break-up results.

Team:

Men Hong Kong (Hkg) b Nigeria; (5th) India (Ind) b Malaysia 5-0. Women: Hkg b Ind 3-0.

Individual:

Men (singles): Chiu Man Kuen (Hkg) b Chen Kongwah (Hkg) 21-14, 21-16, 15-21, 21-14, doubles: Chiu Man Kuen and Vong Lu Meng (Hkg) b Kamlesh Mehta and Manjit Dua (Ind) 21-16, 21-14, 21-11.

Wong So Hung (Hkg) 13-21, 18-21, 21-9, 21-13, 21-17; doubles: Mok Ka Sha and Chai (Hkg) b Yu Kam Kai and Hui So Hung (Hkg) 16-21, 21-12, 21-17, 21-15.

TENNIS

Following were the major international tournaments held in April:

The \$ 3,00,000 Monte Carlo Open held in Monaco, which ended on April 3, was won by the Swedish youngster, 18-year-old Mats Wilander, who defeated Mel Purcell (USA) 6-1, 6-2, 6-3 in the final. The doubles went to Balasz Taroczy (Hungary) and Heinz Gunthardt (Switzerland), with a 6-2, 6-4 win over Frenchmen Henri Le Conte and Yannick Noah.

On April 3, at Yokohama in Japan, the \$ 1,50,000 Bridgestone World Women's Doubles Championship was won by the top seeded Ann Smith and Kathy Jordan (both USA), with a 6-0, 6-1 victory over compatriots Billie-Jean King and Sharon Walsh.

Ivan Lendl of Czechoslovakia won the WCT Tournament, the \$ 3,00,000 Houston Championships, on April 10. The losing finalist was Paul McNamee of Australia 6-2, 6-0, 6-3. In the pre-quarter finals, Lendl had beaten Ramesh Krishnan (India) 6-0, 6-2, while Vijay Amritraj had lost in the 1st round to Bill Scanlon (USA), 3-6, 6-4, 6-1.

INCH BY INCH...

April 5, 1983: It was the last day of the rain-ruined Third Test at The Bourda, in Georgetown, Guyana, and India started its first innings in reply to the West Indies' total of 470, with the match reduced to a mere formality.

Sunil Manohar Gavaskar, who had been struggling on the tour with an aggregate of 53 runs from four innings, was quick to seize this opportunity to redeem his reputation, and went on to score an unbeaten 147—his 27th century. (It was his 154th Innings and 88th Test.)

With this he overtook the "greatest all-rounder ever", West Indies' Sir Garfield St Auburn Sobers' 26 centuries in 93 Tests (163 innings), to be second in the list of centuries in Tests, which is headed by the incomparable Aussie, Sir Donald George Bradman's 29 centuries, in a mere 52 Tests (80 innings) at the phenomenal average of 99.96.

Behind these three are Walter Hammond, Colin Cowdrey, Geoffrey Boycott (all of England) and current Australian captain Greg Chappell, with 22 centuries each.

was won by Wilander, who defeated Noah 2-6, 7-6, 6-4 in the final on April 10.

In the \$ 2,50,000 WCT Spring finals held at Hilton Head Island, South Carolina, USA, Lendl outplayed Guillermo Vilas of Argentina to win 6-2, 6-1, 6-0 on April 17.

Wilander, on April 17, won his third day-court tournament in a row with a 6-3, 6-2 win over Spaniard Sergio Casal in the final of the \$ 75,000 Golden Racket tournament on the Volvo Grand Prix circuit held at Aix-En-Provence, France.

Jimmy Connors (USA) won the \$4,00,000 Alan King-Caesar's Palace Classic held at Las Vegas for the second consecutive year, when he defeated Mark Edmondson (Australia) 7-6, 6-1 in the final on April 24.

The International Grand Prix standings, after the events ended on April 17: (1) Wilander, 914 pts; (2) Lendl, 752 pts; (3) Meyer, 699 pts.

WEIGHTLIFTING

Asian Games gold medalist Chen Wei Qiang (China) created a new Asian record when he jerked 165.0 kg in the 60-kg class, in Nanjing on April 15. The earlier record was 162.5 kg.

RACING

Steeplechase-racing history was created at the 137th Grand National Chase at Aintree in Liverpool on April 9, when 36-year-old Jeanny Pittman became the first lady ever to be the trainer of the winning horse, Corbierre, ridden by 23-year-old Ben de Haan.

Forty-one horses started this 4-mile steeplechase over 30 hurdles, considered to be the toughest horse race in the world, and only 10 finished. In fact, in the last seven races (1977-83), of the 262 starters, only 67 finished—a mere 25.5 per cent.

SQUASH

Nineteen-year-old Jahangir Khan of Pakistan, the reigning world champion, outlasted Gamal Awad of Egypt 9-10, 9-5, 9-7, 9-2 in the final to win an international tournament held at Chichester, England, on March 31. The women's title was won by Vicky Cardwell (Australia) defeating Sue Cogswell (Great Britain) 9-5, 3-9, 9-1, 9-4.

The prestigious British Open title was retained by Khan at Derby on April 14. In the final, he again outclassed Awad 9-2, 9-5, 9-1. The women's title was won for the fourth successive year by Vicky, who defeated Lisa Ople (Great Britain) 9-10, 9-6, 9-4, 9-5.

THE OSCAR STORY

Courtesy USIS

Courtesy USIS

Above: Statuette and the man: Groucho Marx with actress Erin Fleming after receiving an honorary Oscar in 1974.

Above left: Accolades for the cine queen: The winner of the 1974 Best Actress Award for The Country Girl, Grace Kelly, with William Holden.

Every year in the month of April, a cavalcade of luxurious limousines makes a bee-line for the Dorothy Chandler Pavilion in Los Angeles, where in a ceremony lasting several hours the Academy Awards, or 'Oscars' as they are affectionately known, are announced and presented. It is essentially a Hollywood roushaha but it does take in its sweep all the major English films made anywhere in the world. When the idea of the awards was invented in 1927 by Louis B. Mayer, the attempt was to dignify Hollywood, the *raison d'être* to redeem flagging fortunes of movies. However, the awards didn't come into their own until the mid-1930s when the 'Depression' hit the movie business also and Oscars turned out to be a great promotional device with which to compensate for the decline.

Still, the awards were more of a frivolity and hardly the treasure they now seem to be. As Jimmy Stewart, veteran Hollywood actor, told a reporter once, "It didn't mean this big deal at the bawx office. It was just a lotta friends givin' out some little prizes." Cary Grant went

one step further. He described the ceremony thus: "All right, Freddie March, we'd say, we know you're making a million dollars—now come on up and get your little medal for it!"

Today, though the awards generate considerable excitement, play an immense cultural role and have potential economic impact (they can mean a second life for a played-out release or give a movie its real break in the market place), it is highly dubious whether they can be taken to be guarantors of merit. Indeed, it's a coincidence if and when a stray statuette is awarded to the best of anything in one year. The Oscars are more like a sporting race where acumen at predicting winners is valued more highly than rooting that the best entry may win.

The trouble is that the members of the

Academy of Motion Pictures Arts and Sciences, whose nominations decide the winners, are mostly old Hollywood men with a staunch loyalty to that tinsel industry. They are sentimental and protect their own. Every year, therefore, it is a tussle between the head and the heart for them. If the latter rules, the accolades go to old Hollywood faithful, and giants not thus far honoured. In fact, big Hollywood blockbusters always garner a good many nominations even if they don't always win.

This has served to distance the New York film-makers and actors from their Los Angeles counterparts. For instance, Woody Allen preferred playing the clarinet at a New York club to going out to Los Angeles to receive three Oscars for *Annie Hall*. Said he: "I'd never go to an affair where I had to rent a tuxedo for the evening. And I'm not interested in an inanimate statuette of a little bald man. I like something with long, blond curls."

The statuette which Allen spurned is made of bronze, 13½ inches in height, weighing just over 8 lbs and covered with a gleaming finish of 14 carat gold, and worth £100. It was designed by Cedric Gibbons, an art director who was a member of the Academy at its inception. It didn't get its name until 1931 when Margaret Herrick, the then President Director of the Academy, spotted a copy at an executive's desk and exclaimed: "Why, he just looks like my uncle Oscar!"

The Academy has 12 branches and 3,953 members, and nominations in each category of awards are made by members of the corresponding branch. The voting for nominees is done on a weighted basis, with each voter listing his choices—five or fewer—in the order of preference. The differentiation between leading and supporting roles is made by individual voters, but movie studios use their advertising campaigns—expensive, lavish affairs—to help determine the suitable category for a performance in their films.

The general membership does not select the Documentary, Short Film,

A 'musical' win: Audrey Hepburn and Rex Harrison in award-winning *My Fair Lady*.

Foreign Language Film, Visual Effects, Sound Effects, Editing or Make-up awards, which are selected by various procedures through committees. While the committee for the Foreign Film category is the largest with 150 members, the largest member-group overall is of the Actor's branch, followed by a group called Members At Large, whose members do not belong to any specific craft category. The Academy membership is not automatic for the award-winners. Such directors as Sam Peckinpah, Elia Kazan and Orson Welles are conspicuous by their absence from the Academy, as also Gordon Willis, the cinematographer who shot *Godfather*. On the other hand Grace Kelly, despite more than a quarter century's absence from the screen, was a member of the Actor's branch.

An important feature of the Oscar night is its live telecast since 1953. The programme has figured regularly in the top ten ratings on American television.

As the awards are announced the spotlight is focused on both the winners and the losers, capturing their emotions. As the winners come on to the dais one by one to receive the awards, scenes from their films are screened after which they answer some questions and describe their feelings on winning the precious trophy.

This year's ceremony was watched by an estimated 400 million people in a

After four years of prevalent hosting by Johnny Carson—the legendary TV figure—this year's show had multiple hosts: Walter Matthau, Dudley Moore, Richard Pryor and hostess Liza Minnelli.

And now on to some highlights:

- William Wyler's *Ben-Hur* has bagged the largest number of Oscars ever (11), followed by *Gone With The Wind* and *West Side Story* (both 10) and *Gigi* (9).
- *Godfather II* was the first sequel to be a Best Picture winner.
- *The Exorcist* is the only horror film ever to be nominated in the Best Film category.
- Walter Brennan is the only actor to win three Supporting Actor awards.
- Herbert Ross' 1977 film *Turning Point* did not win a single award despite 11 nominations.
- Tatum O'Neal at the age of 10 was the youngest Oscar winner for Best Supporting Actress in *Paper Moon*.
- John Ford is the only director to win four Oscars.
- France has won the most Oscars—eight—in the Best Foreign Language Film category, an award that officially began in 1956.
- The only film in Academy award history to boast three Best Actor nominees, none of whom won, is *Mutiny On The Bounty*.
- George C. Scott created history by becoming the first actor to refuse his Oscar for the film *Patton* (1970). "Life isn't a race," he said, "and because it is not a race I don't consider myself in competition with my fellow actors for award or recognition."
- The 1982 Best Film *Gandhi* is the second successive British film to have won it, thus proving that the last year's Oscar winner *Chariots Of Fire* was not a flash in the pan.

Amit Agarwal, New Delhi

SPELLOFUN

Read out the following sentence to a friend and ask him to write it down. From 100, which is the perfect score for the test, subtract 10 marks for each misspelt word.

Here is the sentence:

"Outside a cemetery sat a harassed cobbler and an embarrassed oculist, picnicking on a desiccated apple, and gazing at the symmetry of a lady's ankle with unparalleled ecstasy."

Rajesh Sharma, Sonapat

On going through the constant flow of letters from our CCT club members, we find that they are an adventurous and imaginative lot. From exciting trips to Kulu Manali to photography exhibitions to quiz contests and group discussions—they have been participating in wideranging activities. Excerpts:

RIMC CCTimes Club, Dehra Dun Cantt (UP), went adventurous when its 18 members undertook a trip to Kulu-Manali and came back a knowledgeable lot. They can now hold their own on stuff like rock structures and landscapes. Next on their agenda are 'lecturettes' on what they saw during their trip.

CCTimes Club, Cuttack (Orissa), organised lively discussions on three vital issues of the day, namely, *The Assam Election and its Outcome*, *Relevance of Non-alignment* and *Situation in Punjab*. Three members of the club also wrote essays on the relevance of non-alignment.

CCTimes Club, Padrauna (UP), held a photography exhibition on uses of solar energy in collaboration with the Indo-German Friendship Society.

CCTimes Club of Vishal Leos, Gauhati, now a wing of the international youth organisation Leo Club Gauhati's branch Vishal Leos, organised a quiz contest in which eight groups, each of two members, participated.

CCTimes Club, Warangal, had a very active two-week schedule from March 26 through April 6. They had two GK quizzes; a group discussion on the *Dowry System and Right of Property to Women*, (in which 15 members took part); 'What's the Good Word'; and extempore speeches. The club plans to start 'Just A Minute' soon.

CCTimes Club, Luxmi Nagar, Delhi, came into being on Holi eve and decided on the aims, policies and functional structure of the club.

CCTimes Club, Trichur (Kerala), held a quiz competition and plans to conduct classes on Indian Economy and a debate on it.

CCTimes Club, New Krishna Park, Delhi, conducted a quiz contest and a talk on communal harmony.

CCTimes Club, Jaipur (Rajasthan), organised debates on the Asiad and NAM and is planning to start a weekly puzzle contest.

CCTimes Club, Banda (UP), organised a conference on the Assam problem in which lecturers were also invited.

Hotlines

BIRTHDAY TALK

Queen Elizabeth II Queen Victoria

Queen Elizabeth II, like many monarchs of Great Britain before her, has the unusual distinction of celebrating two birthdays a year—first, on the actual date of her birth which is April 21, and again on a June day set aside for public rejoicing. At the height of the British Empire, the occasion of King Edward VII's birthday posed a particular problem for India.

When Edward VII came to the throne on the death of his mother, Queen Victoria, his official birthday was usually marked in Britain on the last Friday in June. India, however, was instructed to celebrate on November 9, the new King's true birthday. The Viceroy, Lord Curzon, quickly replied that it would cause ceremonial difficulties. Queen Victoria's birthday on May 24 had by now become the traditional opening of the Simla social season, celebrated with a State banquet and military and air parades throughout India. The 1901 season began with similar pomp on New Year's Day. The sudden change to November, Lord Curzon argued, would make it impossible to hold the celebrations in Simla, and it would be too close to the January 1 Calcutta festivities. As a result, India was permitted to mark Edward VII's birthday on May 30.

Weather a major factor

Many years ago, Buckingham Palace officials tried to discover why a separate date was chosen for the observance of the sovereign's birthday, but the exact reasons for the decision have disappeared in time, although Britain's notoriously unreliable weather appears to have been a major factor in the change.

As far as can be traced, the birthdays of kings George II, III and IV (in the 18th and 19th centuries) were all celebrated on the correct days. So, probably, was that of King William IV, on August 21,

although there is a passing reference in a letter written by Queen Victoria's private secretary which infers that this was not always a convenient time of year for official celebrations.

In the early years of her reign, Queen Victoria preferred to spend her birthday privately with her family and friends. The public celebrations took place on later dates in May and July. By the end of her reign, however, her May 24 birthday and the official events coincided.

King George V conveniently celebrated his birthday on June 3, and by the time George VI came to the throne, June birthdays, whether actual or false, appear to have become an established tradition. He celebrated officially on the second Thursday in June. Queen Elizabeth II, born on April 21, changed the date to the second Saturday in June, when she takes the salute at the ceremony in London of Trooping the Colour.

ENTER, LEVITATE AND ARRIVE...

And now you can levitate to your destination—on 'Transrapid 06'. World's first magnetic levitation train, this 54-m, 120-ton 'magnetic flash' is wheelless and gearless. Costing around 85 million marks, co-developed by the Krauss Maffei Co and Messerschmitt-Bölkow-Blohm and promoted by the Bonn Ministry for Research and Technology, Transrapid 06, say experts, has no engineering equivalent anywhere in the world. It will be tested later this year at speeds of between 300-400 kmph—to set a world record for a vehicle in weight and size class. This magnetic levitation train is seen as a fourth means of transport—after the conventional railways, the car and the airplane.

Though it cannot be sold commercially until it has been thoroughly tested and approved, interested buyers in the US have already made themselves known.

And they have reasons:

- 'Magnetic flash' will have little impact on environment;
- It cannot derail nor can it produce emissions;

● As the train is not in contact with anything when in motion, little noise is produced and there is no wear-and-tear caused by friction between the vehicle and the track below it;

● Transrapid 06 has proved to be superior to competing French and Japanese systems;

● It would make connections between major cities 300-500 km apart faster than travelling by air.

If the French-and-British-built Concorde beat the Germans in air, 'magnetic flash' has upstaged them on land in a hovercraft-like fashion.

TAKIN' THE WRAP

Soon you will be able to get rid of food wrappers by eating them, hook, line and sinker! The British Food Manufacturers' Association has now patented an edible food container.

Professor Alan Holmes of a research centre at Leatherhead, Surrey, has come up with a protein wrapper that can be used as an inner wrapper. So foodstuff can be cooked without taking the wrapper off!

We now no more need laugh at our emaciated cows swallowing protein-rich wastepaper and election manifestos on the streets. Only, ours will be a planned paper protein intake.

Rajendra S. Keserwani, Nagpur

FORD YOU CAN AFFORD

You wouldn't catch the assassination-prone US President ever seated in so vulnerable looking a car outside the White House. But Ford Motor Co has manufactured its smallest-ever (7 ft 9 in long with weight just under 743 lb) four-wheel car, the Ghia Trio, for the recession-hit, unemployed American. Powered by a 250cc engine, this 'microcar' seats three people in an arrowhead configuration and does up to 50 mph at 70 mpg. Making its world debut at the Geneva Motor Show, it sure comes as bad news to Japan's export-fixated small car giants.

Adventure Ventures

OPERATION RALEIGH

Expeditions to find the mysterious lost white city of Ciudad Blanca in Honduras and pursue underwater exploration in the Bahamas are two of the 15 multinational projects commemorating the 400th anniversary next year of Sir Walter Raleigh's first settlement in America.

Operation Raleigh, launched by its patron, Prince Charles, in London on February 23, is the most ambitious world-wide project for youth ever undertaken. It will last from November 1984 to 1988, provide exciting adventures on six continents for 4,000 young men and women between the ages of 17 and 24, and is expected to cost around £11 million.

Among the numerous projects to be undertaken are diving off the Falklands; ecological studies in the Indonesian jungles, biology and archaeological studies of islands in the Indian and Pacific Oceans; and research on the rain forests in India, the Cameroons, Costa Rica, Indonesia, Panama, Brazil, Papua New Guinea and Zaïre.

Science, exploration and adventure are the main themes of the projects. Participants from vastly different backgrounds, including the handicapped and the deprived, will be selected worldwide to work together in multinational teams supervised by scientists and explorers.

The 'venturers' will also be concerned with establishing pumps in developing countries where water is badly needed.

Prince Charles expects there will be around 15,000 applicants for the 4,000 places. Britain and America will provide 1,500 each, and the remaining 1,000 will be selected from other countries.

Operation Raleigh is being led by Britain's most enthusiastic explorer, Colonel John Blashford-Snell. He said that the expedition would begin in November 1984, when a specially equipped exploration flagship would sail from Mersynside bound for North Carolina. On arrival in the US, the venturers would participate in the celebrations commemorating the founding of English-speaking America 400 years ago by Sir Walter Raleigh.

Accompanied by vessels and sailing ships from other participating nations, the flagship will then sail to the Caribbean, Central and South America, Antarctica, Australia, New Zealand, Asia and Africa on its voyage of scientific discovery and adventure.

It will cost £2,300 to sponsor each

young explorer on one of the four-month expeditions, and applications will be accepted towards the end of this year.

Operation Raleigh is being financed privately and already a large financial donation has been received from a former US Ambassador to London, Walter Annenberg. A complete fleet of out-

A HIMALAYAN RACE

"Seven times have I tried. I have come back and tried again; not with pride and force, not as a soldier to an enemy, but with love, as a child climbs into the lap of its mother." No better homage could be paid to the lofty Himalayas and, nestling amidst it, Mount Everest, which Sherpa mothers have described as a "mountain so high, no bird can fly over it".

And no less a person than the greatest-ever Sherpa mountaineer, Tenzing Norgay, said these words on May 29, 1953, the day he and New Zealand's Edmund Hillary scaled Mount Everest.

Today, almost three decades later, the Himalayas have lost none of their magnetic charm. Two Britishers may yet make headlines in their attempt to run the entire length of the Himalayas—from Darjeeling in India to Rawalpindi in Pakistan. British athletes Adrian Crane and his brother Richard are helping to raise funds for the Intermediate Technology Development Group (ITDG), a charity that advises developing countries on the selection and use of the most effective and economic tools and equipment for village and rural communities. ITDG al-

board motors and \$3.3 million worth of canned and dried food has also been donated.

Colonel Blashford-Snell was responsible for the highly successful Operation Drake, a two-year round-the-world expedition in 1978 in which 400 young people from 27 nations participated.

(Further information from: Beth Barrington Haynes, Neilson McCarthy, 25 Bruton Place, London W1X 7AB).

On The Lighter Side

"You say your mother-in-law threw a chair at you?" said the magistrate.

"Yes, sir."

"Then your wife threw a table at you?"

"Yes, sir."

"And what made you leave the house?"

"I saw my daughter looking thoughtfully at the side-board."

First: I wish my wife wouldn't talk so much about her last husband.

Second: Last husband! Forget it, mine is always talking about her next!

At a murder trial, after a 24-hour debate, jury members returned to the jury box. Just before the verdict was delivered, the foreman turned to the judge and said: "Your Honour, may we ask a question?" Judge: "Of course, speak up."

Foreman: "Well, before we pass the judgment, we would like to know if the defendant prefers AC or DC current."

"I was simply historical with laughter."

"Hysterical, darling—not historical."

"No dear, historical—I laughed for ages."

Doctor: I regret to say that the cheque you gave me last week has come back. Patient: So has my fever.

Husband: Suppose I break off our marriage? Will you take it to heart?

Wife: No, darling, I will take it to court.

At a wedding reception, Mr Sethi said to Mr Vij, "Now let me present my wife to you."

Mr Vij: "No thanks, I've got my own."

Kum Kum Joshi, Dehra Dun

In a section of the city of Beirut still burning from the ravages of war, a battle-scarred people see Attenborough's *Gandhi* on the screen and convulse intermittently into tears of grief or ecstatic applause. Their own recent agony is flooding back to them with a vividness that touches their wounds—still raw.

This is what is happening to all those who have known war and violence. Gandhi's message of non-violence infuses in them a new hope that an alternative exists to the holocaust the modern world is moving towards; Gandhi's perpetual fight against tyranny inspires men of spirit and shakes those who have lost it; his superhuman discipline and selflessness awes and overwhelms all. "An eye for an eye makes the whole world blind"—Gandhi's message of non-violence becomes more meaningful in a world torn by violence and strife and threatened by nuclear war.

This world-wide recognition, indeed, has turned the Mahatma into a cult hero. There are foreigners who want to come to India on special Gandhi tours. One such bunch of foreigners from Holland is already here on a sojourn called 'In the footsteps of Gandhi'. Besides dutiful pilgrimages to Porbandar and Ahmedabad, their itinerary also includes Agra and Jaipur! Mrs Gandhi has been saddled with a great outpouring of letters asking her all sorts of questions about the Mahatma prompted by the film. One of these information-seekers happens to be Lech Walesa, the leader of Poland's outlawed independent trade union Solidarity.

Gandhi's autobiography is now selling as if it were some special bargain at a sale. The average annual sales of 25,000 English edition copies have been completed in half that time and Navjivan Trust, the sole publishers of the book, are printing as many more copies to meet the demand. Foreign publishers are requesting permission to publish the book on royalty. An American and a British firm have already got the go-ahead. While Spanish and German translations were allowed even earlier, now Portuguese, Italian and French firms have expressed a desire to translate the book in their respective languages. The US and Canadian rights to the \$22-million movie have been bought for an astronomical figure, as yet undisclosed, but it could be anywhere between \$1 to \$10 million.

It is interesting to note the specific responses of people of various countries to the film. Even as the diehards in Pakistan lock horns with the liberals there as to whether the film should be banned

Above: Gandhi with freedom movement leaders: Crisis of conscience; left: Gandhi on the charkha: Practising his preachings.

because of a "distortion of Jinnah's role and life" in it, many Pakistanis have already seen the film on the video, Jinnah or no Jinnah. In America, people have waited in line for three hours to get a ticket. In fact, an overnight American follower of Gandhi, Leslie Cole, was sentenced to prison as the movie moved her enough for her to refuse to wear her navy uniform and do her duties. Apparently, she would no longer have anything to do with anything that is concerned with war. A 32-year-old Australian, Thomas Alac Weber, who has a thesis on Gandhi to his credit, paid tribute to his hero by traversing the same trail of the Dandi March on the same day—March 12—when Gandhi had undertaken it way back in 1930. He walked the 241 miles between Sabarmati Ashram and Dandi over 25 days. The Indian community in South Africa decided to raise about Rs 40 lakhs to contribute to the Tolstoy Farm Gandhi started there. In Stockholm, nobility, royalty, diplomats and celebrities crammed themselves in an auditorium at the premiere of the film.

In his own country, *Gandhi* enlightened many about their own history. While it made the older generation remember how things were and what they had become, for the younger generation a very significant slice of time was resurrected. One could also see the extraordinary spectacle of literature on Gandhi being sold outside theatres. Attenborough deserves every Indian's gratitude, in fact. For he has made meaningful to an average Indian a man whose name in contemporary India was

brought up mainly by politicians during election time. The elite of this country, who would otherwise have never thought of the man, are now falling head over heels among themselves to flaunt their opinions on Gandhi and the film at cocktail parties. The runaway success of *Gandhi* has made even our TV men sit up—recently the Indian documentary *Mahatma* which was largely ignored so far was screened on the national network.

If Gandhi the man will be treated by history as an immortal, the eight Oscars the film has been honoured with will ensure for *Gandhi* a permanent place in the world of celluloid, too. The awards are going to further induce many more people to see the film.

But not everyone is pleased with the film. Many distinguished commentators have criticised Attenborough's *Gandhi* as very different from the real one. It should be noted, however, that we remember heroes and historical figures only for their particular acts of heroism. What Hitler had for breakfast is hardly as relevant to people as what he did to affect their lives. Moreover, condensing the life of a man as momentous as Gandhi, to three hours necessitates the leaving out of several important aspects of his life.

As for the question everybody has asked as to why this film was not made by an Indian, the answer is not difficult to deduce. As Attenborough's travails while getting finance for his film make clear, no 'right-thinking' Indian producer would have staked his money on it. Anyway, you can't make a film on a subject you don't feel deeply about. Attenborough did. He toiled for 20 years. Which Indian director would have done so? Satyajit Ray has already said that he wouldn't have liked to make the film as it is too recent history.

True Dreams

The moon was throwing its silvery beams...

On me and my sleepy mind;
The stars twinkled in my dreams.
They sparkled with a silvery hue,
To make my wonderful dreams come true.

My slumber and laziness I did quit,
And toiled hard to achieve my goal;
Opportunities and success kissed my feet...

They shone like a drop of dew
I found my dreams really came true.

EAST STREET Rock Tidings

A NEW Indo-American raga-jazz-rock fusion group is all set to make waves on unbounded musical shores. The band is Ji Whiz who recently made a grand debut appearance at the imposing Kala Akademi amphitheatre in Panjim, Goa, on March 25.

Ji Whiz comprises Dinshah Sanjana (keyboards), Leslie Louis (guitar), Sanjay 'Storms' Swamy (electric bass), Ranjit Barot (drums), Sandhya Sanjana and Prem Farid (vocals)—all from Bombay—and Dallas Smith from San Francisco on lyrico, saxes and flute.

"This band," affirms Dallas, "has the greatest potential for East-West fusion, as the musicians are steeped in both schools of music." Dinshah, Sanjay and Ranjit all play the *tabla*, Sandhya sings Hindustani classical vocals while Dallas has been studying Indian *bansuri* for the last 10 years at the Ali Akbar Khan School of Music in California. The band can present a complete set of Hindustani classical music on the same platform.

Whatever their future achievements, Ji Whiz's current concoction of jazz-rock-Latin-funk and reggae is heady brew. The band are a tight outfit and can render classy versions of pop hits as well. Some of Ji Whiz's memorable compositions are the Dallas originals *Sneaky Pete's Shuffle*, *Good Fun Bro* and a combination of the samba and the bossa nova entitled *Sambossa*—and

Ji Whiz in action.

Dinshah's *Come Now, Sidney's Samba, Silent Desert* (a joint composition with his wife Sandhya) and yet another *Song For Amba* dedicated to their eight-month-old daughter.

Melody, Bombay

THEATRE Tughlaq

The air is rent with the blood-curdling screams of unsuccessful conspirators and loud groans of the weary populace of Delhi, forced to march *en masse* to Daulatabad, as the terrible Sultan Muhammad bin Tughlaq comes alive after 600 years and once again haunts the Delhites—this time in the Kamani Auditorium!

The blood-thirsty tyrant of the Delhi Sultanate was brought to life by Girish Karnad in the play *Tughlaq* written by him and staged by the National School of Drama (NSD) Repertory Company in April-May. The direction was provided by E. Alkazi, a celebrated personality of the theatre-world and former Director of the NSD. Incidentally, *Tughlaq* was also staged in London in the Festival of India.

The play throws light on the many facets of the Sultan's complex personality—his idealism, lofty visions, statesmanship, his cunning and guile, suspicious nature, violent temper bordering on insanity and his ruthlessness. It also traces the development of Tughlaq's character from his youth—when he was bursting with enthusiasm and

Courtesy BIS

Above: Salman Rushdie; left: Manohar Singh as Tughlaq.

high ideals—to his middle age when all his hopes and aspirations lie shattered due to the failure of his schemes, making him a desperate, embittered and highly suspicious man, surrounded by court intrigues and conspiracies.

The star performer of the play was Manohar Singh, chief of the NSD Repertory Company, who stole the show with his brilliant portrayal of Muhammad Tughlaq. An established stage actor, he has recently received the 1982 Sangeet Natak Akademi Award for acting. Other laudable actors were Surekha Sikri, who plays Tughlaq's stepmother, Yuvraj Sharma as Aziz and Anang Desai as Barani.

*Hemendra S. Bartwal,

PEOPLE

Salman Rushdie

Salman Rushdie, the much celebrated author of the novel *Midnight's Children*, was in India recently on the invitation of the British Council.

Wherever he went in India, he was besieged by questions on his book. Fortunately, that is one subject he doesn't seem to tire of. "I always had the book in mind," he said, "but I was afraid to start on it because with this kind of a book, where you draw on your childhood period and past life, you get only one chance. If you fail to bring it off, the damage is irreparable and you can never go back to it again. I was extremely careful with it and kept on

writing and rewriting it. Though I did a great deal of background reading for it, what began to fascinate me was the tricks memory begins to play on you once you start remembering past events because what lingers in your mind is not borne out by history.

"So I went ahead and put down impressions of events as I remembered them even if they were a distorted reality. I saw it all through what I call the broken mirror or cracked glass of memory." And the result was extraordinary. More than 40,000 hard covers and a quarter million paperbacks of *Midnight's Children* have been sold besides it being translated in various languages.

Before coming here, Rushdie completed another novel named *Shame* which will be published in September this year and will be quite a contrast to *Midnight's Children*. "It's a very bitter book about Pakistan," Rushdie says.

Over the years, Rushdie has taken up cudgels on behalf of the discriminated coloured minority of Britain. In a recent TV programme for which the BBC unsuspectingly gave him full editorial control, he unleashed an attack on the white majority that had it reeling and caused heated debates. "Who wants to live in England," Rushdie says, "I am doing so only because that country allows considerable freedom of expression."

QUIZ CONTEST-12

WIN Rs 24,000
IN PRIZES
EVERY YEAR
WIN Rs 2,000
A MONTH

- Between which two places did the first telephonic conversation take place?
- What is the study of poisons known as?
- Who wrote the *Arthashastra*?
- What is the birthplace of Shakespeare?
- Who is the first Indian to have won an Oscar?
- At what speed does an aircraft break the sound barrier (in ft. per sec only)?
- What was Tunisia better known as in ancient times?
- Who won the Pulitzer Award for international reporting this year?
- Senator John Glenn has formally declared himself a candidate for the 1984 US Democratic presidential nomination. The Americans and the world remember him for something else too. What is it?
- Name the one-man commission set up recently to review Centre-state relations.

HOW TO ENTER

- Print the answers neatly in capital letters along with your name, age and address.
- You may send in any number of entries, but each must be numbered accordingly and accompanied with its respective COUPON.
- Though all your entries will be included in the draw of lots, you will be entitled to only one prize—the highest in case you're getting more than one.
- The decision of the judges is final and binding. No correspondence will be entered into.
- Closing date for the three contests: June 25.
- Address your entries to: The Editor, Career & Competition Times, 10 Daryaganj, New Delhi 110 002.
- Solutions to this issue's contests will be published in August.
- Solutions to SPORTS QUIZ-18, KENWORDS-18 and CCTIMES QUIZ CONTEST-10 on page 94.

BY NAROTTAM PURI

WIN RUPA PAPERBACKS

- Does a batsman get any runs if he hits the ball twice?
- How many new Pak players got their 'Test Cap' against India in the recently concluded 1982-83 series?
- If both the umpires call 'one short' for two runs taken, does the batsman get any runs?
- How many times has India participated in World Cup Football?
- Of which famous Brazilian football club was Pele a member?
- Has table tennis ever been included in the Olympic Games?
- Who donated the Davis Cup?

BANK RECRUITMENT PROBATIONARY OFFICERS/CLERKS

**"Specialised Training in NSB
Regular/Correspondence Courses has proved
to be the guaranteed way to secure jobs in
Banks as Probationary Officers & Clerks."**

- says Editor, Citylight, Bombay.

**If you have applied to State Bank of India
or any Nationalised Bank Boards, for
PO or Clerical Post, join our Course now.**

Banking: A Rewarding Career:

Nearly 2500 Probationary Officers are recruited every year by Banks in India. This avenue of direct recruitment as Probationary Officers in Banks offers a promising career for bright young people today. Any graduate between 21 and 28 years can apply for the post. The job brings a handsome remuneration, security of service and job satisfaction. The work content is rich and varied. And, after nationalisation, Bank jobs have acquired a new status because now the Banks have taken upon themselves the responsibility of building a better India. Today, in our Banks, our social ideals find a dynamic expression. Bank jobs, therefore, offer the opportunity and challenge to participate in shaping our country's future.

Our Professional Commitment

We coach in regular Courses at Bombay, Pune and by POSTAL TUITION throughout India for objective and descriptive test of PO exams. All subjects - 1) Reasoning (verbal, logical, non verbal) 2) Quantitative Aptitude 3) General Awareness and Current Affairs 4) English Comprehension 5) Essays, letters, precis-writing - are covered exhaustively. Specialised practice books on all subjects covering thousands of typical and actual exam questions are supplied in the Course. These books are not sold to others.

Success Earned is Success Deserved:

We are just a few years old but our successes have been noted across the country. Help and recognition have come from everywhere and in abundance. Test after test, hundreds of our students join the 20 Nationalised Banks, State Bank, Associate Banks, LIC, GIC, ECGC as Officers. The subjects, syllabus, pattern of tests and examining body (NIBM) for all these exams are same. Naturally we have a single common BRPO course for all these exams. Success oriented students join the Course well in advance of the test and benefit by our step-by-step and exhaustive coaching. Admissions are open round the year but the number of admissions is limited to the number of vacancies declared by Banks.

Selection on Merit through Competitive Exams:

When vacancies of Probationary Officers/Clerks are declared at intervals of almost every three months by one Bank or another, large numbers apply for them and appear for the intensely competitive exams based on general intelligence tests. Standards of evaluation are most rigorous and impartial. The percentage of success is lower than 0.5%. In 1979-80, from a total of 5½ lakh applicants, 2500 were taken as POs by Banks. Therefore, every single additional mark that you can get becomes important. A provenly competent, specialised and thorough coaching becomes a MUST.

NSB's Faith in Specialisation:

National School of Banking, head quartered at Bombay, was founded a few years ago as a specialised institute providing coaching mainly for BANK RECRUITMENT exams - of POs and Clerks. It has grown rapidly and is now the largest pre-recruitment training institute in the country. Our continuous research and on-going study of objective and descriptive exam question papers have contributed to our present pre-eminence as the central institute for BANK RECRUITMENT training.

The entire course materials and books are supplied on urgent basis in large instalments to those whose exams are scheduled soon.

**JOIN NOW AND PREPARE FOR A
RICH AND REWARDING CAREER.**

The Management Page

is now a special feature in
THE ECONOMIC TIMES
Every Wednesday & Saturday
covering eight Management areas.

| Wednesday | Saturday |
|---|---|
| First Finance Management | General Management |
| Second Marketing Management
(including sales & advertising) | Information Management
(including systems & communications) |
| Third Legal Management | Taxation Management |
| Fourth Production Management
(including materials management) | Personnel Management
(including manpower development) |

The Management Page raises issues, presents techniques and approaches studies the actual experience of decision makers at all levels and deals with specific problem-oriented situations in all management areas. Mainly written by managers, the articles are brief, practical and frank. Principles emerge wherever possible from the way specific problems are handled.

Plus three extra pages on these two days, focussing on many a sector of the economy - industries, commodities etc

THE ECONOMIC TIMES

A paper for decision-makers

Published simultaneously from New Delhi, Bombay & Calcutta

San The Bomb
The world began with "Adam" and should not end with "Atom" (*Current Events, Arms Race in Defense, Defense, and China: Going Nuclear*, May '63). Although nuclear energy has opened new vistas for human progress and prosperity, many people think of it with horror. This atomic energy was first used for the destruction of Hiroshima and Nagasaki in Japan in August 1945. Since then many destructive bombs, such as the H-bomb, have been produced. However, there is a better side to the picture. Atomic energy can also be used for the benefit of mankind. Nations worldwide should make full use of the talents of their nuclear scientists for the advancement of their economy and technology and to augment their natural resources.

Mocking Gandhi
I protest against the view expressed in *The Freedom Movement* (May 1963) that "the coming generations

Gandhi is Richard Attenborough's noblest effort to present a true picture of this great man. Today, the younger generation has a very vague idea about Mahatma Gandhi. The so-called followers of Gandhism—our politicians—have exploited Gandhi's name for their petty political ends and have contributed to the misinterpretation of the 'naked fakir'. Coming at such a time, the film is bound to prove a great boon for all those who wish to understand this great personality.

Gandhi is a message to the whole of mankind - an epitome of the man's entire life. To one who sees it, non-violence holds irresistible appeal.

Hello Folks (April '83) provided the solution for nearly all the problems of a human being. The main problem with each one of us is that we always try to solve ourselves or problems by trying to solve them by facing them. But the best way to solve away the problem is to turn it into a non-problem. Don't worry.

Furthermore, the inclusion of Gandhi and the Indian Freedom Movement in competitive exams has enhanced their value as marks-fetching subjects only, not as heart-touching history. The lower academic syllabus still lacks full courses on Gandhi and his contribution and the freedom fighters; this makes the coming generations evaluate them and their sacrifices as "the need of a bygone era".

Prize-winning Letter: Rs 25

Deepak M. Tongaonker, Baroda

The prolonged Bombay textile mill-workers' strike has become a burning problem for Maharashtra. Chief ministers come and go, but this issue goes on—as complicated as ever. Trade-union leader Datta Samant has met with utter failure against the stubborn attitude of the millowners. The latter own a number of enterprises in other industries. Thus, the closure of the textile mills for some time is not going to affect them: they can easily make up for the losses here by raising, marginally, the prices of their products in other industries. Samant continues to stick to his militant stand in pressing for the acceptance of the demands which, on the whole, seem rather excessive.

different from those claimed by Samant.

The worst sufferers in this battle are the poor millworkers who can hardly afford to go without a job for such a long period.

Sanjay S. Shanbhag, Karwar

CCTimes is the first magazine of its kind that explains in detail about how to take notes. (May '83). Please publish more of such articles.

Ashok Kumar Gupta, Abu Road

H. Jesse Kochar's feature, *Careers: Merchant Navy* (May '83), though well-written, has a few inconsistencies. Hansa Line, the 'well-known foreign shipping line', has now closed down due to recession and the Bank Line is a British shipping company and has no connection with Hong Kong.

Ladies, too, are recruited as nurses and lady welfare officers on passenger liners. Again, a majority of the radio officers are not from the Indian Navy—only electrical officers are from the Indian Navy. In fact, most radio officers are taken in as 'trainees' from St Xavier's Institute, Bombay, after passing their Second Class Exam.

And 75 per cent of the net earnings cannot be drawn in foreign exchange by the seamen. The present rules permit foreign-exchange withdrawals only for those periods when the ship is in foreign waters. If a foreign-going Indian ship spends one month of its four-month voyage in foreign waters, then the officers are entitled to one month's wages in foreign exchange.

Capt D. Gautama, Bombay

[illegible]

Hello folks...

The history teacher was giving a lesson on Mahabharata to Class VI students. At the end of the lesson he asked a student, "How many brothers were the Pandavas? Name them." The student began thus, "One was Bhim, the second was Arjun, Nakul was third, there was a fourth brother too, and I have forgotten the fifth one."

Then there was Lt. Col Pinto, the famous British spy-catcher. Pinto was responsible for the arrest of several Nazi intelligence officers as he was able to identify them in a crowd of hundreds. The reason, his excellent memory. As a child he could repeat a whole page of the telephone directory just after one reading.

A sound memory is an important personality trait. If you can recall important facts, information, anecdotes and stories at appropriate moments, you can succeed where others have failed. But if names and facts are an elusive matter with you, you remain a person of no consequence.

A sound memory is a God-given gift and not everyone is blessed with it. Can an average memory be improved? If so, how? In search of an answer, I entered a bookshop looking for some good book on the subject. A useful book that I could lay my hands on was Howard L. Philp's *Memory: How To Make The Most Of It*. It is a small booklet on important facts about memory and how it can be improved. Let me share the book with you.

Memory, the faculty by which things are called to or kept in mind, has three parts: learning or memorising, retention

and recall. The three are inter-related because you cannot recall anything that you have not retained, and you cannot retain what you have not learnt. Therefore, if you want to improve your memory, improve your learning, retention and recollection.

Improvement in memory is, in fact, the betterment of your methods of learning. Your first task should be to examine your present methods to find out what they are lacking in. Then only can you decide on the better methods to be adopted. No foolproof method can be suggested because every person has his own way of doing things. However, certain principles can be given which should help you in developing a method that gets results.

The first principle is concerned with our senses. Not all our senses are of the same strength. Some have powerful visual imagery while others have good auditory imagery. If you fall in the former category, make more use of your eyes while learning; in the case of the latter, make better use of your ears. To achieve better results try to use both.

Next, you must learn to concentrate, which means focus all your attention on what you are reading. An hour's concentration is better than several hours' study when your mind is somewhere else. Concentration is largely an affair of the will. You will concentrate better if you watch out for similarities and comparisons and any type of relation that will be of assistance when you wish to recall what you have been studying.

Interest is another fundamental factor to memorising. You can memorise those things easily which interest you. Sometimes important information could not be memorised because you had no interest in it. So, develop interest in those topics which are important to your career.

Research has proved that the 'whole' method is better than the 'part' method. In the former, we read the entire material in one go rather than dividing it into sections. This makes for easy comprehension of the material. The 'whole' method can be applied to general reading. When you pick up a book for reading, make a general survey first. The jacket and preface can give you some idea of the book's contents. Next, skim

through the book, giving special attention to chapter headings, sub-headings and the treatment of the subject. In short, make an outline and then fill in.

The recitation method—reciting what you read—is also considered effective. It enables you to comprehend various points quickly and breaks the monotony of reading.

Some break in learning is also essential. Before you start a new chapter or subject, give yourself an interval. This will prepare your mind to receive new ideas.

The second stage, retention, is a difficult one because most psychologists do not agree that it can be improved. They believe that the retention power is fixed by our native constitutions and the efficiency in retention depends on how thoroughly we learn. Whatever may be their contention, practice or repetitions can improve retention.

Recall, the third stage of memory, can also be improved with practice. An important factor in recall is the keenness and frequency of observing a thing. Review of what we have observed or seen makes recall easy.

For a better recall, avoid emotional conditions like fear. It is sometimes possible to control it by finding an outlet for your nervous tensions. It is particularly important if you are going for an interview. Because of fear you may not be able to recall simple facts.

Distracting thoughts can also act as a mental block. Train your mind so that distracting thoughts do not disturb you.

Lastly, build up a confident attitude. If you suffer from the poor-memory phobia, nothing will help you. If you have confidence that you can improve, much can be achieved. When we are confident, all our energy is concentrated upon the task, but if we are not, our energy is divided.

These are some of the ways by which you can sharpen your memory. But, remember that you cannot memorise everything. Learn what is essential.

R. Thakur

A COMPLETE BOOK

Many of our readers who read R. Gupta's General Studies Book have written appreciation Letters to us. All of them have with one Voice said "It is a Complete Book for civil Services Preliminary Exam. we wish you also join this stream of our wise readers and order your copy of R. FOREIGN WORDS

BY THE AARBES

1. **quod erat demonstrandum** (kwōd ērāt dēmāstrā'ndam) L: which was the thing to be proved (especially in abbreviation QED, in general use).
2. **quo warranto** (kwō wə'rəntō) L: by what warrant; an English writ of right formerly issued on behalf of the crown requiring a person to show by what authority he exercises his office, franchise or liberty.
3. **raison d'être** (rāzawndā'tra) Fr: reason or justification for existence. Asked to state the *raison d'être* of her queer behaviour, she chose to keep mum.
4. **rapprochement** (rəprō'shmahn) Fr: re-establishment or recommencement of harmonious relations, especially between states. After years of conflict, there are now signs of an early *rapprochement* between India and China.
5. **reductio ad absurdum** (riduktio əd əbsə'dam) L: proof of falsity by showing absurd logical consequence; proof of truth by thus proving falsity of alternative(s); carrying of principle to impractical lengths.
6. **répondez s'il vous plaît** (rē'pawndē sil voo plā) (especially in abbreviation RSVP, in general use) Fr: please reply; reply, if you please.
7. **requiescat** (rēkwi'škaht) L: a prayer for the repose of a dead person.
8. **rigor mortis** (ri'gar mawr'das) L: rigidity of muscles after death.
9. **sanctum sanctorum** (sā'ngktam sangktō'ram) L: holy of holies in a Jewish temple; a place of quiet where casual visitors are not welcome.
10. **sang froid** (sā'ng frwah') Fr: composure, imperturbability in danger or under agitating circumstances.
11. **Sartor Resartus** (Sah'tōr rēsah'tas) L: The tailor retailed; a work by Thomas Carlyle in which a fictional German philosopher, Teufelsdröckh (devil's dirt), discusses a philosophy of clothes with much humour and wit.

Note: L—Latin; Fr—French.

PROBLEMS SOCIAL & ECONOMIC

BY SANJUKTA BANERJI
University of Delhi

COMMUNALISM

Between 1947 and 1980, 20,000 communal riots have shaken the roots of democracy in India. In the last two years, 1,200 communal riots took place all over the country: in May last year, seven people died in a clash between Hindus and Muslims in Phulwarisharif in Bihar; in the same year, a dispute over a Shiva temple and a Mazar

Certain social and economic problems figure in almost every second debate or discussion. They might even crop up at your next exam, especially if it's the RBI Officers' Grade Exam. To help you score high, this time we focus on a variety of such national and international problems.

led to the death of 31 persons in Meerut; Baroda, too, saw its quota of violence later in the year, when riots erupted as a result of the controversial transfer of the city's police commissioner. Parts of Kerala, Tamil Nadu and Andhra Pradesh were also affected by communal violence. But the worst-hit areas were Assam and Punjab, the two states where the heat is still on. In Assam, over 3,000 people have already died in communal violence—and that is the official figure.

Why is there so much violence in the name of religion in a state which is avowedly secular? The question becomes even more poignant when one realises that communalism is not a traditional phenomenon. Even as late as 1857, Hindus and Muslims joined hands against the British imperialists in the great revolt of that year. Not only did Hindu and Muslim sepoys fight shoulder to shoulder, but all the leaders of the revolt, both Hindu and Muslim, accepted Bahadur Shah, a Muslim, as the Emperor of India. Communalism saw its birth in the divide-and-rule policy of the British which favoured the separatist ideas that emerged among Muslim leaders like Sir Sayyid Ahmed Khan and Muhammad Ali Jinnah in the late nineteenth and early twentieth centuries. In the post-independence period, communal feelings were kept alive by interested parties in both India and Pakistan and were further fanned by selfish politicians. Communal organisations like the Rashtriya Sevak Sangh, the Jamat-i-Ulema-i-Hind, the Jamat-i-Islamia,

Suraksha Samiti, the Tablighi Jamat, the Majlis-Itehadul-Muslimeen, and to a certain extent, the Bharatiya Janata Party have all helped to keep communalism alive and flourishing in different parts of the country. The electoral policy of the Congress (I), which involves wooing harijans, adivasis and Muslims for votes, has also resulted in communal violence during elections. Other political parties, too, have resorted to wooing a particular community during election time, the recent electoral campaign in Jammu and Kashmir being a case in point. Furthermore, foreign powers are also interested in promoting internal problems in India. Recently, hundreds of harijans were converted to Islam at Meenaksheswarpuram and the chief incentive apparently was Arab money. A kind of Hindu chauvinism has also set in in organisations like the Vishwa Hindu Parishad and the Virat Hindu Samaj trying to reconvert people back to Hinduism.

The solution to the problem is not simple. It not only involves action at the governmental level, but also entails a change of attitude in the rank and file. Unless people believe in mutual tolerance, the problem cannot be solved.

EDUCATION

A second generation of post-independence children are growing up into adulthood—and yet India has the largest number of illiterates in the world. This certainly does not speak well of the education system in post-independence India. The nation's educationists have not been able to formulate a nationwide education policy that would benefit students from the primary level to the university. In fact, the legacy of the British education system is fast disappearing.

The present education system plays a minimal role in shaping a young adult for a place in the socio-economic fabric of the nation. The system of examinations and evaluation is archaic and very often degenerates into scandals. The educational institutions do not generate new ideas and are, therefore, hardly capable of producing leaders who would contribute to the social and

Courtesy USIS

economic development of the nation. In both the Western and Eastern blocs, the education programmes are changing to the requirements of a post-industrial society. In India, universities do not cater to the needs of an industrial society, let alone a post-industrial one. They are still geared to the classical tradition-bound pattern of education and have miserably failed to create far-sighted, futuristic programmes.

Why is our education system so full of problems? The answer lies somewhere in between the students and the academic staff. While it is true that the present-day students have become unruly and try to control the pattern of education or not be taught at all, we should not blame them wholly for the state of affairs today. The teachers, who very often do not take their jobs seriously, are as much to blame as the students. Many teachers joined the profession as a last choice and, therefore, lack a sense of commitment. Furthermore, they lose interest because they do not get job satisfaction. The lack of professional incentive in the field of teaching is well-known. Politics too has upset our system of education. Vice-chancellors and principals are often appointed for political reasons. They are not only academically visionless, but are profiteers in the sense that they want to make the maximum out of their position.

A drastic change is required in the education system if we want to stop the downslide. By change one means a complete overhaul from the highest level to the lowest. Dedicated teachers and new courses, oriented to present-day needs, are among the primary requirements for the betterment of education.

PRISON REFORMS

If prisons were indeed the index of the civilisation of a society, as Dostoyevsky once remarked, contemporary Indian civilisation would be reflected in the worst of lights. Indian jails are too often overcrowded (with over 15 lakh people being put behind bars each year) and have less than adequate basic amenities. A third of the prisons do not have sanitary latrines and drinking

water, while over 70 per cent have no electricity. Few jails have any recreational facilities or ventilation, most of them having been constructed in the last century. Insanity, suicide, sexual abuse, torture and malnutrition are common in Indian jails. In fact, the diary of a modern-day Indian prisoner may read appallingly like the account in *Papillon*.

The issue, however, is being taken up at high governmental levels and it is hoped that the jails would soon be reformed. The Mulla Commission report, which contains about 500 recommendations for dealing with the problem of jail reforms, suggests the setting up of a national prison commission to oversee the modernisation of Indian prisons, and the creation of a prison cell in the Home Ministry. Among direct measures, it has called for improvement in the sub-human conditions of many jails and the provision of facilities like adequate food, beds, canteens, etc. It has given its approval to the concept of open jails in which inmates live in independent houses along with their families within the prison grounds and work for their living. At present, there are only 27 open jails in India, the best examples being the Sangrur open jail in Jaipur, the Maula Mali jail in Andhra Pradesh and the Madurai open prison for women. Justice Mulla has criticised a recent amendment (Sec. 433 A) which excludes lifers from the benefit of premature release on grounds of good conduct, because this could have an adverse effect on the inmate.

The government has provided a large amount of money to various states for improving the conditions of prisons and the establishment of courts. However, the government should also consider innovative schemes like the replacement of imprisonment with a specified period of community service. This particular innovation has been tried out in the US with phenomenal success. It is applicable to prisoners above 18, who have been convicted of offences with imprisonment not exceeding three years. It has the advantage of not only saving minors and first offenders from the dehumanising contact of hardened criminals, but also saves the government a lot of money.

FLOODS & DROUGHTS

India probably has one of the most curious weather conditions in the world. No nation of its size has floods and droughts all at the same time. While one part of the country may be suffering from acute water shortage as a result of monsoon failure, another part may be totally inundated. Last year, 187 districts in seven states were hit by drought, while floods affected 12 states, killing 932 persons and rendering many lakhs homeless. This year, Karnataka, Tamil Nadu, Rajasthan, Maharashtra, West Bengal and Bihar have already suffered periods of severe drought, while Haryana, Jammu and Kashmir, Himachal Pradesh and Orissa have seen heavy unseasonal rains. Besides loss in human lives and the great discomfort caused by acute drinking-water shortage, floods and droughts destroy crop prospects in India. In 1981, the total damage caused by floods and cyclones was Rs 1,132.31 crores. In 1982, the estimated damage was worth Rs 1,150 crores. This year, too, droughts, unseasonal rains and snow have damaged crops all over the country. Paddy crops worth Rs 150 crores in the 'rice bowl' area of Thanjavur in Tamil Nadu withered away as a result of drought. In West Bengal, only 10,000 tonnes of rice were collected till February, as against the target of one lakh tonnes. In a different scenario, over 100 heads of cattle perished and vegetable crops in over 400 hectares were destroyed by a storm in Orissa in February.

The Central and state governments have been trying to cope with the problem by providing financial and material relief to the victims in the affected areas. Drought-affected states have begun a programme of digging bore-wells to provide drinking water. The government has also recently set up a commission to study changing weather conditions. If a new or distinct pattern can be located, changes in the plantation of crops can be instituted accordingly. It is good to remember that although man is ultimately powerless against nature, he can always try.

APARTHEID

Apartheid is Nazism transposed to the African continent," said Alhaji Yussuf Maitama Sule, President of the UN Special Committee against Apartheid. South Africa is the white man's citadel in a sea of black Africans. And the technique used by the white man to maintain his domain is apartheid. The weapons of apartheid are an all-white Parliament in Cape Town, a police state and the ruthless oppression of human rights where the question of *habeas corpus* does not arise. The first principle of apartheid is to look on blacks as outsiders in their own country. In fact, whether they like it or not, blacks are confined to tribal homelands, or Bantustans. The blacks, who comprise 70 per cent of the population, have been arbitrarily allocated to 13 per cent of the territory of South Africa, which includes the poorest areas of land. This has resulted in mass unemployment, poverty and malnutrition. Not being able to find work in Bantustans, blacks have to search for employment in the white zones where they are segregated and treated inhumanly. There are separate beaches, schools, residential areas, etc, for blacks and whites. The socio-economic condition of blacks is deliberately kept at a much lower level than the whites. For instance, the South African Government spent 1,071 rands (\$991) for education per white child in

1980, and only 133 rands (\$123) for education per black child.

A covert movement against apartheid is on in South Africa and this has the support of most nations in the world. The UN, in fact, declared 1982 as the Year of Sanctions against South Africa. Last year, South African Prime Minister P.W. Botha made an offer to set up a tricameral Parliament (at present only the whites have representation), which would have a numerically-dominant white chamber and two lesser ones for the 'coloureds' (people of mixed African and white descent) and people of Indian, Chinese and Malay origin. Africans would, however, be denied the vote. Initially, the coloureds and Indians objected to this offer saying that it was a move to divide the non-whites. But, unfortunately, they have shown signs of breaking ranks with the parent South African Black Alliance in the recent past. Botha declared as late as August 1982 that apartheid would remain a cornerstone of government policy, and the non-whites should do well to remember the threat implied in the statement before cooperating with the racist government.

There are signs, however, that a greater political compromise is on the cards. The growth of trade unionism among the blacks, the increasingly-potent Zulu tribalism, partial rapprochement with at least some of South Africa's northern neighbours—all go to show that the blacks not only exist but are developing *de facto* rights.

tees, regional bodies, professional and educational institutions and in the engine of black economy. This represents political power, irrespective of the franchise. Increased pressure by the world body, in addition to the incipient growth of black power in South Africa, may bring the fortress of apartheid tumbling down.

NORTH-SOUTH DIALOGUE

The widening economic gap between the developed and developing nations has emphasised the necessity for the renewal of the North-South dialogue. So far, the dialogue has been a non-starter, despite summits at Ottawa, Cancun and Versailles. The North has so far found the proposed New International Economic Order (NIEO), in which the Third World has called for a more equitable economic system, unacceptable. As long as the North persists in believing that the NIEO is heavily tilted in favour of the South, a dialogue will not be possible. The Brandt Commission, however, pointed out in February that there is a crisis of contraction all over the world—contraction of production, employment, trade, credit, aid and economic growth—and the recession, if unchecked, would result in the collapse of the international financial system. In view of the crisis, it called for a second North-South Summit.

The first Summit of 22 developed and developing nations, which met at Cancun in October 1981, had ended in a deadlock partly because of American intransigence. At Cancun, US President Ronald Reagan said the dialogue would be fruitless unless the Third World agreed to abide by the imperatives of open economy, which implied, among other things, throwing open the doors of the developing nations for depredation by transnationals. The Third World was cold to Reagan's proposals because economic problems between the North and the South cannot be solved within the framework of a world economy which is inhibited by unequal exchange. The need for restructuring was, however,

later implicitly acknowledged at the Western Economic Summit which met at Versailles in June 1982. Japan, West Germany, Italy, France, Britain, Canada and the US approved the launching of North-South talks, although the intransigent pro-cold war forces fought a hard battle.

Meanwhile, the South had not been sitting idle. Rebuffed by the North, they attempted to solve their problems through South-South cooperation. The groundwork had been laid much earlier at the Colombo Summit of the non-aligned nations in 1976. The programme of action adopted at that conference included restructuring international trade with a view to improving the terms of trade of the developing nations, radical overhauling of the present international monetary system; establishment of a common fund by the developing countries to finance the buffer stock of primary goods, and strict regulations of trans-world corporations in the developing countries. After the Cancun meet, attempts were made to resuscitate the Colombo spirit in the hope that this would generate a countervailing pressure on the North. At the South-South meet, two points of view emerged. President Nyerere represented the radical trend. He insisted on the "provision of basic needs for all our people" and the type of "production and investment which can be sustained by our own resources and our own capacity". This would, he felt, minimise dependence on the North. PM Indira Gandhi, on the other hand, wanted closer unity between the developing nations so that greater concessional aid could be obtained from the Western world and terms of trade could be made more equal. The South-South meet revealed that the task of forging a united front of developing nations against the North was difficult because individual developing countries were situated at different socio-economic levels. At the New Delhi Summit of non-aligned nations in 1983, therefore, the necessity for a renewal of the North-South dialogue was again emphasised. Later, at the South-South conference at Beijing in April, Chinese PM Zhao Ziyang called for global talks for North-South ties and criticised the

industrialised nations, especially the US, for their stubborn attitude towards a North-South dialogue.

The UN Conference on Trade and Development (UNCTAD-VI) which will meet at Belgrade shortly, provides a unique opportunity to revive the North-South dialogue. The South should close ranks and unite, however, if it hopes to pressurise the developed countries to make the concessions it demands.

CHILD LABOUR

Five O'clock and a heavily-crowded street crossing. Hundreds of cars trying to beat the 'red' traffic signal. And in the middle of this medley, a boy, barely 10 years old, rushing in and out of traffic lanes with a bundle of newspapers under his arm, trying to earn enough for his evening meal.

A common enough sight in the urban centres of India. Child labour, however, is not confined to India alone. According to the International Labour Organisation estimates, 75 million children between 8 to 15 work in the labour forces of the developing world and the UN suggests that almost twice that number work all over the world. In Britain, one fourth of all youths between 13 and 16 hold part-time jobs, while in West Germany 3,44,000 violations of child-labour laws were reported recently from Bavaria alone. Sixty per cent of all American youths between 12 and 19 hold at least part-time jobs. But the difference between affluent and developing nations is that in the former, children work for pocket money while in the latter, they work just to be able to eke out a hand-to-mouth existence.

Child labour is a social problem because of the mental and often physical damage that children have to bear. The working conditions that children have to endure are often appalling. They are sometimes exposed to hazardous conditions. In India itself, children who work in match factories, for instance, inhale large doses of sulphur and potassium chlorate. Many children have died in electrical fires and chemical explosions because safety conditions are so often neglected. Children are also exploited by ruthless

entrepreneurs who know that child labour is essentially cheap because the supply is more than the demand and also because children are unaware of their legal rights and do not know how to organise. Minimum-wage laws are, therefore, flouted. In Mexico, children are paid about 50 cents a day, although the legal minimum wage is about \$4.

Children also suffer psychologically when their childhood is snatched away from them and they are catapulted prematurely into adulthood. They learn the art of survival too early in life and this has a bad effect on society. Youths in Africa, Asia and Latin America traffic in babies, drugs and prostitution often at an age when they are too young to understand the wares being hawked. Young Brazilians and Colombians play with knives and automatics at an age when they should be playing with toy trucks and cricket bats.

The driving force behind child labour in the developing nations is economic hardships. Children are often forced or sold into labour by the parents themselves. Instances of children being maimed by parents to serve as better beggars are not unknown. In India, children account for 23 per cent of the total family income and the case is similar in many parts of Africa, Central and South America and South-East Asia. To end child labour abruptly by law would, therefore, cause greater misery to a large number of people. However, attempts are being made to alleviate the problem. Many countries have laws that set the minimum work age between 12 and 16. In India, the Constitution expressly forbids any child under 14 to work in factories or mines or in any other hazardous occupation. Experts have also proposed compulsory education as a means to curb child labour.

The problem is that, due to poverty, the laws are openly flouted. Most relief agencies agree that abolition of child labour is an unrealistic goal. World organisations should, therefore, try to improve the living and work conditions of the children who are so valiantly struggling for survival without even realising that they are doing so. □

If it has anything to do with computers,
IDM has something to do with it.

The Computer People

IDM has often been called the One Stop Computer Shop. Its product line covers a complete range of powerful Computers and high quality Computer supplies. The variety of services offered by it include Consultancy, Software development and a country wide network of Computer Centres.

IDM is always on the lookout for outstanding, creative people — talented individuals who can contribute in the areas of Marketing, Hardware and Software Engineering, Consultancy and Maintenance, to name a few. If you think you would like to make a career with IDM, please get in touch with your nearest IDM Office right away, giving your particulars and area of interest. We look forward to hearing from you.
